2014 International Conference on Trustworthy Systems and their Applications

(TSA 2014)

Taichung, Taiwan
9-10 June 2014
2014 International Conference on Trustworthy Systems and their Applications

TSA 2014

Table of Contents

Message from the General Chairs ............................................................................................................vii
Message from the Program Chair ............................................................................................................viii
Organizing Committee ................................................................................................................................ix
Program Committee .....................................................................................................................................x
Keynote: Authenticatable Visual Secret Sharing by Chin-Chen Chang .........................................................xi

Regular Papers

Detecting Mobile Application Malicious Behaviors Based on Data Flow of Source Code .................................................................1
Chia-Mei Chen, Je-Ming Lin, and Gu-Hsin Lai

An Approach of Quality of Service Assurance for Enterprise Cloud Computing (QoSAECC) ...............................................................................7
William Cheng-Chung Chu, Chao-Tung Yang, Chih-Wei Lu, Chih-Hung Chang,
Nien-Lin Hsueh, Tse-Chuan Hsu, and Stephen Hung

A Reference Architecture for High-Availability Automatic Failover between PaaS Cloud Providers ........................................................................14
Ivor D. Addo, Sheikh I. Ahamed, and William C. Chu

Unified Security and Safety Risk Assessment - A Case Study on Nuclear Power Plant ..............................................................22
Yean-Ru Chen, Sao-Jie Chen, Pao-Ann Hsiung, and I-Hsin Chou

A Framework for Questionnaire-Based Healthcare Application Development .........................................................29
Geng-Hao Wu, Nien-lin Hsueh, and Chih-Hung Chang

Integrated Modeling and Analysis of Attribute Based Access Control Policies and Workflows in Healthcare .........................................................36
Sandeep Lakkaraju and Dianxiang Xu
Software Safety Standards: Evolution and Lessons Learned .................................................................44
   Shou-Yu Lee, W. Eric Wong, and Ruizhi Gao

**Short Papers**

A Video Conferencing System Based on WebRTC for Seniors ...............................................................51
   Chuan-Yen Chiang, Yen-Lin Chen, Pei-Shiun Tsai, and Shyan-Ming Yuan

The Study of Application and Evaluation with NoSQL Databases in Cloud Computing .......................................57
   Tse-Chuan Hsu, Dong-Meau Chang, and Hsin-Jan Lee

Security Management of Authentication System Based on Dynamic Biometric Features ..............................................63
   Yao-Hong Tsai, Hsiao-Ping Huang, and Hui Rong Wu

Reversible Data Hiding Method Based on Exclusive-Or with Two Host Images ................................................69
   Chyuan-Huei Thomas Yang, Yen Ting Hsu, Chien-Cheng Wu, and Jun-Wei Chang

Improving Software Maintenance for Pattern-Based Software Development: A Comment Refactoring Approach ..........................................................75
   Jhe-Jyun Guo, Nien-Lin Hsueh, Wen-Tin Lee, and Shi-Chuen Hwang

An Interactive Software Used in Conferences or Classes Based on the Service Oriented Architecture .........................................................80
   Liang Wang and Li Yao

**Author Index** ........................................................................................................................................84
