# TABLE OF CONTENTS

## VOLUME 1

### MULTIDISCIPLINARY ANALYSIS AND OPTIMIZATION: SHAPE AND TOPOLOGY I

- Topology Optimization for Additive Manufacturing: Considering Maximum Overhang Constraint .................................................. 1
  - A. Gaynor, J. Guest
- Topology Optimization of Thermoelectric Structures using Stress-based Design Criteria ...................................................... 9
  - J. Deaton, R. Grandhi
- A Methodology for the Prediction of Air Transportation Network Growth Dynamics ................................................................. 31
  - M. Hassan, D. Mavris
- Automatic Design Evaluation of Nacelle Geometry Using 3D-CFD .............................................................................................. 49
  - M. Albert, D. Bestle

### MULTIDISCIPLINARY ANALYSIS AND OPTIMIZATION: MDO FRAMEWORKS

- Optimization of Excess System Capability for Increased Reconfigurability .................................................................................. 57
  - J. Watson, J. Allen, C. Mattson, E. Cansler, S. Ferguson
- Geometry and Structural Modeling for High-Fidelity Aircraft Conceptual Design Optimization ...................................................... 71
  - J. Hwang, G. Kenway, J. Martins
- Automatic Evaluation of Multidisciplinary Derivatives Using a Graph-Based Problem Formulation in OpenMDAO ........................................................................................................................................ 86
  - J. Gray, T. Hearn, K. Moore, J. Hwang, J. Martins, A. Ning
- Nonintrusive Continuum Sensitivity Analysis for Aerodynamic Shape Optimization ................................................................. 107
  - M. Kulkarni, R. Canfield, M. Patil

### MULTIDISCIPLINARY ANALYSIS AND OPTIMIZATION: SHAPE AND TOPOLOGY II

- A Numerical Optimization Study on Winglets .............................................................................................................................. 119
  - S. Khorasani, D. Zingg
- A Method for High-Dimensional Design Space Exploration of Expensive Functions with Access to Gradient Information .......................................................... 133
  - S. Berguin, D. Rancourt, D. Mavris
- Preliminary Structural Design Using Topology Optimization with a Comparison of Results from Gradient and Genetic Algorithm Methods ........................................................................................... 147
  - A. Burt, M. Tinker
- Design and Validation of a Supersonic Natural Laminar Flow Test Article .................................................................................. 154
  - P. Sturdza, D. Rajnarayan
- A Non-probabilistic Reliability-based Topology Optimization Method Based on Equivalent Loads ................................................. 166
  - M. Li, W. Tang

### MULTIDISCIPLINARY ANALYSIS AND OPTIMIZATION: APPLICATIONS I

- Conceptual Design of a Multi-Ability Reconfigurable Unmanned Aerial Vehicle (UAV) through a Synergy of 3D CAD and Modular Platform Planning ................................................. 176
  - S. Chowdhury, V. Maldonado, R. Patel
- L-Dominance: An Approximate-Domination Mechanism for Adaptive Resolution of Pareto Frontiers ................................. 189
  - B. Hancock, T. Nysetvold, C. Mattson
- Multidisciplinary Analysis with SORCER using Domain-Specific Objects .................................................................................. 205
  - S. Burton, R. Kolonay, M. Sobolewski
- Visualization of System Decomposition in a Value-Based Framework ......................................................................................... 223
  - E. Tibor, B. Mesmer, C. Bloebaum
- Non Deterministic Approach for Advanced Aircraft Configuration Design Under Uncertainty ................................................. 234
  - P. Shivapraksha, T. Nam, C. Perullo, D. Mavris
MULTIDISCIPLINARY ANALYSIS AND OPTIMIZATION: SHAPE AND TOPOLOGY III

New Projection Methods for Two-Phase Minimum and Maximum Length Scale Control in Topology Optimization ................................................................. 248
  J. Carstensen, J. Guest
Discrete Adjoint Approach for Aeroelastic Design Optimization .................................................. 259
  J. Thomas, E. Dowell
Aerodynamic Sensitivity Analysis based on Modified Navier-Stokes Equations ......................... 266
  K. Gobal, R. Grandhi
An Unsteady Continuous Adjoint Approach for Aerodynamic Design on Dynamic Meshes ............. 284
  T. Economou, F. Palacios, J. Alonso

MULTIDISCIPLINARY ANALYSIS AND OPTIMIZATION: METAMODELING I

Surrogate Models and Mixtures of Experts in Aerodynamic Performance Prediction for Mission Analysis ........................................................................................................... 308
  R. Liem, J. Martins
Optimization when Cost of Optimization is Comparable to the Objective Function .................. 345
  A. Chaudhuri, R. Haftka
Reducing Error of Polynomial Approximation Outside of Designated Design Space for Practical Problems ........................................................................................................... 355
  V. Balabanov, O. Weckner, J. Wu
Aero-Structure-Stealth Coupled Optimization for High Aspect Ratio Wing Using Adaptive Metamodeling Method .................................................................................. 359
  D. Wu, T. Long, Y. Li, M. Jiang, H. Wang, B. Huang
RBF Metamodel Assisted Global Optimization Method Using Particle Swarm Evolution and Fuzzy Clustering for Sequential Sampling ................................................. 376

MULTIDISCIPLINARY ANALYSIS AND OPTIMIZATION: EMERGING METHODS I

Multidisciplinary Design Optimization of an Aircraft Wing Via a Matrix-Free Approach ................. 386
  A. Lambe, G. Kennedy, J. Martins
Incorporation of Coupling Strength Models in Decomposition Strategies for Value-Based MDO ...... 400
  H. Kannan, C. Bloebaum, B. Mesmer
Incorporating Value-Driven Design into the Visualization of Design Spaces Using Contextual Self-Organizing Maps: A Case Study of Satellite Design ................................. 415
  T. Richardson, H. Kannan, C. Bloebaum, E. Winer
Profit and Operational-Based Value Functions ............................................................................... 425
  E. Goetzke, C. Bloebaum, B. Mesmer
Parametrized Continuous Representations of the Pareto Frontier as Decision Aids for Multi-Attribute Design ......................................................................................... 440
  M. Daskilewicz, B. German
Optimization Algorithm for Systems Governed by Chaotic Dynamics ........................................ 454
  A. Ashley, J. Hicken
Fatigue Design Load Development for Conceptual Structural Optimization .................................. 467
  H. Li, H. Bae

MULTIDISCIPLINARY ANALYSIS AND OPTIMIZATION: METAMODELING II

Managing Variable Fidelity Models in Population-based Optimization using Adaptive Model Switching ..................................................................................................................... 500
  A. Mehmami, S. Chowdhury, A. Messac
Mid-Range Approximations in Sub-Spaces for MDO Problems with Disparate Discipline Attributes ................................................................................................................... 513
  J. Ollar, V. Toropov, R. Jones
## VOLUME 2

### Optimistic Bias in Surrogate Prediction near Surrogate Optima
- A. Chaudhuri, R. Haftka

### Global Search for Diverse Competitive Designs
- Y. Zhou, A. Chaudhuri, R. Haftka, G. Cheng

### Truss Structure Satellite Bus Geometry-Structure Optimization Involving Mixed Variables And Expensive Models Using Metamodel-Based Optimization Strategy
- L. Peng, L. Liu, T. Long, X. Guo, R. Shi

### MULTIDISCIPLINARY ANALYSIS AND OPTIMIZATION: SHAPE AND TOPOLOGY METHOD DEVELOPMENT

#### Topology Optimisation: Increasing the Speed and Reliability of Design
- L. Kelly, A. Keane, A. Sobester, D. Toal

#### Strategies for Solving High-Fidelity Aerodynamic Shape Optimization Problems
- Z. Lyu, J. Martins

#### Robust Optimizations of Structural and Aerodynamic Designs
- K. Boopathy, M. Rumpfkeil

### MULTIDISCIPLINARY ANALYSIS AND OPTIMIZATION: EMERGING METHODS II

#### Development of Installed Propulsion Performance Model for High-Performance Aircraft Conceptual Design
- D. Allison, E. Alyanak

#### Towards Gradient-Based Design Optimization of Flexible Transport Aircraft with Flutter Constraints
- G. Kennedy, G. Kenway, J. Martins

#### A Visually-Informed Decision-Making Platform for Model-Based Design of Wind Farms
- S. Chowdhury, A. Mehmani, W. Tong, A. Messac

#### Incorporating Value-Driven Design into the Visualization of Design Spaces Using Contextual Self-Organizing Maps: A Case Study of Satellite Design
- T. Richardson, H. Kannan, C. Bloebaum, E. Winer

#### A Hybrid Differential Evolution Self-Organizing-Map Algorithm for Optimization of Expensive Black-box Functions
- S. Subramanian, D. Delaurentis

### MULTIDISCIPLINARY ANALYSIS AND OPTIMIZATION: UNCERTAINTY I

#### Statistical Sensitivity Analysis Considering both Aleatory and Epistemic Uncertainties in Multidisciplinary Design
- Z. Jiang, W. Chen, B. German

#### Uncertainty Propagation for a Subsonic Aircraft in a Coupled Fluid-Structure Interaction Environment during Conceptual Design
- K. Raghunath, D. Rancourt, D. Mavris

#### Covariance Matching Collaborative Optimization for Uncertainty-Based Multidisciplinary Aircraft Design
- S. Ghosh, C. Lee, D. Mavris

### MULTIDISCIPLINARY ANALYSIS AND OPTIMIZATION: UNCERTAINTY II

#### Multi-Fidelity Uncertainty Quantification: Application to a Vertical Axis Wind Turbine Under an Extreme Gust
- A. Padron, J. Alonso, F. Palacios, M. Barone, M. Eldred

#### Decoupled UMDO Formulation For Interdisciplinary Coupling Satisfaction Under Uncertainty
- L. Brevault, M. Balesdent, N. Berend, R. Riche
