Pages 1-789
# Table of Contents

## M1_Rm12-SS: Collaborative Wireless Sensor Networks

- Inexpensive user tracking using Boltzmann Machines .......................................................... 1
  Mocanu, Elena; Mocanu, Decebal constantin; Bou ammar, Haitham; Zivkovic, Zoran; Liotta, Antonio; Smirnov, Evgueni
- Empowering smart cities through interoperable Sensor Network Enablers ................................. 7
  Molina, Benjamin; Palau, Carlos E; Fortino, Giancarlo; Guerrieri, Antonio; Savaglio, Claudio
  Xu, Guobao; Shen, Weiming; Wang, Xianbin
- Node Centrality Awareness via Swarming Effects ...................................................................... 19
  Mocanu, Decebal constantin; Exarchakos, Georgios; Liotta, Antonio

## M1_Rm13-Agent-Based Modeling I

- Tags and Their Reputation in Demographic Donor-Recipient Game ........................................... 25
  Namekata, Tsuneyuki; Namekata, Yoko
- Towards Modelling Affect and Emotions in Autonomous Agents with Recurrent Fuzzy Systems .......... 31
  Schneider, Moritz; Adamy, Jurgen Hermann
- Is the El Farol more efficient when cognitive rational agents have a larger memory size? .................... 39
  Baccan, Davi; Macedo, Luis; Elton, Shruzi
- Policy Evaluation and Analysis of Choosing Whom to Tweet Information on Social Media ................... 45
  Tang, Mingsheng; Mao, Xinjun; Zhu, Haibin; Yang, Shuqiang

## M1_Rm2-Human Performance Modeling I

- Analysis and Modeling of Hand-Ball Contact Force during Tossing Motion ........................................ 51
  Kajikawa, Shinya
- Implementation of an urban operations simulation model .............................................................. 57
  Klaproth, Oliver Walter
- Identification of Multimodal Control Behavior in Pursuit Tracking Tasks ........................................... 63
  Vos, Maxim C.; Pool, Daan Marinus; Damveld, Herman J.; Van paassen, Marinus M.; Mulder, Max

## M1_Rm3-Biometric Systems and Bioinformatics I

- A Hybrid Biometric System Using Touch-panel-based Finger-vein Identification and Deformable-registration-based Face Identification ................................................................. 69
  Li, Zisheng
- Iris Categorization Using Texton Representation .............................................................................. 75
  Meyer, Rachel Ellen; Zarei, Anahita
Multi-Resolution Fusion of DTCWT and DCT for Shift Invariant Face Recognition ................................. 80
Sultana, Madeena ; Marina, Gavrilova L; Yanushkevich, Svetlana

Disease-Medicine Topic Model for Prescription Record Mining ................................................................. 86
Park, Sungrae ; Choi, Doosup ; Lee, Wonsung ; Jung, Dain ; Kim, Minki ; Moon, Il-chul

M1_Rm4-Heuristic Algorithms
Study on Cluster-Structured Spiral Optimization ......................................................................................... 94
Suzuki, Kimihiro ; Tamura, Kenichi ; Yasuda, Keiichiro

Global Optimization with Derivative-free, Derivative-based and Evolutionary Algorithms ......................... 100
Bashir, Hassan A; Neville, Richard S

Capability-Aware Energy-Efficient Virtual Machine Scheduling in Heterogeneous Datacenters .................. 106
Wang, Chao ; Bhuiyan, Mohammad Fozul haque

Dynamic Stock Trading System based on Multi-objective Quantum-inspired Tabu Search Algorithm .......... 112
Chou, Yao-hsin ; Kuo, Shu-yu

M1_Rm5-SS: Advance on Discrete Event Systems: theory and applications
A Novel Failure Response Policy for Single-arm Cluster Tools with Residency Time Constraints .............. 120
Qiao, Yan ; Wu, Naiqi ; Pan, Chunrong

Team of Bayesian Optimization Algorithms to Solve Task Assignment Problems in Heterogeneous Computing Systems ...................................................................................................................... 127
Junqi, Zhang ; Jie, Li ; Kang, Qi ; Changjian, Jiang

Simulation Modeling and Visualization of Start-up Transient Processes of Dual-arm Cluster Tools with Wafer Revisiting ........................................................................................................................................ 133
Pan, Chunrong ; Zhou, Mengchu ; Qiao, Yan ; Wu, Naiqi

Coloured Petri Net Modeling and Analysis for Community based Wireless Mesh Networks ........................ 139
Ahmad, Farooq ; Khan, Naeem akhtar ; Khan, Sher afzal

M1_Rm6-SS: Image Processing/Pattern Recognition I
Ultrasound speckle noise reduction via an adaptive edge-controlled variational method ............................ 145
Barcelos, Celia A.z.; Vieira, Luciana E.r.s

Associative approach for edge detection ........................................................................................................ 152
Acevedo, Maria Elena; Acevedo, Marco Antonio; Martinez, Fabiola

Cross-Entropy Histogram Equalization ......................................................................................................... 158
Roopaei, Mehdi

3D Hand Posture Recognition from Small Unlabeled Point Sets .................................................................. 164
Gardner, Andrew ; Duncan, Christian A.; Kanno, Jinko ; Selmic, Rastko R.
M1_Rm7-SS: Innovative Technologies and Applications in Computer Intelligence I

Emergence of Altruism Behavior for Multi Feeding Areas in Army Ant Social Evolutionary System
Ichimura, Takumi ; Uemoto, Takuya ; Hara, Akira

Visualization of Online Customer Reviews and Evaluations Based on Self-organizing Map
Sato, Fumiaki

A hybrid FMM-CART model for human activity recognition
Seera, Manjeevan ; Lim, Chee peng ; Loo, Chu kiong

Route Planning Problem with Groups of Sightseeing Sites Classified by Tourist’s Sensitivity under Time-Expanded Network
Hasuake, Takashi ; Katagiri, Hideki ; Tsubaki, Hiroe ; Tsuda, Hiroshi

M1_Rm8-Machine Vision I

Coalitional Game-based Adaboost
Ykllef, Hadjer

Machine Learning and Image Processing in Astronomy with Sparse Data Sets
Jenkinson, John Andrew; Gregoryan, Artyom M; Hajinorozi, Mehdi ; Diaz hernandez, Raquel ; Peregrina barreto, Hayde ; Ortiz esquivel, Ariel ; Altamirano, Leopoldo ; Chavushyan, Vahram

Traffic Light Detection Based on Multi-feature Segmentation and Online Selecting Scheme
Zong, Wenhao ; Chen, Qijun

A Novel Hierarchical Interaction Model and HITS Map for Action Recognition in Static Images
Qingfeng, Liu ; Chengjun, Liu

M1_Rm9-Optimization I

Environmental Adaption Method for Dynamic Environment
Tripathi, Ashish ; Garbyal, Prateek ; Mishra, K. k. ; Misra, A. k.

From the Social Learning Theory to a Social Learning Algorithm for Global Optimization
Zhang, Jun ; Gong, Yue-jiao

A genetic algorithm designed for robot trajectory planning
Menarsi, Riad ; Outhadj, Hamouche ; Daachi, Boubaker ; Nakib, Amir ; Siarry, Patrick

An Optimal General Purpose Scheduler for Networked Control Systems
Elmahdi, Ahmed ; Taha, Ahmad ; Sun, Dengfeng ; Panchal, Jitesh H

Style-based Human Motion Segmentation
Sheng, Yu ; Laviers, Amy E

M1_Rm10-Swarm Intelligence I

Improved Group Explosion Strategy for Searching Multiple Targets using Swarm Robotics
Zheng, Zhongyang ; Li, Jie ; Li, Junzhi ; Tan, Ying

Comparison of Particle Swarm Optimization Algorithms in Wireless Sensor Network Node Localization
Cao, Cen ; Ni, Qingjuan ; Yin, Xushan

Fitness Predator Optimizer to Avoid Premature Convergence for Multimodal Problems
Yang, Shuqin ; Sato, Yuji
Improving Enhanced Fireworks Algorithm with Differential Mutation ................................................................. 264
Yu, Chao; Li, Junzhi; Tan, Ying

Weight Based Fish School Search ...................................................................................................................... 270
Lima neto, Fernando Buarque de; Lacerda, Marcelo Gomes pereira de

M1_Rm11-SS: Decision Support Systems based on Multicriteria Models I

Decision model to deal with participatory environmental problems ................................................................. 278
Levino, Natallya De a.; Costa morais, Danielle

Strategic Options Development and Analysis to identify criteria to evaluate segmentation problems of a water distribution network .............................................................. 283
Silva, Jose Leao; Fontana, Marcele Elisa; Costa morais, Danielle

Analysis of problem structuring methods to improve decisions in environmental planning ................................... 289
Cunha, Annielli Araujo rangel; Costa morais, Danielle

Selection of a Business Process Management System: An Analysis based on a Multicriteria Problem ............. 295
Silva, Lucio Camara; Poleto, Thiago; Carvalho, Victor diogo Heuer; Costa, Ana paula Cabral sexas

M1_Rm14-Sytems Engineering

Deteriorating and Position-based Learning Effects on some Single-machine Scheduling Problems ................. 300
Xu, Haiyan; Li, Xiaoping

Spectral-Spatial Hyperspectral Image Destriping Using Low-Rank Representation and Huber-Markov Random Fields ................................................................................................................. 305
Wang, Yulong; Tang, Yuan yan

Wind Power Forecasting using Emotional Neural Networks ............................................................................... 311
Lotfi, Ehsan; Khosravi, Abbas

IMPROVING THAILAND TOURISM FORECASTING BASED ON COMBINATIONS OF WAVELET DE-NOISING SCHEMES ........................................................................................................... 317
Supratid, Siriporn; Kummong, Ratree

M2_Rm12-SS: Ecological Interface Design: 25 years and counting

Revisiting three ecological interface design experiments to investigate performance and control stability effects under normal conditions ............................................................................................................ 323
Carrasco, Chelsea; Jamieson, Greg; St-cyr, Olivier

Ecological Interface Design: Control Space Robustness in Future Trajectory-based Air Traffic Control Decision Support ............................................................................................................................................. 329
Klomp, Rolf Edwin; Borst, Clark; Praetorius, Gesa

Interfaces to Medical Information Systems: Supporting Evidence Based Practice .............................................. 335
Flach, John M; Mcewen, Timothy R.; Elder, Nancy C.

Ecological Interface Design: Military C2 and Computer Network Defense ...................................................... 341
Bennett, Kevin B.

A Strategy-Based Ecological(?) Display for Time-Series Structural Change Diagnosis ....................................... 347
Hilliard, Antony; Jamieson, Greg
M2_Rm13-Agent-Based Modeling II

Modeling Decline Dynamics of a Teaching Material Sharing Network in Lack of Perceived New Innovations ................................................................. 353
Chen, Ronghuei; Chang, Shi-chung; Sung, Ming chieh

A Multiagent System for Simulating Pedestrian-Vehicle Interaction ......................................................... 359
Yu, Chang-han; Liu, Alan; Zhou, Pei-chuan

A Comparative Study between Using A*-search, Latin Hypercube and Genetic Algorithms in Design of Experiment for Simulation of Military Operational Plans ........................................................................................................ 365
Schubert, Johan

Why Connecting Theories Together May Not Work How to Address Complex Paradigm-Spanning Questions ........................................................................ 373
Pennock, Michael J.; Rouse, William B.

A Simultaneous Descending Auction for Task Allocation ................................................................................. 379
Service, Travis C.; Sen, Sayan D; Adams, Julie A.

M2_Rm2-Human Performance Modeling II

Context Awareness by Unit-type Evolutionary Petri Net for Team Medical Care Support ................................. 385
Suzuki, Takuo; Hamagami, Tomoki

Nonlinear dynamics of human creativity ................................................................................................. 391
Rabinovich, Mikhail; Dubnov, Shlomo

An Approach and Implementation for Coupling Neurocognitive and Neuromechanical Models ......................................................... 399
Goldfarb, Stephanie Eileen; Earl, Durren; De sapio, Vincent; Mansouri, Misagh; Reinbolt, Jeffery

Integration of Evolutionary Computing and Reinforcement Learning for Robotic Imitation Learning .................. 407
Tan, Huan; Kannan, Balajee; Derose, Lynn

Smart meter data analytics: prediction of enrollment in residential energy efficiency programs ................................. 413
Zeifman, Michael

M2_Rm3-Biometric Systems and Bioinformatics II

Shared Features for Multiple Face-Based Biometrics ......................................................................................... 417
Nwogu, Ifeoma

Comparative study of learning algorithms for recognition by hand geometry ......................................................... 423
Nascimento, Marcia Valdenice pereira; Batista, Leonardo Vidal; Cavalcanti junior, Nicomedes Lopes

Sparsification of Voice Data Using Discrete Rajan Transform and its Applications in Speaker Recognition ........................................................................ 429
Govindarajan, Prashanthi; Singh, Satyanand; Ethirajan, Rajan Govinda; Krishnan, Pat

M2_Rm4-Computational Intelligence

Optimal Fuzzy Traffic Signal Controller for an Isolated Intersection ...................................................................... 435
Araghi, Sahar; Khosravi, Abbas; Creighton, Douglas

Using Evolutionary Computation to Shed Light on the Effect of Scale and Complexity on the Difficulty of Object-Oriented Software Design ................................................................................................. 441
Simons, Christopher L.; Smith, Jim E

Bijections for the Numeric Representation of Labeled Graphs .............................................................................. 447
Parque, Victor; Kobayashi, Masakazu; Higashi, Masatake
M2_Rm5-Human-Machine Systems

Extracting Deep Social Relationships from Photos ............................................................. 453
Lu, Iris ; Aarabi, Parham

Audio Feature Reduction and Analysis for Automatic Music Genre Classification .................. 457
Baniya, Babu Kaji ; Lee, Joowhoan

Obfuscation by Code Fragmentation to Evade Reverse Engineering ........................................ 463
Balachandran, Vivek ; Emmanuel, Sabu ; Keong, Ng Wee

Interactive Multi-Robot Command and Control with Quasi-Natural Command Language .......... 470
Remmersmann, Thomas ; Schade, Ulrich ; Schick, Christopher M.

M2_Rm6-SS: Image Processing/Pattern Recognition II

Dual Gaussian Mixture Model with Pixel History for Background Suppression ......................... 476
Mukherjee, Dibyendu ; Saha, Ashirbani ; Wu, Jonathan ; Jiang, Wei

Nomadic Point Cloud Calibration .................................................................................. 483
Giefing, Gerd-juergen ; Heckes, Jurgen ; Arles, Adrien ; Ciba, Dorota ; Klein, Alexander

Speech Description Through MINERS: Model Invariant to Noise and Environment Robust for Speech ........ 489
Viana, Hesdras ; Mello, Carlos

Phantom conception for scintigraphic imaging .................................................................. 495
Makhlouf, Fatma

M2_Rm7-SS: Innovative Technologies and Applications in Computer Intelligence II

Rank-based Semantic Control Crossover in Genetic Programming ......................................... 501
Hara, Akira ; Kushida, Jun-ichi ; Nobuta, Takeyuki ; Takahama, Tetsuya

Agent-based simulation for simultaneous ultimatum games ............................................. 507
Hayashida, Tomohiro ; Nishizaki, Ichiro ; Koji, Saiki

Density-based Adaptive Spatial Clustering Algorithm for Identifying Local High-Density Areas in Georeferenced Documents .............................................................. 513
Sakai, Tatsuhiro ; Tamura, Keiichi ; Kitakami, Hajime

A New Parallelization Model for Detecting Temporal Bursts in Large-Scale Document Streams on a Multi-Core CPU ......................................................... 519
Tamura, Keiichi ; Kitakami, Hajime

M2_Rm8-Machine Vision II

Anisotropic Fractal Snakes .......................................................................................... 525
Smith, Christopher E

Fast 3D Reconstruction using One-shot Spatial Structured Light ......................................... 531
Huang, Bingyao ; Tang, Ying

Real-time Novelty Detection in Video using Background Subtraction Techniques : State of the art A Practical Review .................................................................. 537
Morris, Graffydd ; Angelov, Plamen

Recognizing Conversation Groups in an Open Space by Estimating Placement of Lower Bodies .......... 544
Yasuda, Naoyuki ; Kakusho, Koh ; Okadome, Takeshi ; Funatomi, Takuya ; Iiyama, Masaaki
M2_Rm9-Optimization II

Solving Fuzzy Programming with a Consistent Fuzzy Number Ranking ........................................ 551
Nguyen, Thanh ; Lee, Vincent C. s.; Khosravi, Abbas ; Creighton, Douglas ; Nahavandi, Saeid

A Novel Evolutionary Algorithm Solving Optimization Problems .............................................. 557
Chen, C. l. Philip; Zhang, Tong ; Tam, Sik chung

Constrained Optimization using the Chaotic Sequential Quadratic Approximation Type Lagrange Quasi-Newton Method ............................................... 562
Okamoto, Takashi

Collaborative Filtering by PSO-based MMMF ................................................................. 569
Veeramachaneni, Sowmini Devi; Kagita, Venkateswara Rao; Pujari, Arun K; Padmanabhan, Vineet

Iterative Cost Update Method of Generalized Kelly Mechanism for Fair Utility Resource Allocation ........... 575
Sannomiya, Shigetoshi ; Kanazawa, Takafumi

M2_Rm10-Swarm Intelligence II

A Basic Study of Integer Particle Swarm Optimization having Deterministic Dynamics .................. 581
Kurita, Yuya ; Tsubone, Tadashi

Multiagent-based ABC algorithm for Autonomous Rescue Agent Cooperation ..................................... 585
Takano, Ryo ; Yamazaki, Daichi ; Ichikawa, Yoshihiro ; Hattori, Kiyohiko ; Takadama, Keiki

Solving Performances of PSO Networks with Temporal Couplings ............................................ 591
Sasaki, Tomoyuki ; Nakano, Hidehiro ; Miyachi, Arata ; Taguchi, Akira

Supervisory Control for Cost-Effective Redistribution of Robotic Swarms .................................... 596
Luo, Ruikun ; Chakraborty, Nilanjan ; Sycara, Katia

Particle Swarm Optimization with Non-Linear Velocity ........................................................ 602
Khan, Farrukh Aslam; Malik, Arif Jamal

M2_Rm11-SS: Decision Support Systems based on Multicriteria Models II

A multicriteria model for characterizing the strategic role of IT in organizations ............................ 608
Gusmao, Ana paula Henriques de; Mendonca, Massa Silva; Costa, Ana paula Cabral seixas

Public Safety Planning in Natal city: an application based on ELECTRE TRI model .................... 614
Gurgel, Andre Morais; Mota, Caroline Maria de miranda; Pimenta, Iris Linhares

A method for elicitation and combination of imprecise probabilities: A mathematical programing approach. ... 619
Silva, Lucimario Gois de oliveira; Filho, Adel Teixeira de almeida

A Multicriteria Model for Selecting Renewable Energy Systems in a Distributed Generation Context ........ . 625
Daher, Suzana De franca dantas

Empowering the Delphi Decision-Making Process Using Expert Search from Social Networks ............ 630
Barbosa, Carlos eduardo ; Oliveira, Jonice ; De souza, Jany Moreira
M2_Rm14-Medical Informatics I

Predicting person’s Zheng state using the heterogeneous sensor data by the semi-subjective teaching of TCM doctors .......................................................... 636
Dai, Ying

Thermal Conditions of Breast Cancer Progress-Treatment ..................................................... 642
Roopaei, Mehdi

Cancerous Tweets: Socially Sharing Sensitive Health Information .............................................. 648
Anderson, Michael D; Adams, Julie A.; Hooten, Eli R

Nemeth, Christopher ; Anders, Shilo ; Grome, Anna ; Crandall, Beth ; Dominguez, Cynthia ; Pamplin, Jeremy ; Mann-salinas, Elizabeth ; Serio-melein, Maria

M3_Rm12-Cybernetics for Informatics ; Workshop on System Engineering Human-Centered Intelligent Vehicles

Physical Activity Estimation using Accelerometer and Facility Information for Elderly Healthcare ........ 659
Hayashi, Masayuki ; Kanbara, Masayuki ; Ukita, Norimichi ; Hagita, Norihiro

Identifying the Evolution of Disasters and Responses with Network-Text Analysis ......................... 664
Song, Kyungwoo ; Kim, Du-hyeong ; Shin, Su-jin ; Moon, Il-chul

Soft Systems Methodology in Net-Centric Cyber Defence System Development ............................ 672
Craig, Richard ; Spyridopoulos, Theodoros ; Tryfonas, Theo ; May, John

Adaptive Facial Feature Extraction ............................................................................... 678
Toniges, Torben ; Kummert, Franz

A Framework for Proactive Assistance: Summary .............................................................. 684
Armand, Alexandre ; Filliat, David ; Ibanez-guzman, Javier

Situation Awareness with Different Levels of Automation ............................................... 688
Miller, Dave ; Sun, Annabel ; Ju, Wendy

M3_Rm13-SS: Computational Awareness

A New Proximity Aware Similarity Metric for Contiguous Clustering ........................................ 694
Chakraborty, Goutam

Design of A State Machine towards Efficient Management of User-Generated Data .................... 700
Yen, Neil Yuwen; Huang, Runhe ; Ma, Jianhua

Study on the Effect of Learning Parameters on Decision Boundary Making Algorithm ................... 705
Kaneda, Yuya ; Pei, Yan ; Zhao, Quanfa ; Liu, Yong

Cultural Dimension in Emotion Recognition for Human Machine Interaction .......................... 711
Qairas-ramirez, Maria alejandra ; Onisawa, Takehisa

Estimating Agents’ Attributes Using Simulated Annealing from Statistics to Realize Social Awareness .... 717
Murata, Todahoko ; Masui, Daski

Rough Fuzzy Consistency Measure with Evolutionary Algorithm for Attribute Reduction ................ 723
Chakraborty, Basabi
M3_Rm2-SS: Computational Intelligence Methods for Big Data Processing I

A Feature-emphasized Clustering Method for 2D Vector Field .................................................. 729
Guan, Mengquan ; Zhang, Wenyao

Interval-valued intuitionistic trapezoidal fuzzy number and its application ........................................ 734
Li, Jun Hong; Wenyi, Zeng ; Guo, Ping

A Cooperative Coevolution with Variable Grouping strategy and Auxiliary Function for Large Scale Global Optimization ................................................................. 738
Wang, Yuping

An Efficient and Scalable Learning Algorithm for Near-Earth Objects Detection in Astronomy Big Image Data ................................................................. 742
Wang, Ke ; Guo, Ping

M3_Rm3-SS: Modelling, Analysis and Control of Human-Machine Motor Coordination

Kinematic Characteristics of Motion in the Mirror Game ................................................................. 748
Slowinski, Piotr ; Rooke, Edward ; Bernardo, Mario di ; Tsaneva-atanasova, Krasimira

A Novel Cognitive Architecture for a Human-like Virtual Player in the Mirror Game .......................... 754
Zhai, Chao ; Alderisio, Francesco ; Tsaneva-atanasova, Krasimira ; Bernardo, Mario di

Understanding the Motor Dynamics of Interpersonal Interactions ................................................. 760
Schmidt, Richard ; Fitzpatrick, Paula

Cognitive mechanism in synchronized motion: An internal predictive model for manual tracking control 765
Khoramshahi, Mahdi ; Shakla, Ashwini ; Billard, Aude

Movement similarities and differences during social interaction: The scientific foundation of the ALTEREGO European project ...................................................... 772
Bardy, Benoit G

Discrete and rhythmic movements - just a bifurcation apart? ....................................................... 778
Daffertshofer, Andreas ; Van veen, Bart ; Ton, Robert ; Huys, Raoul

M3_Rm4-SS: Innovations in Intelligent Systems and Applications & SS: Intelligent Robots and Systems

Concept Representation in Intuitionistic Fuzzy Social Relational Networks ................................... 784
Chen, Shyi-ming ; Randyanto, Yonathan

A New Group Decision Making Method Based on Likelihood-Based Comparison Relations of Hesitant Fuzzy Linguistic Term Sets ......................................................... 790
Chen, Shyi-ming ; Lee, Li-wei

RFID-Augmentation for Improving Long-term Pose Accuracy of an Indoor Navigating Robot .............. 796
Opoku, Daniel ; Abdollah homaifar, ; Tunstel, Edward

An Example of a Seven Joint Manipulator Optimized for Kinematic Fault Tolerance ......................... 802
Ben-gharbia, Khaled M.; Maciejewski, Anthony A; Roberts, Rodney Glen

Field Studies of a Robot System to Measure Ground Emissions of Methane ................................. 808
Anderson, Gary T.; Mahdi, Samira ; Khidir, Jarjees ; Isra’a, Mohammad ; Wilson, Edmond

Evaluation of Sonar and Video Data Collection Efforts in an Under-Ice Environment Using an Unmanned Underwater Vehicle ......................................................... 813
Spears, Anthony ; West, Michael ; Collins, Thomas ; Howard, Ayanna M
