Shock Compression of Condensed Matter – 2011

PART ONE

EDITORS

Mark L. Elert
U. S. Naval Academy, Annapolis, Maryland, USA

William T. Buttler
Los Alamos National Laboratory, Los Alamos, New Mexico, USA

John P. Borg
Marquette University, Milwaukee, Wisconsin, USA

Jennifer L. Jordan
Air Force Research Laboratory, Eglin Air Force Base, Florida, USA

Tracy J. Vogler
Sandia National Laboratories, Livermore, California, USA

All papers have been peer reviewed.

AIP I CONFERENCE PROCEEDINGS ■ 1426
# Table of Contents

## PART ONE

**Preface: Shock Compression of Condensed Matter - 2011**  
Mark Elert, William T. Buttler, John P. Borg, Jennifer Jordan, and Tracy Vogler  
1

**Foreword**  
3

**Topical Group on Shock Compression of Condensed Matter**  
2009 - 2010 APS Fellows  
4

**Photograph: Recipient of the APS Shock Compression Science Award, 2011**  
5

**Conferences of the American Physical Society Topical Group on Shock Compression of Condensed Matter**  
7

## PLENARY

**The role of the Gibbs function in solid-solid phase transformations under nonhydrostatic stress conditions**  
James N. Johnson  
11

**Material response to shock/dynamic loading: Windows into kinetic and stress-state effects on defect generation and damage evolution**  
George Thompson Gray III  
19
Metalized heterogeneous detonation and dense reactive particle flow
Fan Zhang 27

Megaamps, megagauss, and megabars: Using the Sandia Z Machine to perform extreme material dynamics experiments
M. D. Knudson 35

BALLISTICS STUDIES

Deceleration of projectiles in sand
Stephan Bless, William Cooper, Keiko Watanabe, and Robert Peden 45

Ballistic penetration of sand with small caliber projectiles
John P. Borg, Andrew Fraser, and Andrew Van Vooren 48

Impact effects of explosively formed projectiles on normal strength concrete
Laurin Bookout and Jason Baird 52

Mechanism of anomalous penetration of shaped charge jet into ceramics
Boris V. Rumyantsev and Vladimir Yu. Klimenko 56

X-ray tomography to measure size of fragments from penetration of high-velocity tungsten rods
Zach Stone, Stephan Bless, John Tolman, Jason McDonald, Scott Levinson, and R. Hanna 60

Numerical study on the high-speed water-entry of hemispherical and ogival projectiles
Zitao Guo, Wei Zhang, Gang Wei, and Peng Ren 64

Incorporation of the Deshpande-Evans mechanism-based damage model into the EPIC code
Timothy J. Holmquist and Gordon R. Johnson 68

Anisotropic effects on constitutive model parameters of aluminum alloys
Nachhatter S. Brar and Vasant S. Joshi 72
Modeling interface defeat and dwell in long rod penetration into ceramic targets
Yehuda Partom 76

A computational study of segmented tungsten rod penetration into a thick steel target plate at high velocities
Michael B. Presnell and A. M. Rajendran 80

Ballistic performance of porous-ceramic, thermal protection systems
Joshua E. Miller, William E. Bohl, Eric C. Christiansen, Bruce A. Davis, and Cory D. Foreman 84

Testing boron carbide under triaxial compression
Charles Anderson, Sidney Chocron, Kathryn A. Dannemann, and Arthur E. Nicholls 88

Experimental analysis of blast mitigation associated with water sheets
Andrew J. Zakrajsek, Eric J. Miklaszewski, Daniel R. Guildenbecher, and Steven F. Son 92

Scaled long rod penetration experiments: Tungsten against rolled homogeneous armour
William Proud and Daniel Cross 96

Burst pressure failure of titanium tanks damaged by secondary plumes from hypervelocity impacts on aluminum shields
Henry Nahra, L. Ghosn, E. Christiansen, B. A. Davis, C. Keddy, K. Rodriguez, J. Miller, and W. Bohl 100

Inferring the high-pressure strength of copper by measurement of longitudinal sound speed in a symmetric impact and release experiment
Stephen Rothman, Rhys Edwards, Tracy Vogler, and M. D. Furnish 104

Ultrafine particle size distribution during high velocity impact of high density metals
Giorgio Buonanno, Luca Stabile, Andrew Ruggiero, Gianluca Iannitti, and Nicola Bonora 108

Scaled long rod perforation experiments using multiple diagnostics: Mild steel against rolled homogeneous armour
Daniel Cross and William Proud 112

The formation and stretching of bi-material shaped charge jets
John Philip Curtis, Frank Thomas Smith, and Alexander White 116
Gel versus aerogel to collect high velocity ejectas from laser shock-loaded metallic targets for postrecovery analyses
   Emilien Lescoute, Thibaut De Rességuier, and Jean-Marc Chevalier 120

Computational work minimization of two-bucket searches for meshless particle neighbors
   Charles Gerlach 124

BIOLOGICAL / NANOMATERIALS

Prospects for studying how high-intensity compression waves cause damage in human blast injuries
   Katherine Brown, Chiara Bo, Spyros Masouros, Arul Ramasamy, Nicolas Newell, Timothy Bonner, Jens Balzer, Adam Hill, Jon Clasper, Anthony Bull, and William Proud 131

The pathogenesis of retinal damage in human eye under impact and blast load
   Luca Esposito, Tommaso Rossi, Nicola Bonora, and Chiara Clemente 135

The dynamic response and shock-recovery of porcine skeletal muscle tissue
   James Michael Wilgeroth, Paul Hazell, and Gareth James Appleby-Thomas 139

Ballistic penetration of Perma-Gel
   Raymond Albert Ryckman, David Arthur Powell, and Adrian Lew 143

On the shock response of pisum sativum and lepidium sativum
   James Allen Leighs, Paul Hazell, and Gareth James Appleby-Thomas 149

Cellular characterization of compression-induced damage in live biological samples
   Chiara Bo, Jens Balzer, Mark Hahnel, Sara M Rankin, Katherine A Brown, and William Proud 153

Sporicidal effects of iodine-oxide thermite reaction products
   Rod Russell, Stephan Bless, Alexandra Blinkova, and Tiffany Chen 157
# COMPOSITES AND POLYMERS

**Temperature dependent equation of state for HMX-based composites**  
Melvin Baer, S. Root, R. L. Gustavsen, T. Pierce, S. DeFisher, and B. Travers  
163

**High strain rate behavior of polyurea compositions**  
Vasant S. Joshi and Christopher Milby  
167

**Challenges in the hydrocode modelling of hopkinson bar tests on polymeric specimens**  
Rory Cornish, P. Church, I. Lewtas, P. Gould, and R. Pereira  
171

**Mesoscale simulations of particle reinforced epoxy-based composites**  
Bradley W. White, Harry Keo Springer, Jennifer Jordan, Jonathan E. Spowart, and Naresh Thadhani  
175

**Composite layering technique for use in a eulerian shock physics code**  
Shane Schumacher  
179

**The shock response of a tape wrapped carbon fiber composite**  
David Christopher Wood, Paul Hazell, Gareth James Appleby-Thomas, and Nicholas Barnes  
183

**Functionally graded shells subjected to underwater shock**  
Shi Wei Gong and Khin Yong Lam  
187

**High strain rate mechanical properties of glassy polymers**  
Jennifer Jordan, Clive Richard Siviour, and Brian Woodworth  
191

# DETONATIONS & SHOCK-INDUCED CHEMISTRY

**Cylindrical converging shock initiation of reactive materials**  
Charles M. Jenkins, Yasuyuki Horie, Christopher Michael Lindsay, George C Butler, David Lambert, and Eric Welle  
197

**Shock compression of formic acid**  
Virginia W. Manner, S.A. Sheffield, Dana M. Dattelbaum, and David B Stahl  
201

Effect of shockwave curvature on run distance observed with a modified wedge test
   Richard Lee, Robert J. Dorgan, Gerrit Sutherland, Ashley Benedetta, and Christopher Milby 251

Computational study of 3-D hot-spot initiation in shocked insensitive high-explosive

A simple model for the dependence on local detonation speed of the product entropy
   David C Hetherington and Nicholas J Whitworth 259

Detonation theory for condensed phase explosives with anisotropic properties
   D. Scott Stewart, Laurence E Fried, and Matthew Szuck 263

Non ideal detonation of emulsion explosives mixed with metal particles
   Ricardo Mendes, José B. Ribeiro, I. Plaksin, and Jose Campos 267

Fast reactions of aluminum and explosive decomposition products in a post-detonation environment
   Bryce C. Tappan, Virginia W. Manner, Joseph M. Lloyd, and Steven J. Pemberton 271

Air blast characteristics of laminated al and NI-AL casings
   Fan Zhang, Robert Ripley, and William Wilson 275

Shock initiation of powder mixtures of aluminum with dense metal oxides
   Francois-Xavier Jette, Sam Goroshin, David Frost, and Fan Zhang 279

Critical hotspots and flame propagation in HMX-based explosives
   Caroline Angela Handley 283

A computational exploration of the differences between prompt and bow shock initiation of explosives by shaped charge jets
   Christopher Mellor, Hugh R James, and Michael J Goff 287

The effect of failure diameter on the initiation of explosives by shaped charge jets
   Hugh R James, Christopher Mellor, and Michael J Goff 291

</table>
Dynamics of the detonation products of a TATB based high explosive: Photon doppler velocimetry and high-speed digital shadowgraphy of expanding species
   Arnaud Sollier, Viviane Bouyer, Louis-Pierre Terzulli, Michel Doucet, Philippe Hebert, and Lionel Decaris 339

Size effect and cylinder test on several commercial explosives
   P. Clark Souers, Lisa Lauderbach, Kou Moua, and Raul Garza 343

Determination of the velocity-curvature relationship for unknown front shapes
   Scott I Jackson and Mark Short 347

Modeling kinetics for the reaction of aluminum and teflon and the simulation of its energetic flow motion
   Sunhee Yoo, D. Scott Stewart, Sungjin Choi, and David Lambert 351

EXPERIMENTAL DEVELOPMENTS—DIAGNOSTICS

Analysis of cylindrical ramp compression experiment with radiography based surface fitting method
   Matthew R. Martin, R. W. Lemke, Ryan D. McBride, Jean-Paul Davis, and M. D. Knudson 357

Shot H3837: Darht’s first dual-axis explosive experiment
   James F. Harsh, Lawrence Hull, Jacob Mendez, and Wendy Vogan McNeil 361

Two-dimensional imaging velocity interferometry: Technique and data analysis
   David Erskine, Ray F Smith, Cindy Bolme, P. M. Celliers, and G. W. Collins 364

An application of the emissive layer technique to temperature measurement by infrared optical pyrometer
   Camille Chauvin, Jacques Petit, and Frederic Sinatti 368

Fourier transform and reflective imaging pyrometry
   Gerald Stevens 372
Neutron resonance spectrometry for temperature measurement during dynamic loading
   Damian Swift, Vincent Yuan, Richard Kraus, James M. McNaney,
   Drew Higginson, Andrew MacKinnon, Farhat Beg, Kate Lancaster,
   and Hiroyuki Nakamura
   376

A thin-film hugoniot measurement using a laser-driven flyer plate
   Hiroki Fujiwara, Kathryn Brown, and Dana Dlott
   382

Use of a fast near-infrared spectrometer for absorption and emission measurements within the expanding blast wave of a high explosive
   Jon D Koch, Joel Carney, James Lightstone, and Scott Piecuch
   386

Shockwave and detonation studies at ITEP-TWAC proton radiography facility
   Sergey Kolesnikov, Sergey Dudin, Vladimir Lavrov, Dmitriy Nikolaev,
   Victor Mintsev, Nikolay Shilkin, Vladimir Ternovoi, Alexander Utkin,
   Vladislav Yakushev, Denis Yuriev, Vladimir Fortov, Alexander Golubev,
   Alexey Kantsyrev, Lev Shestov, Gennady Smirnov, Vladimir Turtikov,
   Boris Sharkov, Vasily Burtsev, Nikolay Zavialov, Sergey Kartanov,
   Anatoly Mikhailov, Alexey Rudnev, Mikhail Tatsenko, and
   Mikhail Zhemokletov
   390

Velocity spectra from explosively driven powders and balls
   Matthew Briggs, James Faulkner, Lawrence Hull, and Michael Shinas
   394

Embedded optical fibers for PDV measurements in shock-loaded, light and heavy water
   Patrick Mercier, Jacky Benier, Pierre Antoine Frugier,
   Michel Debruyne, and Cyril Bolis
   398

Simultaneous photonic doppler velocimetry and ultra-high speed imaging techniques to characterize the pressure output of detonators
   Michael Murphy and Steven A. Clarke
   402

A novel use of PDV for an integrated small scale test platform
   Carl P Trujillo, Daniel T Martinez, Michael W. Burkett, Juan P.
   Escobedo, Ellen Cerreta, and George Thompson Gray III
   406

Determining the source of oxygen in post-detonation combustion of aluminum
   Jeremy E. Monat, Joel Carney, James Lightstone, and
   Nobumichi Shimizu
   410
Influence of the donor charge initiation on the fragments cloud of a metal plate pushed by high explosives
Alexandre Lefrancois, Jacques Petit, Sebastien Dumant, Frederic Sinatti, and Patrick Rey 414

Response of HMX-based HE to low-velocity loading by steel cylindrical impactor
Victor Pushkov, Anatoly Abakumov, Alexey Yurlov, Alexey Kal'manov, Alexander Sedov, and Alexey Rodionov 418

Recovering a short timescale signal from a pair of long-delay visars
David Erskine 422

Experimental technique for direct observation of onset of reaction in shocked powder mixtures
Francois-Xavier Jetté, Sam Goroshin, Andrew Higgins, David Frost, and Julian Lee 426

On the development of an impact-loaded wedge test using ORVIS
Marcia A Cooper and Wayne M. Trott 430

Free-field microwave interferometry for detonation front tracking and run-to-detonation measurements
Philip Rae, Brian Glover, Jake Gunderson, and Lee Perry 434

Increasing data from high rate characterization experiments using optical reconstruction
Clive Richard Siviour, Matthew R Arthington, Euan Wielewski, and Nik Petrinic 438

Index of refraction measurements and window corrections for PMMA under shock compression
David James Chapman, Daniel E Eakins, David Martin Williamson, and William Proud 442

Effect of work hardening on dynamic friction
Ron Winter, S.M. Stirk, and Mark Alistair Collinson 446

The miniaturization and reproducibility of the cylinder expansion test
Chad Rumchik, Rachel Nep, George C Butler, Bradley Breaux, and Christopher Lindsay 450
On the importance of encapsulation environment for lateral gauges
Jonathan David Painter, Gareth James Appleby-Thomas, Paul Hazell, Ron Winter, Ernest Joseph Harris, Gareth D. Owen, and David Christopher Wood 454

Experimental and computational investigation of lateral gauge response in polycarbonate
Jim Eliot, Ernest Joseph Harris, Paul Hazell, Gareth James Appleby-Thomas, Ron Winter, and David Christopher Wood 458

The effect of gauge misalignment on the measurement of lateral stress
Gareth James Appleby-Thomas, Paul Hazell, and Andrew Roberts 462

Underwater laser plasma with reactive fuels
Joel Carney and Scott Piecuch 466

EXPERIMENTAL DEVELOPMENTS - LOADING TECHNIQUES

Determination of pressure and density of shocklessly compressed beryllium from x-ray radiography of a magnetically driven cylindrical liner implosion

Gigabar material properties experiments on nif and omega
Damian Swift, James Hawreliak, David Braun, Andrea Kritcher, Siegfried Glenzer, G. W. Collins, Stephen Rothman, David Chapman, and Steven Rose 477

A simple machine for isentropic compression experiments (ICE)
Douglas G Tasker, Charles H Mielke, George Rodriguez, and Dwight G Rickel 481

High pressure hugoniot measurements using mach waves
Justin Brown and Guruswami Ravichandran 485

Implosion-driven technique to create fast shockwaves in high-density gas
Matthew Serge, Jason Loiseau, Justin Huneault, Daniel Szirti, Andrew Higgins, and Vincent Tanguay 489
Phase velocity enhancement of linear explosive shock tubes
   Jason Loiseau, Justin Huneault, Matthew Serge, Andrew Higgins, and Vincent Tanguay 493

The reverse edge-on impact test: A small scale experiment for non-shock ignition studies
   Didier Picart, D. Damiani, and M. Doucet 497

Versatile gas gun target assembly for studying blast wave mitigation in materials
   S. Bartyczak and W. Mock Jr. 501

ENERGETIC MATERIALS

Chemistry resolved kinetic flow modeling of TATB based explosives
   Peter Vitello, Laurence E Fried, Howard William, George Levesque, and P. Clark Souers 507

Predicting Run Distances for a Modified Wedge Test
   Robert J. Dorgan, Richard Lee, and Gerrit Sutherland 511

Reactive flow calibration for diaminoazoxyfurazan (DAAF) and comparison with experiment
   Carl Johnson, Elizabeth Green Francois, and John Morris 515

A comparison between entropy, temperature and pressure-dependent reactive-burn models
   Caroline Angela Handley and Hugh R James 519

Simulation of the detonation process of an ammonium nitrate based emulsion explosive using the lee-tarver reactive flow model
   José B. Ribeiro, Cristóvão Silva, Ricardo Mendes, I. Plaksin, and Jose Campos 525

Modeling compressive reaction and estimating model uncertainty in shock loaded porous samples of hexanitrostilbene (HNS)
   Aaron L. Brundage and Jared C Gump 529
Dynamic behavior of particulate/porous energetic materials

Microstructural effects on ignition sensitivity in Ni/Al systems subjected to high strain rate impacts
Robert V Reeves, Alexander S Mukasyan, and Steven Son 539

Enhanced reactivity of mechanically-activated nano-scale gasless reactive materials consolidated via the cold-spray technique
Antoine Bacciochini, Matei I. Radulescu, Yannick Charron-Tousignant, Jason Van Dyke, Bertrand Jodoin, Michel Nganbe, Mohammed Yandouzi, and Julian Lee 543

The effect of gaseous additives on dynamic pressure output and ignition sensitivity of nanothermites
Zac Doorenbos, Ian Walters, Paul Redner, Deepak Kapoor, Wendy Balas-Hummers, Jacek Swiatkiewicz, and Jan Puszynski 547

Improving the model fidelity for the mechanical response in a thermal cookoff of HMX
Albert Nichols 551

A comparison of deflagration rates at elevated pressures and temperatures with thermal explosion results
Elizabeth A. Glascoe, Harry Keo Springer, Joseph Tringe, and Jon L. Maienschein 555

Study of thermal sensitivity and thermal explosion violence of energetic materials in the LLNL ODTX system
Peter C. Hsu, Gary Hust, Chadd M. May, W. Michael Howard, Steven Chidester, Harry Keo Springer, and Jon L. Maienschein 559

Developments in a small scale test of violence
Susan Sorber, Chris Stennett, and Matt Goldsmith 563

γ Phase RDX: Initial study of geometry, spectrum and EOS

Calculation of the vibrational spectra of α-RDX using the grimme DFT potential
Warren Perger, William J Slough, Loredana Valenzano, and K. M. Flurchick 571
Equations of state of hexanitrostilbene (HNS)
Jared C Gump, Chad Stoltz, Brian P Mason, and Emily M Heim 575

Gas gun experiments to measure the shock compression behavior of high performance propellant (HPP)
Nathaniel Sanchez, Rick Gustavsen, L. L. Gibson, and Dan Hooks 579

Front curvature and rate stick data on formulations containing DAAF, TATB, RDX and HMX including diameter and temperature effects
Elizabeth Green Francois, V. Eric Sanders, and John Morris 583

Detonation failure characterization of non-ideal explosives
Robert S Janesheski, Lori J Groven, and Steven Son 587

The relation between reaction rate and shock strength—A possible second order improvement to the crest reactive burn model
Brian D Lambourn and Hugh R James 591

Anfo Response To Low-Stress Planar Impacts
Marcia A Cooper, Wayne M. Trott, Robert G Schmitt, Mark Short, and Scott I Jackson 595

Laser-accelerated flyer system for investigating reactions in Ni-Al mixtures
Sean C. Kelly, Sara Barron, Naresh Thadhani, and Timethy P. Weihs 599

Simulation of the reflected blast wave from a C-4 charge
W. Michael Howard, Allen L Kuhl, and Joseph Tringe 603

Preparation and characterization of functionalized aluminum nanoparticles
Jillian M Horn, James Lightstone, Joel Carney, and Jason Jouet 607

Development of metal cluster-based energetic materials at NSWC-IHD
James Lightstone, Chad Stoltz, Rebecca M Wilson, Jillian M Horn, Joe Hooper, Dennis Mayo, Bryan Eichhorn, Kit H. Bowen, and Michael G. White 611

Shock initiation of hexanitrostilbene at ultra-high shock pressures and critical energy determination
Mike Bowden, Matthew Peter Maisey, and Sarah Knowles 615
Gap Test Calibrations And Their Scaling
Harold Sandusky 619

Low velocity impact experiments on the explosive LX-10 with modeling of reaction violence
Steven Chidester, Frank Garcia, Kevin S. Vandersall, Craig M. Tarver, and Louis Ferranti 623

Shock-induced chemical reactions in simple organic molecules
Dana M. Dattelbaum and S.A. Sheffield 627

Characterization of detonation products of RSI-007 explosive
Timothy Ager, Christopher Neel, Bradley Breaux, Christopher Vineski, Eric Welle, David Lambert, and Lalit Chhabildas 633

Detailed characterization of PBX morphology for mesoscale simulations
Scott Gary Bardenhagen, Huiyang Luo, Ronald W. Armstrong, and Hongbing Lu 637

Sonocrystallization as a tool for controlling crystalline explosive morphology and inclusion content
Chad Stoltz, Brian P Mason, Colin Roberts, Steven Hira, and Geoffrey Strouse 641

Study of energy partitioning using a set of related explosive formulations
Mark Lieber, Joseph C Foster, and D. Scott Stewart 645

Analysis of the requirements on modern energetics and their impact on materials design
Joseph C. Foster Jr., Nick Glumac, and D. Scott Stewart 649

Strain-rate master curves for a PBX and binder
Daniel Drodge, David Martin Williamson, Stewart Palmer, and William Proud 653

Time-temperature superposition applied to PBX mechanical properties
Darla Thompson, Racci DeLuca, and Walter J. Wright 657

Taylor impact tests and simulations of plastic bonded explosives
Brad E. Clements, Darla Thompson, D. J. Luscher, Racci DeLuca, and Geoffrey Brown 661
Study on dynamic fracture and mechanical properties of a PBX simulant by using dic and SHPB method
Zhongbin Zhou, Pengwan Chen, and Fenglei Huang

Modeling violent reaction following low speed impact on confined explosives
John Philip Curtis, Andrew Jones, Christopher Hughes, and John Reaug

The use of the ITrAC test to characterise main charge materials
Mark Wright, Matthew Peter Maisey, and Andrew Stoodley

Critical detonation thickness in vapor-deposited pentaerythritol tetranitrate (PETN) films
Alexander S. Tappan, Robert Knepper, Ryan R. Wixom, Michael P. Marquez, J. Patrick Ball, and Jill C. Miller

Small-scale dynamic gap test
Malcolm David Cook

Visualisation of the three-dimensional structure of energetic polymer composite materials
Antonia E. Carmichael, David Martin Williamson, Rebecca Govier, and Claire Leppard

Promising HE for explosive welding of thin metallic foils
Leonid Andreevskikh, Oleg Drennov, A. A. Deribas, A. L. Mikhaylov, N. N. Titova, and Marvin A. Zocher

Development of the floret test for screening the initiability of explosive materials
Mark Wright

Analysis of the mini-deflagration cylinder test: Inference of internal conditions from wall motion
Larry Glenn Hill, Dan Hooks, and Timothy Pierce

Violent cookoff reactions in HMX-based explosives in DDT tubes:
Tracking luminous waves with streak imaging
Gary Parker, Peter Dickson, Blaine W. Asay, Laura Smilowitz, Bryan Henson, and John McAfee
Mesoscale modeling of deflagration-induced deconsolidation in polymer-bonded explosives
Harry Keo Springer, Elizabeth A. Glascoe, John E. Reaugh, James Kercher, and Jon L. Maienschein 705

Cookoff of non-traditional detonators
Jonathan Zucker, Bryce C. Tappan, Virginia W. Manner, and Alan Novak 709

Small-scale explosives sensitivity safety testing: A departure from Bruceton
Daniel Preston, Geoffrey Brown, Cary B. Skidmore, Bettina L. Reardon, and David A. Parkinson 713

Modeling of a random network of extended CO solids
I. G. Batyrev, W. D. Mattson, and Betsy M. Rice 717

A mitigation scheme for underwater blast: Experiments and modeling
Lee G. Glascoe, Jon Margraf, Larry McMichael, and Kevin S. Vandersall 721

On the thermal expansion hysteresis of a UK PBX
David Williamson, Stewart Palmer, Claire Leppard, and Rebecca Govier 725

Modeling shear instability and fracture in dynamically deformed Al/W granular composites
Karl Olney, David Benson, and Vitali F. Nesterenko 729

Mesoscale studies of mixing in reactive materials during shock loading
Ilya Lomov, Eric B Herbold, and Ryan A. Austin 733

Processing and dynamic testing of Al/W granular composites
Po-Hsun Chiu, Chien-Wei Lee, and Vitali F. Nesterenko 737

Fluoropolymer and aluminum piezoelectric reactives
Robert S Janesheski, Lori J Groven, and Steven Son 741

Ratchet growth experiments on TATB and PBX 9502
Racci DeLuca, Darla Thompson, Geoffrey Brown, Mary Sandstrom, Stephanie I. Hagelberg, Anna M. Giambra, and Larry Glenn Hill 745
EQUATION OF STATE

Extension of jaguar procedures for new gaseous species
Leonard Stiel, Ernest L. Baker, and Daniel Murphy 751

Shock compression and unloading response of 1050 aluminum to 70 GPA
Deep Choudhuri and Yogendra M. Gupta 755

Solid and liquid equation of state for initially porous aluminum where specific heat and $\gamma/v$ are constant
Jerry W. Forbes, E. R. Lemar, and Mary Brown 759

Global equation of state for copper
Jeffrey H. Peterson, Kevin G. Honnell, Carl Greeff, James D. Johnson, Jonathan Boettger, and Scott Crockett 763

An equation of state for polymethylpentene (TPX) including multi-shock response
Tariq D. Aslam, Rick Gustavsen, Nathaniel Sanchez, and Brian D. Bartram 767

A review of reshock data for PMMA above the phase transition and the implied Grüneisen coefficient
Christopher Neel, Lalit Chhabildas, and William Reinhart 771

Shock/reload response of water and aqueous solutions of ammonium nitrate
Mike J Morley and David Martin Williamson 775

A relatively simple analytical equation of state for liquid metals
John Richard Maw 779

Resolving the shock profile in a viscous fluids
Kenneth Bernard Jordan and John P. Borg 783

The equation of state of dense xenon plasma under double-shock compression to 172 GPA
Jun Zheng, Yunjun Gu, Qifeng Chen, and Zhiyun Chen 787

Shock compression of precompressed deuterium
Michael Armstrong, Jonathan Crowhurst, Alexander Goncharov, Joseph Zaug, Sorin Bastea, and Burkhard Militzer 791
Complex behavior of noble gases under compression
B.A. Nadykto 795

Equation of state for solids
Dennis Grady 800

A novel equation of state for hydrocode
Michael Greenfield 804

Adaptive tabulation for verified equations of state
John H. Carpenter 808

Tabular equation of state for gold
Jonathan Boettger, Kevin G. Honnell, Jeffrey H. Peterson, Carl Greeff, and Scott Crockett 812

Interferometric windows characterization up to 450 K for shock wave experiments: Hugoniot curves and refractive index
E. Fraizier, Patrice Antoine, Jean Louis Godefroit, Gael Lanier, and Gilles A. Roy 816

Equation of state for a mixture of unreacted HE and HE detonation products
B. A. Nadykto 820

Experimental determination of Grüneisen gamma for polyether ether ketone (PEEK) using the shock-reverberation technique
Andrew Roberts, Gareth James Appleby-Thomas, and Paul Hazell 824

Hugoniot and properties of diesel fuel used in ANFO
David L. Robbins, S. A. Sheffield, Dana M. Dattelbaum, and David B. Stahl 828

The single phase and two-phase equations of state for aluminum
Haifeng Liu, Haifeng Song, and Gongmu Zhang 832

First-principle simulation of shock-wave experiments for aluminum
Dmitry V. Minakov, Pavel R. Levashov, and Konstantin V. Khishchenko 836

Compression waves and phase plots: Simulations
Daniel Orlikowski and Roger Minich 840
PART TWO

GEOPHYSICS & PLANETARY SCIENCE

Flyer acceleration by high-power laser and impact experiments at velocities higher than 10 km/s

Direct measurement of chemical composition of SO\textsubscript{x} in impact vapor using a laser gun

Time-resolved spectroscopic observations of shock-induced silicate ionization

A linear TOF mass spectrometer as a tool for the investigation of impact ionisation plasma
  Anna Mocker, Klaus Hornung, Zoltán Sternovsky, Sascha Kempf, Theresa Johnson, Eberhard Grün, and Ralf Srama 859

Possible magnetic fields of super earths generated by convecting, conducting oxides
  W. J. Nellis 863

Structure and thermal properties of porous geological materials
  Simon Stewart Kirk and David Martin Williamson 867

High-velocity impacts in porous solar system materials
  Katarina Miljković, Gareth S. Collins, David James Chapman, Manish R. Patel, and William Proud 871

Physics of intact capture of cometary coma dust samples
  William Anderson and Thomas Ahrens 875
Soft x-ray shock loading and momentum coupling in meteorite and planetary materials
   J. L. Remo, M. D. Furnish, and R. J. Lawrence 879

Analytic models for pulsed x-ray impulse coupling
   R. J. Lawrence, M. D. Furnish, and John L. Remo 883

Shock compression of preheated silicate liquids: Apparent universality of increasing Grüneisen parameter upon compression
   Paul D. Asimow 887

Observation of mass and velocity of projectile fragments produced by hypervelocity impact with lightweight ceramic targets
   Fumikazu Saito, Nobuaki Kawai, and Hideki Tamura 891

A semi-analytical on-Hugoniot EOS of condensed matter using a linear $U_p-U_S$ relation
   S. Sugita, Kosuke Kurosawa, and T. Kadono 895

Demonstration of survivable space penetrator
   Philip Church, William Huntington-Thresher, Alan Bruce, Nick Penny, Alan Smith, and Rob Gowan 899

HIGH ENERGY DENSITY PHYSICS/WARM DENSE MATTER

Atomistic simulation of laser ablation of gold: The effect of electronic pressure
   Vladimir Stegailov, Sergey Starikov, and Genri Norman 905

Ultrashort elastic and plastic shockwaves in aluminum
   Nail Inogamov, Viktor Khokhlov, Yuri Petrov, Sergey Anisimov, Vasily V. Zhakhovsky, Brian J. Demaske, Ivan I. Oleynik, Sergey I. Ashtikov, Konstantin V. Khishchenko, Mikhail Agranat, Vladimir Fortov, and Carter T White 909

Mesoscale simulation of shocked poly-(4-methyl-1-pentene) (PMP) foams
   Thomas A. Haill, Thomas R. Mattsson, Seth Root, Diana G. Schroen, and Dawn G. Flicker 913

Equation of state of shock compressed gases at megabar pressure range
   V.K. Gryaznov, Igor L Iosilevskiy, and Vladimir Fortov 917
Double shock experiments on the sandia z machine
Heath Hanshaw, Matthew R. Martin, Michael Desjarlais, and R. W. Lemke 921

Temperature measurements and hydrogen transformation under dynamic compression up to 150 GPa.
Dmitry Nikolaev, Vladimir Ternovoi, Alexey Pyalling, Sergey Kvitov, and Vladimir Fortov 925

INELASTIC DEFORMATION, FRACTURE, & SPALL

Plastic behavior of polycrystalline tantalum in the $5 \times 10^7/s$ regime
Benjamin Hammel, Damian Swift, Bassem El-Dasher, Mukul Kumar, G. W. Collins, and Jeffrey Florando 931

The resistance to deformation and fracture of magnesium ma2-1 under shock-wave loading at 293 k and 823 k of the temperature
Gennady Garkushin, Gennady I. Kanel, and Sergey V. Razorenov 935

Rate and temperature effects on the flow stress and tensile strength of metals
Gennady I. Kanel 939

2D- and 3D-explosive experiments for verification of spall and shear strength models for some steels
Evgeny Alexander Kozlov 945

Fragmentation behaviour of age-hardened copperberyllium alloy
CU-2WT%BE cylinders
S.M. Stirk and Ron Winter 949

Spall strength of sapphire
Andrey S. Savinykh, Gennady I. Kanel, and Sergey V. Razorenov 953

Shock response of soda lime glass at 6 GPa
Dattatraya Dandekar 957

Computational comparisons of statistical descriptions of a tungsten alloy subjected to explosive loading
Michael Hopson and David Lambert 961
Mechanical behavior of nanostructured and ultrafine-grained materials under shock wave loadings—Experimental data and results of computer simulation
Vladimir Skripnyak 965

Stress relaxation in silver between 300 and 1233 k
Eugene Zaretsky and Gennady I. Kanel 971

Probing dynamic material strength using in situ x-ray diffraction
James Hawreliak, Bassem El-dasher, Jon Eggert, J.R. Rygg, G. W. Collins, Hector Lorenzana, Giles Kimminau, Andrew Higginbotham, Bob Nagler, Sam Vinko, William Murphy, Thomas Whitcher, Stephen Rothman, Nigel Park, and Justin Wark 975

Dynamic characterization of eglin steel by symmetric impact experimentation
Bradley E Martin, Philip J Flater, Rachel Abrahams, Christopher Neel, William Reinhart, and Lalit Chhabildas 979

On the shock response of the magnesium alloy elektron 675
Paul Hazell, Gareth James Appleby-Thomas, Euan Wielewski, Clive Richard Siviour, and Chris Stennett 983

Study of dislocation walls evolution during spall in pure aluminum
Benny Glam, Daniel Moreno, Shalom Eliezer, and Dan Eliezer 987

The spall strength and Hugoniot elastic limit of tantalum with various grain size
Sergey V. Razorenov, Gennady Garkushin, Gennady I. Kanel, and Olga Nikolaevna Ignatova 991

Quantification of ejecta from shock loaded metal surfaces
Brendan A. Kullback, Guillermo Terrones, Mark D. Carrara, and Muhammad R. Hajj 995

The study of high-speed surface dynamics using a pulsed proton beam
William T. Buttlar, David M. Oro, Dean Preston, Karnig O Mikaelian, Frank J. Cherne, Robert S. Hixson, Fesseha G. Mariam, Christopher L. Morris, Joseph B. Stone, Guillermo Terrones, and Dale Tupa 999

Experimental study of ejecta on lead surface at different loading rates and amplitudes
Yongtao Chen, Haibo Hu, Qingzhong Li, Rongbo Wang, and Tiegang Tang 1003

Fracture of nanoceramics with porous structure at shock wave loadings
Vladimir Skripnyak, Vladimir Skripnyak, and Vladimir Skripnyak 1157

FIRST-PRINCIPLES & MOLECULAR DYNAMICS CALCS.

MD simulations of laser-induced ultrashort shock waves in nickel
Brian J. Demaske, Vasily V. Zhakhovsky, Nail Inogamov, Carter T. White, and Ivan I. Oleynik 1163

Investigation of laser shock induced ductile damage at ultra-high strain rate by using large scale MD simulations
Jean-Paul Cuq-Lelandais, Michel Boustie, Laurent Soulard, Laurent Berthe, Joelle Bontaz-Carion, and Thibaut de Resseguier 1167

Shock-induced phase transition in diamond
You Lin, Romain Perriot, Vasily V. Zhakhovsky, Xiang Gu, Carter T White, and Ivan I. Oleynik 1171
Shock compression of diamond: Molecular dynamics simulations using different interatomic potentials
Romain Perriot, You Lin, Vasily V. Zhakhovsky, Nicolas Pineau, Jan H. Los, Jean-Bernard Maillet, Laurent Soulard, Carter T White, and Ivan I. Oleynik 1175

The effect of a simulated volumetric expansion: Calculated vibrational properties and elastic constants of pentaerythritol

Effect of impurities on optical properties of pentaerythritol tetranitrate
Roman Tsyshhevskiy, Onise Sharia, and Maija M. Kuklja 1183

Effect of vacancy defects on the terahertz spectrum of crystalline pentaerythritol tetranitrate
Andrey Pereverzev and Thomas D. Sewell 1187

Accurate prediction of second-order elastic constants from first principles: PETN and TATB
Loredana Valenzano, William J. Slough, and Warren Perger 1191

Equations of state of mixtures: Density functional theory (DFT) simulations and experiments on Sandia’s z machine
Rudolph Magyar 1195

First-principles thermodynamics of energetic materials
Aaron C. Landerville, Michael W. Conroy, You Lin, Mikalai M. Budzevich, Carter T. White, and Ivan I. Oleynik 1199

Theoretical phase diagram of beryllium at low pressure and high temperature
Gregory Robert, Philippe Legrand, and Stephane Bernard 1203

Cavitation and formation of foam-like structures inside exploding wires
Vasily V. Zhakhovsky, Sergei A. Pikuz, Svetlana I. Tkachenko, Pavel V. Sasorov, Tatiana A. Shelkovenko, Patrick F. Knapp, Charles C. Saylor, and David A. Hammer 1207

A new nickel EAM potential for atomistic simulations of ablation, spallation, and shockwave phenomena
Brian J. Demaske, Vasily V. Zhakhovsky, Carter T. White, and Ivan I. Oleynik 1211
Burnett-Cattaneo continuum theory for shock waves
Brad Lee Holian, Michel Mareshal, and R. Ravelo

The terahertz infrared spectrum of cyclotrimethylenetrinitramine: Targeting anharmonic modes for the fingerprinting and detection of RDX
William J Slough, Loredana Valenzano, and Warren Perger

Comparative analysis of decomposition reactions in gaseous and crystalline β-HMX
Onise Sharia and Maija M. Kuklja

Single two-zone elastic-plastic shock waves in solids
Vasily V. Zhakhovsky, Mikalai M. Budzevich, Nail Inogamov, Carter T. White, and Ivan I. Oleynik

Finite size effects at high speed frictional interfaces
J.E. Hammerberg, R. Ravelo, Timothy C. Germann, and B. L. Holian

Particle based multiscale modeling of the dynamic response of RDX
Joshua D. Moore, Sergei Izvekov, Martin Lisal, and John K Brennan

Multiscale modeling of energetic materials: Easy to say, harder to do
Betsy M Rice

A new method for large scale molecular dynamics simulations of shock-induced ejecta production
Olivier Durand and Laurent Soulard

Nonequilibrium molecular dynamics simulations of shock wave propagation in nanolayered Cu/Nb nanocomposites
Ruifeng Zhang, Jian Wang, XiangYang Liu, Irene J. Beyerlein, and Timothy C. Germann

Growth and collapse of nanovoids in tantalum monocrystals loaded at high strain rate
Yizhe Tang, Eduardo M. Bringa, B. Remington, and Marc Meyers

Shock compression and spallation of single crystal tantalum
Q. An, R. Ravelo, T. C. Germann, W. Z. Han, S. N. Luo, D. L. Tonks, and W. A. Goddard, III
Large-scale molecular dynamics simulations of shock induced plasticity in tantalum single crystals
   R. Ravelo, Qi An, Timothy C. Germann, and B. L. Holian 1263

Shock-induced phase transitions in metals: Recrystallization of supercooled melt and melting of overheated solids
   Mikalai M. Budzevich, Vasily V. Zhakhovsky, Carter T. White, and Ivan I. Oleynik 1267

Density functional theory (DFT) simulations of polyethylene: Principal Hugoniot, specific heats, compression and release isentropes
   Kyle R. Cochrane, Michael Desjarlais, and Thomas R. Mattsson 1271

Mechanisms of condensed-phase dissociation of nitramines: A density-functional study
   Igor V. Schweigert 1275

Effect of reactive chemistry on mechanisms of condensed phase detonation
   Mikalai M. Budzevich, Vasily V. Zhakhovsky, Carter T White, and Ivan I. Oleynik 1279

Molecular dynamics simulations of detonation on the roadrunner supercomputer
   Susan Mniszewski, Marc Cawkwell, and Timothy C. Germann 1283

Nonequilibrium molecular dynamics simulations of aluminum oxynitride
   N. Scott Weingarten, Iskander G Batyrev, and Betsy M Rice 1287

Comparative analysis of the data on shocked benzene properties obtained in MD simulations with different interatomic potentials
   Vladimir Dremov, Gennady Ionov, Filipp A Sapozhnikov, Ilya Derbenev, Jean-Bernard Maillot, Nicolas Pinot, and Laurent Soulard 1291

Self-consistent tight-binding molecular dynamics simulations of shock-induced reactions in hydrocarbons
   Marc Cawkwell, Edward Sanville, Susan Mniszewski, and Anders Niklasson 1295

Shock loading and release of a small angle tilt grain boundary in CU
   Christian Brandl and Timothy C. Germann 1299
Evolution of metastable elastic shockwaves in nickel
Brian J. Demaske, Vasily V. Zhakhovsky, Carter T. White, and Ivan I. Oleynik 1303

Richtmyer-Meshkov instability examined with large-scale molecular dynamics simulations
Frank J. Cherne, Guy Dimonte, and Timothy C. Germann 1307

Molecular dynamics simulation of dynamic response of beryllium
Aidan P. Thompson, J. Matthew D. Lane, and Michael Desjarlais 1311

Irreversible phase transitions in doped metal oxides for use as temperature sensors in explosions
Hergen Eilers, Ray Gunawidjaja, Thandar Myint, James Lightstone, and Joel Carney 1577

Coherent anti-Stokes Raman scattering of laser shock compressed α-quartz
Cindy Bolme, Raymond Smith, Shawn McGrane, David Moore, and G. W. Collins 1581
Raman spectroscopy study of laser-shocked tatb-based explosives
Philippe Hebert, Viviane Bouyer, Michel Doucet, Joël Rideau, and Louis-Pierre Terzulli 1585

Crystallization behavior of vapor-deposited hexanitroazobenzene (HNAB) films
Robert Knepper, Alexander S. Tappan, Mark A. Rodriguez, M. Kathleen Alam, Laura Martin, and Michael P. Marquez 1589

Microscopic states of shocked polymers
Kathryn Brown, Rusty Conner, Yuanxi Fu, Hiroki Fujiwara, and Dana Dlott 1593

Interferometric analysis of cylindrically focused laser-driven shock waves in a thin liquid layer
David Veysset, Alex Maznev, Gagan Saini, Steven Kooi, Thomas Pezeril, and Keith Nelson 1597

Particle velocity history of pentaerythritol tetranitrate shocked along [110] crystal orientation by laser-accelerated miniature flyer impact
Kunihiko Wakabayashi, Tomoharu Matsumura, Yoshio Nakayama, and Mitsuo Koshi 1601

Thermal relaxation of CsI shocked to 45 GPa, with a LiF window, and optical characterization of LiF shocked to 85 GPa
David A. Boness 1605

POST-SHOCK TURBULENCE

Modeling turbulent mixing
Baolian Cheng, James Glimm, David H. Sharp, and Hyunkyung Lim 1611

Jetting instabilities of particles from explosive dispersal
Robert Ripley, Laura Donahue, and Fan Zhang 1615

The role of vorticity and turbulence on the instability of a dense solid particle flow
Fue-Sang Lien, Tao Xu, and Fan Zhang 1619

Development of instabilities in explosively dispersed particles
Y. Gregoire, David Frost, and Oren Petel 1623
Interaction of a planar shock with an isotropic field of sound waves
Juan Gustavo Wouchuk Schmidt, Cesar Huete Ruiz de Lira, and Alexander L. Velikovich 1627

Instabilities and turbulence originating from relaxation phenomena behind shock waves
Matei I. Radulescu and Nick Sirmas 1631

Importance of unsteady force and heating to particle interaction with shock/detonation waves
Yue Ling, Andreas Haselbacher, and S. Balachandar 1635

Simulations of heterogeneous detonations and post-detonation turbulent mixing and afterburning
Kalyana Chakravarthi Gottiparthi and Suresh Menon 1639

Application of the Meshless Local Petrov-Galerkin (MLPG) method to Rayleigh-Taylor instability
Bryan Susi and Beth Smith 1643

Shock-driven mixing: Experimental design and initial conditions
Gavin Friedman, Katherine Prestridge, Ricardo Mejia-Alvarez, and Megan Leftwich 1647

Vortex deposition in shock-accelerated gas with particle/droplet seeding
Peter Vorobieff, Michael Anderson, Joseph Conroy, Ross White, C. Randall Truman, and Sanjay Kumar 1651

Interaction of a planar shock with a dense field of particles
Justin Lawrence Wagner, Steven J. Beresh, Sean P. Kearney, Wayne M. Trott, Jaime N. Castaneda, Brian O. Pruett, and Melvin Baer 1655

Meso-scale simulations of strain-induced reaction mechanisms in Ti/Al/B heterogeneous systems
Manny Gonzales, Ashok Gurumurthy, Arun Gokhale, and Naresh Thadhani 1659

Mix and instability growth from oblique shock
John D. Molitoris, Jan Batteux, Raul Garza, Joseph Tringe, P. Clark Souers, and Jerry W. Forbes 1663
