2014 19th International Conference on Engineering of Complex Computer Systems

(ICECCS 2014)

Tianjin, China
4-7 August 2014
Verification and Validation
From TiMo to Event-B: Event-Driven Timed Mobility ..........................................................1
  Gabriel Ciobanu, Thai Son Hoang, and Alin Stefanescu
Symbolic Analysis of an Electric Vehicle Charging Protocol ..........................................11
  Li Li, Jun Pang, Yang Liu, Jun Sun, and Jin Song Dong
An Extended UML Method for the Verification of Security Protocols ..........................19
  Gang Shen, Xiaohong Li, Ruitao Feng, Guangquan Xu, Jing Hu, and Zhiyong Feng

Security and Fault Tolerance
DroidVault: A Trusted Data Vault for Android Devices ......................................................29
  Xiaolei Li, Hong Hu, Guangdong Bai, Yaoqi Jia, Zhenkai Liang, and Prateek Saxena
Automatic Defect Categorization Based on Fault Triggering Conditions ....................39
  Xin Xia, David Lo, Xinyu Wang, and Bo Zhou
Understanding Complex Binary Loading Behaviors .......................................................49
  Ting Dai, Mingwei Zhang, Roland H.C. Yap, and Zhenkai Liang
Design and Analysis of Security Attacks against Critical Smart Grid Infrastructures ..........59
  Byungho Min and Vijay Varadharajan
Short Papers: Session 1

An Adaptive Auto-configuration Tool for Hadoop .................................................................69
  Changlong Li, Hang Zhuang, Kun Lu, Mingming Sun, Jinhong Zhou,
  Dong Dai, and Xuehai Zhou

QScheduler: A Tool for Parallel Query Processing in Database Systems ............................73
  Qingfeng Zhang, Shanshan Li, and Jing Xu

Deriving Usage Model Variants for Model-Based Testing: An Industrial
Case Study ...........................................................................................................................................77
  Hamza Samih, Hélène Le Guen, Ralf Bogusch, Mathieu Acher,
  and Benoit Baudry

Adaptive, Self-Managing, and Multi-agent Systems

A Reference Framework for the Automated Exploration of Web Applications ......................81
  Gabriel Le Breton, Nicolas Bergeron, and Sylvain Hallé

A Thread Behavior-Based Memory Management Framework on Multi-core
Smartphone ..........................................................................................................................................91
  Zongwei Zhu, Xi Li, Hengchang Liu, Cheng Ji, Yuan Xu, Xuehai Zhou,
  and Beilei Sun

Evolving Commitments for Self-Adaptive Socio-technical Systems .......................................98
  Xin Peng, Yi Xie, Yijun Yu, John Mylopoulos, and Wenyun Zhao

Software Engineering and Refactoring

Clause Replication and Reuse in Incremental Temporal Induction ........................................108
  Liangze Yin, Fei He, Ming Gu, and Jiaguang Sun

Generating SystemC Implementations for Clock Constraints Specified
in UML/MARTE CCSL .........................................................................................................................116
  Judith Peters, Robert Wille, and Rolf Drechsler

Automatic Fine-Grained Issue Report Reclassification ..........................................................126
  Pavneet Singh Kochhar, Ferdian Thung, and David Lo

How Do Open Source Communities Document Software Architecture: An
Exploratory Survey .............................................................................................................................136
  Wei Ding, Peng Liang, Antony Tang, Hans van Vliet, and Mojtaba Shahin

Short Papers: Session 2

Behavior Gaps and Relations between Operating System and Applications
on Accessing DRAM .........................................................................................................................146
  Beilei Sun, Xi Li, Zongwei Zhu, and Xuehai Zhou

OOPN-SRAM: A Novel Method for Software Risk Assessment ..............................................150
  Xiaofei Wu, Xiaohong Li, Ruitao Feng, Guangquan Xu, Jing Hu,
  and Zhiyong Feng
