2014 IEEE/ION Position, Location and Navigation Symposium

(PLANS 2014)

Monterey, California, USA
5-8 May 2014

Pages 1-711
# Table of Contents

IEEE/ION PLANS 2014 proceedings are highlighted in yellow

## High-Performance Inertial Sensor Technologies

<table>
<thead>
<tr>
<th>Title</th>
<th>Authors</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>New Generation of High Performance/High Reliability MEMS Accelerometer for Harsh Environment</strong></td>
<td>F. Rudolf, S. Gonseth, R. Brasson, P. Krebs, Colbrys (Switzerland) Ltd, Switzerland</td>
<td>7 - 11</td>
</tr>
<tr>
<td><strong>A Capacitive MEMS Accelerometer Readout with Concurrent Detection and Feedback Using Discrete Components</strong></td>
<td>Y. Terzioglu, METU-MEMS Research and Application Center, &amp; Middle East Technical University, Turkey; S.E. Alper, METU-MEMS Research and Application Center, Turkey; K. Azin, Middle East Technical University, Turkey; T. Akin, METU-MEMS Research and Application Center &amp; Middle East Technical University, Turkey</td>
<td>12 - 15</td>
</tr>
<tr>
<td><strong>Simulation of Stress Effects on Mode-Matched MEMS Gyroscope Bias and Scale Factor</strong></td>
<td>E. Tarab, T. Mukherjee, G.K. Fedder, Carnegie Mellon University</td>
<td>16 - 20</td>
</tr>
<tr>
<td><strong>A New Integrated Gaussian-Markov Process Model for Precision Shipboard Transfer Alignment</strong></td>
<td>W. Wu, S. Qin, X. Wang, Z. Huang, D. Zhan, National University of Defense Technology, China</td>
<td>21 - 26</td>
</tr>
</tbody>
</table>

## GNSS Atmospheric Effects and Mitigation

<table>
<thead>
<tr>
<th>Title</th>
<th>Authors</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Comparative Studies of High-latitude and Equatorial Ionospheric Scintillation Characteristics of GPS Signals</strong></td>
<td>Y. Jiao, Y. Morton, S. Taylor, Miami University (Ohio)</td>
<td>37 - 42</td>
</tr>
<tr>
<td><strong>Triple Frequency GPS Signal Tracking During Strong Ionospheric Scintillations Over Ascension Island</strong></td>
<td>M. Carroll, Y. Morton, Miami University (Ohio); E. Vazande, Air Force Research Laboratory</td>
<td>43 - 49</td>
</tr>
<tr>
<td><strong>Practical Simulation of GNSS Signals in the Presence of Ionospheric Scintillation</strong> (Best Paper in Track B)</td>
<td>F.D. Nunes, Instituto de Telecomunicacoes and Instituto Superior Técnico, Portugal; F.M.G. Sousa, Instituto de Telecomunicacoes and Instituto Superior de Engenharia de Lisboa, Portugal</td>
<td>50 - 58</td>
</tr>
<tr>
<td><strong>Extending Integration Time for Galileo Tracking Robustness Under Ionosphere Scintillation</strong></td>
<td>N. Kassabian, Politecnico di Torino, Italy; Y. Morton, Miami University (Ohio)</td>
<td>59 - 72</td>
</tr>
<tr>
<td><strong>Design of a Robust Receiver Architecture for Scintillation Monitoring</strong></td>
<td>M. Susi, M. Aquino, University of Nottingham, UK; R. Romero, F. Dovis, Politecnico di Torino, Italy; M. Andreotti, Novatel, Inc., Canada</td>
<td>73 - 81</td>
</tr>
<tr>
<td><strong>Simulation Study of the Effect of Orbital Errors on Open Loop Tracking in GPS Radio Occultation</strong></td>
<td>B. Han, G. Erry, K.S. Low, Nanyang Technological University, Singapore; J. Morton, Miami University (Ohio); Y-F. Tsai, Nanyang Technological University, Singapore</td>
<td>82 - 86</td>
</tr>
<tr>
<td><strong>A COMPASS Ionospheric Delay Grid Correction Algorithm for China</strong></td>
<td>X. Zhang, H. Yuan, M. Sun, Y. Gong, Academy of Opto-Electronics, Chinese Academy of Sciences, China</td>
<td>87 - 94</td>
</tr>
<tr>
<td><strong>Correction Combination of Compact Network RTK Considering Tropospheric Delay Variation Over Height</strong></td>
<td>J. Song, C. Kee, Seoul National University, South Korea; B. Park, Sejong University, South Korea; H. Park, S. Seo, Agency for Defense Development, South Korea</td>
<td>95 - 101</td>
</tr>
</tbody>
</table>

## Environmental Features and Novel Navigation Sensors

<table>
<thead>
<tr>
<th>Title</th>
<th>Authors</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>The Uses of Ambient Light for Ubiquitous Positioning</strong></td>
<td>J. Liu, Y. Chen, A. Kaakkola, T. Hakala, J. Hyypia, L. Chen, Finnish Geodetic Institute, Finland; J. Tang, Wuhan University, China; R. Chen, Texas A&amp;M University Corpus Christi, USA; H. Hyypia, Aalto University, Finland</td>
<td>102 - 108</td>
</tr>
<tr>
<td><strong>Knowledge-based Indoor Positioning Based on LiDAR Aided Multiple Sensors System for UGVs</strong></td>
<td>Y. Chen, J. Liu, A. Kaakkola, J. Hyypia, L. Chen, Finnish Geodetic Institute, Finland; H. Hyypia, Aalto University, Finland; T. Jian, Wuhan University, China; R. Chen, Texas A&amp;M University, Corpus Christi, USA</td>
<td>109 - 114</td>
</tr>
<tr>
<td><strong>Optimization Method of MEMS IMU/LADAR Integrated Navigation System Based on Compressed-EKF</strong></td>
<td>Y.-J. Hang, J.-Y. Lai, R.-B. Li, Y.-R. Sun, Nanjing University of Aeronautics and Astronautics, China; T.-W. Lei, Chengdu Aircraft Design and Research Institute, China</td>
<td>115 - 120</td>
</tr>
</tbody>
</table>
Consumer, Smartphone and Personal Navigation Applications

Robust Motion Mode Recognition for Portable Navigation Independent on Device Usage
M. Elboushi, Trusted Positioning Inc. / Queen's University, Canada; J. Georgy, Trusted Positioning Inc., Canada; M. Korenberg, Queen's University, Canada; A. Nowicki, Queen's University and Royal Military College of Canada
158 - 163

A Method of Pedestrian Dead Reckoning for Smartphones Using Frequency Domain Analysis on Patterns of Acceleration and Angular Velocity
M. Kurogi and T. Kurata, National Institute of Advanced Industrial Science and Technology, Japan
164 - 168

Personal Navigation Using Novel Methods of Human Motion Modeling
A. Zaydak, W. Denninger, Yotta Navigation Corporation; C.K. Toth, D. Grejner-Brzezinska, The Ohio State University
169 - 173

Bayesian Recognition of Safety Relevant Motion Activities with Inertial Sensors and Barometer
K. Frank, E. Mano Diaz, P. Robertsson, German Aerospace Center (DLR), Germany; F.J. Puentes Sanchez, University of Malaga, Spain
174 - 184

Enhanced Wi-Fi ToF Indoor Positioning System with MEMS Based INS and Pedometric Information
U. Schatzberg, L. Bann, Y. Amiraz, Intel Corporation, Israel
185 - 192

Integrating Wi-Fi Based Positioning With A Job Management System to Study Task Management Behaviour
J. Pinchin, M. Brown, J. Blum, D. Shaw, University of Nottingham, UK; J. Blakey, The Liverpool School of Tropical Medicine, UK
193 - 200

Implementation and Performance Analysis of Smartphone-based 3D PDR System with Hybrid Motion and Heading Classifier
B. Shin, Korea Institute of Science and Technology and Seoul National University, South Korea; S. Lee, C. Kim, J. Kim, T. Lee, Korea Institute of Science and Technology, South Korea; C. Kee, Seoul National University, South Korea; S. Heo, Korea Institute of Science and Technology, South Korea; H. Rhee, Greencomm Corporation, South Korea
201 - 204

Optical Flow Based Step Length Estimation for Indoor Pedestrian Navigation on a Smartphone
J. Qian, L. Pei, D. Zou, K. Qian, P. Liu, Shanghai Jiao Tong University, China
205 - 211

Low-Cost Inertial Sensor Technologies

Evaluation of Attitude Estimation Algorithms Using Absolute Magnetic Reference Data: Methodology and Results
T. Brunner, S. Changey, E. Fecheur, French-German Research Institute of Saint-Louis, France; J-P. Laufferbinger, M. Basset, Université de Haute Alsace, France
212 - 218

Fault Detection, Isolation, and Recovery Techniques for Large Clusters of Inertial Measurement Units
D.E. Bittner, J.A. Christian, West Virginia University; R.H. Bishop, Marquette University; D. May, NASA Johnson Space Center
219 - 229

An Effective Unscented Kalman Filter for State Estimation of a Gyro-Free Inertial Measurement Unit
C. Liu, S. Yu, S. Zhang, X. Yuan, Huazhong University of Science and Technology, China; S. Liu, Wuhan University, China
230 - 235

Implementation of Identification System for IMUs Based on Kalman Filtering
D. Ural, Roketsan Missiles Industries Inc., Turkey; M. Dogan, Dogas University, Turkey
236 - 240

Standalone Inertial Pocket Navigation System
E. Munoz Diaz, A.L. Merida Guevara, G. de Ponte Muller, German Aerospace Center (DLR), Germany
241 - 251

Flat Is Not Dead: Current and Future Performance of Si-MEMS Quad Mass Gyro (OMG) System
252 - 258

Look Up Table Implementation for IMU Error Compensation Algorithm
B. Altin, D. Ural, Roketsan Missiles Industries Inc., Turkey
259 - 261

High Assurance and GNSS Augmentation Systems

A Blueprint for Civil GPS Navigation Message Authentication
A.J. Korns, K.D. Wesson, T.E. Humphreys, The University of Texas at Austin
262 - 269

Receiver Autonomous Signal Authentication (RASA) Based on Clock Stability Analysis
P.Y. Hwang and G.A. McGraw, Rockwell Collins
270 - 281

Implications of C/A Code Cross Correlation on GPS and GRAS
Z. Zhu, East Carolina University; F. van Graas, Ohio University
282 - 293
Solution Separation and Chi-Squared ARAIM for Fault Detection and Exclusion
M. Joerger and B. Pervan, Illinois Institute of Technology

Optimized MHSS ARAIM User Algorithms: Assumptions, Protection Level Calculation and Availability Analysis
V. Kropp, B. Eissfeller, University FAF Munich, Germany; G. Berz, Eurocontrol, Belgium

Minimum Volume Ellipsoid Sealed to Contain a Tangent Sphere, with Application to Integrity Monitoring
J.H. Rife and D.W. Schuld, Tufts University

Complementary Signal Structure Proposals for Future Aviation SBAS L5 Signal and Other Non-airborne Applications
A. García-Peña, C. Macabiau, ENAC, France; C. Rodríguez, D. Brocard, CNES, France; M. Mabilleau, Egis Avia, France

A Method for GNSS Spoofing Detection Based on Sequential Probability Ratio Test
D. Yuan, H. Li, M. Lu, Tsinghua University, China

Augmented Positioning with CORS Network Services Using GNSS Mass-market Receivers
A. Cina, P. Dabove, A.M. Manzino, M. Piras, Politecnico di Torino, Italy

Authentication Technology Using QZSS
K. Chino, D. Manandhar and R. Shibasaki, The University of Tokyo, Japan

Adaptable Navigation System Technology

Laser-aided Navigation with Loop Closure Capabilities for Micro Aerial Vehicles in Indoor and Urban Environments
P. Crocoll, T. Caselitz, B. Hettich, M. Langer, G.F. Trommer, ITE, Karlsruhe Institute of Technology, Germany

Indoor WPS/PDR Performance Enhancement using Map Matching Algorithm with Mobile Phone
S. Jeon, J. Lee, H. Hong, S. Shin, H. Lee, DMC R&D Research Center, Samsung Electronics, South Korea

The "Blob" Filter: Gaussian Mixture Nonlinear Filtering with Re-Sampling for Mix-and-Narrowing
M.L. Psimaki, Cornell University

A New In-motion Initial Alignment for Land-vehicle SINS/OD Integrated System
J. Hu, X. Cheng, Southeast University, China

A Novel Local Integrity Concept for GNSS Receivers in Urban Vehicular Contexts
D. Margaria and E. Falletti, Istituto Superiore Mario Boella (ISMB), Italy

Adaptive Multichannel Sequential Lattice Prediction Filtering Method for Range Estimation in Cognitive Radios
M.T. Ozden, Piri Reis University, Turkey

Terrestrial Positioning and Navigation Applications

Bayesian Cooperative Relative Vehicle Positioning using Pseudorange Differences
F. de Ponte Müller, E. Munoz Díaz, B Kloiber and T. Strang, German Aerospace Center (DLR), Germany

Bayesian Localization and Mapping Using GNSS SNR Measurements
J.T. Isaacs, A.T. Irish, University of California, Santa Barbara; F. Quitin, Nanyang Technological University, Singapore; U. Madhow, J.P. Hespanha, University of California, Santa Barbara

Development and Operational Testing of a Sub-meter Positive Train Localization System

An Exploration of Low-Cost Sensor and Vehicle Model Solutions for Ground Vehicle Navigation
D.C. Salmon and D.M. Bevly, Auburn University

GPS Mass-market Receivers for Precise Farming
P. Dabove and A.M. Manzino, Politecnico di Torino, Italy

Privacy Protected Localization and Authentication of Georeferenced Measurements using Galileo PRS
A. Rügamer, M. Stahl, I. Lukcin, G. Rohrer, Fraunhofer Institute for Integrated Circuits IIS, Germany

Micro-technology for PNT

Indoor Pedestrian Navigation Using Miniaturized Low-Cost MEMS Inertial Measurement Units
X. Yuan, C. Liu, S. Zhang, S. Yu, Huazhong University of Science & Technology, China

Effect of Structural Anisotropy on Anchor Loss Mismatch and Predicted Case Drift in Future Micro-Hemispherical Resonator Gyros
L. Sorensen, HRL Laboratories, LLC; F. Ayazi, Georgia Institute of Technology

A MEM Vibratory Gyro with Mode-matching Achieved by Resonator Mass Loading
D. Kim and R. McClosey, University of California, Los Angeles

Boeing Disc Resonator Gyroscope (Walter Fried Award Winner)
A.D. Challenor, H.H. Ge, J.Y. Liu, The Boeing Company

In-Run Bias Self-Calibration for Low-Cost MEMS Vibratory Gyroscopes
Selecting The Optimum Inertial Sensor For Each Specific Application - A Comprehensive Guide Based on Analytic Criteria and Experimental Data Across Several Sensors and Technologies
A. Pizzarulli, R. Senatore, E. Quatraro, M. Perthaller, Civitanavi Systems S.r.l., Italy
519 - 523

Data Fusion with two Nonlinear Constraints on Kalman Filtering
W. Gao, J. Li, F. Yu, G. Zhou, C. Yu, M. Liu, Harbin Engineering University, China
524 - 528

Receiver Signal Processing Technology

Performance Study of PLL Schemes for a Successful Acquisition-to-Tracking Transition
M. Fournas, B. Ekambli, ABBIA GNSS Technologies, France; U. Nguyen, J.Y. Li, O. Julien, C. Macabiau, Ecole Nationale de l’Aviation Civile, France
529 - 540

PIC Technique with Reduced Complexity in GPS
K. Yoo and S-H. Kong, Korea Advanced Institute of Science and Technology, Republic of Korea
541 - 546

Collective Bit Synchronization for Weak GNSS Signals Using Multiple Satellites (Best Student Paper)
T. Ren and M. Petolvello, University of Calgary, Canada
547 - 555

Design of a Very High Sensitivity Acquisition System for a Space GNSS Receiver
L. Musumeci, F. Dovis, Politecnico di Torino, Italy; P.F. Silva, H.D. Lopes, J.S. Silva, DEIMOS ENGENHARIA, Portugal
556 - 568

A New Open-Loop Multipath Mitigation Strategy Suitable to Modern GNSS Signals
D. Margaria, E. Falletti, Istituto Superiore Mario Boella (ISMB), Italy; A. Bagnasco, F. Parizzi, A. Torchi, Selex ES, Italy
569 - 580

Optimizing GNSS Navigation Data Message Decoding in Urban Environment
M. Roudier, T. Grelier, L. Ries, CNES, France; A. Garcia-Pena, O. Julien, ENAC, France; C. Pouillat, M.-L. Boucheret, University of Toulouse, France; D. Kubrak, Thales Alenia Space, France
581 - 588

The Asatron Correlator: Unambiguous Tracking of High-Rate BOC Signals
F.M. Schubert, J. Wendel, M. Stollner, M. Kaindl, R. Kohl, Airbus Defense and Space, Germany
589 - 601

Performance Analysis of a VDFLL GNSS Receiver Architecture Under Ionospheric Scintillation and Multipath Conditions
F.M.G. Sousa, Instituto de Telecomunicações and Instituto Superior de Engenharia de Lisboa, Portugal; F.D. Nunes, Instituto de Telecomunicações and Instituto Superior Técnico, Portugal
602 - 611

Performance Evaluation of Multipath Mitigation Techniques for Critical Urban Applications Based on Land Mobile Satellite Channel Model
P. Brocard, D. Salos, O. Julien, Ecole Nationale de l’Aviation Civile, France; M. Mabilleau, Egis Avia, France
612 - 625

OLED: Optimal Linear Combining Detector in GNSS Signal Acquisition
Y. Lia, B. Li, X. Tang, F. Wang, National University of Defense Technology, China
626 - 630

Indoor Personal and First-Responder Navigation

Accurate Indoor Positioning of Firefighters Using Dual Foot-mounted Inertial Sensors and Inter-agent Ranging
J.-O. Nilsson, J. Rantakokko, P. Hiindel, I. Skog, M. Olsson, KTH Royal Institute of Technology, Sweden; K.V.S. Hari, Indian Institute of Science, India
631 - 636

CHAMELEON on Fire: Thermal Infrared Indoor Positioning
E. Ersson and J. Rydell, Swedish Defence Research Agency, Sweden
637 - 644

Quaternion Based Heading Estimation with Handheld MEMS in Indoor Environments
V. Renaudin, C. Cornettes, F. Peyret, IFSTTAR, France
645 - 656

Range-Free Indoor Positioning System Using Smartphone with Bluetooth Capability
S. Lee, B. Koo, M. Jin, Hanyang University, South Korea; C. Park, Chungbuk National University, South Korea; M.J. Lee, Agency for Defense Development, South Korea; S. Kim, Hanyang University, South Korea
657 - 662

Reliable Trajectory Classification Using Wi-Fi Signal Strength in Indoor Scenarios
M. Werner, L. Schauer, A. Scharf, Ludwig-Maximilians-University Munich, Germany
663 - 670

Aviation Positioning and Navigation Applications

Using on Air UAT/ADS-B Signal to Simulate 3D Aviation Weather Information
G.-J. Liou, S.-S. Jan, National Cheng Kung University, Taiwan
671 - 679

Software Defined Radio Approach to Distance Measuring Equipment
O.A. Yeste-Ojeda and R. Landry, Jr., Ecole de Technologie Superieure, Canada
680 - 685

Performance Assessment on Expanding SBAS Service Areas of GAGAN and MSAS to Singapore Region
Y.-F. Tsai and K.-S. Low, Nanyang Technological University, Singapore
686 - 691

Simultaneous Position Estimation &Ambiguity Resolution (SPEAR) for High-Integrity Carrier-Phase Navigation with Robustness to Tracking Loss (Best Paper in Track D)
J.H. Rieie, Tufts University
692 - 700
Multisensor Integrated Systems and Sensor Fusion Technologies 1

A Least Squares Approach to Size Effect in Inertial Navigation
S. Eilon, Israel Aerospace Industries, Israel

The Design Process for Navigation Kalman Filters: Striving for Performance and Quality
Z. Berman, Berman Consulting and Training Ltd., Israel

Low-end MEMS IMU Can Contribute in GPS/INS Deep Integration
Y. Yan, X. Niu, T. Zhang, Z. Zhang, W. Guo, H. Zhang, Wuhan University, China

Ellipsoidal Set Filter Combined Set-Membership and Stochastic Uncertainties Used in Bearing-only Maneuvering Target Tracking
Y. Liu and Y. Zhao, Beihang University, China

Development of Vision-aided Navigation for a Wearable Outdoor Augmented Reality System

The Four Key Challenges of Advanced Multisensor Navigation and Positioning (Best Paper in Track A)
P.D. Groves, L. Wang, D. Walter, H. Martin, K. Voutsis, Z. Jiang, University College London, UK

Modernized GNSS

USNO GPS/GLONASS PNT Products: Overview, and GPS+GLONASS vs GLONASS Only PPP Accuracy
C. Hackman, S.M. Byram, V.J. Slabinski, J.C. Tracey, United States Naval Observatory

Optimal GNSS Acquisition Parameters when Considering Bit Transitions
M. Foucras, B. Ekambi, F. Bacard, ABBIA GNSS Technologies, France; O. Julien, C. Macabiau, Ecole Nationale de l’Aviation Civile, France

Two Dimensional Compressed Correlator for Fast Acquisition of CBOC Modulated Signal in GNSS
B. Kim, S-H. Kong, Korea Advanced Institute of Science and Technology, Republic of Korea

Direct Comparison of the Multipath Performance of L1 BOC and L1 C/A Using On-Air Galileo and Quasi-Zenith Satellite System (OZSS) Transmissions
Y.H. Chen, S. Lo, P. Enge, Stanford University; D. Akos, University of Colorado Boulder

Multipath Detection and Mitigation Leveraging the Growing GNSS Constellation
B. Schipper, Honeywell Aerospace

Integrity Enhancement of the GNSS Position Solution for the Railway Applications
M. Jonas, University of Pardubice, Czech Republic

Cycle Slip Detection and Repair with Triple Frequency Combination Method
L. Zhao, Y. Liu, L. Li, N. Li, Harbin Engineering University, China

Terrestrial Radionavigation and RF-Positioning

The Study of Error Sources for MOSAIC/DME System: A Single Station Based Positioning System for APNT
O-J. Kim, C. Kim, J. Song, Y. Kim, C. Kee, Seoul National University, South Korea

A Non-uniform DFT-based Batch Acquisition Method for Enhanced DME (eDME) Carrier Phase: Concept, Simulations, and Flight Test Results (Best Paper in Track C)
K. Li and W. Pelgrum, Ohio University

An Analysis on ASF Variations and Temperature
S-W. Hwang, Y-S. Choi, S-J. Lee, Chongnam National University, Republic of Korea; S-H. Yang, Korea Research Institute of Standards and Science, Republic of Korea

An Alternative Positioning Navigation and Timing Concept Based on Diverse Ranging
R.H. Wu, S.A. Davidson, Saab Sensis Corporation

Evaluation & Comparison of Ranging Using Universal Access Transceiver (UAT) and 1090 MHz Mode S Extended Squitter (Mode S ES)
Robotic Guidance, Navigation and Control Applications

CML/SLAM Studies and "Velocity-Over-Ground" SLAM
A. Sarma, Naval Undersea Warfare Center and University of Rhode Island
926 - 936

Robust Simultaneous Localization and Mapping via Information Matrix Estimation
M.C. Graham, Massachusetts Institute of Technology and Draper Laboratory; J.P. How, Massachusetts Institute of Technology
937 - 944

Antonomous Robotic SLAM-based Indoor Navigation for High Resolution Sampling with Complete Coverage
I. Wieser, A. Viseras Ruiz, M. Frassl, M. Angermann, J. Mueller, M. Lichtenstein, German Aerospace Center (DLR), Germany
945 - 951

Polynomial Expansion for Range Image Segmentation and Classification of the Environment
B. Okorn and J. Harguess, Space and Naval Warfare Systems Center Pacific
952 - 958

Navigation System for a Research Ice Probe for Antarctic Glaciers
H. Niedermeyer, University FAF Munich, Germany; J. Clemens, University of Bremen, Germany; J. Kowalki, Aachen University of Applied Sciences, Germany; S. Macht, Braunschweig University of Technology, Germany; D. Heinen, RWTH Aachen University, Germany; R. Hoffmann, University of Wuppertal, Germany; P. Linder, Aachen University of Applied Sciences
959 - 975

Moving Horizon Estimation for Cooperation Localization of Multiple Unmanned Underwater Vehicles with Communication Delay
W. Gao, J. Yang, J. Liu, H. Shi, D. Chen, Harbin Engineering University, China
976 - 981

Multisensor Integrated Systems and Sensor Fusion Technologies 2

New Integrity Concept for Intelligent Transportation Systems (ITS) for Safety of Live (SoL) Applications
H. Beckmann, V. Kropp, B. Eissfelder, University FAF Munich, Germany
982 - 988

Covariance Analysis of Spatial and Temporal Effects of Collaborative Navigation
C. Yang, Signters Technology, Inc.; A. Soloviev, Quanav, LLC
989 - 998

Bayesian GNSS/IMU Tight Integration for Precise Railway Navigation on Track Map
O. Garcia Crespillo, O. Heinrich, A. Lehner, German Aerospace Center (DLR), Germany
999 - 1007

Outliers Rejection in Kalman Filtering—Some New Observations
Z. Berman, Berman Consulting and Training Ltd., Israel
1008 - 1013

A Dual-Rate Multi-filter Algorithm for LiDAR-Aided Indoor Navigation Systems
S. Liu, Harbin Engineering University, China; M.M. Aria, Royal Military College of Canada; T. Karamat, Queen's University, Canada; S. Grägi, A. Nouroklin, Royal Military College of Canada
1014 - 1019

A RGB and D Vision Aided Multi-sensor System for Indoor Mobile Robot and Pedestrian Seamless Navigation
C. Chen, W. Chui, University of Siegen, Germany; Y. Zhang, Beijing University of Technology, China; H. Roth, University of Siegen, Germany
1020 - 1025

Bayesian Sensor Fusion of Wi-Fi Signal Strengths and GNSS Code and Carrier Phases for Positioning in Urban Environments
G. Heic, J. Seitz, T. Vaupel, Fraunhofer Institute for Integrated Circuits IIS, Germany
1026 - 1032

Receiver and Antenna Technology

Will the 1-bit GNSS Receiver Prevail?
M. Stein and J.A. Nossek, Technical University Munich, Germany
1033 - 1040

Error Analysis of GPS Signals From USRP Using GPS Receivers
A. Hennigkar and D. Bevly, Auburn University
1041 - 1047

Comparison of Processing Methods for BOC Modulated Signals with Adaptive Array
S. Huo, Y. Huang, J. Nie, F. Wang, National University of Defense Technology, China
1048 - 1056

Influence of Interference Type Upon Adaptive GNSS Antenna Array Performance
Q. Han, J. Pang, J. Nie, F. Wang, National University of Defense Technology, China
1057 - 1064

A New NCO Model for Tracking Loop Design in GNSS Software Receivers
R. Yang, K. V. Ling, E.K. Poh, Nanyang Technological University, Singapore
1065 - 1074

NAPA: A Fully Integrated Multi-constellation Two-frequency Single-chip GNSS Receiver
1075 - 1083

The Improved Spatial Nuller with Frequency Swept Jammer
Y.S. Choi, S.Y. Lee, H.H. Choi, S.J. Lee, Chungnam National University, Republic of Korea; C.S. Park, Chungbuk National University, Republic of Korea
1084 - 1087

Urban Personal and Vehicular Navigation
Mitigating the Multi-path Effect of GNSS in the Urban Area by Using a Cooperative Wilcoxon Method through VANET
P.-H. Jau, F.-R. Chang, National Taiwan University, Taiwan; D.H.C. Du, X. Jiang, University of Minnesota, Twin Cities, USA

Performance Analysis of Duty-Cycle Power Saving Techniques in GNSS Mass-Market Receivers
N. Linty, L. Lo Presti, F. Dovis, Politecnico di Torino, Italy; P. Crosta, European Space Research and Technology Centre (ESTEC), European Space Agency (ESA), The Netherlands

Multi GNSS Constellation Deeply Coupled GNSS/INS Integration for Automotive Application using a Software Defined GNSS Receiver
M. Langer, G.F. Trommer, Karlsruhe Institute of Technology, Germany

Autonomous WLAN Heading and Position for Smartphones
Y. Zhang, Trusted Positioning Inc., and University of Calgary. Canada; Z. Shen, Z. Syed, J. Georgy, H. Syed, Trusted Positioning Inc. Canada; N. El-Shieymy, University of Calgary, Canada

Odometry Error Estimation for a Differential Drive Robot Snowplow
E.J. Kreinar, R.D. Quinn, Case Western Reserve University

Anchor-Free Localization using Round-Trip Delay Measurement for Martian Swarm Exploration
S. Zhang, E. Staudinger, S. Sand, R. Raulefs, A. Dammann, German Aerospace Center (DLR), Germany

Error Analysis of a Low Cost TDaA Sensor Network
N. El Garmayel, H. Jäkel, F.K. Jondral, Karlsruhe Institute of Technology (KIT), Germany

Using Multiple Sensor Triads for Enhanced Mismalignment Estimation for Portable and Wearable Devices
M. Omr, Trusted Positioning Inc. and Queen's University, Canada; J. Georgy, Trusted Positioning Inc., Canada; A. Noureldin, Queen's University, and Royal Military College of Canada, Canada

Assessment of Using Doppler Shift of LEO Satellite to Aid GPS Positioning
W.-H. Hsu and S.-S. Jan, National Cheng Kung University, Taiwan

Small UAV Positioning and Navigation Applications

Autopilot Design for Control of Rotorcraft Micro Aerial Vehicles (RMAVs) Swarm
F. Li, L. Han, Beijing University, China

Attitude Estimation of a Projectile using Magnetometers and Accelerometers: Experimental Validation
S. Changhai, E. Pocheau, T. Brunner, French-German Research Institute of Saint-Louis (ISL), France

Seamless Indoor-Outdoor Navigation for Unmanned Multi-sensor Aerial Platforms
E. Dill, M. Uijt de Haag, P. Duan, Ohio University; D. Serrano, S. Várdaga, Aerospace Technology Center (CTAE), Spain

A Low SWAP Implementation of High Integrity Relative Navigation for Small UAS
E. Brewer, G. Haemtens, V. Gavrilets, McGraw, Rockwell Collins

Passive Multispectral Sensor Architecture for Radar-EO/IR Sensor Fusion for Low SWAP UAS Sense and Avoid
W.C. Barott, E. Coyle, T. Dabrowski, C. Hockley, and R.S. Stansbury, Embry-Riddle Aeronautical University

Safe & Sound: A Robust Collision Avoidance Layer for Aerial Robots Based on Acoustic Sensors
J. Müllner, A. Viseras Ruiz, I. Wieser, German Aerospace Center (DLR), Germany

Sensor Manufacturing, Error Modeling and Testing

Ratio-metric Readout Technique for MEMS Gyroscopes with Force Feedback
B. Errinoglu, M.H. Klite, I. Izyumin, Y-C. Yeh, B.E. Boser, University of California Berkeley

Polynomial Degree Determination for Temperature Dependant Error Compensation of Inertial Sensors
Y. Gunhan and D. Usmal, Roketsan Missiles Industries Inc., Turkey

Online Calibration Research on the Lever Arm Effect for the Hypersonic Vehicle
Z. Xiong, H. Peng, J-Y. Lai, J. Wang, Y. Sun, Nanjing University of Aeronautics and Astronautics, China

Influence of Latitude in Coarse Self-Alignment of Strapdown Inertial Navigation Systems
F.O. Silva, E.M. Hemery, Technological Institute of Aeronautics, Brazil; W.C.L. Filho, Institute of Aeronautics and Space, Brazil

Study of MEMS-based Inertial Sensors Operating in Dynamic Conditions
Y. Stebler, u-blox AG, Switzerland; S. Guermi, University of California Santa Barbara, USA; J. Skaloud, École Polytechnique Fédérale de Lausanne, Switzerland; R. Molinari, M-P. Victoria-Feser, University of Geneva, Switzerland

Interference, Spectrum Issues and Robust Navigation

GPS Spoofing Detection Using RAiM with INS Coupling
S. Khanrafeh, N. Koshan, S. Langel, F-C. Chan, M. Joerger, B. Pervan, Illinois Institute of Technology

Vestigial Signal Defense Through Signal Quality Monitoring Techniques Based on Joint use of Two Metrics
K. Ali, E. Garbín Manfredini, F. Dovis, Politecnico di Torino, Italy
Effect of Pulse Blanking on Navigation Data Demodulation Performance in GNSS System
L. Musumeci and F. Dovis, Politecnico di Torino, Italy
1248 - 1257

Multi-test Detection and Protection Algorithm Against Spoofing Attacks on GNSS Receivers
A. Jovanovic, C. Botteron, P-A. Fariné, Ecole Polytechnique Fédérale de Lausanne, Switzerland
1258 - 1271

Assessment of Camera Capture for GPS RFI Monitor
C.-K. Feng, S.-S. Jan, National Cheng Kung University, Taiwan; T. Johnson, D. Akos, University of Colorado at Boulder
1272 - 1281

Analysis of Notch Filtering Methods for Narrowband Interference Mitigation
J. Raasakka, M. Orejas, Honeywell International, Czech Republic
1282 - 1292

Software-Defined Radio Based Roadside Jammer Detector: Architecture and Results
R. Bauernfeind and B. Eissfler, University FAF Munich, Germany
1293 - 1300

Vision/Integrated Navigation Systems

Visual Pose Estimation for Shipboard Landing of Autonomous Parafols
C.W. Hewgley, United States Naval Academy, R. Cristi, O.A. Yakimenko, Naval Postgraduate School
1301 - 1308

High-Precision Globally-Referenced Position and Attitude via a Fusion of Visual SLAM, Carrier-Phase-Based GPS, and Inertial Measurements
D.P. Shepard and T.E. Humphreys, The University of Texas at Austin
1309 - 1328

Indoor Localization and Mapping Using Camera and Inertial Measurement Unit (IMU)
N. Mostof, University of Calgary, Canada; M. El-Habiby, University of Calgary, Canada and Ain Shams University, Egypt; N. El-Sheimy, The University of Calgary, Canada
1329 - 1335

Vision-based Context and Height Estimation for 3D Indoor Location
B. Kazemipour, Trusted Positioning Inc./University of Calgary, Canada; Z. Syed, J. George, Trusted Positioning Inc., Canada; N. El-Sheimy, University of Calgary, Canada
1336 - 1342

Indoor Navigation Using Smartphone Technology: A Future Challenge or an Actual Possibility?
M. Pirs, A. Liugn, P. Dabouve, I. Azcardi, Politecnico di Torino, Italy
1343 - 1352

Video Integration in a GPS/INS Hybridization Architecture for Approach and Landing
J. Vezirot, A-C. Escher, C. Macabiau, ENAC, Telecom Lab., France; A. Guillet, AIRBUS, France
1353 - 1364

Marine Positioning and Navigation Applications

Transversal Strapdown INS and Damping Technology for Marine in Polar Region
Q. Li, Y. Ben, F. Sun, L. Hao, Harbin Engineering University, China
1365 - 1370

A Method for Ice-aware Maritime Route Optimization
R.E. Gunniss, J. Saarimaki, Laura Ruotsalainen, Heidi Kuusniemi, Finnish Geodetic Institute, Finland; F. Goerlandt, J. Montewka, Aalto University, Finland; R. Berghard, V. Kotovvita, VTT Technical Research Centre of Finland
1371 - 1378

Time-varying Parameters Based Gyrocompass Alignment for Marine SINS with Large Heading Misalignment
F. Sun, J. Xia, Y. Ben, Harbin Engineering University, China; H. Lan, University of Calgary, Canada
1379 - 1383

IMU Calibration and Validation in a Factory, Remote on Land and at Sea
M.J. Joergensen, D. Paccagnan, N.K. Poulsen, Technical University of Denmark, Denmark; M.B. Larsen, Sonardyne International Ltd., UK
1384 - 1391

Navy Testing of the IXBlueMARINS FOG Inertial Navigator
K. Carr, SPAWAR Atlantic; M.B. May, S. Gitt, PSU/ARL; R. Greer, SPAWAR Atlantic
1392 - 1408

A Novel Alignment Accuracy Evaluation Approach for Shipborne Slave INS
J. Cheng, D. Chen, D. Guan, B. Wang, Harbin Engineering University, China; R. Jr. Landry, Ecole de Technologie Superieure, Canada
1409 - 1414

A Fast Inertial Frame Alignment Algorithm Based on Horizontal Alignment Information for Marine SINS
W. Guo, Y. Che, F. Yu, Y. Liu, Harbin Engineering University, China
1415 - 1419

An Improved Cooperative Localization Method for Multiple Autonomous Underwater Vehicles Based on Acoustic Round-Trip Ranging
W. Gao, Y. Liu, B. Xu, Y. Che, Harbin Engineering University, China
1420 - 1423
