# TABLE OF CONTENTS

## APPLICATIONS IN AUDIO

A Delayed Parallel Filter Structure with Improved Numerical Properties .................................................. 1  
Bank, Balázs; Smith, Julius O.

Latest Improvements for Spatial Sound Reinforcement: Configuration’s Automation, Remote  
Configuration Using Mobile Devices and Object Based Room Simulation ................................................ 10  
Frutos-Bonilla, Javier; Gatzsche, Gabriela; Rodigast, Rene

A Loudness-Based Adaptive Equalization Technique for Subjectively Improved Sound Reproduction  19  
Drossos, Konstantinos; Floros, Andreas; Kanellopoulos, Nikolaos - Grigorias

New Sound and Visual System of the State Parliament of North-Rhine Westphalia in Duesseldorf/Germany .......................................................... 27  
Ahnert, Wolfgang; Finder, Enno

## HUMAN FACTORS

Audio Information Mining – Pragmatic Review, Outlook and a Universal Open Architecture ...................... 36  
Duncan, Philip; Mohammed, Duraid; Li, Francis

A New Algorithm for Vocal Tract Shape Extraction from Singer's Waveforms ........................................ 44  
Angus, Jamie; Vos, Rebecca; Story, Brad

Participatory Amplitude Level Adjustment of Gesture Controlled Upper Body Garment Sound in  
Immersive Virtual Reality .......................................................................................................................... 56  
Sikström, Erith; Laursen, Morten Havemøller; Pedersen, Kasper Søndergaard; De Götzen, Amalia; Serafin,  
Stefania

## PERCEPTION 1

The Acceptability of Speech with Interfering Radio Programme Material ............................................... 64  
Baykaner, Khan; Hummersone, Christopher; Mason, Russell; Bech, Søren

An Approach to Quantifying the Latency Tolerance Range in Non-Collaborative Musical  
Performances .......................................................................................................................................... 73  
Victoria, Jorge Medina

Consistency of High Frequency Preference Among Expert Listeners ............................................................. 79  
King, Richard; Leonard, Brett; Brenner, Stuart; Sikora, Grzegorz

The Effect of Dynamic Range Compression on Loudness and Quality Perception in Relation to Crest  
Factor ..................................................................................................................................................... 86  
Wendl, Mark; Lee, Hyunkook

Hyper-Compression in Music Production: Listener Preferences on Dynamic Range Reduction .............. 94  
Taylor, Robert; Martens, William

Subjective Evaluation of High Resolution Recordings in PCM and DSD Audio Formats ....................... 104  
Marui, Atsushi; Kamekawa, Toru; Endo, Kazuhiko; Sato, Erisa

## PERCEPTION 2

Criticality of Audio Stimuli for Listening Tests – Listening Durations During a Ranking Task ..................... 114  
Ekeroott, Jonas; Berg, Jan; Nykänen, Arne

Data-Driven Modeling of the Spatial Sound Experience ........................................................................... 123  
Härnä, Aki; Park, Munhun; Kohlrausch, Armin

The Effect of Auditory Memory on the Perception of Timbre ................................................................... 131  
Pike, Cleopatra; Mason, Russell; Brookes, Tim

Emotional Impact of Different Forms of Spatialization in Everyday Mediatized Music Listening:  
Placebo or Technology Effects?.............................................................................................................. 141  
Lepa, Steffen; Weinzierl, Stefan; Maempel, Hans-Joachim; Ungeheuer, Elena

Investigation Into Vertical Stereophonic Localisation in the Presence of Interchannel Crosstalk ............. 149  
Wallis, Rory; Lee, Hyunkook
Investigation of a Random Radio Sampling Method for Selecting Ecologically Valid Music
Francombe, Jon; Mason, Russell; Dewhirst, Martin; Bech, Søren

The Perceptual Effects of Horizontal and Vertical Interchannel Decorrelation, Using the Lauridsen
Decorrelator
Gribben, Christopher; Lee, Hyunkook

POSTERS 1

3D Audio Object Rendering Into 5.1 Surround System
Lee, Kangeun; Jo, Seokkwan; Kim, Do-Hyung

Elevation Localisation Response Accuracy on Vertical Planes of Differing Azimuth
Ashby, Tommy; Mason, Russell; Brookes, Tim

Elicitation and Objective Grading of ‘Punch’ Within Produced Music
Fenton, Steven; Lee, Hyunkook; Wakefield, Jonathan

Implementation of a Binaural Localization Algorithm in Hearing Aids: Specifications and Achievable
Solutions
Courtois, Gilles; Marmaroli, Patrick; Lissek, Hervé; Oesch, Yves; Ballande, William

A New Method for the Determination of Acoustically Good Room Dimension Ratios
Sarris, John

A Novel Approach for Prototype Extraction in a Multipoint Equalization Procedure
Cecchi, Stefania; Bank, Balazs; Romoli, Laura; Piazza, Francesco; Carini, Alberto

The Subjective Effect of BRIR Length on Perceived Headphone Sound Externalisation and Tonal
Colouration
Crawford-Emery, Ryan; Lee, Hyunkook

POSTERS 2

Adaptive Digital Oscillator for Virtual Acoustic Feedback
Gabrielli, Leonardo; Giobbi, Marco; Squartini, Stefano; Valimaki, Vesa

Application of Common-Pole Parallel Filters to Nonlinear Models Based on Orthogonal Functions
Romoli, Laura; Cecchi, Stefania; Bank, Balazs; Gasparini, Michele; Piazza, Francesco

A Guide to the Design and Evaluation of New User Interfaces for the Audio Industry
Dewey, Christopher; Wakefield, Jonathan

Multiphysic Modeling and Heuristic Optimization of Compression Driver Design
Gasparini, Michele; Cecchi, Stefania; Piazza, Francesco; Toppi, Romolo; Capucci, Emiliano

An Open-Source Dynamic Networked Audio System
Daniels, Michelle

Properties of Gradient Loudspeakers
Gudvangen, Sigmund

A Psychoacoustic-Based Vocal Suppression for Enhanced Interactive Service Using Spatial Audio
Object Coding
Lee, Tung-Chin; Park, Young-Cheol; Yoon, Daeh-Hee

POSTERS 3

Cross Level Peer Tutoring to Support Students Learning Audio Programming
Moore, David; Walters, Steven

Diffuse System of Noise Measurement, Concept and Implementation
Kruk, Bartlomie; Luczynski, Michal; Pralat, Adrian

Efficient Cross-Codec Framing Grid Analysis for Audio Tampering Detection
Gaertner, Daniel; Ditmar, Christian; Aichroth, Patrick; Cuccovillo, Luca; Mann, Sebastian; Schuller, Gerald

Eyes-Free Auditory Interface for Personal Media Devices
Svedström, Thomas; Hårmå, Aki

From Faraday to Fourier: Teaching Audio Technology Fundamentals Using Loudspeaker Design
Beveridge, Scott

Improving the Performance of a In-Home Acoustic Monitoring System by Integrating a Vocal Effort
Classification Algorithm
Principi, Emanuele; Bonfigli, Roberto; Squartini, Stefano; Piazza, Francesco
Supporting TV Sound in the UK – a New Role for Education? .......................................................... 339
Quinn, Patrick

ROOM ACOUSTICS

Infrasound in Vehicles—Theory, Measurement and Analysis ................................................................. 344
Vanderkooi, John

On Low and Mid Frequencies Sound Absorption Characteristics of Porous Materials .............................. 352
Prokofieva, Elena

Open Plan Office Acoustics and Computer Modelling: Theory Vs. Practice ........................................... 358
Tjellesen, Lise

Optimising Microphone Placement and Formats for Assistive Listening System Sound Pick-Up ........... 362
Mapp, Peter

SIGNAL PROCESSING I

Computationally-Efficient Speech Enhancement Algorithm for Binaural Hearing Aids ......................... 374
Ayllon, David; Gil-Pita, Roberto; Rosa-Zurera, Manuel

Efficient Low Frequency Echo Cancellation Using Sparse Adaptive FIR Filters ................................. 382
Favrot, Alexis; Faller, Christof

Introducing Waveform Distribution Moments for Audio Content Analysis ........................................... 388
von Coler, Henrik

Memory Requirements Reduction Technique for Delay Storage in Real-Time Acoustic Cameras ........ 395
Sánchez-Hevia, Héctor; Mohino-Herranz, Inma; Gil-Pita, Roberto; Rosa-Zurera, Manuel

Two-Stage Impulsive Noise Detection Using Inter-Frame Correlation and Hidden Markov Model for Audio Restoration ................................................................. 401
Jeon, Kwang Myung; Lee, Dong Yun; Park, Nam In; Choi, Myung Kyu; Kim, Hong Kook

SIGNAL PROCESSING II

An Approach to the Generation of Subharmonic Frequencies in Audio Applications .......................... 406
Leckschat, Dieter; Epe, Christian

Creation of New Virtual Patterns for Emotion Recognition Through PSOLA ........................................... 412
Mohino-Herranz, Inma; Sánchez-Hevia, Héctor; Gil-Pita, Roberto; Rosa-Zurera, Manuel

Drift and Wow Correction of Analogue Magnetic Tape Recordings in the Analogue Domain Using HF-Bias Signals .................................................................................. 420
Wallaszkovits, Nadja; Hetzer, Tobias; Pichler, Heinrich

Extended Subtractive Synthesis of Harmonic Musical Tones .................................................................. 430
Mignot, Rémi; Välimäki, Vesa

True Peak Metering – a Tutorial Review .................................................................................................. 438
Dash, Ian

A Virtual Acoustic Environment for Automated Parameter Optimization of a Multichannel Downmix Algorithm .................................................................................................. 448
Knapp, Fabian; Mores, Robert; Hartmann, Christian

SPATIAL AUDIO

2D to 3D Upmixing Based on Perceptual Band Allocation (PBA) .......................................................... 455
Lee, Hyunook

Ambidio: Sound Stage Width Extension for Internal Laptop Loudspeakers ........................................... 462
Wu, Tsai-Yi; Roginska, Agnieszka; Glasgal, Ralph

Control of Frame Loudspeaker Array for 3D Television ........................................................................ 470
Ando, Akio; Fujii, Masafumi

Customization of Head-Related Impulse Response Via Two-Dimension Common Factor Decomposition and Sampled Measurements ............................................................ 478
Wang, Zhixin; Chan, Cheung Fat

Effect of Microphone Number and Positioning on the Average of Frequency Responses in Cinema Calibration ........................................................................................................... 488
Cengarle, Giulio; Mateos, Toni
A Flexible System Architecture for Collaborative Sound Engineering in Object-Based Audio Environments ........................................................................................................................................................................ 498
Sladecek, Christoph; Gatzsche, Gabriel
On Spatial-Aliasing-Free Sound Field Reproduction Using Infinite Line Source Arrays ................................................................. 507
Schultz, Frank; Rettberg, Till; Spors, Sascha

TRANSDUCERS I: LOUDSPEAKERS

Active Loudspeaker Heat Protection ........................................................................................................................................................................ 521
Tassart, Stephan; Simon, Valcin; Menu, Michel
Auralization of Signal Distortion in Audio Systems - Part 2: Transducer Modeling ...................................................................................................................... 531
Klippel, Wolfgang
Dynamic Measurement of Loudspeaker Suspension Parameters Using an Active Harmonic Control Technique ........................................................................................................ 539
Novak, Antonin; Lotton, Pierrick; Simon, Laurent
An Investigation of Loudspeaker Simulation Efficiency and Accuracy Using a Conventional Model, a Near-To-Far-Field Transformation and the Rayleigh Integral .......................................................................................................................................................... 547
Skov, Ulrik; Christensen, René
Mechanical Nonlinearities of Electrodynamic Loudspeakers: An Experimental Study ...................................................................................................................... 557
Maillou, Balbine; Lotton, Pierrick; Novak, Antonin; Simon, Laurent
A Novel Moving Magnet Linear Motor .......................................................................................................................................................................................... 566
Lastrucci, Claudio
Quantifying Acoustic Measurement Tolerances and Their Importance in the Loudspeaker Supply Chain ......................................................................................................................................................... 574
Chapman, Peter
Small-Signal Loudspeaker Impedance Emulator ...................................................................................................................................................................................... 589
Iversen, Niels Elkjær; Knott, Arnold

TRANSDUCERS II

Ambient Atmospheric Conditions and Their Influence on Acoustic Measurements ........................................................................................................................................................................ 598
Chapman, Peter
A Condenser Microphone for Close-Miking and Very High Sound Pressure Levels – Revisited ...................................................................................................................................................................................... 613
Schneider, Martin
Graphene Microphone ................................................................................................................................................................................................................................. 621
Todorovic, Dejan; Salom, Iva; Jovanovic, Djordje; Matkovic, Aleksandar; Milicevic, Marijana; Radosavljevic, Mirjana
How Far Do Microphones Reach? Comparing Different Microphones and Signal Chains ...................................................................................................................................................................................... 634
Breitlow, Jürgen; Haul, Dominic
Numerical Simulation of Microphone Wind Noise, Part 3: Wind Screens and Shields ...................................................................................................................................................................................... 639
Backman, Juha
