48th International Scientific Conference on Experimental Stress Analysis

(EAN 2010)

Velke Losiny, Czech Republic
31 May – 3 June 2010

Editors:

Petr Šmíd
Pavel Horváth
Miroslav Hrabovský

TABLE OF CONTENTS

Experimental Determination of Circumferential and Meridian Stresses of the Blast Furnace Shell ................................. 1
   Peter Bigoš, Jozef Kulka, Martin Mantic, Jaroslav Curilka
Application of Lie Groups in the Study of Beam and Plate Vibrations ................................................................. 9
   Jozef Bocko, František Trebuna, Miroslav Pástor, Peter Frankovský
Assessment of Incremental Strain Method Used for Residual Stress Measurement by Ring-Core Method ....................... 17
   Adam Cívín, Miloš Vlk
Experimental Methodology for Evaluation of High Cycle Fatigue Properties of Tubes with Variable Diameter .......................................................... 26
   Ivo Cerný, Ivan Führbacher, Martin Cipera
Experimental Stress Analysis of Critical Locations in Vicinity of Frame Welds of Hospital Sickbeds ............................ 33
   Ivo Cerný, Ivan Führbacher, Dagmar Mikulová
Determination of the Fatigue Life of the Shank Disk Harrow .................................................................................... 41
   Karel Dabrava, Pavel Syrováška
Measurement Static and Dynamic Characteristic Automobile Seats ........................................................................ 45
   Vitezslav Fliegel, Alex Ľaťinka, Jan Petrik, Rudolf Martinova
Effect of Machining Conditions on Residual Stresses due to Milling .......................................................................... 49
   Nikolaj Ganev, Zdenek Pála, Kamil Kolarík
XRD Analysis of Oxide Layers Formed on Zirconium Alloys at 360°C in Water with Different pH .............................. 56
   Galina Gosmanová, Ivo Kraus, Michal Kologa, Vera Vrutíková
An Industrial Application of a Method for Spatial Motion Measurement ...................................................................... 63
   Radim Halana, Martin Fisek, František Fojtík
Numerical Modelling of the Glass Shaping Forms Cooling ......................................................................................... 69
   Martina Havelcová, Petr Schovánek
Contact System of Solid State Surface Mapping ....................................................................................................... 77
   Helena Hiklová, Martina Havelcová, Hana Chmelícková, Hana Lapšanská
Optical Sensor for Measurement of an Object In-plane Translation and Rotation by Speckle Correlation Method ................. 82
   Pavel Horváth, Petr Šmid, Miroslav Hrabovský, Ivana Hamarová
Experimental Tests of the Shear Strength of the Cohesive Soils and Their Use in the Geotechnical Calculations ................. 88
   Luboš Hruštinec, Jozef Samec, Jozef Kuzma
Laser Welding of Stainless Steel Tubes ......................................................................................................................... 94
   Hana Chmelícková, Hana Lapšanská, Helena Hiklová, Martina Havelcová
Utilisation of Light and Laser Security Protection in the Commercial Security Industry .............................................. 102
   Ján Ivanča, Petr Navrátil
Multiestimation Scheme for Adaptive Control of Three Tank System DTS200 ........................................................... 110
   Ján Ivanča, Petr Navrátil
Optimization and Calibration of Digital Image Correlation method ........................................................................... 118
   Ivan Jandýsek, Jaroslav Valach, Daniel Vavrik
Analysis of Welded Thin-Walled Profiles Under Large Deformations ........................................................................ 124
   Jiří Jankovec
The Study of the Possibilities of Residual Stresses Prediction in Weld Joint Using the Elastic-Viscoplastic Material Model ......................................................... 132
   Milan Jary, Vladimír Diviš
Comparison between Mechanical Properties of Fresh and Frozen Specimens of Corio-Epidermal Junction of Equine Hoof ...................................................................................................................... 142
   Petra Kochová, Robert Cimrman, Zbyněk Tonar, Jana Mezerová
About the Capability of X-ray Diffraction Technique for Diagnostics of Technological Residual Stresses ............................. 148
   Kamila Kolarík, Nikolaj Ganev, Zdenek Pála
A New Construction for Tyres, their Disc Frequencies and Testing Equipments for Fatigue Tests ................................. 156
   Miroslav Kopecký
Original Experimental Equipment for Slow Processes of Lateral Pressure in Granular Masses ........................................... 164
   Petr Koudelka, Jan Bryscejn

Use of Fibre Bragg Grating Sensors for Structural Health Monitoring of Structures ................................................................. 380
Milan Ružicka, Milan Dvorák, Viktor Kušilek

The Influence of Short-Term Simulated Body Fluid Storage on the Mechanical Properties of Composites Based on Polyamide Fibers and PDMS Matrix Modified by CaP nano/micro Particles ........................................ 388
Miroslav Sochor, Tomáš Suchý, Karel Balík, Zbynek Sucharda, Martin Cerný

Experimental Tests of the Deformation and Consolidation Properties of the Cohesive Soils and Their Use in the Geotechnical Calculations ........................................................................... 395
Jozef Sumec, Jozef Kuzma, Luboš Hruštinec

Influence of Thermoeelastic Instabilities on Thermal Stresses in Brake Discs .................................................................................. 401
Michal Švantner, Robert Cimrman, Jan Šroub

Material Properties of a Gypsum Block Exposed to Influence of Weather ....................................................................................... 407
Pavel Tesárek, Tomáš Mracek, Pavel Padevet

Mechanical Properties of Gypsum Blocks After Fire ......................................................................................................................... 411
Pavel Tesárek, Andrea Wilczynská, Tomáš Korecký, Pavel Padevet

Abilities of New Software for PhotoStress® Method ......................................................................................................................... 415
František Trebuna, Ján Jadlovský, Peter Frankovský, Miroslav Pástor

Influence of Spraying on the Surface of Investigated Object to Precision of Digital Image Correlation .................................................... 423
František Trebuna, Róbert Hunady, Martina Znamenáková

Using of Digital Image Correlation Method for Experimental Determination of Modal Parameters ............................................................. 430
František Trebuna, Róbert Hunady, Martina Znamenáková

Possibilities of Experimental Verification of Containers for Radioactive Materials Transport ............................................................. 438
František Trebuna, František Šimcák, Jozef Bocko, Zdenko Bohovský

Experimental and Numerical Analysis of Failure in Press Supporting Structure .............................................................................. 446
František Trebuna, František Šimcák, Jozef Bocko, Peter Trebuna, Patrik Šarga

Analysis of Stress States in Critical Parts of Supporting Structure of Steam Boiler and Determination of Its Residual Life Span .......................................................... 454
František Trebuna, František Šimcák, Miroslav Pástor

Experimental Determination of Damping Characteristics of Hybrid Composite Structure .................................................................. 462
Josef Vacík, Václava Lašová, Radek Kottner, Josef Kána

Residual Stress Analysis using ION-C Device .......................................................... 470
Jaroslav Václavík, Petr Bohdan, Stanislav Hoří, Otakar Weinberg

Nondestructive Methods for Detection of Hidden Fatigue Crack in the Steel Bridge Element ................................................................. 476
Jaroslav Valach, Ladislav Fryba, Ivan Jandejsek, Jaroslav Lesák, Ondrej Vála, Shota Urushadze

Identification of Material Parameters of an Orthotropic Metal Sheet ................................................................................................. 483
Daniel Vavrík, Zdenek Fiala, Marco Grédiac, Ivan Jandejsek, Michal Micka, Jiri Minster, Fabrice Pierron

Theory of Stress State Identification After Hole-Drilling Method Application .......................................................................................... 489
Karel Vítek

Sensitivity Gain of the Hole Drilling Method for Stress State Identification .......................................................................................... 495
Karel Vítek

Optical Methods in Use by Experimental Strain Measurement ............................................................................................................. 504
