Process Development Division 2014

Core Programming Area at the 2014 AIChE Spring Meeting and 10th Global Congress on Process Safety

New Orleans, Louisiana, USA
30 March - 3 April 2014

ISBN: 978-1-63439-077-4
TABLE OF CONTENTS

(1a) Possible vs. Practical: Engineers Must Lead the Development of Practical Technologies ......................................................... 1
    William Banholzer

(7a) Improving the Speed and Representation of Physical Properties Regression ................................................................. 2
    John Pendergast, John Dowdle, Pradeep Suresh

(7b) Shale Gas and the History of C1 Chemistry ......................................................................................................................... 3
    Joseph B. Powell

(7c) Using the Patterns of Invention in the Patent Literature to Predict Disruption ................................................................. 4
    Jack Hipple

(7d) Mitsubishi Advanced Technology for On-Purpose Butadiene Production .................................................................................. 19
    Michio Higashijima

(26a) Thinking Like Sherlock Holmes for Process Filtration Technology Selection ................................................................. 20
    Barry A. Peltmutter

(26b) Managing Process Safety in Pilot Plants and Bench Scale Units ............................................................................................... 32
    Joseph B. Powell

(26c) Mechanism-Free Chemical Engineering Kinetics ................................................................................................................. 33
    Blake T. Broussard, Maxwell W. Smith, Jessica N. Orsak, Jonathan H. Worstell

(26d) Dynamic Kinetic Test Unit for Determination of Kinetic Parameters Under Prototype Conditions ................................................................................................................. 48
    Chandrakant B. Panchal, Richard Doctor, John C. Prindle

(26e) Rapid Process Scale-up through Innovative Design Methodologies .......................................................................................... 49
    John C. Prindle, Richard Doctor, Aspi K. Kolah, Carl T. Lira, Dennis J. Miller, Chandrakant B. Panchal

(31a) Energy Systems Model: Development of a Discrete-Event Simulation Tool to Facilitate Operating Decisions ................................................................. 50
    Intan Hamdan, Scott J. Bury, Rene Diaz

(31b) Oxygenated Compounds as Reducing Agent for NOx Removal in a Selective Non-Catalytic Reduction (SNCR) System ................................................................................................................. 51
    Maoqi Feng, Reggie Zhan

(31c) Flare Emission and Greenhouse Gas Reduction Study during an Ethylene Plant Startup on Recycle through Dynamic Simulation and Process Optimization ........................................................................... 63
    Hu Dinh, Shujing Zhang, Qiang Xu, Fadwa T. Eljack, Servek Kamrava, Mahmoud El-Halwagi

(31d) Chemical Plant Startup Simulations for Flare Emission Reduction .......................................................................................... 64
    Jian Zhang, Ziyuan Wang, Qiang Xu, Thomas C. Ho

(31e) Dynamic Simulation for Flare Minimization Strategy in an Ethylene Plant Shutdown .......................................................... 65
    Ziyuan Wang, Qiang Xu, Thomas C. Ho

(31f) Assessing the Use of Ceramic Membrane Bioreactor for Anaerobic Treatment of High-Load Food Wastewater at Bench Scale and Pilot Scale ....................................................................................... 66
    Carlos M Negro Sr., Luis Cortijo Sr., Helen Barndok, Patricio Lopez Sr., Daphne Hermosilla, Elena Meabe, José R. Santiago Sr., Frank Rogalla Sr.

(38a) Common Issues that Can Limit Steam Trap Performance ................................................................................................................. 69
    Norman White

(38b) Overview of Steam Trap Types and Their Operation ................................................................................................................. 70
    Norman White

(38c) A Practical Approach to Feedwater Quality Requirements in Boiler Systems .................................................................................. 71
    Deborah Bloom, David Puchan

(38d) Steam Traps: Audience Survey of Operation and Maintenance .............................................................................................. 83
    Jonathan H. Worstell, William Hollar

(48a) Operator Errors and What Can be Done to Minimize ................................................................................................................. 84
    Tom Nolan, Dustin Beebe

(48aa) When Sharing is not Enough… HUAA ................................................................................................................................. 99
    Mike Bearrow

(48ac) Autocad - Smart Grid – Agriculture - Architecture and the United States Government .................................................................................. 103
    Ethelia Scott

(48ad) Production, Characterization and Catalytic Studies of Biobased Carbon Materials .................................................................................. 104
    Qiang Tan, Jilei Zhang, Zhiyong Cai

(48ag) Uncertainty in Sour Gas Viscosities Estimation, What Is the Effect on Your Reservoir Inflow and Tubing Performance ................................................................................................................. 105
    Adel Elsharkawy
(48ah) Chromonic Nanocarriers for Chemotherapeutics: Size Distribution and Control Release Studies
Rahul Misra, Sunat Mohanty

(48ai) Double Containment Piping Systems: A Fail-Safe, Leak-Free Solution
Patrick Fedor, Darin Johnson

(48b) DTP Process - Now Ready to License
Kazunori Honda, Atsushi Okita, Jumpei Takahashi, Koji Oyama, Nobuyasu Chikamatsu, Mitsuo Morita, Shuji Obayashi

(48d) Self-Cleaning "Bernoulli" Type Filters Used in Onshore and Offshore Applications
Artur W. Krueger

(48f) Effects of Support on Sulfur Tolerance and Regeneration of Pt Catalysts Measured By Ethylene Hydrogenation and EXAFS
Jorge Pazmino, Chuansheng Bai, Jeffrey T. Miller, Fabio H. Ribeiro, W. N. Delgass

(48h) Improved Operational Efficiency and Reliability through Insulation Materials Selection
Steven Coppella

(48ij) Boiler MACT Compliance: Mercury in Fuel Gas
Patrick Laine

(48k) Young Professional Simulation Tutorial
Naomi Hua, Mike Donahue

(48m) Development Of Polymeric Sulfonic Acid Composite Membranes For Fuel Cell Applications
Jimoh Adewole, Abdullah S. Sultan, Amir Al-Ahmed, S. M. Javid Zaidi

(48o) Facility Siting for Major Projects – Implementation of Consequence Analysis/Quantitative Risk Analysis, a Project Development Lifecycle Framework
Mohammad Faruqi Haider

(48p) Global Energy and Transportation and Mobil Oil
Ethenia Scott

(48r) Characterization of Iron Phthalocyanine As the Active Material for Lithium Batteries
Sarwan S. Sandhu, Joseph P. Fellner, David Anneken

(48s) Design of a Free-Fall Reactor for Fast Pyrolysis of Waste Plastics
Pravin Kannan, Ahmed Alshoaibi

(48t) Biosorptive Dehydration of Ethanol/Water Azeotropes Using Compound Starch-Based Adsorbent
Wenping Wang, Jinsheng Sun, Xijia Cao, Guangxin Liu

(48u) Purification of 2-Amino-1-Phenylethanol Enantiomers By a New Technique Combining Distillation and Crystallization
Lie-Dong Shiu, Hou-Guo Teng

(48w) Fabrication of Low Cost Insulating Material from Kaolin Clay for Construction Purposes
Naim Faqir, M. Al-Harthi, Hamad Abdulwahhab, Mazen Aleshauer, Reyad Shawabkeh

(48x) Thermodynamic Study of Binary PAH (Anthracene + Phenanthrene) Solid Mixtures
James W. Rice, Jinxia Fu, Emma Sandström, Eric M. Sauberger

(48y) How Confident Are You That Your Major Accident Risks Are Under Control?
Ellis Graeme, Robert Smith

(48z) Sil Determination: Shortcomings with the Use of LOPA
Alan King

(52a) Shale Oil and Gas -Wellhead to Fuel
Lawrence Kremer

(60a) A Study on Exergy-Based Thermodynamic Analysis and Process Synthesis of Mixed-Refrigerant Systems for Ethylene Plants
Hu Dinh, Jian Zhang, Qiang Xu

(60b) Plant-Wide Simulation of Ethanol Oxidation Process for Acetic Acid Production
Yiling Xu, Weiping Zhou, Qiang Xu

(60c) Dynamic Modeling and Optimization of Ring Opening Polymerization: Modeling Challenges and Computation Improvements
Kaytlin Henry, Carlos Villa

(60d) Polymerization in a Spray Dryer – Designing a Pre-Reaction before Atomization to Boost the Reaction in the Spray
Magnus Tewes, Urs A. Peuker

(60e) Utilization and Benefits of a Nanoparticle Extraction Process in a Drop Column for Production of High Quality Organosols
Jacqueline V. Erler, Tom Leistner, Urs A. Peuker

(602a) Dimensional Analysis of Gas Flow Through Packed Columns
Meng Zhang, Jonathan H. Worstell, Jacob H. Arredondo
(62b) Project “Multi-Phase” – a Combined Effort of Industry and Academia to Investigate Bubble Column Hydrodynamics
Philipp Rollbusch, Marc Becker, Martina Ludwig, Marcus Gruenewald

(62c) Scaling Solid Resuspension and Sorption for the Small Column Ion Exchange (SCIX) Processing Tank
Michael Pojer

(62d) Project “Multi-Phase” – Gas Holdup of Bubble Columns in a Multidimensional Space
Philipp Rollbusch, Linda Schlaesper, Marc Becker, Martina Ludwig, Marcus Gruenewald

(64a) Time-Series Analysis of Optical Measurements in Gas-Liquid Stirred Tanks
Boung Wook Lee, Yujian Sun, Milorad P. Dudukovic

(64b) Liquid Phase Back Mixing in Bubble Columns
Linda Schlaesper, Marcus Gruenewald

(64c) Dimensional Analysis of Gas Flow Through Packed Beds
Meng Zhang, Jonathan H. Worstell, Eric Doll, Michael Doll

(88a) Development of a Reactive Distillation where the Reactor is the Reboiler
Thomas A. Kenat

(88b) Heat Integrated Reactive Distillation Using External Side Reactors for Synthesis of Tri-Ethyl Citrate
Aspi K. Kolah, Carl T. Lira, Dennis J. Miller, Richard Doctor, John C. Prindle, Chandrakant B. Panchal

(88c) Reactive Distillation Process of Methyl Acetate Hydrolysis Directly Intensified by Auxiliary Reaction of Methanol Dehydration
Zhiwen Qi

(88d) Simulation and Optimization of Different Extractive Distillation Schemes for Aromatics Recovery from Pyrolysis Gasoline
Mansour Emir, Elmahboub Edreder

(88e) A Reactive Distillation Column with Two Reaction Zones for the Cyclohexanol Production from Cyclohexene
Xinhua Yao, Kejin Huang, Kun Wang, Ningning Wei, Mingyao Li

(88a) A Recipe to Excel: Beyond Technical Competency
Syrakal K. Poddar

(88b) Managing Careers in Consulting and Engineering
R. Benson Pair

(88c) Management Careers in an Industrial Setting
Frank Van Lier

(88d) Managing Through Extreme Change
T. Bond Calloway Jr.

(88e) You Can Have it All, But Not at the Same Time
Rosemarie D. Wesson

(88f) Managing Volunteers is a Little Like Herding Cats
Joseph Cramer

(105a) New Learning Curves for Industrial Biotechnology: Liquid Fuels from Bioconversion of Methane and Bioelectrosynthesis
Ramon Gonzalez

(105b) Project “Multi-Phase” – Gas Holdup of Bubble Columns in a Multidimensional Space
Philipp Rollbusch, Linda Schlaesper, Marc Becker, Martina Ludwig, Marcus Gruenewald

(105c) Development of a Reactive Distillation where the Reactor is the Reboiler
Thomas A. Kenat

(105d) Hybrid Separations Including Organic Solvent Nanofiltration: Process Intensification for the Purification of Iso-Butylbenzene
Nora Valentinyn, Kai Groß, Peter Mizsey, Patrick Schmidt, Philip Latte

(105e) Optimization of Floating Liquefied Natural Gas Process with Process Knowledge and Boxline Method
Mohd Shariq Khan, Jin Ho Park, Moonpyong Lee

(117a) Chemical Process Development - a Lean Six Sigma Perspective
Darren Clark

(117b) Using Six Sigma and Experimental Design in Process Development
Mark V. M. Emonds

(117c) Lean Six Sigma Methods at Xerox Research Centre of Canada
Tom Enright

(117d) Development of Continuous Improvement Network in Xerox Manufacturing
Terry Missana, Tom Enright
(117e) Use of Six Sigma Tools in the Commercial Scale-up of a Novel PPE Copolymer ................................................. 341
  Alvaro Carrillo

(120a) Achieving Environmental Compliance through Proper Destruction Efficiency of Multi-Tip Low-Profile (MTLP) Flare Systems ............................................................................................................................... 342
  Joseph Smith, Scot Smith

(120b) A Multi-Period Process Integration to the Management of Process Flares with Consideration of Fuel Substitution and Cogeneration Systems ......................................................... 359
  Servak Kamrava, Fadwa T. Eljjack, Kerreon Gabriel, Mahmoud El-Halwagi

(120c) Real Time Remote Monitoring of Flare Combustion Efficiency ................................................................. 360
  Yousheng Zeng, Jonathan Morris

(120d) Flameless Thermal Oxidation ............................................. 371
  Gene Irgang, Goutam Shabani

(120e) Modeling of the Dynamic Interaction in an LDPE Closed System Purge Bins-Regenerative Thermal Oxidizer (RTO) for Ethylene Emission Mitigation ................................................................. 372
  Teresa Leung, Kamal K. Botros, Andrew Stojcevski

(120f) Air Quality Impact of the Startup of a Single Olefin Plant ........................................................................ 373
  Jian Zhang, Ziyuan Wang, Qiang Xu, Thomas C. Ho

(136a) A Qualitative in Field Test to Characterize Oil-Shale Reservoirs ................................................................. 374
  Roy A. Drayton

(136b) Pressure Regulation and Kick Attenuation with Wired Pipe Technology in Managed Pressure Drilling ............................................................................................................................... 375
  Hector Perez, Reza Asgharzadeh Shishavani, James Memmott, John D. Hedengren, David Pixton

(136c) Risks from Unconventional Wells Gasification .............................................................................................. 387
  Dennis Butts

(136d) Supercritical CO2 / Brine / Hydrocarbon Interactions in Shale Rock Fracture: A Geo-Microfluidics Approach ............................................................................................................................... 396
  Peng He, Mark L. Porter, J. W. Carey, Hari Viswanathan

(136e) Model Shale Gas Properties from a Statistical Mechanical Perturbed Hard-Sphere Chain Cubic Equation of State ............................................................................................................................... 397
  Arthur S. Gow, Anna O. Malley, Tyler Trimble, Robert Kelly, Saad Al Khalidi

(137a) Solid Fuel to Natural Gas Conversions for Existing Boiler Applications ................................................................. 399
  Bill Gierke, John Guarco, Nando Nunziante

(137b) Vapor Intrusion - Models and Their Value ................................................................................................................... 413
  Eric M. Suuberg, Rui Shen, Yijun Yao, Kelly Pennell, Niklas Novoa

(137c) Synthesis, Fine Structural Characterization, and CO2 Adsorption Capacity of Cobalt and Nickel-Based Metal Organic Framework-74 ............................................................................................................................... 414
  Abhijit Krishna Adhikari, Kaen-Song Lin

(137d) Treatment of Flowback Water from Hydraulic Fracturing with Biochar ......................................................................................................................................................................................... 419
  Maoqi Feng, Steven Cooks, Zhigang Feng

(137e) Hazards Management for Building Locations through Air Dispersion Modeling .............................................. 432
  Morgan Reed, Tony Liu, Eric Peterson

(137f) H2S Removal from Biogas Using an Ionic Liquid as Physical Absorbent ................................................................. 433
  Ricardo Macias-Salinas, Isabella Luna

(138a) U of H Senior Design Project: Steam-Methane Reforming Hydrogen Generation Plant ........................................... 434
  Miguel T. Fleischer, Jonathan H. Worstell

(138b) Grass-Roots Design of an Ethylene Oxide Manufacturing Facility ............................................................................................................................... 444
  Andrew Jones, Erica Diamond, Alex Tir, Morgan Weber

(138c) Economic Optimization and Hazard Analysis of a Hydrofluoric Acid Catalyzed Alkylation Process ............................................. 475
  James D. Palmer

(144a) The Growth of Idea Ownership: Patent Infringement and Risk Management within the Chemical Process Industries ................................................................. 476
  Paul Lavanway Jr.

(144b) Chemical Engineering & the Law – Case Examples in Industrial Litigation ................................................................. 491
  Satish Almaula

(144c) Determining the Liability of a Fire Starting Product ................................................................................................................... 498
  Carl Abraham
