5th Workshop on Computational Approaches to Subjectivity, Sentiment and Social Media Analysis

(WASSA 2014)

Held at ACL 2014

Baltimore, Maryland, USA
27 June 2014
# Table of Contents

**Words: Evaluative, Emotional, Colourful, Musical!**  
Saif Mohammad ......................................................... 1

**Robust Cross-Domain Sentiment Analysis for Low-Resource Languages**  
Jakob Elming, Barbara Plank and Dirk Hovy .................................. 2

**An Investigation for Implicatures in Chinese: Implicatures in Chinese and in English are similar!**  
Lingjia Deng and Janyce Wiebe ........................................... 8

**Inducing Domain-specific Noun Polarity Guided by Domain-independent Polarity Preferences of Adjectives**  
Manfred Klenner, Michael Amsler and Nora Hollenstein .................. 18

**Aspect-Level Sentiment Analysis in Czech**  
Josef Steinberger, Tomáš Brychčín and Michal Konkol .................... 24

**Linguistic Models of Deceptive Opinion Spam**  
Myle Ott ............................................................... 31

**Semantic Role Labeling of Emotions in Tweets**  
Saif Mohammad, Xiaodan Zhu and Joel Martin ............................... 32

**An Impact Analysis of Features in a Classification Approach to Irony Detection in Product Reviews**  
Konstantin Buschmeier, Philipp Cimiano and Roman Klinger ............... 42

**Modelling Sarcasm in Twitter, a Novel Approach**  
Francesco Barbieri, Horacio Saggion and Francesco Ronzano .......... 50

**Emotive or Non-emotive: That is The Question**  
Michał Ptaszynski, Fumito Masui, Rafal Rzepka and Kenji Araki ........ 59

**Challenges in Creating a Multilingual Sentiment Analysis Application for Social Media Mining**  
Alexandra Balahur, Hristo Tanev and Erik van der Goot .................... 66

**Two-Step Model for Sentiment Lexicon Extraction from Twitter Streams**  
Ilia Chetviorkin and Natalia Loukachevitch ............................... 67

**Linguistically Informed Tweet Categorization for Online Reputation Management**  
Gerard Lynch and Pádraig Cunningham .................................... 73

**Credibility Adjusted Term Frequency: A Supervised Term Weighting Scheme for Sentiment Analysis and Text Classification**  
Yoon Kim and Owen Zhang ................................................ 79

**Opinion Mining and Topic Categorization with Novel Term Weighting**  
Tatiana Gasanova, Roman Sergienko, Shakhnaz Akhmedova, Eugene Semenkin and Wolfgang Minker .................................................. 84

**Sentiment classification of online political discussions: a comparison of a word-based and dependency-based method**  
Hugo Lewi Hammer, Per Erik Solberg and Lilja Øvrelid ................. 90
