Preface
P. Jędrzejowicz, L.C. Jain, R.J. Howlett, I. Czarnowski .......................... 11
Mining Sparse and Big Data by Case-based Reasoning
P. Perner .......................................................... 19
Aliased States Discerning in POMDPs and Improved Anticipatory Classifier System
T. Hayashida, I. Nishizaki, R. Sakato ........................................ 34
Training Example Generation Method for Supervised Learning Agents in Sequential Scenarios
P. Stobiecki, B. Śnieżyński ................................................. 44
Overfitting Problem in a Virtual Sensor Obtained with W–M Method
P.A. Wałga .......................................................... 54
Exploration of Multi-objective Tradeoff during High Level Synthesis Using Bacterial Chemotaxis and Dispersal
A. Sengupta, S. Bhadauria .................................................. 63
Construction of Data Aggregation Tree for Multi-objectives in Wireless Sensor Networks through Jump Particle Swarm Optimization
Y. Lu, J. Chen, I. Comsa, P. Kuenen, B. Hirshbrunner ...................... 73
Ant Colony Optimization Algorithm Applied to Ship Steering Control
M. Tomera .......................................................... 83
A Surrounding World Knowledge Acquiring by Using a Low-cost Ultrasound Sensors
B. Szlachetko, M. Lower .................................................. 93
A Hybrid of Bacterial Foraging and Differential Evolution–Based Distance of Sequences
M.M.M. Fuad .......................................................... 101
Island-based Differential Evolution Algorithm for the Discrete-continuous Scheduling with Continuous Resource Discretisation
P. Jędrzejowicz, A. Skakovski .............................................. 111
Arabic Textual Images Compression Approach
J. Mütet, H. Amiri ..................................................... 118
Using an Improved Rule Match Algorithm in an Expert System to Detect Broken Driving Rules for an Energy-efficiency and Safety Relevant Driving System
E. Yay, N.M. Madrid, J.A.O. Ramirez ...................................... 127
Taiwan Stock Investment with Gene Expression Programming
On the Belief Merging by Negotiation
T.H. Tran, Q.B. Vo, T.H.K. Nguyen ....................................... 147
On-line Modelling and Assessment of the State of Technosphere and Environment Objects based on Monitoring Data
T.G. Penkova, A.V. Korobko, V.V. Nicheporchuk, L.F. Nozhenkova ....... 156
Aspect based Summarization of Context Dependent Opinion Words
H. Kansal, D. Toshniwal .................................................. 166
Representing Knowledge in DL ALC from Text
R.R. de Azevedo, F. Freitas, R. Rocha, J.A.A. de Menezes, C.M. de Oliveira Rodrigues, M.C. Gomes ....................... 176
Experience based Reasoning System Coupled with Real World Knowledge
R.L. Hartung, A. Hakansson ................................................ 186
A Case-based Reasoning System to Support the Global Software Development
A Fault Fuzzy-ontology for Large Scale Fault-tolerant Wireless Sensor Networks
Y. Benazzouz, Oum-El-keir Aktouf, I. Parissis ............................ 203
An Ontology-based Personalized Retrieval Model Using Case Base Reasoning
A. Zidi, A. Bouhana, M. Abed, A. Fekih .................................... 213
A Tree-based Algorithm for Mining Diverse Social Entities
Signal Learning with Messages by Reinforcement Learning in Multi-agent Pursuit Problem
K. Noro, H. Tennoto, A. Kamiya ......................................... 233
Context-aware Multi-agent System in Machine-to-machine Communication
H. Manacic, T. Miskovic, M. Kusek, I. Lovrek ................................ 241
doi:10.1016/S1877-0509(14)01235-6
### Contents

Ontology based Multi Agent System for Improved Procurement Process: Application for the Handicraft Domain  
R. Dhouadi, A. Bennmiled, K. Ghedira  ................................................................. 251

Enhancing DisCSP-Netlogo from Simulation to Real-execution of Agents in Distributed Constraints  
I. Muscalagiu, P.H. Emil, V. Negru  ................................................................. 261

Pruning Statistically Insignificant Association Rules in the Presence of High-confidence Rules in Web Usage Data  
M. Dimitrijevic, Z. Bosnjak  ................................................................. 271

Soft Approach to Identification of Cohesive Clusters in Two Gene Representations  
M. Koziełski, A. Gruca  ................................................................. 281

Spatial Internet Traffic Load Forecasting with Using Estimation Method  
A. Kamińska-Chuchmula  ................................................................. 290

RELIEF-based Selection of Decision Rules  
U. Stanczyk  ................................................................. 299

Sequential Classification by Exploring Levels of Abstraction  
T. Łukaszewski, S. Wilk  ................................................................. 309

A Privacy Preserving Technique to Prevent Sensitive Behavior Exposure in Semantic Location-based Service  
Y. Oh, K. Jung, S. Park  ................................................................. 318

Tightening Upper Bounds to the Expected Support for Uncertain Frequent Pattern Mining  

Effectively and Efficiently Mining Frequent Patterns from Dense Graph Streams on Disk  
P. Braun, J.J. Cameron, A. Cuzzocrea, F. Jiang, C.K. Leung  .................................................. 338

The Branch-and-bound Method, Genetic Algorithm, and Dynamic Programming to Determine a Safe Ship Trajectory in Fuzzy Environment  
M.-S. Mostefa  ................................................................. 348

Parallel Learning and Classification for Rules based on Formal Concepts  
N. Meddouri, H. Khoufi, M. Maddouri  .................................................. 358

Minimization of Decision Tree Average Depth for Decision Tables with Many-valued Decisions  
M. Azad, M. Moshkov  ................................................................. 368

Comparison of Heuristics for Inhibitory Rule Optimization  
F. Alsolami, I. Chikalov, M. Moshkov  .................................................. 378

Ensembles of Instance Selection Methods based on Feature Subset  
M. Blachnik  ................................................................. 388

Ensemble Classifier for Mining Data Streams  
I. Czarnowski, P. Jędrzejowicz  ................................................................. 397

Poss-OWL 2: Possibilistic Extension of OWL 2 for an Uncertain Geographic Ontology  
B.-B. Safi a, M. Aicha  ................................................................. 407

Extended Content-boosted Matrix Factorization Algorithm for Recommender Systems  
O. Krasnoshchok, Y. Lamo  ................................................................. 417

An Economic Approach to Big Data in a Minority Language  
S. Dembitz, G. Gliedec, M. Sokele  ................................................................. 427

Topic Segmentation for Textual Document Written in Arabic Language  
A.H. Chaibi, M. Nauli, S. Sammoud  ................................................................. 437

A Text to Speech System for Fon Language Using Multisyn Algorithm  
T.K. Dugha, C. Boco  ................................................................. 447

Incident Related Tweet Extraction with Density Ratio Estimation  
H. Yanagimoto, S. Isaji  ................................................................. 456

Extraction Japanese Slang from Weblog Data based on Script Type and Stroke Count  
K. Matsumoto, K. Akita, X. Keranmu, M. Yoshida, K. Kita  .................................................. 464

Econo-ESA Reduction Scheme and the Impact of its Index Matrix Density  
F. Rahutomo, Y. Manabe, T. Kitasuka, M. Aritsugi  .................................................. 474

Detecting Emotive Sentences with Pattern-based Language Modelling  
M. Ptaszynski, F. Masui, R. Rzepka, K. Araki  .................................................. 484

Lattice-based Spatio-temporal Ensemble Prediction  
S. Samulevičius, Y. Pitarch, T.B. Pedersen  .................................................. 494

A Method of Identifying Ontology Domain  
D. Wu, A. Hákansson  ................................................................. 504

Total Path Length and Number of Terminal Nodes for Decision Trees  
S. Hussain  ................................................................. 514

Robust Anisotropic Diffusion Scheme for Image Noise Removal  
T. Barbu  ................................................................. 522

Semantic Modelling of Interactive 3D Content with Domain-specific Ontologies  
J. Flotyński  ................................................................. 531

Building Intelligent Tutoring Systems Immersed in Repositories of E-learning Content  
J. Marciniak  ................................................................. 541

Biometric Identification on Android Smartphones
S.P. Darwaz, E. Moradian, T. Rahmani, M. Knauer .................................................. 832

Image Projection in Immersive 3D Visualization Laboratory
A. Mazikowski, J. Lebiedź ................................................................. 842

Distributed System for Crossroads Traffic Surveillance with Prediction of Incidents
M. Favorskaya, E. Kazmiruk, A. Popov .................................................. 851

Image Inpainting based on Self-organizing Maps by Using Multi-agent Implementation
M. Favorskaya, L.C. Jain, A. Bolgov .................................................. 861

### A Study on Effect Evaluation of Payment Method Change in the Mail-order Industry
M. Takahashi, H. Azuma, K. Tsuda .................................................. 871

### Improvement of Terminology Extraction Method for Specific Patent Search
K. Yanagihori, K. Tanaka, K. Tsuda .................................................. 879

### A Study on Accuracy Improvement of Knowledge Extraction from the Medical Package Inserts
T. Ikoma, M. Takahashi, K. Tsuda .................................................. 886

### Evaluation of Communication and Travel Behavior Extraction with Latent Topics
N. Suzuki, K. Tsuda ................................................................. 894

### Study on Web Analytics Utilizing Segmentation Knowledge in Business to Business Manufacturer Site
A. Sekiguchi, K. Tsuda ................................................................. 902

### Effects of Collaborative Learning on a Complex Doubly Structured Network
S. Kurahashi, K. Kuniyoshi ................................................................. 910

### An Extraction Method of ITSS Common Skill Knowledge Using Japanese Text Network Analysis
K. Tanaka, K. Tsuda ................................................................. 918

### Classifying Homographs in Japanese Social Media Texts Using a User Interest Model
T. Harada, K. Tsuda ................................................................. 929

### The Function of Facilitator in risk/chance Management: Action Research in the Stricken Area of the Great East Japan Earthquake
Y. Nara ................................................................. 937

### Data Jackets for Externalizing Use Value of Hidden Datasets
Y. Ohsawa, C. Liu, T. Hayashi, H. Kido .................................................. 946

### Discovering Design Concept for Immovable Objects
J. Nakamura ................................................................. 954

### Model Oriented System Design on Big-data
N. Kushiro, S. Matsuda, K. Takahara .................................................. 961

### Critical Points in Conversations from the Perspective of Chance Discovery
M. Kubo, A. Abe ................................................................. 969

### Historical Oslo on a Handheld Device—A Mobile Augmented Reality Application
W. Chen ................................................................. 979

### Estimating Collaborative Attitudes based on Non-verbal Features in Collaborative Learning Interaction
Y. Hayashi, H. Morita, Y.S. Nakano .................................................. 986

### A Fuzzy Clustering Method Using the Relative Structure of the Belongingness of Objects to Clusters
T. Hatori, M. Sato-Ilic ................................................................. 994

### On Fuzzy Priority Weights of AHP for Double Inner Dependence Structure
S. Ohnishi, T. Yamanoi ................................................................. 1003

### Ant Colony Optimization based Navigational Decision Support System
A. Lazarska ................................................................. 1013

### Automation in Handling Uncertainty in Semantic-knowledge based Robotic Task-planning by Using Markov Logic Networks
A. Al-Moaddhen, M. Packianather, R. Setchi, R. Qiu .................................................. 1023

### Enhancing the Dgree of Autonomy on a ‘Tier 1’ Unmanned Aerial Vehicle Using a Visual Landing Framework
J.W. Tweedale, D. Gonano .................................................. 1033

### A Review of Cognitive Decision-making within Future Mission Systems
J.W. Tweedale ................................................................. 1043

### Detection of Hidden Laughter for Human-agent Interaction
S. Tatsumi, Y. Mohammad, Y. Ohmoto, T. Nishida .................................................. 1053

### A Personalized Recommender System from Probabilistic Relational Model and Users’ Preferences
R. Chuladyo, P. Leray ................................................................. 1063

### Towards Accurate Eye Tracker Calibration—Methods and Procedures
K. Harezlak, P. Kasprowski, M. Stasch .................................................. 1073

### Exploratory Clustering and Visualization
A. Nowak-Brzezińska, T. Xięski ................................................................. 1082

### Graphical Models of Psychosocial Factors in Chronic Somatic Diseases
A. Galuszka, A. Galuszka ................................................................. 1092

### Determining Life Cycles of Evolving Groups
A. Zygmun, J. Kozłak, E. Nawarecki, A. Mika .................................................. 1102
