Contents

Organizing Committee

Preface

Atmospheres

Advanced On-Site Hydrogen Generation Provides Enhanced Capabilities.....1

Dave Wolff¹, Randy Gorman², Mike Wood², and Adam Herringshaw²

(1) Proton OnSite, Wallingford, CT, USA

(2) Riverhawk Company, New Hartford, NY, USA

Case Hardening Using Nitrogen-Based Atmospheres.....5

Zbigniew Zurecki¹ and Karl-Michael Winter²

(1) Air Products & Chemicals, Inc., Allentown, PA, USA

(2) Process-Electronic GmbH, Heiningen, Germany

Understanding Atmosphere in Carburizing Applications Using Simulation and Real-Time Carbon Diffusion.....9

Jim Oakes, Super Systems, Inc., Cincinnati, OH, USA

Brazing

Dynamic Fluoride Ion Cleaning as A Pre-Brace Process.....12

Robert E. Kornfeld

Hi-Tech Furnace Systems, Inc., Shelby Township, MI, USA

Welding Behavior of Molybdenum Tubing With and Without Lanthanum Oxide.....N/A

Todd Leonhardt, Rhenium Alloys Inc., North Ridgeville, OH, USA

Cryogenics

Comparisons of Deep Cryogenically Treated Brake Rotors versus Untreated Rotors Using Laboratory Tests and Practical Tests.....15

Frederick (Rick) J. Diekman

Controlled Thermal Processing, Inc., Antioch, IL, USA

Cryogenic Non Destructive Testing (NDT) and Material Treatment Cryogenic Transition Detection.....18

Victor F. Sloan

Victor Aviation Service, Inc., Palo Alto, CA, USA

New Frontiers in Metal Treatment—Deep Cryogenic Treating of Metals and Other Materials.....22

Rozalia Papp, Air Liquide U.S. LP, Houston, TX, USA

Emerging Technologies

Austempering versus Quenching and Tempering—Impact Behavior of SAE 4140 and SAE O1 Steels.....	26
<i>Lauralice de C. F. Canale¹, José E. Nucci¹; Jan Vatauvuk², and George E. Totten³</i>	
<i>(1) University of São Paulo, São Carlos, SP, Brazil</i>	
<i>(2) Universidade Presbiteriana Mackenzie, São Paulo, SP, Brazil</i>	
<i>(3) Portland State University, Portland, OR, USA</i>	
Calculate Allowable Stress—Quit Factor of Safety.....	29
<i>Nori VSN Murthy, Independent Researcher, India</i>	
Delta Ferrite in Heat Treated Bolts—Characterization and Consequences.....	36
<i>Robson Bussoloti¹, George E. Totten², and Lauralice de C. F. Canale¹</i>	
<i>(1) Escola de Engenharia de São Carlos, São Carlos, SP, Brazil</i>	
<i>(2) Portland State University, Portland, OR, USA</i>	
Is There A Viable Alternative to Refractory Ceramic Fibers?.....	40
<i>Chris Johnson and William Patton</i>	
<i>Thermal Ceramics business of Morgan Advanced Materials, Augusta, GA, USA</i>	
Self-Heating of Powder Materials during High-Temperature Drying.....	44
<i>Muhammad M. Rafique Qureshi</i>	
<i>Chilworth Technology, Inc., Princeton, NJ, USA</i>	
The Effects of Tempering on The Hardness Profiles in Carburized Steels.....	49
<i>Lei Zhang, Xiaoqing Cai, Mei Yang, and Richard D. Sisson, Jr</i>	
<i>Worcester Polytechnic Institute, Worcester, MA, USA</i>	

Equipment Innovations

Batch Integral Quench Furnace Innovations—Heating, Quenching, Automation.....	53
<i>Ralph P. Poor, Surface Combustion, Inc., Maumee, OH, USA</i>	
Bright Tempering—Achieving High Quality Appearance During Tempering.....	55
<i>Aymeric Goldsteinas and Craig Moller, Ipsen, Inc., Cherry Valley, IL USA</i>	
Dual Processes' Normalize and Anneal Temperature Uniformities in Box Furnaces.....	58
<i>William J. Bernard, III, Surface Combustion, Inc., Maumee, OH, USA</i>	
Heat Treating with Diode Lasers.....	60
<i>Mark Daichendt¹ and Wolfgang Todt²</i>	
<i>(1) Laserline GmbH, Muelheim-Kaerlich, Germany</i>	
<i>(2) Laserline, Inc., Santa Clara, CA, USA</i>	

Investigation on Improving The Life of Immersion Burner Tubes in Industrial Furnaces.....	63
<i>R. Krishna Sabareesh, P. Ragupathy, Sudhir Malavade, Shishir Desai, Rajesh Mohite, Devendra Patil, Suresh Gulavani, and Joseph Lopes Tata Steel Global Wire Division, Maharashtra, India</i>	
Monitoring, Understanding, and Reducing Energy in Heat Treat.....	66
<i>Michael A. Pershing, David M. Miller, and Kinyon Gorton Caterpillar Inc., East Peoria, IL, USA</i>	
Trial to Determine The Suitability of The New Heat Treat Facility at Corry Forge Company for Processing Blowout Preventer Bodies.....	N/A
<i>Jared C. Alexander, Corry Forge Company, Corry, PA, USA</i>	

Global Issues

Environmental Friendly Controlled Cooling of Forgings—Potential Replacement to Normalizing and Iso-Annealing.....	70
<i>Udayan Pathak and Vikas Shingade Tata Motors Limited Pune, India</i>	
Reducing Heat Treat Product Issues in The Global Automotive Heat Treat Supply Chain.....	74
<i>Teri Buck¹, Suranjeeta Dhar², Medina Kaknjo², Philip Mikula³ (1) TRW Automotive, Livonia, MI, USA (2) Ford Motor Company, Allen Park, MI, USA (3) P.C. Mikula Consulting LLC, Grosse Point Woods, MI, USA</i>	
Web Based Wireless Heat Treating Services.....	78
<i>Tom Decker¹ and Eric Sjerne² (1) Thermal Technologies International Inc., Claremore, OK, USA (2) IRISNDT Corp., Alberta, Canada</i>	

Induction Heating

Control Systems for Induction Heat Treating—The Obsolete and Newest Designs.....	81
<i>Fred R. Specht Ajax Tocco Magnethermic Corp., Warren, OH, USA</i>	
Enhancing Induction Coil Reliability.....	90
<i>K. Kreter, R. Goldstein, C. Yakey, and V. Nemkov Fluxtrol Inc., Auburn Hills, MI, USA</i>	
In-Line Induction Heat Treating of Tube, Pip, and Bar Products.....	96
<i>Lesley D. Frame, Thermatool Corp., East Haven, CT, USA</i>	

Influence of Geometric Parameters on Residual Stress in Hollow Cylindrical Parts Subjected to Induction Surface Hardening.....	100
<i>Dmitry Ivanov, Leif Markegård, and John Inge Asperheim</i> <i>EFD Induction a.s., Skien, Norway</i>	

Innovations in Soft Magnetic Composites and Their Applications in Induction Systems.....	104
<i>R. Ruffini, N. Vyshinskaya, V. Nemkov, R. Goldstein, and C.J. Yakey</i> <i>Fluxtrol Inc., Auburn Hills, MI, USA</i>	

Novel User-Friendly Computer Modeling Software for Induction Heating and Induction Heat Treating.....	110
<i>Valery Rudnev, Inductoheat, Inc., Madison Heights, MI, USA</i>	

Effect of Spray Quenching Rate on Distortion and Residual Stresses during Induction Hardening of A Full-Float Truck Axle.....	113
<i>Zhichao (Charlie) Li¹, B. Lynn Ferguson¹, Valentin Nemkov², Robert Goldstein², John Jackowski², and Greg Fett³</i> <i>(1) Dante Software, Cleveland, OH, USA</i> <i>(2) Fluxtrol, Inc., Auburn Hills, MI, USA</i> <i>(3) Dana Corporation, Maumee, OH, USA</i>	

Process Innovation to Eliminate Cracking Problems in Large Diameter Parts with Nonuniform Wall Thickness.....	125
<i>Zhichao (Charlie) Li and B. Lynn Ferguson</i> <i>Dante Software, Cleveland, OH, USA</i>	

Materials Selection for Induction Hardening Processes.....	129
<i>Fred R. Specht, Ajax-Tocco-Magnethermic, Warren, OH, USA</i>	

Masters Series

The Jominy End Quench and Effect of Austenitizing on The Hardenability and Performance of Quenched Steels.....	134
<i>George Krauss, Colorado School of Mines, Golden, CO, USA</i>	

Nitriding & Carburizing

Effect of Plasma Nitriding on Fatigue and Wear Behavior of AISI4330 Low Alloy Steel.....	137
<i>Jagdish Sherkar¹, Rajkumar Singh¹, Raju Kadam¹, Ganesh Jawale¹, and Ram Chandra Prasad²</i> <i>(1) Bharat Forge Ltd., Maharashtra State, India</i> <i>(2) Indian Institute of Technology Bombay, Maharashtra State, India</i>	

A Practical Approach to Controlling Gas Nitriding and Ferritic Nitrocarburizing (FNC) Processes.....	141
<i>Stephen Thompson, Super Systems, Inc., Cincinnati, OH, USA</i>	

An Investigation of Case-Core Separation in Carburized Steels.....	144
<i>Sarah Byrnes, Claire A. Campbell, and Timothy De Hennis</i> <i>The Boeing Company, Philadelphia, PA, USA</i>	
Analysis and Experience using Process Modeling for Developing New and Corrective Heat Treat Schedules for Deep Case Carburizing.....	154
<i>Andrew M. Freborg and B. Lynn Ferguson</i> <i>Dante Software, Cleveland, OH, USA</i>	
Influence of Steel Surface Roughness on The Nitrogen Uptake during Gaseous Nitriding Process.....	158
<i>D. Koshel and J. Kalucki, Nitrex Metal Inc., QC, Canada</i>	
Modeling The Carbonitriding of Steel.....	162
<i>Mei Yang, Xiaolan Wang, Yuan Xu, Liang He, and Richard D. Sisson Jr.</i> <i>Worcester Polytechnic Institute, Worcester, MA, USA</i>	
Modeling The Gas Nitriding Process for Steels.....	166
<i>Mei Yang, Xiaolan Wang, and Richard. D. Sisson Jr.</i> <i>Worcester Polytechnic Institute, Worcester, MA, USA</i>	
Ferritic Nitrocarburizing Processes and Applications.....	170
<i>Benjamin T. Bernard, Surface Combustion, Inc., Maumee, OH, USA</i>	
Numerical Simulation Advances in Gear Manufacturing Processes.....	173
<i>James B. Miller, Ravi Shankar, and John Walters</i> <i>Scientific Forming Technologies Corp., Columbus, OH, USA</i>	

Processes and Applications

Advances in Eddy Current Verification of Heat Treat Processes.....	177
<i>Dan DeVries, Criterion NDT, Auburn, WA, USA</i>	
Banding Effect on The Hardenability of AISI 4340 Steel Bar—Case Study.....	181
<i>Jan Vatauvuk¹, Antonio Augusto Couto¹, Silvio André de Lima Pereira², Silas Aragão de Sousa², and Lauralice de C. F. Canale³</i> <i>(1) Universidade Presbiteriana Mackenzie, SP, Brasil</i> <i>(2) Mahle Metal Leve S.A. Centro Tecnológico, SP, Brasil</i> <i>(3) Escola de Engenharia de São Carlos, SP, Brasil</i>	
Evaluation of A New Alloy (PremoMet) for Seamless Rings Application.....	185
<i>Octavio Covarrubias-Alvarado¹, Arisbeth Sias-Chacon¹, and Alberto Perez-Unzueta²</i> <i>(1) Frisa Forjados SA de CV, Nuevo Leon, Mexico</i> <i>(2) Universidad Autonoma de Nuevo Leon, Nuevo Leon, Mexico</i>	

Improvement in Mechanical Properties of Austempered Ductile Iron (ADI) by Cryogenic Treatment.....	189
<i>Susil K. Putatunda¹, Saranya Panneerselvam¹, Codrick J Martis¹, Frederick Diekman², and Rozalia Papp³</i>	
<i>(1) Wayne State University, Detroit, MI, USA</i>	
<i>(2) Controlled Thermal Processing Inc., Park City, IL, USA</i>	
<i>(3) Air Liquide US LP, Countryside, IL, USA</i>	
Improving New and Existing Heat Treat Processes.....	193
<i>Joe Clarke, Invensys Eurotherm, Ashburn, VA, USA</i>	
Localized Surface Modification on 1018 Low Carbon Steel by Electrolytic Plasma Process and its Impact on Corrosion Behavior.....	197
<i>Jiandong Liang, Shengmin Guo, and Muhammad A. Wahab</i>	
Modeling Precipitation Kinetics during Heat Treatment with Calphad-Based Tools.....	206
<i>Kaisheng Wu¹, Paul Mason¹, Gustaf Sterner², and Qing Chen²</i>	
<i>(1) Thermo-Calc Software Inc., McMurray, PA, USA</i>	
<i>(2) Thermo-Calc Software AB, Stockholm, Sweden</i>	
Novel Method of Removal and Tightening of Bolts.....	210
<i>Tom Decker¹ and Eric Sjerve²</i>	
<i>(1) Thermal Technologies International Inc., Claremore, OK, USA</i>	
<i>(2) IRISNDT Corp., AB, Canada</i>	
Protective Atmospheres, Measurement Technologies, and Troubleshooting Tools.....	213
<i>Damian Bratcher, Super Systems, Inc., Cincinnati, OH, USA</i>	
How important is Accuracy in Today's World! Technology and Improvements in Analog and Digital Control.....	217
<i>Steve Miller, Invensys Eurotherm, Ashburn, VA, USA</i>	
Technology to Connect and Enhancements to Improve.....	220
<i>Chris Mooney, Invensys Eurotherm, Ashburn, VA, USA</i>	

Quenching and Cooling

Characterizing Water Quenching Systems with A Quench Probe.....	224
<i>B. Lynn Ferguson, Zhichao Li, and Andrew M. Freborg</i>	
<i>Deformation Control Technology, Inc., Cleveland, OH, USA</i>	
Agitated Quench Heat Transfer—An Experimental Characterization.....	228
<i>Andrew L. Banka, William H. Newsome, and Jeffrey D. Franklin</i>	
<i>Airflow Sciences Corp., Livonia, MI, USA</i>	
Comparison of Nozzle versus Impeller Agitation in Quench Systems.....	232
<i>Andrew L. Banka and Tiffany M. Lee</i>	
<i>Airflow Sciences Corp., Livonia, MI, USA</i>	

Design and Optimization of Fixture for High Pressure Gas Quenching of Transmission Components.....	236
<i>Junsheng Wang¹, Xuming Su¹, Mei Li¹, Ronald Lucas², and William Dowling²</i>	
<i>(1) Ford Research and Advanced Engineering Lab, Dearborn, MI, USA</i>	
<i>(2) Powertrain Manufacturing Engineering, Livonia, MI, USA</i>	
Development of Quench Tank Agitation Design Using CFD Modeling.....	241
<i>Andrew L. Banka¹, John D. Nitz¹, and Jeffery Nystrom²</i>	
<i>(1) Airflow Sciences Corp., Livonia, MI, USA</i>	
<i>(2) Corry Forge Company, Corry, PA, USA</i>	
Fixture Hardening of Large Components.....	245
<i>Gerd Müller-Laessig</i>	
<i>HEESS GmbH & Co KG, Lampertheim, Germany</i>	
Flexible Controlled Atmosphere Hardening Processes Utilizing Atmosphere Furnaces and Salt Quenching Systems.....	249
<i>Charles Hartwig¹ and John W. Gottschalk²</i>	
<i>(1) Therm-Tech of Waukesha, Inc., Waukesha, WI, USA</i>	
<i>(2) Surface Combustion, Inc., Maumee, OH, USA</i>	
Numerical Investigation of Immersion Quenching Process for Cast Aluminum Parts Using An Eulerian Multi-Fluid Approach.....	251
<i>R. Kopun¹, D. Greif¹, Z. Kovačič¹, and R. Tatschl²</i>	
<i>(1) AVL – Advance Simulation Technology d.o.o., Maribor, Slovenia</i>	
<i>(2) AVL List GmbH, Graz, Austria</i>	
The Mechanism of Quench Oil Oxidation.....	255
<i>D. Scott MacKenzie</i>	
<i>Houghton International, Valley Forge, PA, USA</i>	
Progress on The Development of A Comprehensive Heat Transfer Model for Industrial Liquid Quenching Processes.....	259
<i>Jeffrey Franklin, Andrew Banka, and William Newsome</i>	
<i>Airflow Sciences Corp., Livonia, MI, USA</i>	
Redefining Quenching Technology.....	265
<i>Aymeric Goldsteinas and Jake Hamid, Ipsen, Inc., Cherry Valley, IL, USA</i>	
Some New Phenomena Discovered During Immersion of Steel Parts Into Liquid Quenchants.....	269
<i>Nikolai I. Kobasko, IQ Technologies Inc., Kyiv, Ukraine</i>	
Vacuum Technology	
In Situ Oxidation of Steels as an Effective and Economical Pretreatment for Uniform and Consistent Vacuum Gas Nitriding Results.....	N/A
<i>Trevor M. Jones, Solar Atmospheres Inc., Souderton, PA, USA</i>	

Modeling Gas and Low Pressure Carburizing of Steel.....	273
<i>Xiaolan Wang, Mei Yang, Yingying Wei, Lei Zhang, Liang He, and Richard D. Sisson, Jr. Worcester Polytechnic Institute, Worcester, MA, USA</i>	
Modern Heat Treatment of Large Dies in HPGQ Vacuum Furnaces.....	277
<i>Maciej Korecki¹, Jozef Olejnik¹, Piotr Kula², Emilia Wolowiec² (1) SECO/Warwick S.A., Swiebodzin, Poland (2) Lodz University of Technology, Lodz, Poland</i>	
Synchronized Heat Treatment for Totally Integrated Manufacturing-Lines.....	279
<i>Volker Heuer and Klaus Loeser ALD Vacuum Technologies GmbH, Hanau, Germany</i>	
Vacuum and Atmosphere Heat Treating Overview.....	283
<i>Josh McCaughey, C.I. Hayes, Cranston, RI, USA</i>	
Considering Emissivity Factors of A Workload When Projecting Heating Rates in a Vacuum Furnace.....	285
<i>Real Fradette and Trevor Jones Solar Manufacturing, Souderton, PA, USA</i>	
Vacuum Tempering at Higher Pressures.....	289
<i>Ralph P. Poor, Surface Combustion, Inc., Maumee, OH, USA</i>	
Welding Behavior of Molybdenum Tubing with and without Lanthanum Oxide.....	291
<i>Todd Leonhardt</i>	
Trial to Determine the Suitability of the New Heat Treat Facility at Corry Forge Company for Processing Blowout Preventer Bodies.....	295
<i>Jared C. Alexander</i>	
In Situ Oxidation of Steels as an Effective and Economical Pretreatment for Uniform and Consistent Vacuum Gas Nitriding Results.....	304
<i>Trevor M. Jones</i>
