CO2 Capture 2013

Topical Conference at the 2013 AIChE Annual Meeting: Global Challenges for Engineering a Sustainable Future

San Francisco, California, USA
3-8 November 2013

ISBN: 978-1-63439-022-4
**TABLE OF CONTENTS**

(479a) Functionalization of Metal Organic Frameworks for Enhanced Stability Under Humid Environment for CO2 Capture Applications ................................................................. 1  
Dinara Androva, Yu Lei, Sunho Choi

(479b) Evaluating Different Classes of Porous Materials for Carbon Capture ................................................................. 2  
Johanna M. Obst, Li-Chiang Lin, Adam H. Berger, Richard L. Martin, Maciej Haranczyk, Abhoyjit S. Bhow, Karsten Reuter, Berend Smit

(479c) Carbon Dioxide Separation Using Highly Selective Narrow Pore Zeolite ZK-4 ................................................................. 3  
Ocean Cheung, Zohban Bacsi, Amber Mace, Panagiotis Krokidas, Aatto Laaksonen, Niklas Hedin

(479d) Understanding Carbon Dioxide Adsorption On Alkali Metal Exchanged Zeolite SSZ-13 ................................................................. 4  
Trong Pham, Rauf F. Lobo

(479e) Molecular-Level Insight Into Unusual Low Pressure CO2 Affinity in Pillared Metal-Organic Frameworks ................................................................. 7  
Nicholas C. Burch, Himanshu Jasuja, David Dubbeldam, Krista S. Walton

(479f) Adsorption of CO2 Over Supported Amine Absorents in the Presence of SOx and NOx Impurities ................................................................. 8  
Fatemeh Rezaei, Christopher W. Jones

(479g) Selective Dynamic CO2 Separations On Mg-MOF-74 Pellets At Low Pressures: A Detailed Comparison With 13X................................................................. 9  
Tom Rémy, Sunil A. Peter, Stijn Van Der Perre, Gino Baron, Joeri Denayer

(479h) Metal-Organic Framework With Optimal Adsorption Thermodynamics and Kinetics for CO2 Separations ................................................................. 10  
Youssef Belmahbouh

(524a) Dynamic Modelling and Analysis of a Coal Fired Power Plant Integrated With Post-Combustion CO2 Capture Process ................................................................. 12  
Niall Mac Dowell, Nilay Shah

(524b) Dynamic Modeling Studies On Absorption of CO2 in Rotated Packing Bed ................................................................. 14  
Jia-Lin Kang, Sun Kai, David Shan-Hill Wong, Shi-Shang Jang, Chung-Sung Tan

(524c) A Plantwide Dynamic Model of Post-Combustion Amine Scrubbing With Aqueous Piperazine ................................................................. 15  
Matthew S. Walters, Thomas F. Edgar, Gary T. Rochelle

(524d) Study of the Effect of Stripping Components in Absorption Processes for CO2-Removal From Power Plant Flue Gases ................................................................. 16  
Andreas Kossmann, Peter Moser, Harald Klein

(524e) Incorporating Technology Improvements in Amine Scrubbing in Power Plants With Post-Combustion Capture ................................................................. 17  
Mathieu Lucquiaud, Xi Liang, Jon Gibbins

(524f) CO2 Post Combustion Capture Operational Flexibility and Scale-Up For Power Plants ................................................................. 18  
Prachi Singh

(535a) Modeling and Optimization of a MOF-Based Pressure/Vacuum Swing Adsorption Process Coupled With Material Selection ................................................................. 22  
Hanyu Gao, Fengqi You, Randall Snurr

(535b) Energy and Cost Estimation for CO2 Capture From Dry Flue Gas Using a Vacuum Swing Adsorption Process ................................................................. 23  
Naresh Susarla, Reza Haghpanah, Iftekar A. Karimi, S. Farrow, Arvind Rajendran

(535c) CO2 Capture From Flue Gas By PSA Utilizing a Structured Adsorbent ................................................................. 25  

(535d) Post-Combustion CO2 Capture Using Structured Bed Loaded With Functionalized SBA-15 Sorbent ................................................................. 26  
Nikhil Mittal, Arunkumar Samanta, Juan Segura, Saeid Amiri, Partha Sarkar, Rajender Gupta

(535e) A New Temperature Swing Adsorption Configuration for High Purity and Recovery CO2 Capture From Flue Gas With Increased Throughput ................................................................. 28  
Brian J. Maring, Paul A. Webley

(535f) Impact of Water Vapor and Oxygen On Amine Sorbents for Post-Combustion CO2 Capture ................................................................. 29  
Sonia Hammache, James S. Hoffman, Ademeci Egbebi, McMahan L. Gray

(535g) Adsorption Isotherm Measurements of Gas Shales for Subsurface Temperature and Pressure Conditions ................................................................. 30  
Beibei Wang, Reza Haghpanah, Jennifer Wilcox
(590a) CFD Simulation of Liquid-Gas Flows On Structured Packing Elements for An Acid Gas Removal Column
Chinh S. Ho, Jeong-Eun Kim, Thanh D. B. Nguyen, Young-II Lim ................................................................. 31

(590b) Numerical and Experimental Investigation of Liquid Film Flows On Packings in Absorbers for Post-Combustion CO2 Capture
Yoshiyuki Iso, Jian Huang, Mariko Kato, Shin’ichi Matsuoka, Kenji Takano, Nobuki Fujinara .......................... 32

(590c) Advanced Characterization of CO2 Absorption Into Dispersed Aqueous Amine Solvents
Yash Tamhankar, James R. Whiteley, Mike Retzert, Clint P. Aichele ................................................................. 34

(590d) Consistent Measurements of Hydraulic and Mass Transfer Packing Characteristics
Mieczyslaw Perry, Chao Wang, Frank Seibert .................................................................................................. 35

(590e) Packing Economy Analysis for Post-Combustion CO2 Capture
Chao Wang, Mieczyslaw Perry, Frank Seibert, Gary T. Rochelle ................................................................. 36

(590f) Investigating the Impact of Non-Isothermal Behavior and the Role of Water Transfer in Membrane Contactors for CO2 Capture
Thibaut Neveux, Yann Le Moullec, Christophe Castel, Eric Favre .................................................................. 38

(640a) The Influence of Plasticization and Dual-Mode Competitive Effects On CO2 Transport in Thermally Rearranged (TR) Polymers
Krisitser L. Gleason, Zachary P. Smith, Qiang Liu, Donald R. Paul, Benny D. Freeman .......................... 40

(640b) Facilitated Transport in Hydroxide-Exchange Membranes for Post-Combustion CO2 Separation
Lai Xiong, Shuang Gu, Kurt Jensen, Yushan Yan ......................................................................................... 41

(640c) CO2 Removal From High Pressure Natural Gas With Hybrid Fixed-Site-Carrier Membranes: Experimental, Process Design and Feasibility Analysis
Xuezhong He, Taek-Joong Kim, May-Britt Hägg .................................................................................. 42

(640d) Synthesis, Characterization, and Gas Transport Properties of Two Isomeric Thermally Rearranged (TR) Polymers for Gas Separation Membranes
Qiang Liu, Haifun Boyiggin, Donald R. Paul, James E. McGrath, Benny D. Freeman ......................................................... 45

(640e) Process Modeling and Optimization of Post-Combustion Carbon Capture With N2-Selective Membranes
Kumnoon Narakornpijit, Mengyao Yuan, Reza Haghighan, Jennifer Wilcox ............................................................. 46

(640f) Benchmarking Of Hydrogen Selective Membranes Through Experiments and Modelling
Johannis A. Z. Pieterse, Jurriaan Boon, Jan-Wilco Dijkstra ........................................................................... 47

(647a) The Novel Cal-C Process for Single-Stage Removal of CO2, SOx and NOx – Experimental Studies and Process Analysis and Integration
Niranjani Deshpande, Nihar Phalak, William Wang, L. S. Fan ....................................................................... 48

(647b) Carbon Dioxide Absorption Into Aqueous Solution of Hydrophilic Amine-Functionalized Ionic Liquids
Bihong Lu, Xiangqian Wang, Jiajia Jin, Wei Li .......................................................................................... 49

(647c) The Effect of Tethering Strategies On the Surface Structure of Amine-Functionalized Ionic Liquids: Inspiration On the CO2 Capture
Huaixin Xing, Yan Yan, Qiwei Yang, Zongbi Bao, Baogen Su, Yiwen Yang, Qilong Ren .................................. 51

Qing Ye, Yongqi Lu ............................................................................................................................................ 52

(647e) Carbon Capture and Utilization By Three-Step Aqueous Phase Mineralization
Azadeh Hemmati, Jie Bu, Jalal Shayan, Paul Sharratt ................................................................................... 53

(647f) Wood Ash Suspensions in Water As a Solvent in CO2 Absorption Processes
Sandra L. Petho, Wilson Miguel Salvagnini, Maria Elena S. Taqueda .......................................................... 54

(647g) CO2 Chemical Transformation to Valuable Commodities: Toward a Utopia for Fossil-Fuel-Based Economies
Amin Taheri Najafabadi ......................................................................................................................................... 55

(654a) Effects of Inorganic Salts On Absorption of Carbon Dioxide and Oxygen for Alkanolamine Solution Containing Diethyletriamine and Piperazine in a Rotating Packed Bed
Cheng-Hsiu Yu, Yu-Xiao Lin, Chung-Sung Tan ............................................................................................ 56

(654b) A Parametric Study of CO2 Absorption Into An Aqueous Potassium Carbonate Solution Promoted With Amines in a Packed Bed Column
Shihan Zhang, Nicholas Devries, Yongqi Lu ..................................................................................................... 57

(654c) Prediction of Reaction Rate Constant of Carbon Dioxide Absorption Into Aqueous Amine Solution
Kazuho Goto, Hitotaka Yamada, Takayuki Higashii ....................................................................................... 58
(654d) Modeling the Absorption of CO2 Into Aqueous Blends of Deea and Mapa
Juliana Garcia Moret-Sohn Monteiro, Majeed Hammad, Saddum Hussain, Hanna Knutilla, Hallvard F. Svendsen

(654e) Pilot Test and Simulation of An Advanced Amine Process for CO2 Capture
Xi Chen

(654f) Techno-Economic Analysis for CO2 Capture and Storage Processes With Concentrated PZ and Mdea/PZ Blends
Peter T. Frallie, Darshan J Sachde, Tarun Mudan, Gary T. Rochelle

(702a) Low-Pressure Sweep Membrane Modules for Carbon Dioxide Capture
Jay Kniep, Pingjiao Hao, Ken Chan, Don Fulton, Brice Freeman, Tim Merkel, Richard Baker

(702b) Major Interest of Hollow Fiber Membrane Contactors for An Ammonia-Based CO2 Capture Process: Detailed Analysis of An Innovative Process
Camel Makhloufi, Denis Roizard, Eric Favre

(702c) Membrane Assisted Liquid Absorbent Regeneration (MALAR): Innovative Use of Membranes in Liquid Absorbent Based CO2 Capture
Paul Feron, Shuafie Zho

(702d) Pressure Swing Membrane Absorption for Pre-Combustion CO2 Capture From Shifted Syngas
Kamalesh K. Sirkar, John Chau, Xingming Jie, Gordana Obuskovic

(702e) Application of Composite Polymeric Membranes for Efficient Regeneration of Physical Solvents
Alireza Pesaran, Brian Tande

(702f) Efficient Capture of CO2 From Pulverized Coal Fired Plants
Emmanuel A. Dada, Kazeem Olarewaju, Roy A Drayton

(702g) CO2 Capture and Conversion Based On ILs
Suojiang Zhang

(702h) Modeling of CO2 Capture Using Microalgae
Lidiane Maria Andrade, Maria Anita Mendes, Carlos Alberto Silveira, Cláudio Augusto Oller Nascimento

(702i) Biogas Sweetening Via a Carbamate Crystallization Approach
Shudong Zheng, Qing Liu, Yi He, Yao Shi

(702j) Preparation and Absorption Behaviors Study of Doped Li4SiO4 At Low CO2 Concentration
Zhang Qi, Zhang Sai

(702k) Zr Doping Effect On CeO2 As the Catalyst in the CO2 – Ethylbenzene Reaction
Qian Wang, Wenying Li

(702l) Combined Natural Gas Liquefaction and Power Generation Plant With Carbon Dioxide Sequestration
Sandeep Verma, T. S. Ramakrishnan

(702m) Computational Study of the Proton Affinity, 1 H NMR Chemical Shifts, and Thermophysical Properties of Imidazole Derivatives
Haining Liu, Jason E. Bara, C. Heath Turner

(702n) Separation Selectivity of Various Gases in the Ionic Liquid 1-Ethyl-3-Methylimidazolium Tris(pentafluoroethyl)Trifluorophosphate
Mamoun Althuluth, Cor J. Peters, Abdollah S. Berrouk, Maaike C. Kroon

(702o) Modelling and Measuring Hydrate Promotion for CO2 Capture
Peter Jørgensen Herslund, Kaj Thomsen, Jens Abdilskov, Nicolas Von Solms, Aurélie Galfre, Pedro Bräntunus, Matthias Kwaterski, Jean-Michel Herri

(702p) Experimental Characterization Of Multiply-Substituted Alkylimidazoles As Solvents and Polymeric Membranes For CO2 Capture
Jason E. Bara, Matthew S. Shannon, Joshua Moon, Kristopher Reclusado

(702q) Tuning the Physical and Chemical Properties of Novel CO2 Capture Solvents Based On Hybrid Nanomaterials
Camille Petit, Ah-Hyung Alissa Park

(702r) The Study of Using Novel Scrubbing Agent Mg(OH)2 Solution to Capture CO2 From Flue Gases
Lei Cheng, Tongyan Li, Tim. C Keener, Joo-Youp Lee

(702s) Electrochemical Strategies for Reduction of Greenhouse Gas Emissions
Michael C. Stern, Howard Herzog, T. Alan Hinton, Aly Eltayeb

(713a) Integrated Absorber-Regenerator System for Rapid Screening of Thermal and Thermo-Oxidative Degradation of Primary and Secondary Amines for Predicting Fate in Validation-Scale CO2 Capture (CC) Systems
Indira Jayaweera, Palitha Jayaweera, Jianer Bao, Srinivas Bhamidi
(713c) Development of Fast and Thermally Stable Solvent System for CO2 Capture From Post-Combustion Flue Gas .......................................................... 92
Kun Liu, Naser S. Matin, Quanzhen Huang, Chase Martin, Joseph E. Remias, Kunlei Liu

(713d) Advanced Stripper Configurations for CO2 Capture Using PZ and MEA .......................................................... 93
Yu-Jeng Lin, Tarun Madan, Gary T. Rochelle

(713e) Rigorous Modeling of Novel Absorption-Stripping Process Configurations With Aqueous Piperazine for CO2 Capture From Natural Gas Combustion .......... 94
Darshan J Sachde, Gary T. Rochelle, Tarun Madan

(713f) Integration of Solar Thermal Energy With Post-Combustion Carbon Capture Process .......................................................... 98
Forough Parvaneh, Manish Sharma, Abdul Qadir, Rajab Khalilpour, Matteo Chiesa, Ali Abbas

(769a) Evaluation of Reclaimer Sludge Disposal Options From Amine-Based Post-Combustion CO2 Capture Process .......................................................... 99
Andrew Sexton, Kevin Fisher, Eric Chen, Paul Nielsen, Katherine Dombrowski, Prachi Singh

(769b) Stack Sampling and Analytical Methods for Post-Combustion Carbon Capture Amines and Degradation Products .......................................................... 101
Stephanie Shaw, Annette Rohr, Moetaz Attalla, Karl A. Hoff

(769c) A Combined Hazard and Life Cycle Assessment of Six Amine Solvents for Post-Combustion CO2 Capture .......................................................... 102
Sara Badr, Jerome Frutiger, Peng Soon Tan, Stavros Papadokonstantakis, Konrad Hungerbuehler

(769d) Bicine Production in Promoted-Mdea Solvents .......................................................... 103
Fred Clossmann

(769e) Thermal Decomposition of Nitrosamines in Amine Scrubbing .......................................................... 105
Nathan A. Fine, Gary T. Rochelle

(769f) Influence of Amine Structural Characteristics On N-Nitrosamine Formation in Post-Combustion Carbon Dioxide Capture Systems .......................................................... 108
Ning Dai, William A. Mitch

(774a) A Novel Fluidized Bed Hydrator for Steam Reactivation of Calcium-Based CO2 Sorbent .......................................................... 109
Alan Wang, Dawei Wang, Niranjani Deshpande, Nihar Phalak, William Wang, L. S. Fan

(774b) Dynamic Modeling of a Solid-Sorbent CO2 Capture System .......................................................... 110
Srinivasarao Modekurti, Debangsu Bhattacharyya, Stephen E. Zitney, David C. Miller

(774c) Comparative Environmental Life Cycle Assessment of CO2 Capture Systems Based On Ionic Liquid and Monoethanolamine Solvents .......................................................... 111
Reza Farahipour, Arunprakash T. Karumanthi

(774d) Whole-Chain CCS System Modelling: Enabling Technology to Help Accelerate Commercialisation and Manage Technology Risk .......................................................... 112
Mark Matzopoulos, Alfredo Ramos

(774e) Optimization of CO2 Capture, Utilization and Sequestration (CCUS) Supply Chain Networks .......................................................... 113
M. M. Faruque Hasan, Fani Boukouvala, Christodoulos A. Floudas

(801a) Thermodynamic Analysis of Amine Solvents for CO2 Scrubbing .......................................................... 115
Paul M. Mathias, Satish Reddy, Arnold R. Smith, Kash Afshar

(801b) Thermodynamic Modeling of Carbon Dioxide Solubility in Aqueous Morpholine Solutions .......................................................... 116
Naser S. Matin, Joseph E. Remias, James K. Neathery, Kunlei Liu

(801c) Modeling of CO2 Absorption Into Aqueous Piperazine/Aminoethyipiperazine .......................................................... 117
Yang Du, Gary T. Rochelle

(801d) Simulation of a Phase Change System for CO2 Capture .......................................................... 118
Diego D. Pinto, Juliana Monteiro, Hanna Knuutila, Finn Andreasseus, Thor Mejdell, Hallvard F. Svendsen

(801e) Solubility of Carbon Dioxide in Aqueous Solutions of Potassium Carbonate (“Activated Hot Potassium Carbonate Process”) .......................................................... 121
Michael Wagner, Nichola McCann, Jacek Kumela, Dirk Speyer, Gerd Maurer, Hans Hasse

(808a) CO2 Capture By Gas Hydrate Formation: Combined Effect of Thermodynamic and Kinetic Promoters .......................................................... 122
Nagu Daraboina, Nicolas Von Solms

(808b) CO2/Brine/Rock Interactions Under CO2 Sequestration Conditions .......................................................... 123
Yee Soong, Bret H. Howard, S. W. Hedges, Dustin McIntyre, Robert P. Warzinski, Gino Irdi, Igor Haljasmaa, Dustin Crandall

(808c) Novel CO2 Capture and Carbonation Process With Waste Concrete .......................................................... 125
Daiki Shuto, Akihito Yamazaki, Tershisa Hongo, Atsushi Hikaka

(808d) Direct Capture and Conversion of CO2 From Flue Gas Via Ex-Situ Mineral Carbonation Using Chemical and Biological Catalysts .......................................................... 126
Edward J. Swanson, Patrick V. Brady, Ah-Hyung Alissa Park
(808e) A Green Approach to Mitigate CO2 Using Mixed Microbial Culture

Smita Raghuvanshi, Suresh Gupta, Somesh Mishra

(816a) Steady-State and Dynamic Modeling of a Moving Bed Adsorber/Regenerator for Solid Sorbent CO2 Capture

Hosoo Kim, Srinivasarao Modekuri, David C. Miller, Debangsu Bhattacharyya, Stephen E. Zitney

(816b) Modeling, Analysis and Optimization of Process Technologies for Flue Gas Dehydration

Hanyu Gao, Fengqi You, Randall Saur

(816c) On the Design and Modeling of a Rotary Reactor for Chemical-Looping Combustion With a Nickel-Based Oxygen Carrier

Zhenlong Zhao, Tianjiao Chen, Ahmed F. Ghoniem

(816d) Experimental Characterization of Rotary Reactor for Chemical-Looping Combustion

Tianjiao Chen, Mruthunjaya Uddi, Zhenlong Zhao, Ahmed F. Ghoniem

(816e) Comparison of Various Carbon Capture Technologies to Reduce CO2 Emissions From a Cement Plant

Dursun Can Ozcan, Davide Bocciardo, Maria Chiara Ferrari, Hyungwoong Ahn, Agnieszka M. Kierzkowska, Christoph R. Müller, Stefano Brandani

(816f) Non-Isothermal Performance Modeling for CO2 Adsorption

Ronald W. Breault, E. David Huckaby, Lawrence J. Shadle, James Spenik

(816g) A Correlation for the Impact of Extracting Steam From Power Plants for Carbon Capture Processes

Adam H. Berger, Abhoyjit S. Bhown
