2014 International Conference on Teaching and Learning in Computing and Engineering

(LaTiCE 2014)

Kuching, Malaysia
11-13 April 2014
2014 International Conference on Teaching and Learning in Computing and Engineering

LaTiCE 2014

Table of Contents

Message from General Chair .............................................................................................................................. xi
Message from Technical Co-Sponsor ............................................................................................................... xii
Organising Committee ........................................................................................................................................ xiii
Program Committee ..........................................................................................................................................xiv

Track 1: Computing Education

Session I

First Year Computer Science and IT Students' Experience of Participation in the Discipline .............................................................. 1

Anne-Kathrin Peters, Anders Berglund, Anna Eckerdal, and Arnold Pears

The Effect of Gamification on Students with Different Achievement Goal Orientations .............................................................. 9

Lasse Hakulinen and Tapio Auvinen

Computers in Homes (CIH): Enabling Community Access to Internet and ICT? .............................................................. 17

Tony Omid Assadi and Sue Chard

Session II

Investigating Students' Reflective Thinking Level in Online Discussion Forum ...................................................................................... 25

Norhasyimah Hamzah and Jamalludin Harun

Web-Based Systems for Assisting PM Students Learn Financial Analysis Methods .................................................................................... 29

R.T. Hans, N.D. Chuene, C.K. Lepota, and M.V. Masuku

A Recommended ICT Curriculum for K-12 Education ...................................................................................... 33

Chiu-Fan Hu, Yu-Tzu Lin, Hui-Chi Chuang, and Cheng-Chih Wu
Impact of Cultural and Language Background on Learning Computer Science Concepts .................................................................37

Ismat Aldmour and Aletta Nylén

Session III

Software Architectures for Implementing Achievement Badges - Practical Experiences .................................................................41

Lassi Haaranen, Lasse Hakulinen, Petri Ihantola, and Ari Korhonen

The Design of a Computer-Supported Collaborative Learning Environment that Promotes Interaction .................................................................47

Nurbiha A. Shukor, Zaidatun Tasir, Norasykin Zaid, and Norazlina Ahmad

Virtual World for Collaborative Learning: A Review .................................................................52

Mohd Hishamuddin Abdul Rahman, Noraffandy Yahaya, and Noor Dayana Abd Halim

Video Based Learning Embedded with Cognitive Load Theory: Visual, Auditory, and Kinaesthetic Learners’ Perspectives .................................................................58

Norah Md Noor, Munirah Aini, and Nurul ‘Izzati Hamizan

Session IV

C++ or Python? Which One to Begin with: A Learner’s Perspective .................................................................64

Muhammad Ateeq, Hina Habib, Adnan Umer, and Muzammil Ul Rehman

Technological Aspects of E-Learning System in Malaysian Context .................................................................70

Nadia Parsazadeh, Rosmah Ali, and Norziha Megat Mohd Zainuddin

Instructional Scaffolding in Online Learning Environment: A Meta-analysis .................................................................74

Nurul Farhana Jumaat and Zaidatun Tasir

Collaborative Augmented Reality in Education: A Review .................................................................78

Danakorn Nincarean Eh Phon, Mohamad Bilal Ali, and Noor Dayana Abd Halim

Session V

Motivational and Influential Factors for Choice of CS Major: A Gender Aware Study .................................................................84

Hina Habib, Muhammad Ateeq, Adnan Umer, and Muzammil Ul Rehman

A Glimpse into the Cultural Situatedness of Computer Science: Some Insights from a Pilot Study .................................................................92

Anders Berglund and Neena Thota

Student Approach to Learning in Programming Courses among Industrial Mechatronics Engineering Technology Students .................................................................100

Norsyarizan Shahri, Roselainy Abdul Rahman, and Noor Hamizah Hussain

Application of the Pedagogical and Andragogical Model in Web-Based Learning Instruction Among Non-major Computer Science Students’ Learning Programming .................................................................106

Norah Md Noor, Jamalludin Harun, and Baharuddin Aris
Session VI
Understanding and Analysing Novice Programmer Interactions in a Facebook Programming Group ................................................................. 112
  Mercy Maleko, Margaret Hamilton, Daryl D'Souza, and Falk Scholer
Facebook as a Tool: Exploring the Use of Facebook in Teaching and Learning ......................................................................................... 120
  Mohd Nihra Haruzuan Mohamad Said, Lokman Mohd Tahir, and Mohd Fadzli Ali
Programming Course Design: Phenomenographic Approach to Learning and Teaching ............................................................................... 125
  Neena Thota
Viewpoints to ICT Practices and Hindrances from in Tanzanian Secondary Schools and Teacher Training Colleges: Focus on Classroom Teachers ................................................. 133
  Olivier Ufitese Muhoza, Matti Tedre, Naghmeh Aghaee, and Henrik Hansson

Poster Session
Supporting In-Class Learning with Asynchronous and Autonomous Viewing of Near Real-Time Lecture Videos .................................................. 141
  Jia-Ling Koh, Te-Chin Chu, and Greg C. Lee
Online Social Learning Model ......................................................................................................................................................... 143
  Nurul Izzanie Binti Adnan and Zaidatun Tasir
Pattern of Reflection in Learning for Predicting Students' Performance .................................................................................................. 145
  Siti Khadijah Mohamad and Zaidatun Tasir
Learning to Develop Learning and Teaching of CS: A Collaborative Example .......................................................................................... 147
  Anders Berglund, Arnold Pears, Ali Alagla, Nimir Salih, and Mohamed Shenify
The Growth of Applied Knowledge with Integration of Group Activity Possess Elements of Critical Thinking .......................................................... 149
  Norasykin Mohd Zaid and Nurul Izzati Hamizan

Track 2 : Engineering Education
Session I
Sustainable Construction - The Use of Case Studies in Civil Engineering Education ...................................................................................... 151
  Wael Elleithy and Lau Teck Leong
Confirming Self-Regulation Construct Items for Students Learning Statics .............................................................................................. 158
  Habibah Norehan Haron, Noor Hamizah Hussain, Kamilah Radin Salim, Rosmah Ali, and Hafizah Harun
Computing in Differential Equations with Mathematical Thinking Approach among Engineering Students ................................................................. 163
   Zaleha Binti Ismail, Fereshteh Zeynivandnezhad, Yudariah Binti Mohammad, and Eric David

Session II
Review Current Practical Skills Assessment in Machining Course Based on Psychomotor Domain ................................................................. 171
   Azri Bin Azman, Awaluddin Bin Mohamed, and Morina Binti Abdullah
Contextual Knowledge in Three Dimensional Computer Aided Design (3D CAD) Modeling: A Literature Review and Conceptual Framework ......................................................... 176
   Mohd Fahmi Adnan, Mohd Fadzil Daud, and Muhammad Sukri Saud
Conceptual Framework for Development of an Instrument to Measure Students' CNC Machining Skill ................................................................. 182
   Shahril Bin Noh, Mohd Yusof bin Md Daud, and Rosmah binti Ali
Scholarship of Teaching and Learning: How Does It Perceive by Engineering Lecturers? ................................................................. 186
   Hadijah Jaffri, Narina A. Samah, and Lokman Mohd Tahir

Session III
Engaging Integrated Approach in Designing Engineering Curricula ......................................................................................................... 190
   Mohd Zaki Kamsah and Rohaya Talib
Industry Involvement in Undergraduate Research Project for Chemical Engineering (Biotechnology) Programme ......................................................... 196
   Norazwina Zainol, Sumaiya Zainal Abidin, and Noraziah Abu Yazid
Green Initiatives towards Sustainable Product Design at Kolej Kemahiran Tinggi Mara ......................................................................................................... 201
   Azmin Bin Ariffin, Norihan Abu-Hassan, and Kamilah Radin Salim
Review of Learning Models for Production Based Education Training in Technical Education ......................................................................................................... 206
   Mohd Halimudin Mohd Isa Hamid, Maslin Masrom, and Kamilah Radin Salim

Session IV
Addressing the Needs of Gaming Approach in Hazard Identification Training ......................................................................................................... 212
   Norhazren Izatie Mohd and Kherun Nita Ali
Mathematical Competency of Engineers and Engineering Students ......................................................................................................... 216
   Soheila Firouzian, Zaleha Ismail, Roselainy Abd Rahman, Yudariah Mohammad Yusof, Hamidreza Kashefi, and Fariba Firouzian
Computer Science & Engineering Curricula and Ethical Development ......................................................................................................... 220
   Farooq Ahmad
An Exploratory Study: Problem Solving Process in a Problem/Project-Based Laboratory (PBLab) Course ................................................................. 226

Nur Ayuni Shamsul Bahri, Naziha Ahmad Azli, and Narina Abu Samah

Track 3 : Higher Education

Session I
What are Teachers Concerned about in Implementing Digital Collaboration? ........................................................................................................ 234

Mei-Wen Chen, Cheng-Chih Wu, and Greg C. Lee

Comparison of Pedagogical Content Knowledge between Expert and Novice Lecturers in Teaching and Learning Process ...................................... 240

Nor Hasniza Ibrahim, Johari Surif, Abdul Halim Abdullah, and Nur Amira Syafillin Sabtu

Session II
The Implementation of Pneumatic Training Instrument in Higher Learning Institutions: Analysis of Two Institutions ........................................... 247

Huzaimi Bin A. Hamid and Marlia Binti Puteh

Postgraduate Supervision: Supervisors versus Students .......................................................................................................................... 251

Fatin Aliah Phang, Nor Haniza Sarmin, Siti Norziahidayu Amzee Zamri, and Naomie Salim

Making Students’ Thinking Explicit: Learning What They Know about Functions .......................................................................................... 256

Yudariah Mohammad Yusof, Mohd. Fauzi Bin Othman, and Aisha Mahmood

Problems in Learning Movement Skills among Students in Higher Education ...................................................................................................... 262

Adjah Naqkiah Mazlan, Jamalludin Harun, and Zainal Abidin Zainuddin

Session III
E-Learning Readiness: A Literature Review ........................................................................................................................................ 267

Hisyamuddin Hashim and Zaidatun Tasir

Four Feed-Forward Principles Enhance Students’ Perception of Feedback as Meaningful .................................................................................. 272

Arnold Pears, James Harland, Margaret Hamilton, and Roger Hadgraft

C.P. Liew, M. Puteh, and S. Mohammad

”The Beauty of I-Bonding” Website Development Based on Needham 5 Phase Constructivism Model ........................................................................ 283

Johari Surif, Nor Hasniza Ibrahim, Abdul Halim Abdullah, and Fatimah Sarah Yaacob
Session IV

Students' Social Presence in Online Learning System ................................................................. 289
  Nur Jannah Binti Jamil and Zaidatun Tasir

Effects of CSCL Learning Approach for Students' Knowledge Construction
Process in School Based Assessment (SBA) Environment .................................................. 293
  Suhaizal Hashim and Jamalludin Harun

Using E-Readers in Education - Challenges and Opportunities ........................................... 299
  N.D. Chuene, C.K. Lepota, and R.T. Hans

An Experience with a Peer Assisted Teaching Scheme .......................................................... 306
  Daryl D'Souza, Astrid Bauers, Angela Carbone, and Bella Ross

Session V

Effect of Educational Software on Students' Achievement Based
on Cognitive Styles .................................................................................................................. 311
  Hasnah Mohamed, Zaidatun Tasir, and Baharuddin Aris

The Effects of Van Hiele's Phase-Based Learning on Students' Geometric
Achievement and Attitude towards Geometry ...................................................................... 317
  Abdul Halim Abdullah, Nor Hasniza Ibrahim, Johari Surif, and Effandi Zakaria

Author Index .................................................................................................................................. 325
