2014 IEEE Eighth International Conference on Research Challenges in Information Science

(RCIS 2014)

Marrakech, Morocco
28-30 May 2014
## Table of contents

### Session 1: Social Network Analysis – 1

Overcoming challenges in Global Software Development: The role of Brokers  
Christina Manteli and Bart van den Hooff and Hans van Vliet and Wilco van Duinkerken  
An energy-based model to optimize cluster visualization  
Taoufiq Dkaki and Josiane Mothe  
OLAP of the tweets: From modeling to exploitation  
Maha Ben Kraiem and Jamel Feki and Kais Khrouf and Franck Ravat and Olivier Teste

### Session 2: Information System Engineering – 1

Analysing the concept of quality in model-driven engineering literature: a systematic review  
Fáber Danilo Giraldo Velásquez and Sergio España and Oscar Pastor  
Organizational and Customer related Challenges of Software Testing: An Empirical Study in 11 Software Companies  
Frank Philip Seth and Ossi Taipale and Kari Smolander  
A preliminary analysis of theorizing effort in ERP research  
Saïd Assar and Redouane El Amrani

### Session 3: Social Network Analysis - 2

On the use of intrinsic time scale for dynamic community detection and visualization in social networks  
Alice Albano and Jean-Loup Guillaume and Benédicte Le Grand  
Collaborative management of applications in enterprise social networks  
Ourania Hatzi and Giannis Meletakis and Mara Nikolaidou and Dimosthenis Anagnostopoulos  
Mining bipartite graphs to improve semantic pedophile activity detection  
Raphael Fournier and Maximilien Danisch

### Session 4: Requirements Engineering - 1

Taking Goal Models Downstream: A Systematic Roadmap  
Jennifer Horkoff and Tong Li and Feng-Lin Li and João Pimentel and Mattia Salnitri and Evellin Cardoso and Paolo Giorgini and John Mylopoulos  
Exploring Alternative Designs of Sociotechnical Systems  
Fatma Başak Aydemir and Fabiano Dalpiaz and Paolo Giorgini and John Mylopoulos  
Consideration in Software-mediated Social Interaction  
Raian Ali and Nan Jiang and Sheridan Jeary and Keith Phalp

### Session 5: Business Processes

Navigating in Process Model Repositories and Enterprise Process Information  
Markus Hipp and Bela Mutschler and Bernd Michelberger and Manfred Reichert  
A Novel Approach to Process Mining : Intentional Process Models Discovery  
Ghazaleh Khodabandelou and Charlotte Hug and Camille Salinesi  
Towards the construction of Quality-aware Web Warehouses with BPMN 20 Business Processes  
Andrea Delgado and Adriana Marotta and Laura González  
Business models alignment with reuse approach  
Maryam Radgui and Rajaa Saidi and Salma Mouline
Session 6: Risk Management

Overview of e-mail SPAM Elimination and its Efficiency  156  
Tomas Sochor

Formal approach for managing firewall misconfigurations  167  
Amina Saâdaoui and Nihel Ben Youssef Ben Souayeh and Adel Bouhoula

A Collaborative Risk Management Framework for Enterprise Architecture  177  
Diana Marosin and Sergio Sousa and Dirk van der Linden

Session 7: Social Network Analysis – 3

User-Annotated Microtext Data for Modeling and Analyzing Users’ Sociolinguistic Characteristics and Age Grading  183  
Nathaniel Moseley and Cecilia Ovesdotter Alm and Manjeet Rege

From Tweet to Graph: Social Network Analysis for Semantic Information Extraction  189  
Rocío Abascal Mena and Rose Lema and Florence Sèdes

Taxonomy-based Job Recommender Systems On Facebook and LinkedIn  199  
Mamadou Diaby and Emmanuel Viennet

Session 8: Human Computer Interaction

User Interface Patterns for Rich Applications in the Context of Cultural Heritage Data  205  
Patricia Martin-Rodilla and José Ignacio Panach and Oscar Pastor

Towards an Evaluation of Graphical User Interfaces based on Metrics  215  
Mathieu Zen and Jean Vanderdonckt

Evaluating Rogue User Testing in Industry: an experience report  227  
Sebastian Bauwersfeld and Antonio de Rojas and Tanja EJ Vos

Session 9: Information System Engineering - 2

A Survey on Project Factors that Motivate Finnish Software Engineers  237  
Ayse Tosun Misirli and June Verner and Jouni Markkula and Markku Oivo

Insider Action Design Research - A Multi-Methodological Information Systems Research Approach  246  
Radhouane Ben Neji Jrad and M Daud Ahmed and David Sundaram

Standards compliance helps value creation in agile projects  258  
Zornitza Bakalova and Maya Daneva and Tuan Nguyen

Session 10: Requirements Engineering - 2

Analyzing the Evolution of Software Development: From Creative Chaos to Software Ecosystems  264  
Mahsa Hasani Sadi and Eric Yu

QualiHM: A Requirement Engineering Toolkit for Efficient User Interface Design  275  
Mohamed Boukhebouze and Ravi Ramdoyal and Dimitri Diakodimitris and Ugo Sangiorgi and Mathieu Zen and Jean Vanderdonckt

A tool to improve requirements review in collaborative software development platforms  286  
Zeina Azmeh and Isabelle Mirbel and Laila El Jiani

Integration of non-functional requirements in a service-oriented and model-driven approach  292  
Abdelhadi Bouain and Abdelaziz El Fazziki and Mohammed Sadgal

Session 11: User-Centered Approaches - 1

Privacy Conscious Web Apps Composition  300  
Aurélien Faravelon and Eric Cérer

A user-centric vision of service-oriented Pervasive Information Systems  312  
Salma Najar and Manuele Kirsch Pinheiro and Bénédicte Le Grand and Carine Souveyet
Engaging a Class of 2200 Digital Natives: A Blended Approach  
Andrew Eberhard and Khushbu Tilivwala and Gabrielle Peko and David Sundaram

Session 12: Services - 1

Adapting Service Interfaces when Business Processes Evolve  
Vladimir Kudelas and Marek Polák and Martin Nečaský and Irena Holubova

An integration architecture framework for e-genomics services  
David Roldán Martínez and Óscar Pastor López and Mercedes Fernández

Assessing Open Source Communities’ Health using Service Oriented Computing Concepts  
Marc Oriol and Oscar Franco-Bedoya and Xavier Franch and Jordi Marco

Session 13: Social Network Analysis - 4

Link Formation in a Telecommunication Network  
Erick Stattner

Dynamic Enrichment of Social Users’ Interests  
Manel Mezghani and Corinne Zayani and Ikram Amous and André Peninou and Florence Sedes

Session 14: Information Search and Discovery

Introduction of an outranking method in the Cloud Computing Research and Selection System based on the Skyline  
Manar Abourezq and Abdellah Idrissi

Randomized Algorithm for Information Retrieval Using Past Search Results  
Claudio Gutiérrez-Soto and Gilles Hubert

Toward Variability Management to Tailor High Dimensional Index Implementations  
Veit Koeppen and Martin Schäler and Reimar Schröter

Session 15: Information System Engineering - 3

FASMM: Fast and Accessible Software Migration Method  
Louis Forite and Charlotte Hug

Research Paradigms and Topics in Enterprise Engineering: Analysis of recent conferences and workshops  
Wolfgang A Molnar and Janne J Korhonen

The Four Pillars of Crowdsourcing: A Reference Model  
Mahmood Hosseini and Keith Phalp and Jacqui Taylor and Raian Ali

Session 16: Modeling and Design

An ISO/IEC 24744-Derived Modelling Language for Discourse Analysis  
Patricia Martin-Rodilla and Cesar Gonzalez-Perez

Heterogeneous models matching for consistency management  
Mahmoud El Hamlaoui and Sophie Ebersold and Adil Anwar and Bernard Coulette and Mahmoud Nassar

On the Use of Graph Transformations for Model Composition Traceability  
Youness Laghouaouta and Adil Anwar and Mahmoud Nassar and Jean-Michel Bruel

Session 17: User-Centered Approaches – 2

The Design of Adaptive Acquisition of Users Feedback: an Empirical Study  
Malik Almaliki and Cornelius Ncube and Raian Ali

A user centred approach to represent expert knowledge: A case study at STMicroelectronics  
Manel Brichni and Sophie Dupuy-Chessa and Lilia Gzara and Corinne Jeannet

Session 18: Services – 2
DC Session 1: Recommendation and Business Processes

Hybrid System for Personalized Recommendations 520
Jihane Karim

A Roadmap for Upgrading Unupgradable Legacy Processes in Inter-Organizational Middleware Systems 526
Radhouane Ben Neji Jrad

Intelligent Systems for Users’ Automated Guidance 532
Elena Kushnareva

Software Implementation Knowledge Management with Technical Debt and Network Analysis 537
Johannes Holvitie

DC Session 2: Software Product Lines

Towards a co-evolution model for software product lines based on Cladistics 543
Anissa Benlarabi

Survey of Non-Functional Requirements Modeling and Verification of Software Product Lines 549
Fatima Zahra Hammani

Towards an Agile Feature Composition for a Large Scale Software Product Lines 555
Ikram Dehmouch

Poster and Demo Session

How can imitation counterbalance innovation? An ABM Bass model for competing products 561
Philippe Collard and Wilfried Segretier

Process behavior meta-modeling for the derivation of enactment engines 563
Sana Damak Mallouli and Said Assar and Carine Souveyet

Robustness Against Data Availability Problems in Urban Energy Planning Support Software 565
Najd Ouahjou and Wolfgang Loibl and Peter Palensky and Amin Anjomshoaa and Stefan Fenz and A Min Tjoa

A Computational Approach for Design Rationalization in Enterprise Architecture 567
Georgios Plataniotis and Sybren de Kinderen and Henderik A Proper

Integrating user’s profile in the query model for Social Information Retrieval 569
Chahrazed Bouhini and Mathias Géry and Christine Largeron
