2014 10th European Workshop on Microelectronics Education

(EWME 2014)

Tallinn, Estonia
14 – 16 May 2014
# Table of Contents

**Motivation-driven Learning Processes at the Example of Embedded Systems** ............ 3 - 6  
Thomas HOLLSTEIN, Uljana REINSALU, Mairo LEIER  
*Tallinn University of Technology, Department of Computer Engineering, Estonia*

**Teaching Many-Core Programming** ................................................................. 7 - 10  
Leonidas TSIOPOULOS, Fareed Ahmed JOHKIO, Georgios GEORGAKARAKOS, Andreas DAHLIN, Johan LILIUS  
*Åbo Akademi University, Finland*

**Flipped classroom teaching for a cyber-physical system course - an adequate presence-based learning approach in the internet age** ............................................................. 11 - 15  
Peter MARWEDEL, Michael ENGEL  
*TU Dortmund, Germany*

**Training Communication Skills in Project-Oriented Microelectronics Courses** .......... 16 - 20  
Fabio CAMPI¹, Vivian NEAL¹, Roberto AIROLDI², Jari NURMI²  
¹ Simon Fraser University, School of Engineering Science, Canada  
² Tampere University of Technology, Department of Electronics and Communications, Finland

**InMRAM: Introductory course on Magnetic Random Access Memories for microelectronics students and engineers** ................................................................. 21 - 25  
Gregory DI PENDINA, Guillaume PRENAT, Bernard DIeny  
*Univ. Grenoble Alpes - CNRS - INAC-SPINTEC, Grenoble, France*

**Dependable Embedded Systems: FP7 KhAI-ERA Project Experience** ...................... 26 - 30  
Vyacheslav KHARCHENKO¹, Vitaliy KULANOV¹, Gert JERVAN²  
¹ National Aerospace University “KhAI”, Ukraine  
² Tallinn University of Technology, Estonia

**Massive Open Online Courses in Microelectronics education** ............................ 31 - 36  
Lubica STUCHLÍKOVÁ, Árpád KÓSA, Peter BENKO, Daniel DONOVAL  
*Slovak University of Technology in Bratislava, Faculty of Electrical Engineering and Information Technology, Institute of Electronics and Photonics, Slovakia*

**Experiences from System-on-Chip design courses** ............................................. 37 - 42  
Lauri MATILAINEN, Erno SALMINEN, Timo D. HÄMÄLÄINEN  
*Tampere University of Technology, Department of Pervasive Computing, Finland*
Teaching Mixed-Mode Full-Custom VLSI Design with gaf, SpiceOpus and Glade ........ 43 - 48
Stepan SUTULA¹, Francesc VILA¹, Jofre PALLARÈS¹, Keith SABINE², Lluís TERÉS¹,³, Francisco 
SERRA-GRAELLS¹,³
¹ IMB-CNMI(CSIC), Spain
² Peardrop Design Systems, United Kingdom
³ DEMISE-UAB, Spain

Automatic evaluation of correctness and originality of source codes ..................... 49 - 52
Daniel POHUBA, Tomas DULIK, Peter JANKU
Tomas Bata University in Zlin, Czech Republic

European Master Programs in Nanoelectronics and Microsystems ......................... 53 - 57
Erik BRUUN¹, Danilo DEMARCHI², Ivan Ring NIELSEN¹
¹ Technical University of Denmark, Denmark
² Politecnico di Torino, Italy

Mixed Signal System Design (A project based course) ............................................ 58 - 61
Linga Reddy CENKERAMADDI, Ragnhild Terese Veimo LARSEN, Ragnar JOHNSEN, Magne 
Arild HAGLUND
University of Agder, Norway

Nano & Microelectronics Curricula Developpement: Exploration Tasks and Experiments 
for Students in Electrical Engineering ...................................................................... 62 - 63
Slavka TZANOVA³, Mile STANKOVSKI³, Silvia SCHINTKE³
¹ Department of Microelectronics, Technical University of Sofia, Sofia, Bulgaria
² Faculty of Electrical Engineering and IT, Ss Cyril and Methodius University Skopje, Skopje, 
Macedonia;
³ Institute of Micro & Nanotechnics – Laboratory of Applied NanoSciences (MNT-LANS), Haute Ecole 
d’Ingénierie et de Gestion du Canton de Vaud (HEIG-VD), University of Applied Sciences Western 
Switzerland, Switzerland

Interdisciplinary Design of a Research Experience on Microelectronic Systems 
for K-12 Student ....................................................................................................... 64 - 69
Valentina MAZZONI, Davide BERTOZZI
University of Ferrara, Italy

The Electronic Engineering Step Ladder .................................................................... 70 - 73
Bjørn B. LARSEN, Lars LUNDHEIM
Norwegian University of Science and Technology, Norway
FPGA-based critical computing: TEMPUS and FP7 projects issues ......................... 74 - 79
Vyacheslav KHARCHENKO¹, Oleg ILLIASHENKO¹, Artem BOYARCHUK¹, Chris PHILLIPS²,
Juri VAIN³, Madli KRISPIN³
¹ National Aerospace University KhAI, Ukraine
² Newcastle University, United Kingdom
³ Tallinn University of Technology, Estonia

Laboratory Framework TEAM for Investigating the Dependability Issues of Microprocessor
Systems .................................................................................................................... 80 - 83
Artjom JASNETSKI¹, Raimund UBAR¹, Anton TSERTOV², Helena KRUUS¹
¹ Tallinn University of Technology, Estonia
² Testonica Lab OÜ, Estonia

CAD Tools Utilized in Microelectronic IC Design Education in the
University of Oulu ..................................................................................................... 84 - 88
Janne [P.] AIKIO, Timo RAHKONEN
Department of Electrical Engineering, University of Oulu, Finland

Synopsys' Educational Generic Memory Compiler .................................................. 89 - 92
Rich GOLDMAN¹, Karen BARTLESON¹, Troy WOOD¹, Vazgen MELIKYAN², Eduard BABAYAN²
¹ Synopsys, Inc., CA, United States of America
² Synopsys Armenia CJSC, Armenia

Hardware Close Programming for Freshmen ....................................................... 93 - 96
Helena KRUUS, Marina BRIK, Margus KRUUS, Priit RUBERG, Vladimir VIIES, Peeter ELLERVEE
Tallinn University of Technology, Estonia

Every Student Makes His Own Microprocessor ............................................... 97 - 101
Dirk JANSEN, Benjamin DUSCH
University of Applied Sciences, Offenburg, Germany

WSN for Smart Building Application .................................................................... 102 - 105
Cyril JACQUEMOD¹, Benjamin NICOLLE¹, Gilles JACQUEMOD²
¹ Qualisteo, France
² University of Nice Sophia Antipolis, France

Trends in Nanoelectronic Education From FDSOI and FinFET: Technologies to
Circuit Design Specifications ........................................................................... 106 - 111
Olivier BONNAUD¹, Laurent FESQUET²
¹ GIP-CNFM, Grenoble INP and IETR University of Rennes 1, France
² CIME-Nanotech, University of Grenoble Alpes Grenoble, France
Teaching Advanced Digital ASIC Designs By A Complex Case Study ................. 112 - 115
Mohamed Amine BOUSSADI, Thierry TIXIER, Alexis LANDRAULT, Jean-Pierre DERUTIN
Institut Pascal, France

Interactive animation as a motivation tool ...................................................... 116 - 119
Lubica STUCHLÍKOVÁ1, Arpád KÓSA1, Juraj JAKUŠ1, Michal ŠUŠOLIAK1, Daniel DONOVAL1,
Jiri HRBÁČEK2
1 Slovak University of Technology in Bratislava, Faculty of Electrical Engineering and Information
Technology, Institute of Electronics and Photonics, Slovakia
2 Masaryk University, Faculty of Education, Dept. of Technical Education and Information Science,
Czech Republic

Power MOSFET interactive e-learning course ............................................. 120 - 123
Juraj MAREK, Lubica STUCHLÍKOVÁ, Daniel DONOVAL, Peter BÉNKO, Aleš CHVÁLA,
Marián MOLNÁR
Institute of Electronics and Photonics, Slovak University of Technology in Bratislava, Slovakia

Wide Parameterization of FPGA Projects: Educational and Research Aspects .... 124 - 126
Artem PEREPELITSYN, Vitaliy KULANOV
Department of Computer Systems and Networks, National Aerospace University “KhAI”, Kharkiv,
Ukraine

Innovative Engineering Outreach Using Intel® Security and Embedded Tools ...... 127 - 132
Raghudeep KANNAVARA1, Patrick SCHAUMONT2, Michail MANIATAKOS3,
Michael A. SMITH4, Scott BUCK5
1, 4, 5 Intel Corporation, USA,
2 ECE Department, Virginia Tech, Blacksburg, VA, USA,
3 ECE Department, NYU Abu Dhabi, United Arab Emirates

Streaming Distribution of a Live Seminar: Rudimentary Knowledge for
LSI Design ............................................................................................................. 133 - 136
Toru NAKURA, Kunihiro ASADA
The University of Tokyo, Japan

The System of Microelectronics Education for aerospace Industry Based on “University-
Enterprise” Link ................................................................................................. 137 - 141
Konstantin PETROSYANTS1, Alexander TIKHONOV1, Boris LVOV1, Saygid UVAYSOV1, Igor
KHARITONOV1, Stanislav BALAKIN2
1 Moscow Institute of Electronics and Mathematics of National Research University “Higher School of
Economics”, Russia
2 S.P. Korolev Rocket and Space Corporation “Energia”, Russia
Introduction of New Technologies in Secondary Schools in Brittany (France) ........ 142 - 145
Tayeb MOHAMMED-BRAHIM1, Jean-Marie FLOCH1, Olivier DE-SAGAZAN1, Maxime
HARNOIS1, Christophe LEBRETON1, Marie-Helene JEGU2
1 CCMO-CNFM, France
2 Rectorat Rennes, France

High-Level Abstraction for Teaching Smart Systems Design with
Modular Hardware ............................................................ 146 - 150
François PHILIPP, Manfred GLESNER
TU Darmstadt, Germany

Timing- and Power-Driven ALU Design Training Using Spreadsheet-Based Arithmetic
Exploration .............................................................. 151 - 154
Per LARSSON-EDEFORS1, Kjell JEPPSON2
1 Dept. of Computer Science and Engineering, Chalmers University of Technology, Sweden
2 Dept. of Microtechnology and Nanoscience, Chalmers University of Technology, Sweden

Recognition, Reconstruction and Fault Identification Problems in Boolean Concepts
Learning ................................................................. 155 - 160
Gabi SHAFAT1, Ilia LEVIN2
1 Afeka Tel Aviv Academic College of Engineering, Tel Aviv, Israel
2 School of Education, Tel Aviv University Ramat Aviv, Tel Aviv, Israel

Electronics for the RADMON Instrument on the Aalto-1 Student Satellite .......... 161 - 166
Juhani PELTONEN
Department of Information Technology, University of Turku, Finland

System On Chip Project: Integration of a Motion-JPEG Video Decoder ............. 167 - 170
Lorena ANGHEL
Grenoble Alpes University, Grenoble, France

"MEMS de Piano" - an Experimental Course of Design, Fabrication, and Testing of MEMS
Oscillator ................................................................. 171 - 176
Yoshio MITA1, Masanori KUBOTA1, Matthieu DENOUAL2, Eric LEBRASSEUR1, Tomoki
SAWAMURA1
1 The University of Tokyo, Japan
2 Ecole Nationale Superieure d'Ingenieurs de Caen, France

SysML in Systems Engineering Course ......................................................... 177 - 181
Helena KRUUS, Tarmo ROBAL, Gert JERVAN
Tallinn University of Technology, Estonia
The TBU Software Branch Exchange Laboratory .................................................... 182 - 186
Tomas KNOT, Karel VLCEK
Department of Computer and Communication Systems, Tomas Bata University in Zlin, Czech Republic

Lessons from Ten Years of the International Master’s Program in System-on-Chip ..................................................................................................... 187 - 192
Peter NILSSON¹, Pietro ANDREANI¹, Krzysztof KUCHCINSKI², Joachim RODRIGUES¹, Henrik SJÖLAND¹, Markus TÖRMÄNEN¹
¹ Department of Electrical and Information Technology, Sweden; ² Department of Computer Science, Sweden

Advanced Technical Education in the Age of Cyber Physical Systems ..................... 193 - 198
Heinrich T. VIERHAUS¹, Mario SCHÖLZEL¹, Jaan RAIK², Raimund UBAR²
¹ Brandenburg University of Technology, Germany; ² Tallinn University of Technology, Estonia

How to Teach the Skills Needed in Writing Behavioral Models of Physical Systems? ................................................................................................. 199 - 202
Timo RAHKONEN, Janne [P.] AIKIO
Department of Electrical Engineering, University of Oulu, Finland

Efficient Teaching of Digital Design with Automated Assessment and Feedback .... 203 - 207
Paul W. NUTTER, Vasilis F. PAVLIDIS, Jeffrey PEPPER
University of Manchester, United Kingdom

Accomodating the Fast-paced Evolution of VLSI in Engineering Curricula .......... 208 - 212
Fabio CAMPI¹, Roberto AIROLDI², Jari NURMI²
¹ Simon Fraser University, Canada; ² Tampere University of Technology, Finland

Designing and Manufacturing of Real Embedded Multi-Core CPUs: A Holistic Teaching Approach in Computer Architecture ................................................................. 213 - 218
Marc REICHENBACH, Benjamin PFUNDT, Dietmar FEY
Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany

Mixed Diagnostic Tests as Innovation approach in VLSI Engineering Education ..... 219 - 223
Anna YANKOVSKAYA
Computer Science Department, Intelligent Systems Laboratory, Department of Computer Systems in Control and Design, TSU, TSUAB, TUSUR, Tomsk, Russia
