13th International Conference on Automated People Movers and Transit Systems 2011

From People Movers to Fully Automated Urban Mass Transit

Paris, France
22 – 25 May 2011

Editors:

William H. Leder
William J. Sproule

ISBN: 978-1-63439-388-1
Contents

Airports

MIA Mover—Project Delivery in a Constrained Financial Environment ......................... 1
Sanjeev N. Shah, Larry Coleman, Franklin Stirrup, Pedro Hernandez, and Carlos Bonzon

Miami International Airport (MIA)—Overcoming Challenges Related to Huge Capital Improvement Programs ................................................................. 9
Daniel J. McFadden and Juan Carlos Arteaga

Skylink Modification Mitigates Station Water Intrusion .................................................. 25
Jack M. Weaver

How to Move Passengers in a Comfortable Way? .............................................................. 34
Bernard Choukroun and Jean-Paul Huard

DFW Skylink: Enhancements to Station Quality ............................................................... 43
David Taliaferro

Integrating Systems Integration with Safety Certification ................................................. 49
William B. Stewart

PHX Sky Train—Positioned for Success .............................................................................. 59
Jane Morris, Ron Sheahan, and Diane Jones

PHX Sky Train: Transit Design for Smart Airport and Community Growth ............... 79
David Hensley, Mark Pilwallis, and Allan Bleismer

A Cableway People Mover for a Strategic Interchange Node ......................................... 104
D. Gattuso

PHX Sky Train: APM Adaptation for Phoenix ................................................................. 114
Jane L. Morris, Robert L. DeCostro, and Mark V. Incorvati

BART OAC Project: Moving Forward at Last ................................................................ 126
Thomas Dunscombe, Jackie C. Yang, G. John Kennedy, and Harley L. Moore

Integration of Transit Systems at Seattle-Tacoma International Airport .................... 135
Dave Tomber and Bob Griebenow

Re-Entrant Corner Cracking on Bulb Tees on the Miami Airport MIA Mover APM System Project ................................................................. 144
David G. Leverenz and Thomas E. Davidson

The CDG Val Roissy: The On-Going Extension ............................................................ 153
Bertrand Picard and Remy Pasquer

Newark Airport ATS Circulator System Studies ............................................................. 164
Catherine Cronin and J. Sam Lott

Refurbishment of the Inter Terminal Shuttle, Gatwick Airport, UK ............................ 174
D. Liaghat, R. Abbott, and J. Booth
Dulles International Airport Automated People Mover System: Design and Construction of the Main Terminal and Tier 2 Stations .......................................................... 186
   J. L. Stahmer, J. P. Gould, and R. G. Turner

Major Activity Centers

Downtown People Movers—History and Future in U.S. Cities........................................ 197
   William J. Sproule and William H. Leder

Planning and Procurement of an Urban People Mover System in Doha, West-Bay ................................................................. 208
   Kamel-Eddine Mokhtech, Sanjeev Shah, Ghanim Hassan Al-Ibrahim, and Sultan Al-Enazi

Simulation Analysis of a PRT System in a University Campus Setting.......................... 218
   J. Sam Lott, Adam D. Novak, Jill A. Capelli, and David S. Tai

Mandalay Bay People Mover: Safe Operations for 10+ Years ........................................ 229
   J. David Mori and Jose Sandoval

New Systems

Gravity Powered Transport Systems for Rail, Road, Water, and Airport Use .............. 234
   Rajaram Bojji

The Future of High Capacity PRT.......................................................................................... 250
   Raymond McDonald

BeemCar—The Innovative “Plastic” PRT Solution............................................................... 263
   Peter Lovering

Concept and Feature of Energy Saving Urban Transportation System “EcoRide” .................. 273

Sustainable “Green” Transportation Systems: Integrating Renewable Energy Technologies into Automated Fixed Guideway Systems .................................................. 283
   Steven M. Castaneda and J. David Mori

PRT—Modeling and Dynamic Simulation of Track and Vehicle........................................ 294
   W. Choromanski and J. Kowara

Considerations for Planning and Implementing FRT and PRT Systems in Carbon Neutral Environments ................................................................. 307
   D. Menichetti and T. van Vuren

Analytical Capacity Limits of Personal Rapid Transit Stations ........................................ 326
   J. Schweizer, L. Mantecchini, and J. Greenwood

PRT Vehicle Architecture and Control in Masdar City .................................................... 339
   Menno de Graaf

Policies, Planning, and Perspectives for APMs

Strategic Procurement Planning—A P3 Case Study .......................................................... 349
   Sanjeev N. Shah, Larry Coleman, Dan Onorato, Dennis M. Davin, Lynn L. Heckman, and Caren Glotfelty
Cityval or the Rubber Tire APM for Our Cities’ New Development................................. 365
Bertrand Picard

Strategic Urban Public Transport Improvement in Japan.................................................. 375
Naohito Matsui

Design Considerations for Capacity in PRT Networks..................................................... 385
Jörgen Gustafsson, Jong-Gu Kang, Johan Englund, and Peter Grimtell

System Improvements

Automation of Line 1: A Real Opportunity for the Parisian Metro ................................. 395
Philippe Mancone

End-of-Life Overhaul of the California Exposition and State Fair Monorail ................. 400
Eric Troy and Jose Sandoval

Pearlridge Monorail: Reinvestment in a Critical Transit Link....................................... 409
J. David Mori and Jose Sandoval

The Renovation Requirements for the VAL Manless System in Lille........................... 416
El Miloudi El Koursi, Gérard Couvreur, François Baranowski, François Flamant, and Aymeric Butin

Measuring the Performance of Automated People Mover Systems................................ 424
Jefferson H. Davis and Gregory W. Love

Transportation Policy and Perspective for Large Metropolitan Areas with Fully Automated Metros

Unattended Metro Lines Offer Low Cost Service Adaptation Possibilities: Regular Full Night Public Service Operations; Unforeseen or Planned Public Service Adaptations to Occasional Needs ........................................ 443
Henri Frey

Reflections on the Development of a Common Incident/Accident Model for Urban Guided Transport in Europe ............................................................................. 450
V. Benard, L. Furlan, and EM. El-Koursi

Osmose Station: Three Urban and Transport Projects .................................................... 462
L. Sancho de Coulhac and T. Guillemin

Use of the Independent Safety Assessor in the Early Project Phases .............................. 477
Gunni S. Frederiksen, Stephan Jubin, and Peter Olsen

Urban Metro Applications

Automation of High Density Metro Lines: Rome Line A Case Study ............................. 491
S. Chiusolo, A. Dicembre, S. Ricci, and F. Sorable

Siemens CBTC Solution in Barcelona—The First Driverless Metro in Spain .................. 502
Gérard Yelloz
