# Table of Contents

**KEYNOTE**
Novice and Expert, How Are They Programming Differently?
  *Simon Xu* ............................................................................................................................................................... 1

VMKit: Improving Design and Performance of Managed Runtime Environments
  *Bertil Folliot* ......................................................................................................................................................... 3

**ALGORITHMS, ARTIFICIAL INTELLIGENCE**
Dynamic Artificial Immune System and its application to File Transfer Scheduling Optimization
  *Milad Dastan Zand, Mohammad Kalantari, Shahram Golzari* ................................................................. 5

Feature Selection Method Based on Across Centroid for Text Categorization
  *Jieming Yang, Zhiying Liu, Zhaoyang Qu, Jing Wang* ..................................................................................... 11

**ALGORITHMS COMMUNICATION SYSTEMS**
An Efficient Structure for LKH Key Tree on Secure Multicast Communications
  *Sakamoto Naoshi* ............................................................................................................................................... 17

**ARTIFICIAL INTELLIGENCE**
OntoSSN: ScientiFiC Social Network ONTOlogy
  *Eya Ben Ahmed, Wafa Tebourski, Wahiba Ben Abdessalem Karaa, Faïez Gargouri* ......................................... 25

Collaborative filtering recommendation algorithm based on item attributes
  *Mengxing Huang, Longfei Sun, Wencai Du* ........................................................................................................ 29

New Approach on PCA-Based 3D Face Recognition and Authentication
  *Taher Khadhraoui, Faouzi Benzarti, Hamid Amiri* ......................................................................................... 35

Hierarchical speech recognition system using MFCC feature extraction and Dynamic Spiking RSOM
  *Tarek Behi, Najet Arous, Noureddine Ellouze* ................................................................................................. 41

**COMMUNICATION SYSTEMS AND NETWORKS**
Converting PCAPs into Weka Mineable Data
  *Charles Fowler, Robert J. Hammell II* .................................................................................................................. 47

Microcredit Risk Assessment using Crowdsourcing and Social Networks
  *Tofig Hasanov, Motoyuki Ozeki, Natsuki Oka* .................................................................................................. 53

**COMPONENT-BASED SOFTWARE ENGINEERING**
Non-functional Properties Aware Configuration Selection in Component-based Systems
  *Mohammad Charaf Eddin, Zoubir Mammeri* ......................................................................................................... 59

Effective Domain Modeling for Mobile Business AHMS (Adaptive Human Management Systems) Requirements
  *Haeng-Kon Kim* .................................................................................................................................................. 67

  *Hassan Almari, Clive Boughton* ......................................................................................................................... 77

**CRYPTOGRAPHY AND NETWORK SECURITY**
Analysis and Acceleration of NTRU Lattice-Based Cryptographic System
  *Tianyu Bai, Spencer Davis, Juanjuan Li, Hai Jiang* .......................................................................................... 83

</table>
An Energy Balanced Topology Construction Protocol for Wireless Sensor Networks
Soumya Saha, Lifford McLauchlan ................................................................. 191

Ensuring the Integrity and Non-Repudiation of Remitting E-Invoices in Conventional Channels with Commercially Available NFC Devices
Shi-Cho Cha, Yuh-Jzer Joung, Yen-Chung Tseng, Shih-Chieh Huang, Guan-Heng Chen, Chih-Teng Tseng . 197

NEURAL NETWORKS GENETIC ALGORITHMS
On Simplification of Chaotic Neural Network on Incremental Learning
Toshinori Deguchi, Toshiki Takahashi, Naohiro Ishii .................................................. 203

PARALLEL AND DISTRIBUTED COMPUTING
AES-128 ECB Encryption on GPUs and Effects of Input Plaintext Patterns on Performance
Ayaz ul Hassan Khan Khan, Mayez Al-Mouhamed, Anas Almousa, Allam Fatayar, Abdul Rahman Ibrahim, Abdul Jabbar Siddiqui ............................................................... 207
Optimizing MapReduce with Low Memory Requirements for Shared-Memory Systems
Yasong Zheng, Yuanchao Xu, Haibo Meng, Xiaochnun Ye, Lingjun Fan, Futaow Miao, Dongrui Fan............. 213
Padding Free Bank Conflict Resolution for CUDA-Based Matrix Transpose Algorithm
Ayaz ul Hassan Khan, Mayez Al-Mouhamed, Allam Fatayar, Anas Almousa, Abdurrahman Baqais, Mohammed Assayony ...................................................... 219
Unbinds Data and Tasks to Improving the Hadoop Performance
Kun Lu, Dong Dai, Xuehai Zhou, Mingming Sun, Changlong Li, Hang Zhuang ............................................ 225
High Performance and Grid Computing with Quality of Service Control
Sadiq M. Sait, Raed Al-Shaikh ................................................................. 231

SOFTWARE MANAGEMENT
Refinement/Verification of Early Stage Probabilistic Software Project Schedules in the Planning Stage
Donghwoon Kwon, Robert J. Hammell ......................................................... 239

SOFTWARE SPECIFICATION ARCHITECTURE
A Dialogue-Based Framework for the User Experience Reengineering of a Legacy Application
Angelo Martella, Roberto Paiano, Andrea Pandurino .............................................. 245
A Requirements Description Language pLSCs for Probabilistic Branches and Three-Stage Events
Jinyu Kai, Huaikou Miao, Honghao Gao .......................................................... 251
Design Patterns Applied for Networked First Person Shooting Game Programming
Junfeng Qu, Yong Wei, Yinglei Song ............................................................. 257
Software Development Concerns in the Building of Service-Oriented Based Enterprise Systems
Chia-Chu Chiang ....................................................................................... 263
Strategy-Guided Requirements Development and Validation
Xiaofeng Cui, Richard Paige ........................................................................ 269

SOFTWARE TESTING VISUAL AND MULTIMEDIA COMPUTING
Test Image Generation using Segmental Symbolic Evaluation for Unit Testing
Tahir Jameel, Lin Mengxiang, Li He, Hou Xiaomei .............................................. 275

SPECIAL SESSION 1: ANALYSIS, EVALUATION, AND USAGE OF WEB INFORMATION, SYSTEM BEHAVIORS, AND HUMAN ACTIONS
Consideration of Cross-validation in Estimating Objective Scores of Answer Statements Posted at QA Sites
Yokoyama Yuya, Hochin Teruhisa, Nomiya Hiroki .............................................. 281
Considerations on Pauses and Fundamental Movements for Transmitting Traditional Skills
Teruhisa Hochin, Hiroki Nomiya ................................................................. 287

The Analysis Method Focusing on Peaks of Darkness for the Impression Evaluation Method by Space
Shunsuke Akai, Teruhisa Hochin, Hiroki Nomiya ........................................ 293

SPECIAL SESSION 2: DATA MINING FOR INFO-COMMUNICATION NETWORKS AND SERVICE DIFFUSION
An Efficient Structure for LKH Key Tree on Secure Multicast Communications
Naoshi Sakamoto ........................................................................................ 299

An Improvement of Micro Area Selection Technique for the Diffusion of ICT Infrastructure
Motoi Iwashita, Akiya Inoue, Takeshi Kurosawa, Ken Nishimatsu ................. 307

Risk Assessment Quantification in Life Log Service
Shigeaki Tanimoto, Ken Takahashi, Taro Yabuki, Kazuhiko Kato, Motoi Iwashita, Hiroyuki Sato,
Atsushi Kanai ......................................................................................... 313

SPECIAL SESSION 3: EXPERIENCES OF SOFTWARE ENGINEERING
A proposal of Cloud-based Home Network System for Multi-Vendor Services
Satoshi Takatori, Shinsuke Matsumoto, Sachio Saiki, Masahide Nakamura ......................... 319

A Rule-Based Framework for Managing Context-Aware Services Based on Heterogeneous and Distributed Web Services
Hiroki Takatsuka, Sachio Saiki, Shinsuke Matsumoto, Masahide Nakamura .................. 325

An Obfuscation Method to Build a Fake Call Flow Graph by Hooking Method Calls
Kazumasu Fukuda, Haruaki Tamada ........................................................ 331

Brain Activity Measurement during Program Comprehension with NIRS
Ikutani Yoshiharu, Uwano Hidetake ........................................................... 337

Designing and Implementing Service Framework for Virtual Agents in Home Network System
Hiroyasu Horiuchi, Sachio Saiki, Shinsuke Matsumoto, Masahide Nakamura .................. 343

Pitfalls of Analyzing a Cross-company Dataset of Software Maintenance and Support
Masateru Tsunoda, Kenichi ........................................................................ 349

Toward A Dynamic Analysis Technique to Locate Framework Misuses That Cause Unexpected Side Effects
Izuru Kume, Masahide Nakamura, Naoya Nitta, Etsuya Shibayama ....................... 355

Using Goal Net to Model User Stories in Agile Software Development
Jun Lin, Han Yu, Zhiqi Shen, Chunyan Miao ............................................. 361

SPECIAL SESSION 4: THEORY AND PRACTICE OF INTELLECTUAL SOFTWARE
A Data Structure for Triangular Dissection of Multi-Resolution Images
Taiyou Kikuchi, Koichi Anada, Shinji Koka, Youzou Miyadera, Takeo Yaku ....................... 367

A Source Code Plagiarism Detecting Method Using Alignment with Abstract Syntax Tree Elements
Kikuchi Hiroshi, Goto Takaaki, Wakatsuki Mitsuo, Nishino Tetsuro ......................... 375

An Application of 3D Spiral Visualization to the Uchida-Kraepelin Psychodiagnostic Test
Zhuang Heliang, Chieko Kato, Futoshi Sugimoto, Kensei Tsuchida ......................... 381

Multisensory Images Evoked by Olfactory Stimuli
Kazuyoshi Ichihashi, Hideki Ichihashi .................................................... 387

Software Ontology Design to Support Organized Open Source Software Development
Mahfuzus Salam Khan, Anwarus Salam Khan, Takaaki Goto, Tetsuro Nishino, Narayan Debnath .... 393

SPECIAL SESSION 5: SIGNAL PROCESSING FOR SOCIAL WELFARE
Applications of Ultrasonic Sensors and Obrid-Sensor in Safety Confirmation System for Elders
Shenglin Mu, Shota Nakashima, Kanya Tanaka ............................................ 399
Detection Range Fitting of Slit Type Obrid-Sensor
  Shota Nakashima, Shenglin Mu, Tatsuya Ichikawa, Hiromasa Tomimoto, Shintaro Okabe, Kanya Tanaka, Yuhki Kitazono, Seiichi Serikawa ................................................................. 405

Development of Input Assistance Application for Mobile Devices for Physically Disabled
  Naruki Shirahama, Yuki Sakuragi, Satoshi Watanabe, Naofumi Nakaya, Yukio Mori, Kazunori Miyamoto ... 411

Development of Leaving-bed Detection System to Prevent Midnight Prowl
  Yuhki Takahashi, Yuhki Kitazono, Shota Nakashima ...................................................................................... 417

One Dimensional Ring Type Growing SOM with Asymmetric Neighborhood Function and its Application to a Hand Shape Instruction Learning System
  Takashi Kuremoto, Takuhiro Otani, Masanao Obayashi, Kunikazu Kobayashi, Shingo Mabu ...................... 423

Proposal of Eye-gaze Recognize Method for Input Interface without Infra-red Ray Equipment
  Kazuki Fukushima, Naruki Shirahama ............................................................................................................ 429

SPECIAL SESSION 6: SOFTWARE TESTING 1

An Efficient Reduction Approach to Test Suite
  Pan Liu ............................................................................................................................................................ 435

Dynamic Test Case Prioritization based on Multi-objective
  Xiaolin Wang, Hongwei Zeng .......................................................................................................................... 441

Modeling Web Application for Cross-browser Compatibility Testing
  Xinxin Li, Hongwei Zeng .................................................................................................................................. 447

VM scheduling strategies based on artificial intelligence in Cloud Testing
  Yang Zheng, Lizhi Cai, Shidong Huang, Zhihong Wang ................................................................................. 453

A Self-tuned Bat Algorithm for Optimization in Radiation Therapy Treatment Planning
  Georgios Kalantzis, Yu Lei ............................................................................................................................... 461

Big Data in Memory: Benchimarking In Memory Database Using the Distributed Key-Value Store for Machine to Machine Communication
  Michiaki Iwazume, Takahiro Iwase, Kouji Tanaka, Hideaki Fujii, Makoto Hijiya, Hiroshi Haraguchi........... 467

Author Index 474
