2014 Fourth International Conference on Communication Systems and Network Technologies

(CSNT 2014)

Bhopal, India
7-9 April 2014

Pages 1-596
Table of Contents

Message from General Chairs ................................................................................................................xxiii
Message from Program Chairs ................................................................................................................xxv
Conference Committees ..........................................................................................................................xxvi
Program Committees ...............................................................................................................................xxviii

Track A: Microwave Devices, Circuits, Antennas, and Filters
Performance Analysis of Microstrip Patch Antenna by Varying Slot Size for UMTS Application ......................................................................................................................................................1
    Janabeg Loni, Shahanaz Ayub, and Vinod Kumar Singh
Semi-circular Microstrip Patch Antenna for Multi-frequency Application .........................................................6
    Samrat Ghosh, C.C. Ravindranath, and A.V. Pratapkumar
Bandwidth Enhancement of Wang Shape Microstrip Patch Antenna for Wireless System ........................................................................................................................................................................11
    Chandan and B.S. Rai
A Study of Plasma Antenna Parameters with Different Gases ..............................................................................16
    Sharan Bonde, Vikram Ghiye, and Ashwinikumar Dhande
A UWB Frequency-Band Reconfigurable Antenna Using Switchable Slotted Ground Structure ........................................................................................................................................................................20
    Chirag Gupta, Divyanshu Maheshwari, Ritesh Kumar Saraswat, and Mithiles Kumar
Sequential Parameter Extraction of Direct-Coupled Resonator Filter ............................................................25
    Ambrish Ghadiya and Shilpi Soni
A New Approach for the Coupling Identification in Dielectric Resonators Filters ............................................30
    Shilpi Soni, Ambrish Ghadiya, and Nishant Shukla
Design of Wideband Inverted Sinc Shaped Monopole Antenna .....................................................................34
    Ritesh Kumar Badhai and Nisha Gupta
Design of Planar Bandpass Filter for Ultra Wideband Applications ............................................................38
   Suman Kumari and Mithilesh Kumar

Design of a Broadband Planar Equiangular LPDA .............................................................................................41
   Zhen Yu, Xiaoying Ran, Zhen Yu, and Jianguo Yu

Dual Band Rectangular and Circular Slot Loaded Microstrip Antenna for WLAN/GPS/WiMax Applications ...........................................................................................................45
   Rajat and Srivastava

Design of Grooved Microstrip Band Pass Filter at 4.2 GHz .............................................................................49
   Vivek Singh Kushwah, Swati Singh Tomar, and Santos Sharma

**Track B: Sensors and Wireless Sensor Networks**

Simulation of MTMS Using TSSE and Minimum Energy Consumption Using DVS for WSN Ad Hoc Network ..................................................................................................................54
   Nishakumari Lodha, Prasant Rewagad, and Yogita Pawar

Performance Analysis of Zigbee Based Wireless Sensor Network for Remote Patient Monitoring ..........................................................58
   Rinki Sharma, Shreyas K. Gupta, K.K. Suhas, and G. Srikanth Kashyap

Energy Efficient Grid Based Clustering and Routing Algorithms for Wireless Sensor Networks ..........................................................63
   Srikanth Jannu and Prasanta Kumar Jana

Effect of Number of Active Nodes and Inter-node Distance on the Performance of Wireless Sensor Networks ................................................................................................................69
   Rinki Sharama, J. Uma Shankar, and S.T. Rajan

Survey on DAG Based Fault Tolerance in Wireless Multimedia Sensor Network ..........................................................74
   Poonam P. Borkar

Design and Implementation of Energy Efficient Node Data Transmission by Using Mobile Sink Node ..................................................................................................................79
   Shweta P. Palaskar and Nekita A. Chavhan

Ant Based Cluster Head Election Algorithm in Wireless Sensor Network to Avoid Redundancy ..................................................................................................................83
   Tripti Sharma, Bijesh Kumar, Karan Berry, Akanksha Dhawan, Rahul Singh Rathore, and Vishalakshi Gupta

Identifying Jammers in Wireless Sensor Network with an Approach to Defend Reactive Jammer ..................................................................................................................89
   Apurva A. Bodkhe and Archana R. Raut

Adaptive Duty Cycle Algorithm for Large Scale Wireless Sensor Networks ..........................................................93
   Laxmi Dongre and Veena Gulhane
Real Time Monitoring and Control System for Green House Based on 802.15.4 Wireless Sensor Network ..........................................................98

Jaypal Baviskar, Afshan Mulla, Amol Baviskar, Shweta Ashtekar, and Amruta Chintawar

Metric Aware Flow Assignment with ARS in Wireless Mesh Networks ........................................104

Seema Deshpande and Deepali Gothawal

Wireless Node Control and Monitoring System Using Web Enabled Interface ..........................109

Suniti Purbey and Archana Raut

Profile Based Scheme against DDoS Attack in WSN .................................................................112

Varsha Nigam, Saurabh Jain, and Kavita Burse

Reliable Attribute Based Flooding in Distributed WSN ..............................................................117

Swati D. Hiwase and Veena Gulhane

Clustering Based Energy Efficient Algorithm Using Max-Heap Tree for MANET ..................123

Madhvi Saxena, Neelam Phate, K.J. Mathai, and M.A. Rizvi

Area Based Coverage for Three Deployment Distributions and Their Connectivity in Wireless Sensor Networks ........................................................................128

S.K.L.V. Sai Prakash and Niranjan Patidar

Location and Time Based Clone Detection in Wireless Sensor Networks ..................................133

R. Sivaraj and R. Thangarajan

Priyanka Tripathi and Rajni Dubey

A Novel Application Semantics Based Routing Algorithm in Wireless Sensor Networks ............143

Qingxu Xiong, Chenghao Chen, Jiabing Wang, and Wei Xiong

Cross-Layer Design of MAC and Application Semantics in Wireless Sensor Networks ..............147

Qingxu Xiong and Xiang Li

Delivery Probability Aware Data Forwarding Mechanism in Opportunistic Networks .................151

Liu Qiao-Shou, Liu Jia, and Wang Yan-Yan

Link Weight Based Enable Protocol in Wireless Sensor Network .............................................156

Ankita Samadhiya, Gunjan Jain, and Brijesh Kumar Chaurasia

A Quick Survey on Wireless Sensor Networks .....................................................................160

Manisha Bhende, Sanjeev J. Wagh, and Amruta Utpat

Locoduo - Low Cost Dual Hop Clustering Based Routing Protocol for Wireless Sensor Network ..................................................................................................................168

Shounak Chakraborty and Ajoy Kumar Khan
Track C: Wireless Communication, MIMO, Computer Networks, and Wireless Ad Hoc Networks

Overview of Proactive Routing Protocols in MANET .................................................................173
    T. Prasanna Venkatesan, P. Rajakumar, and A. Pitchaikkannu

Multiple Energy Detection vs Cyclostationary Feature Detection Spectrum Sensing Technique .........................................................................................................178
    Ashish Bagwari and Geetam Singh Tomar

Performance Evaluation of Comparison of Sphere Decoder with Other Equalization Techniques on 2x2 MIMO Systems Using Rayleigh and Rician Flat Fading Channels .................................................................................................182
    Rahul Vij, Priyanka Mishra, and Gurpreet Singh

Energy Efficient Load Balancing Approach to Improve AOMDV Routing in MANET .............................................................................................................................187
    Bhavna Sharma, Shaila Chugh, and Vismay Jain

Gateway-Level Load Balancing Techniques for WMN: A Comparative Study .............................................193
    Banani Das, Amit Kumar Roy, Ajoy Kumar Khan, and Sudipta Roy

An Efficient Broadcast Algorithm in Multi-hop Relay MANETs ........................................................................198
    Dipali K. Dakhole and Archana R. Raut

Path Load Balanced Adaptive Gateway Discovery in Integrated Internet-MANET ..................................................................................................................................203
    Rafi U. Zaman, Khaleel Ur Rahman Khan, and A. Venugopal Reddy

Node Failure Effect on Reliability of Mobile Ad-Hoc Networks ........................................................................207
    Anil Choudhary, O.P. Roy, and T. Tuithung

Mobile Application for Safe Driving ..................................................................................................................212
    Nadeem Akhtar, Kush Pandey, and Saurabh Gupta

Implementation of Watchdog Protocol with AODV in Mobile Ad Hoc Network ......................................................217
    Tarun Varshney, Tushar Sharma, and Pankaj Sharma

An Architecture for Implementation of IEEE1588v2 over MPLS/MPLS-TP Networks ...............................................................................................................................222
    Vivek Jain and Abhay S. Gandhi

Performance Comparison of Adaptive Algorithms RLS and LMS on Space-Time Coded MC-CDMA Systems ..................................................................................................................228
    Ashish Garg and Rajkumar Rajoria

Joint Fair Resource Allocation for Multi-radio Multi-channel Mesh Networks with Flow Demand Constraint .........................................................................................................................233
    Gervais I. Mady Dzal, Suili Feng, Weijun Tang, Wei Feng, and Yuan Liu

Packet Loss in Handover for Host Based Mobility Management Protocols ....................................................239
    Malavade Vinayak Nandkishor and Shedge Rajashree

Data Generation and Analysis for Digital Forensic Application Using Data Mining .................................................................458
Prashant K. Khobragade and Latesh G. Malik

Hybrid Ensemble Classifier for Stream Data .................................................................463
Purva S. Gogte and Deepti P. Theng

Feature Selection Algorithm for Improving the Performance of Classification: A Survey .................................................................468
Kajal Naidu, Aparna Dhenge, and Kapil Wankhade

An Efficient Approach for Supervised Learning Algorithms Using Different Data Mining Tools for Spam Categorization .........................................................472
Rachana Mishra and Ramjeevan Singh Thakur

An Efficient Cache Based Client Side DNS Resolution Approach .........................................................478
Nikhil Agrawal, M.A. Rizvi, and Shailendra Singh

Evaluation of the Effective Usage of Web Site Using Interactions of Users for Refinement .................................................................................483
Supriya Chakraborty, Dibakar Chakraborty, Biswabarata Dey,
Soumik Banerjee, and Sweta Singh

An Efficient Approach for Inverted Index Pruning Based on Document Relevance .................................................................................487
Santosh K. Vishwakarma, Kamaljit I. Lakhtaria, Divya Bhatnagar,
and Akhilesh K. Sharma

**Track E: Fuzzy Logic, Artificial Neural Networks, and Soft Computing**

Dynamic Growth of Hidden-Layer Neurons Using the Non-extensive Entropy .........................................................491
Seba Susan and Mayank Dwivedi

Software Reliability Prediction by Using Ant Colony Optimization Technique .........................................................496
Ramakanta Mohanthy, Venkateswaru Naik, and Azmath Mubeen

Video Shot Segmentation Using Spatio-temporal Fuzzy Hostility Index and Automatic Threshold .........................................................501
Hrishikesh Bhaumik, Siddhartha Bhattacharyya, and Susanta Chakraborty

Evolutionary Computing Techniques for Optimal Reactive Power Dispatch: An Overview and Key Issues .........................................................507
Tejaswini Sharma and Laxmi Srivastava

A Quantum Multilayer Self Organizing Neural Network for Object Extraction from a Noisy Background .........................................................512
Siddhartha Bhattacharyya, Pankaj Pal, and Sandip Bhowmik
Optimal Placement of Shunt Facts Devices Using Heuristic Optimization
Techniques: An Overview ................................................................. 518
  Rahul Dubey, Shishir Dixit, and Ganga Agnihotri

Fuzzy Based Sleep Scheduling in TDM Passive Optical Network .................................................. 524
  Akanksha Vyas and Manish Sharma

Routing in Wireless Sensor Network Using Fuzzy Based Trust Model ............................................. 529
  Radhika A. Raje and Apeksha V. Sakhare

Enhancement of Fuzzy Implication Operator ...................................................................................... 533
  Ravi Kant Kumar

**Track F: Cloud Computing, Big Data, and IT Services**

Towards Cloud Supported E-Governance Services Delivery Model .................................................. 537
  Mahesh Kumar Sharma and Kunwar Singh Vaisla

An Enterprise Data Center Network Design - Netdes ........................................................................ 540
  Shameemraj M. Nadaf, Vishvesh Revoori, Hemant Kumar Rath, and Anantha Simha

New Fuzzy Voice Part Algorithm of Chorus Literary Based on Internet Integration Information ........... 546
  Zhao Jing

An Efficient Approach for Software Protection in Cloud Computing .................................................. 550
  Navneet Singh, Shailendra Singh, and Swapnamukta Agarwal

Prominence of MapReduce in Big Data Processing ............................................................................... 555
  Shweta Pandey and Vrinda Tokekar

The Analysis of Exam Paper Component Based on Genetic Algorithm ................................................ 561
  Lingling Han and Xiaodong Li

Mobile Cloud Computing - Bring Your Own Device ........................................................................... 565
  Gurudatt Kulkarni, Rupali Shelke, Rajnikant Palwe, Vikas Solanke, Shrikant Belsare, and Sangita Mohite

Optimization in Mobile Cloud Computing for Cloud Based Health Application ............................... 569
  Gurudatt Kulkarni, Rupali Shelke, Pooja Bhore Niraj Patil, Vishakha Kulkarni, and Sangita Mohite

An Effective Approach for Allocating VMs to Reduce the Power Consumption of Virtualized Cloud Environment ........................................................................................................ 573
  Pushtikant Malviya, Swapnamukta Agrawal, and Shailendra Singh

Access Control Mechanism for Multi-user Data Sharing in Social Networks ....................................... 578
  Ashwajit Ramteke and Girish Talmale

Parallel Processing and Intercommunication of Multiple Negotiation Processes in E-Commerce for Optimal Business ...................................................................................................................... 583
  Mohamed Jawahar Hussain
A Performance Analysis of MapReduce Task with Large Number of Files
Dataset in Big Data Using Hadoop ................................................................. 587
Amrit Pal, Kunal Jain, Pinki Agrawal, and Sanjay Agrawal

Impact of Software Licenses in Cloud Computing Based E-Governance
Initiatives ........................................................................................................ 592
Shailesh Kumar Shrivastava, Prabhat Kumar, and Amarnath Pandey

Analyzing Email Account Creation: Expectations vs Reality .......................... 597
Vishal Kumar, Kunwar Singh Vaisla, and Jaydeep Kishore

Virtual Desktop Infrastructure in Higher Education Institution: Energy Efficiency
as an Application of Green Computing ......................................................... 601
Shalabh Agrawal, Rana Biswas, and Asoke Nath

**Track G: Security and Authentication: Image, Data, Network, and Information Security**

Estimation of User Location in 4G Wireless Networks Using Cooperative
TDOA/RSS/TDOA Method .................................................................................. 606
Reza Ashrafi Amineh and Ali Asghar Beheshti Shirazi

Comparative Analysis of PAVD Security System with Security Mechanism
of Different Cloud Storage Services ................................................................. 611
Yogita Pawar, Prashant Rewagad, and Nisha Lodha

Binod Kumar Mishra, Mohan C. Nikam, and Prashant Lakkadwala

Smartphone Security and Contact Synchronization .......................................... 621
Kunal Gupta, Ravi Kumar, and Sachin Loothra

A Review of Watermarking Application in Digital Cinema for Piracy Deterrence .... 626
Nilesh Kumar Dubey and Shishir Kumar

Consignor Is a Spammer ................................................................................... 631
Ravi Kumar, Mayank Punetha, Ishani Sharma, and Mahua Bhattacharya

A Real Time Approach for Secure Text Transmission Using Video
Cryptography ...................................................................................................... 635
G. Metaliya Viral, Deepak Kumar Jain, and Sardhara Ravin

A Novel Technique for Data Hiding in Audio Carrier by Using Sample
Comparison in DWT Domain ............................................................................ 639
Satish Singh Verma, Ravindra Gupta, and Gaurav Shrivastava

Protecting Location Privacy via Synchronously Pseudonym Changing
in VANETs ....................................................................................................... 644
Wang Ying and Yang Shiyong

Analysis of Location Monitoring Techniques with Privacy Preservation in WSN .......... 649
Shrikant P. Dhawale and Archana R. Raut
Inter-cloud Data Transfer Security .................................................................654
  Rajkumar R. Chalse, Arun Katara, Ashwin Selokar, and Roshani Talmale

Defining Categories to Select Representative Attack Test-Cases in MANETs .......658
  Sara Chadli, Mohammed Saber, and Abdelhak Ziyyat

Proposed Method for Multimedia Data Security Using Cyclic Elliptic Curve,
Chaotic System, and Authentication Using Neural Network .........................664
  Ankita Baheti, Lokesh Singh, and Asif Ullah Khan

Key Management in WiMax .............................................................................669
  Himanshu Tiwari and Brijesh Kumar Chaurasia

Secure Localization and Location Verification of Wireless Sensor Network .......673
  Gaurish M. Edake, Ganesh R. Pathak, and Suhas H. Patil

Analysing Security and Privacy Management for Cloud Computing Environment .................................................................677
  Manish H. Gourkhede and Deepti P. Theng

Intrusion Detection Based on Support Vector Machine Using Heuristic Genetic Algorithm .................................................................681
  Tao Yerong, Sui Sai, Xie Ke, and Liu Zhe

Agent Based Intrusion Detection System to Find Layers Attacks ..................685
  Jaipal Singh Parihar, Jitendra Singh Rathore, and Kavita Burse

The Evaluation Model for Network Security ..................................................690
  Zhiyong Lu and Yunyan Zhou

An Improved Module Based Substitution Steganography Method ................695
  Nadeem Akhtar, Ambreen Bano, and Faraz Islam

A Design and Implementation of Intrusion Detection System by Using Data Mining .................................................................700
  Brijesh Sharma and Huma Gupta

Inspecting the Ways of Source Anonymity in Wireless Sensor Network .........705
  Rupali D. Shinganjude and Deepti P. Theng

A Comparative Study on Various Aspects of Security of Geospatial Data .......708
  Manali Singh Rajpoot and Pratik Patel

Comparative Study of CIA and Revised-CIA Algorithm ...............................713
  Sneha Vasant Thakare and Deipali V. Gore

Overview of CDAMA Scheme in Wireless Sensor Network Using DAS Model 719
  Nidhi Mouje and Nikita Chavhan

Efficient Sensor Node Authentication in Wireless Integrated Sensor Networks
Using Virtual Certificate Authority .................................................................724
  Rashmi P. Fulare and A.V. Sakhare
Track H: Image, Speech, and Signal Processing

Symbol Synchronization for a Class of CPFSK Receiver .................................................................800
  Sapta Girish Neelam

An Algorithmic Digital Audio Watermarking in Perceptual Domain Using Direct
Sequence Spread Spectrum ...................................................................................................................805
  Naresh Kumar Trivedi and Munesh Chandra Trivedi

Sign Language Recognition Using Principal Component Analysis .................................................810
  Ankita Saxena, Deepak Kumar Jain, and Ananya Singhal

Real Time Fog Removal Technique with Improved Quality through FFT .......................................814
  Ashish Saxena and Yogadhar Pandey

Hand Gesture Recognition Using an Android Device .................................................................819
  Ankita Saxena, Deepak Kumar Jain, and Ananya Singhal

Fingerprint Segmentation: Optimization of a Filtering Technique with Gabor
Filter ..................................................................................................................................................823
  Vishal Krishna Singh, K.J. Mathai, and Shailendra Singh

High Dynamic Range Imaging for Dynamic Scenes ........................................................................828
  Rahul Kumar Chaurasiya and Vishakha Chourasia

Skin Lesion Detection of Dermoscopy Images Using Estimate Localization
Technique .................................................................................................................................................833
  Sookpotheram Supot

Subjective Evaluation of Image Color Damage Based on JPEG Compression ..................................838
  Xiaoqiang He

The Study on Auto Mosaic Technology of Microscopic Image .........................................................843
  Yunxiao Shan

  Shubhra Dixit, Deepak Kumar Jain, and Ankita Saxena

Using Self Organized Mapping to Seek Refactorable Code Clone .......................................................851
  Meng Fanqi

Comparison of Sub-band Decomposition and Reconstruction of EEG Signal
by Daubechies9 and Symlet9 Wavelet ..................................................................................................856
  Supriya Shete and Revathi Shriram

TOA Estimation with Cross Correlation-Based Music Algorithm for Wireless
Location ......................................................................................................................................................862
  Liang Zhou, Guangjun Li, Zhi Zheng, and Xuemin Yang

A Novel Lossy Image Compression Method .........................................................................................866
  Nadeem Akhtar, Salman Khan, and Gufran Siddiqui

Coherence Analysis of EEG Signal Using Power Spectral Density ...................................................871
  Sukhada A. Unde and Revati Shriram
Comparison of Color and Color with Edge Feature Extraction Using Contribution-Based Clustering Algorithm.................................................................................................................................875
*Snehal Mahajan and Dharmaraj Patil*

Issues and Challenges in Content-Based Media Retargeting ..............................................................................................................................881
*Ranjit Y. Fule and Deepti P. Theng*

Vishit: A Visualizer for Hindi Text.............................................................................................................................................................................886
*Priyanka Jain, Hemant Darbari, and Virendrakumar C. Bhavsar*

Literature Review: Model Free Human Gait Recognition .........................................................................................................................891
*Suvama Shirke, S.S. Pawar, and Kamal Shah*

A Fragile ROI-Based Medical Image Watermarking Technique with Tamper Detection and Recovery ............................................................................................................................896
*R. Eswaraiah and E. Sreenivasa Reddy*

A Conditional Random Field Based Indian Sign Language Recognition System under Complex Background .............................................................................................................................900
*Ananya Choudhury, Anjan Kumar Talukdar, and Kandarpa Kumar Sarma*

Line Analyzer Techniques for Teeth Using Edge-Based Method and Gray-Based Method........................................................................................................................905
*Saurabh U. Saoji and Prachi Jaini*

Hiding the Trace of JPEG Compression History ..................................................................................................................................................909
*Hong Yang and Zhiping Zhou*

Resampling Tamper Detection Based on JPEG Double Compression ..............................................................................................................................914
*Dan Zhu and Zhiping Zhou*

A Method for Hand Gesture Recognition .................................................................................................................................................................919
*Jaya Shukla and Ashutosh Dwivedi*

Exposing Digital Image Forgeries from Near Duplicate Images ..............................................................................................................................924
*Snehal M. Khamankar and M.S. Madankar*

Image Segmentation Methods: A Survey Approach ........................................................................................................................................929
*Amit Singh Chauhan, Sanjay Silakari, and Manish Dixit*

Computer Vision Based Human-Computer Interaction Using Color Detection Techniques ...............................................................................................934
*Chetan Dhule and Trupti Nagrare*

Integrating Rule and Template-Based Approaches to Prosody Generation for Emotional BODO Speech Synthesis ................................................................................................................939
*Laba Kr. Thakuria, Purnendu Acharjee, Akalpita Das, and P.H. Thakdar*

A Sentence-Pitch-Contour Model for Indiginous Language (Galo) Using Vector Quantization (VQ) and Hidden Markov Model ................................................................................................................944
*Akalpita Das, Laba Kr. Thakuria, Purnendu Acharjee, and P.H. Thakdar*
Assamese Intonation Modeling for Speech Synthesis

Palash Dutta, Laba Kr. Thakuria, Akalpita Das, Purnendu Acharjee, and Pranhari Talukdar

Track J: Control Systems, Simulation, Power Systems, and Optimisation Techniques

Power Distribution System Load Flow Using Microsoft Excel

M.K.S. Sastry, Randy Roopchand, and Roshan Chhetri

Exact Loss Procurement for Distribution Franchisee in the Restructured Environment: To Promote Distribution Franchisee Implementation in India

Baidyanath Bag, Tripta Thakur, and Vijae Pande

Model Based Experimental Determination of Moisture Content in Oil-Paper Insulation System Using FDS Technique

Yogesh Yashwant Pundlik and Pradeep M. Nirgude

A Distinct Pseudo-random Carrier Modulation Approach for a Boost Converter

Anant Kumar Verma and Gagan Singh

Optimal Location and Sizing of SVC for Minimization of Power Loss and Voltage Deviation Using NSGA II

Shishir Dixit, Laxmi Srivastava, and Ganga Agnihotri

Test Case Generation for Object-Oriented Systems: A Review

Rajvir Singh

Dynamic Energy and Reserve Dispatch Solutions for Electricity Market with Practical Constraints: Intelligent Computing Technique

Aayush Shrivastava, Akanksha Bhatt, Manjaree Pandit, and Hari Mohan Dubey

Design and Development of Matlab Toolbox for State Estimation

M.K.S. Sastry, Rajiv Ramrattan, and P.V. Balasubrahmanyam

A Model Predictive Controller Using Multiple Linear Models for Continuous Stirred Tank Reactor (CSTR) and ITS Implementation Issue

Vivek Agarwal, Manish Gupta, Umesh Gupta, and Rahul Saraswat

Influence of Profile Error on the Bearing Characteristics of Hydrostatic Turntable

Ligang Cai, Pengwei Cui, Yongsheng Zhao, and Changqing Jing

Research and Realization of Media Node Method-MNM and Embedding Future Key Method-EFK to Avoid Selective Jamming

Junwei Du, Shuai Ding, and Yan Wan

Scheduling Algorithms Based on Resource Fragmentation for Advance Reservation Tasks

Bo Li, Yijian Pei, Hao Wu, Xian Zhao, and Bin Shen
Home Energy Audit: A Case Study of Phuentsholing, Bhutan ..........................1022
Roshan Chhetri, Kinley Wangchuk, and M.K.S. Sastry

Three Phase Shunt Active Filter Interfacing Renewable Energy Source with Power Grid ............................................................................................................1026
S. Dineshkumar and N. Senthilnathan

Track K: VLSI Design and Implementation of Digital Design Concepts

Thermal Aware Task Scheduling for Embedded Systems ............................................1032
Chanchal Paul, Biju Kranti, and Santanu Chattopadhyay

Via Minimization for Multi-layer Channel Routing in VLSI Design ..........................1036
Bhaskar Das, Ashim Kumar Mahato, and Ajoy Kumar Mahato

Design and Development of CMOS Image Sensor for Motion Detection & Localization ..................................................................................................................1040
Shraddha Moon and Trushna Deotale

A Novel PMOS Data Retention Leakage Power Reduction Design ..........................1045
Rohit Lorenzo and Saurabh Chaudhury

Networks on Chip: The New Trend of On-Chip Interconnection ...............................1050
Hridoy Jyoti Mahanta, Abhijit Biswas, and Md. Anwar Hussain

Investigation of Ternary Function Minimization .......................................................1054
Vikram Ghiye, Sharan Bonde, and Ashwinikumar Dhande

Seema M. Borawake and P.G. Chilveri

Performance and Evaluation of Loopback Virtual Channel Router with Heterogeneous Router for On-Chip Network .........................................................1065
Mamta P. Daf and Bharti B. Saynkar

A 3.1-10.6 GHz CMOS Two Stage Cascade Topology Low-Noise Amplifier for UWB System .........................................................................................................1070
Neelam Gautam, Manish Kumar, and Abhay Chaturvedi

Double Balanced Diode Ring Mixer for Ultra-wideband System .............................1074
Abhay Chaturvedi, Mithilesh Kumar, and R.S. Meena
Track L: Machine Learning, Software Modelling, and Intelligent Systems

Using Virtual Reference Tags to Improve the Accuracy of Active RFID-Based Positioning Systems ................................................................. 1078
  Saber Seyyedi, Behzad Akbari, Esmaeil Arab, Iraj Ramezani, and Milad Mahdavi

Integrating Machine Learning Techniques to Constitute a Hybrid Security System .......................................................................................... 1082
  Nikita Singh and Nidhi Chandra

Development of a Classification System for Quality Evaluation of Oryza Sativa L. (Rice) Using Computer Vision ............................................. 1088
  Niky K. Jain, S.O. Khanna, and Kavindra R. Jain

  Lingling Han and Xiaodong Li

The Analysis of Checkpoint Strategies for Large-Scale CFD Simulation in HPC System ...................................................................................... 1097
  Ren Xiaoguang, Xu Xinhai, Tang Yuhua, and Fang Xudong

Automation of HR Interview System Using JESS Inference Engine ............................................................................................................. 1102
  Kush Kumar, Abhay Kumar, Kumar Abhishek, and D.K. Singh

Blue Brain Technology: A Subway to Artificial Intelligence ...................................................................................................................... 1106
  Swati Sharma, Nitisha Payal, Ankur Kaushik, and Nitin Goel

Performance Appraisal of Learning Automata in Networks ......................................................................................................................... 1110
  Rohit Kumar Das, Banai Das, and Sudipta Roy

Digital Circuit Design Using Support Vector Machines ............................................................................................................................. 1114
  J. Manikandan and V.K. Agrawal

Hybrid Multi-level Cache Management Policy .............................................................................................................................................. 1119
  Krupal Chikhale and Urmila Shrawankar

DTMF Based Automation System with Reduction of Noise Using Goertzel DFT Estimation .................................................................................. 1124
  Afshan Mulla, Jaypal Baviskar, and Amol Baviskar

Traffic Signal Control Using Reinforcement Learning ...................................................................................................................................... 1130
  Namrata S. Jadhao and Ashish S. Jadhao

A Multiobjective Model for Energy Efficient QoS Provisioning Using Genetic Algorithm ................................................................................. 1136
  Sunita Prasad, Zaheeruddin, and D.K. Lobiyal

User and Device Tracking in Private Networks by Correlating Logs: A System for Responsive Forensic Analysis ............................................. 1142
  Swati Chaudhari, Hitendra Chauhan, S.S. Tomar, and Anil Rawat
