2013 ACM/IEEE International Conference on Information Processing in Sensor Networks

(IPSN 2013)

Philadelphia, Pennsylvania, USA
8-11 April 2013
# Table of Contents

**IPSN 2013: ACM/IEEE International Conference on Information Processing in Sensor Networks**

| Organizers | x |

| Sponsors & Supporters | xii |

## Keynote Talks

- **Sensemaking for Mobile Health**
  Deborah Estrin *(Cornell Tech University)*

- **Aerial Robot Swarms**
  Vijay Kumar *(University of Pennsylvania)*

- **Challenges in Modeling Cyber-Physical Systems**
  Manfred Broy *(Technical University of Munich)*

## Session 1: IP: Learning from Sensor Data

- **A Fresh Perspective: Learning to Sparsify for Detection in Massive Noisy Sensor Networks**
  Matthew Faulkner, Annie H. Liu *(California Institute of Technology)*, Andreas Krause *(ETH Zurich)*

- **Autonomous Place Naming System using Opportunistic Crowdsensing and Knowledge from Crowdsourcing**
  Yohan Chon, Yunjong Kim, Hojung Cha *(Yonsei University)*

- **Matchstick: A Room-to-Room Thermal Model for Predicting Indoor Temperature from Wireless Sensor Data**
  Carl Ellis, Mike Hazas *(Lancaster University)*, James Scott *(Microsoft Research UK)*

## Session 2: SPOTS: Networking and Location

- **Low Power Counting via Collaborative Wireless Communications**
  Wenjie Zeng, Anish Arora, Kannan Srinivasan *(The Ohio State University)*

- **SoNIC: Classifying Interference in 802.15.4 Sensor Networks**
  Frederik Hermans *(Uppsala University)*, Olof Rensfelt, Thiemo Voigt *(SICS and Uppsala University)*, Edith Ngai, Lars-Åke Nordén, Per Gunningberg *(Uppsala University)*

- **Camazotz: Multimodal Activity-Based GPS Sampling**
  Raja Jurdak, Philipp Sommer, Branislav Kusy, Navinda Kottege, Christopher Crossman, Adam McKeown, David Westcott *(CSIRO)*

- **SCPL: Indoor Device-Free Multi-Subject Counting and Localization Using Radio Signal Strength**
  Cherren Xu, Bernhard Firner, Robert S. Moore, Yanyong Zhang, Wade Trappe, Richard Howard, Feixiong Zhang *(Rutgers University)*, Ning An *(Hefei University of Technology)*

## Session 3: IP: Applications

- **Volcanic Earthquake Timing Using Wireless Sensor Networks**
  Guojin Liu *(Chongqing University & Michigan State University)*, Rui Tan *(Michigan State University & Illinois at Singapore)*, Ruogu Zhou, Guoliang Xing *(Michigan State University)*, Wen-Zhan Song *(Georgia State University)*, Jonathan M. Lees *(University of North Carolina at Chapel Hill)*

- **In-Pavement Wireless Weigh-In-Motion**
  Ravneet Bajwa, Ram Rajagopal, Erdem Coleri, Pravin Varaiya, Christopher Flores *(Sensys Networks, Inc)*
• **FixtureFinder: Discovering the Existence of Electrical and Water Fixtures** .......................................................................................................... 115
  Vijay Srinivasan (Samsung Research America), John Stankovic, Kamin Whitehouse (University of Virginia)

• **Strip, Bind, and Search: A Method for Identifying Abnormal Energy Consumption in Buildings** ..................................................................................................... 129
  Romain Fontugne (The University of Tokyo & Japanese-French Laboratory for Informatics),
  Jorge Ortiz (University of California, Berkeley),
  Nicolas Tremblay, Pierre Borgnat, Patrick Flandrin (CNRS, Ecole Normale Supérieure de Lyon),
  Kensuke Fukuda (National Institute of Informatics), David Culler (University of California, Berkeley),
  Hiroshi Esaki (The University of Tokyo)

**Session 4: SPOTS: Programming and Testing**

• **Nemo: A High-Fidelity Noninvasive Power Meter System for Wireless Sensor Networks** ............................................................................................................. 141
  Ruogu Zhou, Guoliang Xing (Michigan State University)

• **FlockLab: A Testbed for Distributed, Synchronized Tracing and Profiling of Wireless Embedded Systems** ..................................................................................................... 153
  Roman Lim, Federico Ferrari, Marco Zimmerling, Christoph Walse (ETH Zürich),
  Philipp Sommer (CSIRO ICT Centre), Jan Beutel (ETH Zürich)

• **A Comprehensive Compiler-Assisted Thread Abstraction for Resource-Constrained Systems** ..................................................................................................... 167
  Alexander Bernauer (ETH Zürich), Kay Römer (University of Lübeck)

**Session 5: SPOTS: Applications**

• **A Real-time Auto-Adjustable Smart Pillow System for Sleep Apnea Detection and Treatment** ............................................................................................................. 179
  Jin Zhang, Qian Zhang (Hong Kong University of Science and Technology),
  Yuanpeng Wang (Shenzhen New Element Medical Co.),
  Chen Qiu (Shenzhen People's Hospital, 2nd Clinical Medical College of Jinan University)

• **MARS: A Muscle Activity Recognition System Enabling Self-configuring Musculoskeletal Sensor Networks** ..................................................................................................... 191
  Frank Mokaya (Carnegie Mellon University),
  Brian Nguyen, Cynthia Kao, Quinn Jacobson (Vibrado Technologies),
  Anthony Rowe, Pei Zhang (Carnegie Mellon University)

• **POEM: Power-efficient Occupancy-based Energy Management System** ..................................................................................................... 203
  Varick L. Erickson, Stefan Achleitner, Alberto E. Cerpa (University of California, Merced)

**Session 6: IP: Location and Coverage**

• **Acoustic Shockwave-Based Bearing Estimation** ................................................................................................................................. 217
  János Sallai, Péter Völgyesi, Akos Lédeézi, Ken Pence, Ted Bapty, Sandeep Neema, James Davis (Vanderbilt University)

• **Radio Tomographic Imaging and Tracking of Stationary and Moving People via Kernel Distance** ..................................................................................................... 229
  Yang Zhao (GE Global Research),
  Neal Patwari, Jeff M. Phillips, Suresh Venkatasubramanian (University of Utah)

• **Using Wearable Inertial Sensors for Posture and Position Tracking in Unconstrained Environments through Learned Translation Manifolds** ..................................................................................................... 241
  Aris Valtazanos, D. K. Arvind, Subramanian Ramamoorthy (University of Edinburgh)

• **SugarMap: Location-less Coverage for Micro-Aerial Sensing Swarms** ..................................................................................................... 253
  Aveek Purohit, Zheng Sun, Pei Zhang (Carnegie Mellon University)
Session 7: IP: Networking

- **Think Globally, Act Locally: On the Reshaping of Information Landscapes**
  Andreas Loukas, Marco Zuniga, Matthias Woehrle, Marco Cattani, Koen Langendoen
  (Delft University of Technology) ................................................................. 265

- **Energy-Efficient Low Power Listening for Wireless Sensor Networks in Noisy Environments**
  Mo Sha, Gregory Hackmann, Chenyang Lu (Washington University in St. Louis) ................................................................. 277

- **MediaScope: Selective On-Demand Media Retrieval from Mobile Devices**
  Yurong Jiang, Xing Xu (University of Southern California), Peter Terlecky (City University of New York),
  Tarek Abdelzaher (University of Illinois at Urbana-Champaign), Amotz Bar-Noy (City University of New York),
  Ramesh Govindan (University of Southern California) .................................................. 289

Session 8: Posters and Demo Abstracts

- **Demo Abstract: Networking Algorithms on a Resource-Limited Distributed Mobile Embedded System**
  Mahdi Asadpour, Raymond Oung (ETH Zurich) ................................................................. 301

- **Demo Abstract: EnergyLab — Building Energy Testbed for Demand-Response**
  Madhur Behl, Neel Shah, Larry Vadakedathu, Dan Wheeler, Rahul Mangharam (University of Pennsylvania) ................................................................. 303

- **Demo Abstract: A Radio Tomographic System for Real-Time Multiple People Tracking**
  Maurizio Bocca (The University of Utah), Ossi Kaltiokallio (Aalto University School of Electrical Engineering),
  Neal Patwari (The University of Utah) ................................................................. 305

- **Demo Abstract: A Magnetic Field-Based Appliance Metering System**
  Niranjini Rajagopal, Suman Giri, Mario Berges, Anthony Rowe (Carnegie Mellon University) ................................................................. 307

- **Demo Abstract — Netamorph: Field-Programmable Analog Arrays for Energy-Efficient Sensor Networks**
  Brandon Rumberg, Brandon M. Kelly, David W. Graham, Vinod Kulathumani (West Virginia University) ................................................................. 309

- **Demo Abstract: Distributed Debugging Architecture for Wireless Sensor Networks**
  Philipp Sommer, Branislav Kusy (CSIRO ICT Centre) ................................................................. 311

- **Demo Abstract – Mediascope: Selective On-Demand Media Retrieval from Mobile Devices**
  Xing Xu, Yurong Jiang (University of Southern California), Peter Terlecky (City University of New York),
  Tarek Abdelzaher (University of Illinois at Urbana-Champaign), Amotz Bar-Noy (City University of New York),
  Ramesh Govindan (University of Southern California) .................................................. 313

- **Demo Abstract: Low Capacity Devices with Semantic Interfaces**
  Arto Ylisaukko-oja, Jussi Kiljander, Esa Viljamaa, Janne Takalo-Mattila, Pasi Hyttinen, Juha-Pekka Soininen
  (VTT Technical Research Centre of Finland) ................................................................. 315

- **Demo Abstract — Nemo: A High-Fidelity Noninvasive Power Meter System for Wireless Sensor Networks**
  Ruogu Zhou, Guoliang Xing (Michigan State University) ................................................................. 317

- **Demo Abstract – Skitracker: Measuring Skiing Performance Using a Body-Area Network**
  Thomas Homewood, Christer Norström (Swedish Institute of Computer Science),
  Per Gunningberg (Uppsala University) ................................................................. 319

- **Poster Abstract: Connected Wireless Camera Network Deployment with Visibility Coverage**
  Hua Huang (Temple University), Chien-Chun Ni, Xiaomeng Ban, Jie Gao (Stony Brook University),
  Shan Lin (Temple University) ................................................................. 321
• Poster Abstract: ASFECs — Using Approximately Synchronized Fetch-and-Execute Cycles as Basic Operation Cycles for Wireless Sensor Networks

Gerhard Fuchs (Independent)

• Poster Abstract: Managing Road Lighting with a Hitchhiking Sensor System

Huang-Bin Huang, Yen-Shuo Huang, Pei-Che Huang, Hsiao-Hsien Lin, Huang-Chen Lee
(National Chung-Cheng University)

• Poster Abstract: A Mobile-Cloud Service for Physiological Anomaly Detection on Smartphones

Dezhi Hong, Shahriar Nirjon, John A. Stankovic, David J. Stone (University of Virginia), Guoibin Shen (Microsoft Research Asia)

• Poster Abstract: Range-Based Localization in Sensor Networks: Localizability and Accuracy

Liang Heng, Grace Xingxin Gao (University of Illinois at Urbana-Champaign)

• Poster Abstract – SmartRoad: A Crowd-Sourced Traffic Regulator Detection and Identification System

Shaohan Hu, Lu Su, Hengchang Liu, Hongyan Wang, Tarek F. Abdelzaher
(University of Illinois at Urbana-Champaign)

Ehsan Ullah Warriach (University of Groningen), Christian Claudel (King Abdullah University of Science and Technology)

• Poster Abstract: Extensible Sensor Network Solutions for Visitor Identification and Tracking

Richard M. Abbot, Jacquiline Jacob, Hock M. Ng (Alcatel-Lucent Bell Laboratories)

• Poster Abstract: Human Localization and Activity Detection Using Thermopile Sensors

Hock M. Ng (Alcatel-Lucent Bell Laboratories)

• Poster Abstract: Studied Wind Sensor Nodes Deployment Towards Accurate Data Fusion for Ship Movement Controlling

Lei Shu, Jianbin Xiong (Guangdong University of Petrochemical Technology), Lei Wang (Dalian University of Technology), Jianwei Niu (Beihang University, China), Qinruo Wang (Guangdong University of Technology)

• Poster Abstract: Enabling a Cloud-Based Logging Service for Ball Screw with an Autonomous Networked Sensor System

Huang-Chen Lee, Yu-Chang Chang, Yen-Shuo Huang, Wei-Kuan Wang, Yuan-Sun Chu
(National Chung-Cheng University, Taiwan)

• Poster Abstract: High Throughput Data Collection with Topology Adaptability in Wireless Sensor Network

JinZhi Liu, Makoto Suzuki, Doohwan Lee, Shigemi Ishida, Hiroyuki Morikawa (The University of Tokyo)

• Poster Abstract: Exploiting Nonlinear Data Similarities — A Multi-Scale Nearest-Neighbor Approach for Adaptive Sampling in Wireless Pollution Sensor Networks

Manik Gupta, Eliane Bodanese (Queen Mary University of London), Lamling Venus Shum, Stephen Hailes (University College London)

• Poster Abstract: Occupancy Estimation Using Real and Virtual Sensors

Seshan Srinagarajan, Dirk Pesch (Cork Institute of Technology)

• Poster Abstract: Human Tracking Based on LRF and Wearable IMU Data Fusion

Lin Wu (Chinese Academy of Sciences & University of Chinese Academy of Sciences), ZhuLin An, YongJun Xu, Li Cui (Chinese Academy of Sciences)

• Poster Abstract: ASWP: A Long-Term WSN Deployment for Environmental Monitoring

Miguel Navarro (Indiana University - Purdue University Indianapolis), Tyler W. Davis (University of Pittsburgh), Yao Liang (Indiana University - Purdue University Indianapolis), Xu Liang (University of Pittsburgh)
• Poster Abstract: Virtualizing External Wireless Sensors for Designing Personalized Smartphone Services .............................................................. 353
  JeongGil Ko, Byung-Bog Lee, Sang Gi Hong, Nasesoo Kim
  (Electronics and Telecommunications Research Institute)

• Poster Abstract: Voxnet Acoustic Array for Multiple Bird Source Separation
  by Beamforming using Measured Data .......................................................... 355
  Shengsheng Cai (Zhejiang University), Travis Collier (University of California, Los Angeles),
  Lewis Girod (Massachusetts Institute of Technology),
  Ralph E. Hudson, Kung Yao, Charles E. Taylor (University of California, Los Angeles),
  Ming Bao (Chinese Academy of Sciences), Zhi Wang (Zhejiang University)
