51st International Scientific Conference on Experimental Stress Analysis

(EAN 2013)

Litomerice, Czech Republic
11-13 June 2013

Editors:

Blanka Skocilasova    Alena Petrenko

# TABLE OF CONTENTS

- Method Of Investigation Of The Stress-Strain State Of Surface Layer Of Machine Elements From A Sintered Nonuniform Material ........................................ 1
  V. Kazar, S. Grigoriev
- Behaviour of Different Types of Concrete under Impact and Quasi-staic Loading ......................................................... 5
  Petr Maca, Petr Konvalinka, Manfred Curbach
- Experimental Identification of Material Properties of Piezoelectric Patch Transducer ...................................... 11
  Zuzana Lasova, Robert Zemcik
- The Changes of the Gypsum Mechanical Properties in Dependence on the Number of the Freeze-Thaw Cycles .................................................... 17
  Tomas Plachy, Pavel Tesarek, Richard Toupek, Vaclav Nezerka, Michal Polak
- Deformation Properties of Laminated Glass Subjected to Increased Temperature ................................................. 21
  Bittner Tomas, Tej Petr, Bouska Petr, Spacek Miroslav, Vokac Miroslav
- Mechanical Resistance of Triple Glass Facade Panels ......................................................................................... 27
  Bouska Petr, Pask Radomir, Spacek Miroslav, Vokac Miroslav, Bittner Tomas
- Temperature And Stress Field Measurement At Friction-Stir Welding Of An Aluminum Alloy Probe .................. 33
  Pavel Elezzius, Roland Jancou, Ladislav Ecsi, Gregor Izrael
- Implementation Of Correction Coefficients Relevant For Photoelastic Coatings Into The Photostress Software ......................................................................... 39
  Peter Frankovsky, Frantisek Trebuna, Jan Judlovske, Miroslav Pastor, Marie Kenderova
- Determination Of The Necessary Geometric Parameters Of The Specimen In Ring-Core Method .................. 45
  Frantisek Menda, Frantisek Trebuna, Patrik Sarga
- The Use Of Modan 3D In Experimental Modal Analysis ......................................................................................... 51
  Robert Hunady, Frantisek Trebuna, Martin Hagara, Martin Schrotter
- Portable Device for Indirect Assessment of Strength in Tension of Building Materials and Problem of Boundary Condition ........................................................................... 57
  Stepan Major, Ivan Jandiejk, Jaroslav Valach, Daniel Vavrik
- Influence Of Imperfections On The Stress State Identification Accuracy Assessment Using The "Hole-Drilling Strain-Gauge Method" ........................................ 64
  Karel Vitek
- The Knowledge Acquired By Using Of Optical Methods By Strain Fields Investigation ............................................. 68
  Martin Hagara, Frantisek Simcak, Matus Kalina
- QUALISYS System Applied to Industrial Testing ................................................................................................. 74
  Pavel Maly, Frantisek Lopot
- Impact Performance Of Sandwich Structures Produced By Crush-Core Technology ....................................... 80
  Ladislav Fojil, Sona Russnakeva, Milun Zaluadek
- Investigation Of Long-Term Mechanical Response Of Rubber .................................................................................. 84
  Jan Hezko, Radex Kottnier, Lesek Fukala
- Time Progress of Compressive Strength of High Performance Concrete ................................................................. 90
  Ondrej Holcapek, Filip Vogel, Tomas Vavriuk, Martin Keppert
- The Evolution of the Cement Paste Creep with Addition of Fly Ash in Time and Ratio of Parts 60/40 ................. 96
  Pavel Padevet, Petr Bittnar
- Comparison of the Humidity Influence on the Material Properties of Cement Paste with Fly Ash ............. 102
  Pavel Padevet, Ondrej Zobal
- Correlation of Material and Mechanical Properties of the Cement Paste with Fly Ash, depending on the Water Content ......................................................................................... 108
  Ondrej Zobal, Pavel Padevet
- Residual Stress Surface Distribution in the Vicinity of Welds in Laser Welded Steel Sheets ......................... 112
  Zdenek Pala, Kamill Kolarik, Nikolaj Ganev, Jiri Capek
- Tensile Strength and Stiffness of PVA-based Nanofiber Textiles with Incorporated Copper Ions .................. 118
  Zuzana Racova, Pavla Ryparova, Richard Hlavac, Pavel Tesarek, Vaclav Nezeka
- Experimental Investigation Of Projectile Impact Local Damage On Cementitious Composite Slabs ........ 122
  Tomas Vavriuk, Jan Zatloukal
- Bending Strength of Mortars Containing Crushed Brick Particles ............................................................... 128
  Pavel Tesarek, Vaclav Nezeka, Tomas Plachy, Pavel Padevet
- Experimental Verification of Test Blade Loading .................................................................................. 132
  Karel Doubrava, Jiri Kuzelka
