Global Congress on Process Safety 2014

Topical Conference at the 2014 AIChE Spring Meeting and 10th Global Congress on Process Safety

New Orleans, Louisiana, USA
30 March - 3 April 2014

# TABLE OF CONTENTS

(1a) Possible vs. Practical: Engineers Must Lead the Development of Practical Technologies ............................................. 1
   William Banholzer

(46aa) How to Better Manage the Combined Effects of Barrier (IPL) Impairment and Ongoing Work Hazard Risks ............... 2
   Mike Neill

(46ae) Comparative Consequence Analysis Between LNG Import and Export Terminals through the Use of PHAST and GIS ........................................ 3
   Guido Lamus, Bilkis Islam, Sonny Sachdeva, M. Sam Mannan

(46ah) Challenges of Explosion Risk Management in Arctic Environments ...................................................... 4
   Derek M. Engel, Are Brattetrig, Tom Debold, Scott G. Davis

(46b) Experimental Study On The Relationship Between The Charge Amount Of Polypropylene Granules and Electrostatic Discharges While Silo Loading ....................... 5
   Kwangseok Choi

(46c) Management of Change at Shell ........................................................................................................... 14
   Soy Tir

(46f) Inherently Safer Design: Lessons Learned about the Principle of Simplification ............................................. 15
   Russell A. Ogle, Andrew R. Carpenter, Sean J. Dee, Brenton L. Cox

(46g) On What Do You Base the Safety of Your Process .................................................................................. 23
   John Wincek

(46i) The Need for a Unified Process Safety Map ....................................................................................... 34
   Teddy Bucher, John T. Perez

   Steve Arendt

(46k) Using Metrics to Improve Emergency Management ............................................................................... 36
   Rixio E. Medina

(46l) Flame Propagation in Dust/Air Mixtures Under Reduced Pressure Conditions ......................................... 37
   Hannes Kern, Gerald J. Wieser, Harald Raupenstrauch

(46n) Using Incident Risk Analysis to Learn from Near Misses ........................................................................ 47
   Sharon K. Tinker

(46r) Use of KPI’s for Process Safety ........................................................................................................... 59
   Prasad Goteti

(46s) PSSR: The Easiest and Sometimes Forgotten PSM Element ........................................................................ 60
   Brian D. Rains

(46u) Kinetic Identification and Risk Assessment Based on Non-Linear Fitting of Calorimetric Data ................ 61
   Charles Guinard, Michal Dabros, Bertrand Roduit, Thierry Meyer, Francis Stoessel

(46x) Integration of Learned Knowledge into the Technical Information System ....................................... 76
   Craig A. Richardson

(46y) Control Systems Integrity Review - Selective Application of Controls Systems HAZOP (CHAZOP) Study ..................................................... 77
   Steven T. Maher, David Bent, Whye Foong, Senem Weaver, Stephanie Smith

(47f) Are We in Control of Our Safety Critical Equipment in Drilling Operations? ........................................ 78
   Claudio Castaneda, Luis Rincon

(49b) Development of Low-Charring Nanocomposites to Aid in Fundamental Understanding of Nanocomposite Flame- Retardancy ......................................................... 82
   Logan Hatanaka, Sonny Sachdeva, Agustin Diaz, Zhengdong Cheng, Qingsheng Wang, M Sam Mannan

(43a) Best Practices in IPL Integrity Management - Case Study in Kuwait Oil Company ............................ 91
   Chandra Sreepathi

(47a) Multiple Perspectives on the Role of Safety Leadership in Major Hazard Organisations .................. 92
   Julie Bell, Waddah Ghanim, Chrysanthi Lekka

(47ab) Using Explicit Finite Element Analysis to Simulate the Dynamic Response and Predict the Structural Damage Associated with a Real-Life Process Equipment Failure Due to an Internal Detonation ........................................................................................................... 93
   Phillip E. Prueter

(47ac) Analysis of the Potential Energy Sources of Risk of Tools in Presence of Hazardous Area in Segment of Oil and Gas ........................................................................ 107
   Leandro Erthal, Caetano Moraes, Denize D. Carvalho

(47bp) Incident Lessons Learned Portal .......................................................... 253
Marco Vela

(47bq) A Functional System Approach to Criticality Analysis, Fsca ........................................ 254
Tacoma Zach

(47br) Can Black Swans be Red Herrings? ........................................................ 257
Stephen Shaw

(47bs) Emergency Response Plan: It's Above and Beyond Best Practices ................................ 258
Sarah Acton, Najmeh Vaez, Suresh Vellisetty, Dennis Batts

Margaretha Thaliharjanti

(47bw) Process Risk Assessment and “Safe Area” for a Petro-Chemical Plant in China .................. 260
Jing Yu, S. Dharmavaram, Jiming Wang

(47bx) Identifying and Quantifying MAJOR Hazard for Platforms Deck Raising Using Synchronous Hydraulic Jacking System ............................................. 261
Ahmad Harmantoro, Margaretha Thaliharjanti

(47by) A Creative & Strategic Initiative (Champions Model) In Managing Process Hazard: Process Safety Culture ........................................................ 275
Sharad Rathore

(47c) Defining Dust Hazard Areas ...................................................................... 276
Michelle Murphy

(47ca) Challenges and Achievements in Implementing Management of Change System at Binh Son Refinery (BSR), Vietnam .................................................................................. 277
Bong Nguyen Thanh

(47cd) Process Safety Culture Applied in Latin America Oil and Gas Industry: Experiences in Ecopetrol Colombia .............................................................. 284
Oscar Barajas

(47cf) Ammonium Nitrate Condition-Dependent Thermal Decomposition .................................. 285
Zhe Han, Sonny Sachdeva, Maria Papadaki, M. Sam Mannan

(47cg) CFD Modeling for Prediction and Prevention of Runaway Reaction ................................ 286
Edha Mendez, Yi Liu, M. Sam Mannan

(47ch) Sensitivity Analysis of Variables Affecting the Runaway Decomposition of Dicumyl Peroxide .............................................................. 287
Olga Reyes-Falces, Valeria Cassson-Moreno, Luc Vechot

(47ci) Beyond the Phi Factor: Correction of Experimental Data for Vaporization in Tempered Reactions, for Pressure-Relief System Design ........................................ 288
Guiling Zhao

(47cj) The Effect of Non-Uniform Distribution of Obstacles on Deflagration-to-Detonation Transition (DDT) .......................................................... 302
Camilo Rosas, Hao Chen, Eric L. Petersen, M. Sam Mannan

(47ck) Dispersion Modeling of a Cloud Generated By Depressurization of a Flashing Multi- Component Liquid System .......................................................... 303
Laurent Nouailhetas, Ralph Mansik

(47cl) Quantitative Analysis of Environmental and Societal Risk for Onshore FUEL Pipelines .......................................................... 316
Alexander Gutierrez, Lina Parra, Maria Camila Saurez, Felipe Muñoz

(47cm) Characterization Of Vaporization Rates Of Liquid Nitrogen On Water and Ice .......................................................... 318
Nirupama Gopalaswami, Luc Vechot, Tomasz Olewski, M. Sam Mannan

(47cn) Consequences Analysis Associated with the Failure of the Safety Interlock System of Methanator (I-351) of the Ammonia Plant of Fertilizantes Nitrogenados De Venezuela, C.E.C. (FertiNitro) .......................................................... 331
Ruben Garcilazo Sr., Juan Duarte Sr.

(47cq) Building Siting Evaluation: A New Software Tool for the Determination of Blast Loads from Potential Vapour Cloud Explosions (VCEs) .......................................................... 333
Kehinde Shaha, Nic Cavanagh

(47cr) Modelling of Time-Varying Dispersion from Ground-Level Liquid Pools or Vapour Area Sources .......................................................... 334
Henk W. M. Witlox, Mike Harper, Maria Fernandez

(47cu) Nanotechnology on Removing Arsenic Using Modified Carbon NANO- Tubes (MCNTs) .......................................................... 349
Ahmed Ashiq

(47cv) Possible Two Physical Hazard Scenarios for Polystyrene Foams, Based on Life Cycle Stages .......................................................... 350
Toyoaki Nakarai, Satoru Yoshino, Atsumi Miyake

(47cw) Problems Encountered in the Development of a Process Safety Climate Tool .......................................................... 364
Julie Bell, Sarah Binch, Caroline Sugden
(47d) Upper Explosible Limits for Combustible Dusts ................................................................. 365
    Richard Prugh

(47e) Agglomeration Effect on Combustion and Explosion Properties of Nanoparticles ........... 366
    Jiaqi Zhang, Yi Liu, Hao Chen, M. Sam Mannan

(47g) Shock Interaction with Dust Layers for Different Mach Numbers and Dust Layer Depths ...... 379
    Amira Yousuf Chowdhury, Brandon Marks, H. Greg Johnston, Eric L. Petersen, Sam M. Mannan

(47h) Numerical Simulation of Cryogenic Boiling .............................................................. 380
    Monir Ahammad, Yi Liu, Samina Rahmani, Luc Vechot, Sam Mannan

(47i) Homogenous-Gaseous and Particle-Gas-Air Combustion in Turbulent Environment: Analytical
    Formulation and Experimental Validation ........................................................................ 381
    Yacheslav Akkerman, Ali S. Rangwala

(47j) Application of Leading and Lagging Indicators to Improve Laboratory Operation Safety .... 382
    Tianxing Cai, Qiang Xu

(47q) Graphic Visualization of IPL Status Enables Better Judgement of Inspection, Maintenance and
    Repair Priorities and Helps Day to Day Assessment of Operational Risk and Work Management
    Decisions ........................................................................................................................ 383
    Mike Neill

(47r) 2. Successes in Implementing PHA/HAZOP/LOPA in Major Capital Projects in a Steel
    Company ......................................................................................................................... 384
    William Bridges

(47s) Liquid Fuels Release Rate Calculation in Transport Pipelines with Complex Topographical
    Conditions ...................................................................................................................... 385
    Carlos A. Manjarres, Jaime E. Cadena, Felipe Munoz

(47t) Decision Tree to Optimize NFPA 30 Criteria in Fire Protection Systems Applied in Oil and Gas
    Industry ......................................................................................................................... 386
    Oscar Barajas

(47u) Sil Determination of High Integrity Pressure Protection System (HIPPS) ......................... 387
    Frik Febby, Margaretha Thalharjanti

(47w) Comparison of Different Methods to Determine the Activation Energy of Flammable Dusts
    Mixed with Inert and Inhibitory Materials ....................................................................... 388
    Christoph Wanke

(47x) Economical Approach Quantification of Impacts in Major Accidents ......................... 389
    Alexander Gutierrez, Carlos A. Manjarres, Felipe Munoz

(47z) Application of Consequence Analysis in the Development of Emergency Response Plans for
    Accidental Events in Liquid Fuels Transport Pipelines .................................................. 390
    Carlos A. Manjarres, Alexander Gutierrez, Felipe Munoz

(52a) Shale Oil and Gas -Wellhead to Fuel ................................................................. 391
    Lawrence Kremer
