2014 Tenth European Dependable Computing Conference

(EDCC 2014)

Newcastle, United Kingdom
13-16 May 2014
2014 Tenth European Dependable Computing Conference
EDCC 2014

Table of Contents

Message from General Chair ..................................................................................................................... ix
Message from Honorary Chair .................................................................................................................. x
Message from Programme Chair ............................................................................................................. xi
Organisation Committee ............................................................................................................................ xii
Program Committee .................................................................................................................................. xiii
Steering Committee ................................................................................................................................... xiv
External Reviewers .................................................................................................................................... xv

History of EDCC, the European Dependable Computing Conference .......................................................... xvi

Session 1: Distributed Systems and Networking

An Autonomic Implementation of Reliable Broadcast Based on Dynamic Spanning Trees ................................................................. 1

Improving the Kuo-Lu-Yeh Algorithm for Assessing Two-Terminal Reliability .............................................. 13

*Minh Lê, Max Walter, and Josef Weidendorfer*

On Probabilistic Analysis of Disagreement in Synchronous Consensus Protocols ......................................................... 23

*Negin Fathollahnejad, Emilia Villani, Risat Pathan, Raul Barbosa, and Johan Karlsson*

Deviation Estimation between Distributed Data Streams .............................................................................. 35

*Emmanuelle Anceaume and Yann Busnel*

From Resilient Computing Architectural Concepts to Wireless Sensor Network-Based Applications (Short Paper) ................................................................. 46

*Miruna Stoicescu, Jean-Charles Fabre, Matthieu Roy, and Animesh Pathak*
Session 2: Online Fault and Failure Management

Mining Invariants from SaaS Application Logs (Practical Experience Report) .......................................................50
  Santonu Sarkar, Rajeshwari Ganesan, Marcello Cinque, Flavio Frattini, Stefano Russo, and Agostino Savignano

Towards a Dependability Control Center for Large Software Landscapes
(Short Paper) ..........................................................................................................................................................58
  Florian Fittkau, André Van Hoorn, and Wilhelm Hasselbring

Modified Hamming Codes to Enhance Short Burst Error Detection in Semiconductor Memories (Short Paper) ..........................................................62
  Luis-J. Saiz-Adalid, Pedro Gil, J.-Carlos Baraza-Calvo, Juan-Carlos Ruiz, Daniel Gil-Tomás, and Joaquin Gracia-Morán

Increasing Dependability of Component-Based Software Systems by Online Failure Prediction (Short Paper) .............................................................66
  Teerat Pitakrat, André van Hoorn, and Lars Grunske

Session 3: Resilient Systems Modelling

Do I Need to Fix a Failed Component Now, or Can I Wait Until Tomorrow? ..............................................................70
  Muffy Calder and Michele Sevegnani

A DSL-Supported Workflow for the Automated Assembly of Large Stochastic Models ................................................................................................82
  Leonardo Montecchi, Paolo Lollini, and Andrea Bondavalli

Markov Modeling of Availability and Unavailability Data .........................................................................................94
  Peter Buchholz and Jan Kriege

Software Diversity as a Measure for Reducing Development Risk .............................................................................106
  Peter Popov, Andrey Povyakalo, Vladimir Stankovic, and Lorenzo Strigini

Session 4: Testing, Fault-Injection and Benchmarking

On the Soundness of Silence: Investigating Silent Failures Using Fault Injection Experiments ..................................................118
  Erik Van Der Kouwe, Cristiano Giuffrida, and Andrew S. Tanenbaum

Gaining Confidence on Dependability Benchmarks’ Conclusions through "Back-to-Back" Testing (Practical Experience Report) ......................................................................................................130
  Miquel Martínez, David De Andrés, and Juan-Carlos Ruiz

Binary-Level Fault Injection for AUTOSAR Systems (Short Paper) ........................................................................138
  Mafijul Md. Islam, Nithilan Meenakshi Karunakaran, Johan Haraldsson, Fredrik Bernin, and Johan Karlsson
Session 5: Compilation
A Framework for Creating Binary Rewriting Tools (Short Paper) .............................................................142
    Jason D. Hiser, Anh Nguyen-Tuong, Michele Co, Benjamin Rodes,
    Matthew Hall, Clark L. Coleman, John C. Knight, and Jack W. Davidson
A Study of the Impact of Bit-Flip Errors on Programs Compiled with Different Optimization Levels .............................................................146
    Behrooz Sangchoolie, Fatemeh Ayatollahi, Roger Johansson, and Johan Karlsson

Session 6: Safety-Critical Systems
Application of Statistical Testing to the Data Processing and Control System for the Dungeness B Nuclear Power Plant (Practical Experience Report) .............................................................158
    Helen Gough and Silke Kuball
On a Modeling Approach to Analyze Resilience of a Smart Grid Infrastructure .............................................................166
    Silvano Chiaradonna, Felicita Di Giandomenico, and Nadir Murru
A Layered Model for Structuring Automotive Safety Arguments (Short Paper) .............................................................178
    John Birch, Roger Rivett, Ibrahim Habli, Ben Bradshaw, John Botham,
    Dave Higham, Helen Monkhouse, and Robert Palin

Session 7: Space and Aeronautics
On MILS I/O Sharing Targeting Avionic Systems .............................................................182
    Kevin Müller, Georg Sigl, Benoit Triquet, and Michael Paulitsch
Towards a Resilience Benchmarking Description Language for the Context of Satellite Simulators (Short Paper) .............................................................194
    Denise Rotondi Azevedo, Ana Maria Ambrosio, and Marco Vieira
An Approach for Assessing the Impact of Dependability on Usability: Application to Interactive Cockpits .............................................................198
    C. Fayollas, C. Martinie, P. Palanque, Y. Deleris, J.-C. Fabre, and D. Navarre

Session 8: Security and Privacy
Speculative Software Modification and its Use in Securing SOUP .............................................................210
    Benjamin D. Rodes and John C. Knight
Geo-Location Inference Attacks: From Modelling to Privacy Risk Assessment (Short Paper) .............................................................222
    Miguel Nuñez del Prado Cortez and Jesús Friginal
Stochastic Game-Based Analysis of the DNS Bandwidth Amplification Attack Using Probabilistic Model Checking .............................................................226
    Tushar Deshpande, Panagiotis Katsaros, Scott A. Smolka, and Scott D. Stoller
To B or not to B: Blessing OS Commands with Software DNA Shotgun
Sequencing .................................................................................................................................................238

Anh Nguyen-Tuong, Jason D. Hiser, Michele Co, Nathan Kennedy,
David Melski, William Ella, David Hyde, Jack W. Davidson, and John C. Knight

Author Index ..................................................................................................................................................250
