ICING PHYSICS

An Experimental Study of Wind-Driven Water Film Flows over Roughness Array (AIAA 2014-2326) ........................................265
Kai Zhang, Yang Liu, Alric P. Rothmayer, Hui Hu

On the Numerical Solution of Three-Dimensional Condensed Layer Films (AIAA 2014-2327) ..................................................277
Alric P. Rothmayer, Hui Hu

Effects of Surface Characteristics and Droplet Diameter on the Freezing of Supercooled Water Droplets Impacting a Cooled Substrate (AIAA 2014-2328) ................................................................. 290
Joshua D. Blake, David S. Thompson, Dominik M. Raps, Tobias Strobl, Elmar Bonaccorso

Time-Resolved Temperature Distribution of Icing Process of Supercooled Water in Microscopic Scale (AIAA 2014-2329) ................................. 313
Mio Tanaka, Morita Katuaki, Shigeki Kimura, Hirotaka Sakae

Ice Roughness in Short Duration SLD Icing Events (AIAA 2014-2330) ............................................................. 318
Stephen T. McClain, Dana Reed, Mario M. Vargas, Richard E. Kreeger, Jen-Ching Tsao

A Thermal Analysis of a Hot-Wire Probe for Icing Applications (AIAA 2014-2331) ................................................................. 331
Peter M. Struk, David L. Rigby, Krishna Venkataraman

MANAGING WAKE VORTEX ENCOUNTER I

Laurence H. Mutuel, Frederic Barbaresco, Philippe Juge, Mathieu Klein, David Canal, Yves Ricci, Jean-Yves Schneider, Jean-Francois Monene, Erwan Lavernge

In-Flight Wake Encounter Prediction with the Wake Encounter Avoidance and Advisory System (AIAA 2014-2333) ................................. 379
Tobias Bauer, Dennis Vechtel, Fethi Abdelmoula, Thomas Immisch

Investigation of Encounters with Deformed Wake Vortices using a Monte-Carlo Simulation Methodology (AIAA 2014-2334) ........................................... 391
David Bieniek, Robert Luckner

Topological Approach to Multisensory Realization of Wake Turbulence (AIAA 2014-2335) .......................................................... 419
Yuriko Takeshima, Takashi Misaka, Shigeru Obayashi, Frank N. Holzäpfel, Hiroshi Kato, Shigeki Takahashi, Jusei Fujishiro

In-Flight Testing of Airborne LIDAR for Wake Vortex Detection, Characterization and Tracking (AIAA 2014-2336) ............................ 426
Meiko Steen, Mirko Stanisak, Thomas Feuerle, Peter Hecker

Anthony P. Brown

ICE ROUGHNESS EFFECTS ON HEAT TRANSFER AND TRANSITION

Convection from Ice Roughness with Varying Flux Boundary Conditions (AIAA 2014-2463) ......................................................... 447
Christopher Walker, Stephen T. McClain

Transient Heat Transfer Measurements of Surface Roughness due to Ice Accretion (AIAA 2014-2464) ................................................ 463
Yiqiang Han, Jose Palacios

Infrared and Hot-Wire Investigations of Ice Roughness Induced Transition (AIAA 2014-2465) ................................................................. 485
Stephen T. McClain, Christopher Walker, Logan Tecson

MANAGING WAKE VORTEX ENCOUNTER II: INCLUDING WAKE VORTEX MODELLING

Nashat N. Abid, Randal Van Valkenburg, Roland Bowles, Fanny M. Limon Duparcmeur

First Results from the NASA Wake Vortex Measurements at the Memphis International Airport (AIAA 2014-2467) ................................. 522
Donald P. Delisi, Matthew J. Pruis, Don Jacob, David Lai

Mathew J. Pruis, Donald P. Delisi

Numerical Study of a Long-Lived, Isolated Wake Vortex in Ground Effect (AIAA 2014-2469) ................................................................. 545
Fred Proctor

Impact of Wind and Obstacles on Wake Vortex Evolution in Ground Proximity (AIAA 2014-2470) ......................................................... 556
Frank N. Holzäpfel, Anton Stephan, Nikola Tchipev, Tobias Heel, Stephan Körner, Takashi Misaka
3-D MODEL DESIGN AND ICE MEASUREMENT METHODS FOR EXPERIMENTAL ICING SIMULATION

Ice Shapes on a Tail Rotor (AIAA 2014-2612) .............................................. 572
Richard E. Kreeger, Jen-Ching Tsao
Implementation and Validation of 3-D Ice Accretion Measurement Methodology (AIAA 2014-2613) ............................................ 580
Sam Lee, Andy P. Broeren, Richard E. Kreeger, Mark G. Potapczuk, Lloyd Ut
Validation of 3-D Ice Accretion Measurement Methodology for Experimental Aerodynamic Simulation (AIAA 2014-2614) .......................... 613
Andy P. Broeren, Harold E. Addy, Sam Lee, Marianne C. Monastero
Validation of 3-D Ice Accretion Measurement Methodology Using Pressure-Sensitive Paint (AIAA 2014-2615) .............................................. 635
Marianne C. Monastero, Michael Bragg
3D Swept Hybrid Wing Design Method for Icing Wind Tunnel Tests (AIAA 2014-2616) .............................................. 651
Gustavo E. Fujiwara, Brock D. Wiberg, Brian Woodard, Michael Bragg
Large-Scale Swept-Wing Icing Simulations in the NASA Glenn Icing Research Tunnel Using LEWICE3D (AIAA 2014-2617) .................... 667
Brock D. Wiberg, Gustavo E. Fujiwara, Brian Woodard, Michael Bragg

VOLCANIC ASH AND AVIATION

Real Time Volcanic Cloud Products and Predictions for Aviation Alerts (AIAA 2014-2618) .............................................. 684
Nickolay Krotkov, Shahid Habib, Arlindo da Silva, Eric Hughes, Kai Yang, Kelvin Brentzel, Colin Seftor, David Schneider, Marianne Guffanti, Robert L. Hoffman, Tim Myers, Johanna Tamminen, Seppo Hassinen

ENGINE ICING I - CLOUD MEASUREMENT AND CHARACTERIZATION

Development of a Sensor for Total Temperature and Humidity Measurements under Mixed-Phase and Glaciated Icing Conditions (AIAA 2014-2751) .............................................. 691
Dan Fuleki, Ali Mahallati, Thomas C. Currie, James D. MacLeod, Daniel C. Knezevic
Simulation of Fluid Flow and Collection Efficiency for an SEA Multi-Element Probe (AIAA 2014-2752) .............................................. 700
David L. Rigby, Peter M. Struk, Colin S. Bidwell
AIRBUS Flight Tests in High Total Water Content Regions (AIAA 2014-2753) .............................................. 723
Alice Grandin, Jean-Michel Merle, Marc Weber, John Strapp, Alain Protat, Patrick King

NASA PROPULSION SYSTEMS LABORATORY ICE CRYSTAL ENGINE ICING TEST

Turbofan Ice Crystal Rollback Investigation and Preparations Leading to Inaugural Ice Crystal Engine Test at NASA PSL-3 test Facility (AIAA 2014-2895) ................. 739
Ronald V. Goodwin, David G. Dischinger
PSL Icing Facility Upgrade Overview (AIAA 2014-2896) .............................................. 759
Thomas A. Griffin, Paul Lizanich, Dennis J. Dicki
NASA Glenn Propulsion Systems Lab: 2012 Inaugural Ice Crystal Cloud Calibration Procedure and Results (AIAA 2014-2897) .............................................. 781
Judith F. Van Zante, Bryan M. Rosine
Validation Ice Crystal Icing Engine Test in the Propulsion Systems Laboratory at NASA Glenn Research Center (AIAA 2014-2898) .................... 796
Michael J. Oliver
Modeling of Commercial Turbofan Engine with Ice Crystal Ingestion; Follow-On (AIAA 2014-2899) .............................................. 830
Joseph P. Veres, Philip C. Jorgenson, Ryan J. Coennen

AIRSPACE SYSTEMS HAZARDS AND CONSTRAINTS

Airline and Airport Operations Under Lightning Threats - Safety Risks, Impacts, Uncertainties, and How to Deal with Them All (AIAA 2014-2900) .......................... 845
Matthias Steiner, Wiebke Deierling, Kyoko Ikeda, Eric Nelson, Randall Bass
Observed Heuristics and Biases in Air Traffic Management Decision Making Using Convective Weather Uncertainty (AIAA 2014-2901) .............................................. 851
William Gibbons, Jon Jonsson, Steve Abelman, Randall Bass
An Optimized Neural Network Approach for Rapid Unpressurized Compartment Venting Predictions (AIAA 2014-2902) .............................................. 858
Patrick E. Rodi
ENGINE ICING II - ICE CRYSTAL ACCRETION AND PARTICLE IMPACT DYNAMICS

Possible Mechanisms for Turbofan Engine Ice Crystal Icing at High Altitude (AIAA 2014-3044) ........................................... 867
Jen-Ching Tsao, Peter M. Struk, Michael J. Oliver

Ice Particle Impacts on a Moving Wedge (AIAA 2014-3045) ........................................................................................................ 879
Mario M. Vargas, Peter M. Struk, Richard E. Kreeger, Jose Palacios, Kaushik Iyer, Robert E. Gold

Investigation of the Impact Behaviour of Ice Particles (AIAA 2014-3046) ......................................................... 902
Tobias Hauk, Ilia V. Roisman, Cameron D. Tropea

Experimental Measurement of Frozen and Partially Melted Water Droplet Impact Dynamics (AIAA 2014-3047) .............................................. 917
Jose Palacios, Sihong Yan, Chiong Tan, Richard E. Kreeger

Modeling and Analysis of Ice Shed in Multistage Compressor of Jet Engines (AIAA 2014-3048) ................................. 933
Reema Kundu, J V R Prasad, Rajkeshar Singh, Swati Saxena, Andy Breeze-Stringfellow, Tsuguij Nakano

Experimental Studies of Mixed-Phase Sticking Efficiency for Ice Crystal Accretion in Jet Engines (AIAA 2014-3049) ........................................ 948
Thomas C. Currie, Dan Fuleki, Ali Mahallati
