# TABLE OF CONTENTS

A Random Walk Model for Infection on Graphs ................................................................. 1  
A. Ganesh, M. Draief

Network Calculus and Queueing Theory: Two Sides of One Coin ............................. 9  
Y. Jiang

Parallelising a Simulator for the Analysis of Electromagnetic Radiation Using MUMPS Library .................................................. 21  
R. Lopez, V. Cabanas, R. Diaz, L. Garcia-Castillo, I. Gomez-Revuelto, J. Acebron

Heavy Traffic Steady State Approximations in Stochastic Networks with Levy Inputs .................................................. 27  
J. Haddad, R. Mazumdar

A Mean Field Approach for Optimization in Particle Systems and Applications ......... 32  
N. Gast, B. Gaujal

An Information-theoretic Look at MIMO Energy-efficient Communications .................. 42  
E. Belmega, S. Lasaulce

Complex Synchronizations in Markovian Models: A Tensor-based Proof of Product Form .................................................. 52  
T. Thi, J. Fourneau

A Game Theoretic Framework for joint Routing and Pricing in Networks with Elastic Demands .................................................. 62  
E. Altman, J. Elias, F. Martignon

Estimating Service Resource Consumption From Response Time Measurements .......... 72  
S. Kraft, S. Pacheco-Sanchez, G. Casale, S. Dawson

Throughput Loss in Task Scheduling due to Server State Uncertainty ................. 82  
C. Chan, N. Bambos

Measuring the Utility/Path Diversity Trade off in Multipath Protocols .................. 92  
F. Hunt, V. Marbukh

Asymptotic End-to-end Stochastic Evaluation for Tandem Networks with Many Flows ........ 99  
K. Kobayashi, Y. Takahashi, H. Takada

Population Effects in Multiclass Processor Sharing Queues .................................... 108  
A. Tahar, J. Alain

The Concert/Cafeteria Queueing Problem: A Game of Arrivals .................................. 118  
S. Juneja, R. Jain

Simulation Modeling of Secure Wireless Sensor Networks ............................................. 124  
T. Vu, C. Williamson, R. Safavi-Naini

Reliable and Secure Broadcast Communication Over Resource Constrained Systems ........ 134  
A. Kherani, S. Muthaiash, D. Bhattacharyya, S. Padhy

Analytical Modeling Of Swarm Intelligence In Wireless Sensor Networks Through Markovian Agents .............................................. 144  
D. Bruno, A. Bobbio, D. Cerotti, M. Scarpa, M. Gribaudo

Interfaces and Binding in Component Based Development of Formal Models ............ 154  
G. Franceschini, M. Gribaudo, M. Iacono, S. Marrone, F. Moscato, V. Vittorini

A Power-Law Graph as a Distributed Hash Table with Quick Search and Small Tables 164  
H. Reittu, I. Norros

Analysis of a TCP System under Polling-Type Reduction-Signal Procedures ............ 174  
O. Czerniak, E. Altman, U. Yechiali

From Partially to Fully Lumped Markov Chains in Stochastic Well Formed Petri Nets .......... 180  
S. Baarir, M. Beccuti, G. Franceschini, C. Dutheillet

New Stochastic Network Calculus for Loss Analysis ........................................... 190  
A. Galvis, J. Biro, F. Nemeth

Hybrid Simulation of Biochemical Systems Using Hybrid Adaptive Petri Nets .......... 200  
H. Yang, C. Lin, Q. Li

Response Time Distributions and Network Perturbation into Product-form .............. 210  
P. Harrison, M. Vigliotti

Spatial Fairness in Wireless Multi-Access Networks ............................................ 219  
P. Ven, J. Leeuwaarden, D. Denteneer, A. Janssen

Using Bulk Arrivals to Model I/O Request Response Time Distribution in Zoned Disks and RAID Systems ........................................ 226  
A. Lehrecht, N. Dingle, P. Harrison, W. Knottenbelt, S. Zertal

Enhanced Inferencing: Estimation of a Workload Dependent Performance Model ........ 236  
D. Kumar, L. Zhang, A. Tantawi

A Performance Experiment System Supporting Fast Mapping of System Issues ........... 246  
M. Mroz, G. Franks
