# TABLE OF CONTENTS

## KEYNOTES

**Keynote T1: Challenges and Directions in Mobile Device Packaging** ................................................................. 1
  Steve Bezuk

**Keynote T2: Mobile Packaging and Interconnect Trends** .................................................................................. 17
  Brandon Prior

**Keynote TH1: Trends in Automotive Packaging** .................................................................................................. 28
  Glenn G. Daves

**Keynote TH2: Present and Future Applications of MEMS for Automotive Industry** ........................................... 45
  T. Buisson

**Keynote W1: Die Stacking And High-Bandwidth Memory** .................................................................................. 66
  Bryan Black

**Keynote W2: Graphics Market The Market Trends In Graphic Products: From Handhelds To Supercomputers Ther's A GPU In Your Future** .................................................................................. 78
  John Peddie

## TA1: ADVANCED PACKAGING TECHNOLOGIES, MARKET TRENDS, TECHNOLOGIES, INTELLECTUAL PROPERTY and COST

  Chairs: Peter Ramm, Kathy Cook

**TA11: 3D Technology Applications Market Trends & Key Challenges** .......................................................... 79
  T. Buisson, A. Pizzagalli, E. Mounier, R. Beica

**TA12: 2.5D and 3D Integration Technology Update** .......................................................................................... 83
  Robert Patti

**TA13: Reverse Engineering for the Purpose of Intellectual Property Protection and Accelerated Product Development of SOC and SIP Structures** ................................................................. 84
  Lajos Burgyan, Yuji Kakizaki

**TA14: Cost Comparison of Temporary Bond and Debond Methods for Thin Wafer Handling** .......................... 88
  Amy J. Palesko, Chet A. Palesko

## TA2: FLIP CHIP INTERCONNECT and ELECTRICAL PERFORMANCE

  Chairs: Lars Boettcher, Kevin Martin

**TA21: Damage Induced in Interconnect Structures Mimicking Stresses During Flip Chip Packaging** .................. 94

  Kim Blackwell, Dave Alcoe, Frank Egitto

**TA23: Electrical Performance Comparisons between fcBGA and eWLB Packages** ............................................ 102
  Kai Liu, Yong Taek Lee, H. Kim, Ma Phoo Pwint Hlaing, Gwang Kim, Susan Park, Billy Ahn

**TA24: Evaluation of Polymer Core Solderballs for Wafer Level Reliability Improvements** ............................... 106
  Adren Hsieh, John Hunt, Eddie Tsai, Chien Fan Chen, Tsaiying Wang

## TA3: NANOTECHNOLOGY

  Chair: Robert Dean

**TA31: Assembly Standardization for the Diverse Packaging Requirements of MEMS & Sensors** ....................... N/A
  Russell Shumway

**TA32: A Current-Controlled PCB Integrated MEMS Tilt Mirror** ................................................................. N/A
  R. Dean

**TA33: A Zinc Oxide Nanowire-Based Sensing Platform for Carbon Dioxide Detection** .................................... 112
  Bruce Kim, Anurag Gupta
TA34: Fatigue Testing of Bulk Materials Using a Microsystems Based Approach ........................................... 114
Li-Anne Liew, David T. Read, Nicholas Barbosa III

TP1: 3D PACKAGING APPLICATIONS
Chairs: Scott M. Hayes, Rozalia Beica

TP11: ARM Dual Core Product Demonstration with 2.5D Through-Silicon-Via ........................................... 118
Mike Kelly, Rick Reed, Jon Greenwood, Steve Eplett
TP12: Next Generation High Power Electronic Module Based on Embedded Power Semiconductors ........... 122
Lars Boettcher, Stefan Karaszkiewicz, Dionysios Manessis, Eckart Hoene, Andreas Ostmann
TP13: How to Bring 3D IC to Maturity - Example of a Pacemaker ........................................................... 127
Reno Dal Molin, Pascal Couderc
TP14: Optimized TSV Module for High Performance 2.5D Device Packaging ........................................... 131
Cyprian Uzoh, Liang Wang, Zhuowen Sun, Andrew Cao, Bong-Sub Lee, Gailian Gao, Hong Shen, Sitaram Arkalgud
TP15: A Cost Effective PoP Structure for High I/O Density ........................................................................ 132
Hongjie Wang, Weidong Huang, Fei Geng, Yuan Lu, Bo Zhang, Wen Yin, Haidong Wang
TP16: Embedding Active and Passive Devices in Medical Electronics ........................................................ 135
Susie Johansson, John Dzarnoski

TP2: WAFER LEVEL PACKAGING PROCESSES and PERFORMANCE
Chairs: Jon Aday, Michael Vincent

TP21: A Flexible Manufacturing Method for Wafer Level Packages ........................................................... 139
Tom Strothmann, Damien Pricolo, Seung Wook Yoon, Yaojian Lin
TP22: Enabling Resist Processing Technologies for Advanced Packaging .............................................. 143
Antun Peic, Thorsten Matthias, Johanna Bartl, Paul Lindner
TP23: Dielectric Laser Via Drilling for Next Generation Wafer Level Processing ......................................... 147
Jim Zaccardi, Guy Burgess, Theodore Tessier, Matthew Souter
TP24: Patterned Permanent Bonding of Benzocyclobutene Based Dielectric Materials for Advanced Wafer Level Packaging Solutions ........................................................ 150
Jong-Uk Kim, Anupam Choubey, Rosemary Bell, Hua Dong, Michael Gallagher, Joe Lachowski, Masaki Kondo, Corey O'Connor, Greg Prokopowicz, Robert Barr, Kai Zoschke, Matthias Wegner, Christina Lopper, Michael Toepper
TP25: Solderability Challenges in Emerging BGA Packages .................................................................... 151
Maria Durham, Andy Mackie, Yan Liu
TP26: Manufacturing Readiness of BVA (TM) Technology for Fine-Pitch Package-on-Package .................. 156
Rajesh Katkar, Rey Co, Rizza Cizek, Wael Zohni

TP3: SENSORS and THERMAL DEVICES
Chairs: Michael Kranz, Russell Shumway

TP31: All-Silicon Multi-Chip Modules based on Ultra-Thin Active Pixel radiation Sensors ............................. 159
Ladislav Andricek, Christian Koffmane, Jelena Ninkovic, Rainer Richter
TP32: A PCB Technology Moisture Content and Electrical Conductivity Sensor Probe for Agricultural and Horticultural Applications ............................................................. 162
R. Dean, Elizabeth A. Guertal, Adam F. Newby, Glenn B. Fain
TP33: 2D PCB with 3D Print Fabrications for Rigid-Conformal Packaging of Microsensor Imaging Arrays Based on Bioinspired Architectures ......................................................... 166
David P. Fries, Chase A. Starr, Geran W. Barton
TP34: A MEMS DC Current Sensor Utilizing Neodymium Rare Earth Magnets ............................................. 170
J. J. Tatarchuk, C. B. Stevens, R. Dean
TP35: Integrated Localized Cooling using Piezoelectrically-Driven Synthetic Jets ........................................ 175
M. Kranz, M. Whitley, B. English, T. Hudson
TP36: MEMS-Enabled Cryogenic Coolers ................................................................................................. 179
Y.D. Wang, R. Lewis, R. Radebaugh, Y.C. Lee
WA1: INTERPOSER TECHNOLOGIES
Chairs: Dingyou Zhang, Diane Scheele

WA11: TSV Technology Embedding High Density Capacitors for Advanced 3D Packaging Solutions .......... 181
  Catherine Bunel

WA12: Interposer Based Solution for Wide IO Processor Integration ...................................................... N/A
  Venky Sundaram

WA13: Progress in Fabrication and Test of Glass Interposer Substrates .................................................. 183
  Aric Shorey, Scott Pollard, John Keech

WA14: New Lithography Requirements Driven by 2.5D Interposer Manufacturing .................................. 186
  Klaus Rahmer, Elvino De Silveira, Philippe Cochet

WA2: FLIP CHIP MATERIALS and PROCESSES
Chairs: Curtis Zwenger, Ahmer Syed

WA21: Precise Solder Dispensing in High-Throughput Micro-Device Packaging Applications .................. 189
  Hanzhuang Liang, Linh Rolland, Floriana Suriavidjaja, Mani Ahmadi, Heakyoung Park, Nordson Asymtek

WA22: Underfill Design Using FEM for FC-BGA, FC-CSP, and Moving Towards 2.5/3D ...................... 193
  Brian Schmaltz, Yukinari Abe, Kazuyuki Kohara

WA23: Direct EP/EPAG - Ultrathin Surface Finish for Soldering and Wire Bonding .............................. 197
  Mustafa Oezkoek, Gustavo Ramos, Arnd Kilian, Jens Wegricht

WA24: Fault Detection and Classification in Advanced Packaging ...................................................... 202
  Richard Beaver

WA3: PROCESSING and PASSIVE DEVICES
Chairs: Li-anne Liew, Aubrey Beal

WA31: Sapphire Surface Protection During Sapphire Micromachining and Through-Sapphire Via
  Formation for Device Densification, Backside Interconnect and Chip Stacking .................................. 205
  Fred Haring, Kevin Mattson, Greg Strommen, Syed Sajid Ahmad, Aaron Reinholz

WA32: Design Considerations and Ring-Down Characteristics of Micromachined, High Current
  Density Capacitors ................................................................................................................................. 209
  A. N. Beal, J. J. Tatarchuk, C. B. Stevens, T. A. Baginski, M. C. Hamilton, R. Dean

WA33: Wire Bond Reliability Challenges Across Electronic Packaging Platforms .............................. 214
  Vijay Sarihan, Steve Safai, Boon Yew Low, Darrel Frear

WA34: Development of Passives on Sapphire Backside ............................................................................ 217
  Cherish Bauer-Reich, Mike Reich, Layne Berge, Fred Haring, Oliver Boeckel, Kevin Mattson, Greg Strommen,
  Justin Vignes, Syed Sajid Ahmad, Aaron Reinholz

WP1: PROCESS INTEGRATION (1st HALF) and MANUFACTURABILITY (2nd HALF)
Chairs: Jeff Calvert, Scott M. Hayes

WP11: Through-Sapphire Via Filling Process Development for Backside Interconnect and Chip
  Stacking and Front-to-Back Interconnect Demonstration With a Front-to-Back Daisy Chain Chip ............ 222
  Syed Sajid Ahmad, Fred Haring, Kevin Mattson, Greg Strommen, Justin Vignes, Aaron Reinholz

WP12: Efficient TSV Resist and Residue Removal in 3DIC ..................................................................... 228
  Laura Mauer, John Taddei, Ramey Yousef, John Clark, Kimberly Pollard, Meng Guo, Richie Peters, Mike Phenis

WP13: High Throughput Thin Wafer Support Technology for 3DIC .................................................... 233
  Jared Pettit, David Young, Alex Brewer, Alman Law, John Moore

WP14: A New Type of TSV Defect Caused by BMD in Silicon Substrate .............................................. 238
  Dingyou Zhang, Sarasvathi Thangaraju, Daniel Smith, Himani Kamisini, Christian Klewer, Mark Scholefield,
  Ming Lei, Tong Qing Chen, Kumaraparam Gopalakrishnan, Abhishek Vikram, Victor Lim, Wonwoo Kim,
  Ramakanth Alapati

WP15: Next Generation TSV Filling by Electrochemical Deposition .................................................... 242
  Stephen N. Golovato, Tyler Barbera, Keiichi Fujita, Takashi Tanaka
WP16: Metrology and Inspection for New Interconnects in Advanced Packaging .................................................. 245
Russ Dudley, Matt Wilson, Rajiv Roy

WP2: BUMPING and PLATING PROCESSES and MATERIALS
Chairs: Eric Huenger, Linda Bal

WP21: Optimization of Lead Free Plating for Flip Chip Applications ................................................................. 249
Charles Arvin, Jurg Stahl, Wolfgang Sauter, Harry Cox, Eric Perfecto, Valerie Oberson, Nathalie Normand

WP22: Versatile Lead-Free Solder Electroplating Products for Advanced Bumping Technologies ...................... 253
Inho Lee, Regina Cho, Lou Grippo, Yan-Lin Wang, Wayne Baldehii, Ryan Farrell, Julia Woertink, Yi Qin,
Jonathan Prange, Yil-Hak Lee, Masaaki Imanari, Jianwei Dong, Jeffrey Calvert

WP23: CupraEtch (TM) DE - Recyclable Anisotropic Etchant for Advanced Flip Chip Manufacturing .................. 257
Norbert Lützow, R. Haidar, S. Hotz, Waimun Wong

WP24: Control of Bump Morphology in Lead Free Solder Plating for Higher Density Packaging ...................... 261
Koji Tatsumi, Kyouhei Mineo, Takeshi Hatta, Takuma Katsuse, Masayuki Ishikawa, Akinori Masuda

WP25: Adhesive Enabling Technology for Directly Plating Metal on Molding Resin .......................................... 262
Kwonil Kim, Kenichiroh Mukai, Brian Eastep, Lee Gaherty, Anirudh Kashyap, Lutz Brandt

WP26: Use of Darkfield Laser Technology in Monitoring Particles Generated by Process Tools in Cu Pillar Bumping ................................................................. 269
Reza Asgari

WP3: PHOTONIC PACKAGING AND TEST TECHNOLOGY
Chairs: Bob Kuo, John Mazurowski

WP31: Photonic Device Package Design, Assembly and Encapsulation .............................................................. 273
Arnold Bos

WP32: Alignment Process for Fabrication of Mirror-based Optical Via Using Maskless Lithography Tool with Buffer Coat Materials ....................................................... 280
Sunglin Wang, Chris Summitt, Tao Ge, Lee Johnson, Melissa Zaverton, Tom Milster, Yuzuru Takashima

WP33: A Decade of High Accuracy Die Attach Equipment and Process Developments (Addressing Photonics Device Packaging Challenges) .............................................. 285
Johann Weinhändlere

WP34: A New Method for Testing Electrolytic Capacitors to Compare Life Expectancy ..................................... 286
S. Gulbrandsen, Ken Cartmill, Joelle Arnold, Nick Kirsch, Greg Caswell

WP35: Wafer Level Packaging for High-Brightness LED Lighting with Optimized Thermal Dissipation and Optical Performance ................................................................. 289
Liang Wang, Gabe Guevara, Rey Co, Ron Zhang, Roseann Alatorre

THA1: PROCESSING and MATERIAL ADVANCEMENTS
Chairs: Cristina Chu, Kimberly Pollard

THA11: Temporary Bonding Cost of Ownership: The Link Between Low Total Thickness Variation and Chip Yield ............................................................................................................. 292
Thomas Ullmann, Harald Wiesbauer, Julian Bravin, Thorsten Matthias, Markus Wimplinger, Paul Lindner,
Herman Meynen, Yann Civale, Ranjith John, Sheng Wang, Peng-Fei Fu, Craig Yeakle, Gary Aw

THA12: Adhesive Enabling Technology for Directly Plating Copper onto Glass ................................................ 293
Lutz Brandt, Zhiming Liu, Hailu Fu, Sara Huaegaw, Tafadzwa Magaya

THA13: Magnetic Field Imaging for 3D Applications ............................................................................................ 297
Jan Guadestad, Antonio Orozco

THA14: Wet Chemical Processing with Megasonics Assist for the Removal of Bumping Process Photomasks ........................................................................................................... 301
Hongseong Sohn, John Tracy
THA2: 3D DESIGN, MODELING and RELIABILITY
Chairs: Keith Cooper, Venky Sundaram

THA21: Non-Conductive Film (NCF) with No Voiding and High Reliability .................................................. 306
Edgardo Antuzes, Anupam Choubey, Avin Dhoble, David Fleming, Robert Barr, Jeffrey Calvert, Joon-Seok Oh,
Masaki Kondo

THA22: Applying System Modeling to Define 2.5 - D and 3 - D Packaging Roadmaps ........................................ 309
Dev Gupta

THA23: Pathfinding and Design Optimization of 2.5D/3D Devices in the Context of Multiple PCBs .................... 312
Farhang Yazdani, John Park

THA24: Path Finding for Multiple Platforms ....................................................................................................... 316
John Park

THA3: PHOTONIC DEVICES AND MATERIALS
Chairs: Bob Kuo John Mazurowski

THA31: Heterogeneous Integration of Photonic Integrated Circuits Using 3D Assembly Techniques:
Silicon Technology and Packaging ............................................................................................................................... 319
Yann Lamy, Haykel Ben Jamaa, Hughes Metras, Stéphane Bernabé, Sylvie Menezo, Laurent Fulbert

THA32: Thermal Aging of Optically Silicone Encapsulants .................................................................................. 323
Michelle Velderrain

THA33: Pulsed 2 Micron Wavelength Fiber Lasers for Packaging ........................................................................ 324
Shibin Jiang

THA34: UV-C LEDs for Sterilization Applications ................................................................................................ 325
Joseph A. Grzyb

POSTER SESSION

POSTER - Cost Comparison of Temporary Bond and Debond Methods for Thin Wafer Handling ................... 328
Amy J. Palesko, Chet A. Palesko

POSTER - Optical and Acoustic Metrology Techniques for 2.5 and 3D Advanced Packaging ......................... 334
Parker Huang, Bruce Chiu, Jay Chao, Chun Hung Lu, Stephen Chen, Jay Chen, Fei Shen, Jian Ding, Johnny Dai,
Priya Mukundhan, Timothy Kryman

POSTER - A Comparison of Through-Sapphire Via Process Development at Laser Service Suppliers ............ 338
Syed Sajid Ahmad, Fred Haring, Nathan Schneck, Greg Strommen, Sydney Boschert, Minara Sooriarchi, Kacie
Gerstner, Justin Vignes, Aaron Reinholz

POSTER - High Throughput Thin Wafer Support Technology for 3DIC ........................................................... 344
Jared Pettit, David Young, Alex Brever, Alman Law, John Moore

POSTER - Direct EP/EPAG - Ultrathin Surface Finish for Soldering and Wire Bonding ................................ 349
Mustafa Oezkoek, Gustavo Ramos, Arnd Kilian, Jens Wegricht

POSTER - Manufacturing Readiness of BVA(TM) Technology for Fine-Pitch Package-on-Package ............... 354
Rajesh Katkar

POSTER - Magnetic Field Imaging for 3D Applications ....................................................................................... 355
Jan Gaudestad, Antonio Orozco

POSTER - Temporary Bonding Cost of Ownership: The Link Between Low Total Thickness Variation and Chip Yield .......................................................... 359
Thomas Uhrmann, Jorgen Burgrgraf, Harald Wiesbauer, Julian Bravin, Thorsten Matthias, Markus Winplinger,
Paul Lindner, Herman Meynen, Yann Civale, Ranjith John, Sheng Wang, Peng-Ye Fu, Craig Yeakle, Gary Aw

POSTER - Fault Detection and Classification in Advanced Packaging ............................................................... 360
Richard Beaver

POSTER - Impact of Reprocessing Technique on First Level Interconnects of Pb-Free to SnPb Reballeds Area Array Flip Chip Devices .................................................................................. 363
Joelle Arnold, Melissa Keener, S. Gilbrantsen, Nathan Blattau, David Kayser

POSTER - Electrical Performance Comparison Between fCBGA and eWLB Packages .................................. 367
Kai Liu, Yong Taek Lee, H. Kim, Ma Phoo Pwint Hlaing, Gwang Kim, Susan Park, Billy Ahn

POSTER - Damage Induced in Interconnect Structures Mimicking Stresses During Flip Chip Packaging .......... 371

POSTER - Fatigue Testing of Bulk Materials Using a Microsystems Based Approach ...................................... 375
Li-Anne Liew, David T. Read, Nicholas Barbosa III
POSTER - Cu Migration in Polycrystalline CdTe Solar Cells

POSTER - Electrical and Thermal Transport in Alternative Device Technologies
S. Qazi, K. Raleva, D. Vasileska
