2014 IEEE 27th Conference on Software Engineering Education and Training

(CSEE&T 2014)

Klagenfurt, Austria
23-25 April 2014
Contents

Frontmatter

Message from the Chairs ................................................................. iii
Organization .................................................................................. vi

Keynote

The Times, They Are a Changing
Dennis J. Frailey — Southern Methodist University, USA ...................... 1

Academic Research

Requirements
Industrial Case Studies in Graduate Requirements Engineering Courses: The Impact on Student Motivation
Marian Daun, Andrea Salmon, Bastian Tenbergen, Thorsten Weyer, and Klaus Pohl — University of Duisburg-Essen, Germany ................................................................. 3
Using Business Process Models to Foster Competencies in Requirements Engineering
Yvonne Sedelmaier and Dieter Landes — University of Applied Sciences and Arts Coburg, Germany ................................................................. 13
Teaching Modeling using Umlpe: Principles for the Development of an Effective Tool
Timothy C. Lethbridge — University of Ottawa, Canada .......................... 23

Educational Strategy

Cloud Computing Education Strategies
Hongyu Pei Breivold and Ivica Crnković — ABB Research, Sweden; Mälardalen University, Sweden ......................... 29
The Flipped Classroom Experience
Pang Nai Kiat and Yap Tat Kwong — Nanyang Polytechnic, Singapore ......................... 39
The Synergy of Engineering and Research Aspects in Software Engineering Education
Abir Benabid and Ghada AL-Houdhoud — King Saud University, Saudi Arabia ................................. 44
Increasing the Effectiveness of Teaching Software Engineering: A University and Industry Partnership
Aldo Dagnino — ABB Research, USA ................................................... 49

Design to Validation

InspectorX: A Game for Software Inspection Training and Learning
Henrique Pötter, Marcelo Schots, Leticia Duboc, and Vera Werneck — UERJ, Brazil; UFRJ, Brazil ................................. 55
Teaching Analysis of Software Designs using Dependency Graphs
Kevin Steppe — Singapore Management University, Singapore ......................... 65

Educational Style

Observations of a Software Engineering Studio: Reflecting with the Studio Framework
Christopher N. Bull and Jon Whittle — Lancaster University, UK ......................... 74
Enhancing the Software Engineering Curriculums: A Case Study of the Jordanian Universities
Samer Hanna, Hayat Jaber, Fawze Abu Jaber, Tarek Al Shalaby, and Ayad Almasalmeh — Philadelphia University Jordan, Jordan

Automated Mentor Assignment in Blended Learning Environments
Chris Boesch and Kevin Steppe — Singapore Management University, Singapore

Project Management

Improving Teamwork in Students Software Projects
Maíra Marques and Sergio F. Ochoa — University of Chile, Chile

An Experiment on Teaching Coordination in a Globally Distributed Software Engineering Class
Martin Nordio, H.-Christian Estler, Bertrand Meyer, Nazareno Aguirre, Elisabetta Di Nitto, Rafael Prikladnicki, and Anthony Savidis — ETH Zurich, Switzerland; Universidad Nacional de Rio Cuarto, Argentina; Politecnico di Milano, Italy; PUCRS, Brazil; University of Crete, Greece

The Impacts of Personal Characteristic on Educational Effectiveness in Controlled-Project Based Learning on Software Intensive Systems Development
Yusuke Yamada, Shota Inaga, Hironori Washizaki, Katsuhiko Kakehi, Yoshiaki Fukazawa, Shoso Yamato, Masashi Okubo, Teruhiko Kume, and Manabu Tamaki — Waseda University, Japan; University of Tsukuba, Japan; NEC, Japan

Processes

Guoping Rong, He Zhang, and Dong Shao — Nanjing University, China

Teaching and Learning Agile Collaboration
Martin Kropp, Magdalena Mateescu, Andreas Meier, and Carmen Zahn — University of Applied Sciences Northwestern Switzerland, Switzerland; Zurich University of Applied Sciences, Switzerland

Enhancing Software Engineering Student Team Engagement in a High-Intensity Extreme Programming Course using Gamification
Bilal Sercan Akpolat and Wolfgang Slany — Graz University of Technology, Austria

Workshops

Workshop 1: Learning and Working Together as Prerequisites for the Development of High-Quality Software

Learning and Working Together as Prerequisites for the Development of High-Quality Software
Gabriele Frankl, Sofie Bitter, and Bonifaz Kaufmann — University of Klagenfurt, Austria

Improving Model-Based Collaboration by Social Media Integration
Wolfgang Gaar and Egon Teiniker — University of Applied Sciences Joanneum, Austria

Win-for-All in Software Engineering Education: Balancing Social Dilemmas to Foster Collaboration
Gabriele Frankl, Sofie Bitter, and Bonifaz Kaufmann — University of Klagenfurt, Austria

Workshop 2: Technology-Driven Software Engineering Curriculum Development

Technology-Driven Software Engineering Curriculum Development
Emanuel S. Grant and Venky Shankararaman — University of North Dakota, USA; Singapore Management University, Singapore

Reshaping Software Engineering Education towards 2020 Engineers
Inggriani Liem, Yudistira Asnar, Saiful Akbar, Adi Mulyanto, and Yani Widyan — Bandung Institute of Technology, Indonesia

Teaching Software Product Engineering in Undergraduate Computing Curriculum
Y. Raghu Reddy and Kesav V. Nori — IIIT Hyderabad, India

Opportunities and Challenges in Using Competencies during Design and Delivery of Software Engineering Curriculum
Venky Shankararaman and Joelle Ducrot — Singapore Management University, Singapore
Workshop 3: Workshop on Improving the CSEE&T Submissions Process

Workshop on Improving the CSEE&T Submissions Process  
Michael Barker — NAIST, Japan  183

The Academy for Software Engineering Education and Training (ASEE&T)

ASEE&T Session 1
Experience of Teaching Executive Master's Program in Software Engineering: Challenges, Lessons Learned, and Path Forward  
W. Eric Wong — University of Texas at Dallas, USA  186
Self-Guided Learning Environment for Undergraduate Software Engineering  
Junhua Ding — East Carolina University, USA  188
An Active Learning Module for an Introduction to Software Engineering Course  
A. Frank Ackerman — Montana Tech, USA  190

ASEE&T Session 2
The Impact of SWEBOK Version 3 on Software Engineering Education and Training  
Richard E. Fairley, Pierre Bourque, and John Keppler — S2EA, USA; École de Technologie Supérieure, Canada; IEEE Computer Society, USA  192
Top-10 Risks in Real-Client Software Engineering Class Projects  
Supannika Koolmanojwong — University of Southern California, USA  201
Teaching Semantic Technologies as Part of a Software Development Program  
Andreas L. Opdahl — University of Bergen, Norway  203

Panel
Panel on Industrial Needs and Educational Response  
Roland T. Mittermeir — University of Klagenfurt, Austria  205

Tutorial
Combining Software Engineering Education and Empirical Research via Instrumented Real-Client Team Project Courses  
Barry Boehm and Supannika Koolmanojwong — University of Southern California, USA  209
