2014 IEEE Symposium on Computational Intelligence in Control and Automation

(CICA 2014)

Orlando, Florida, USA
9-12 December 2014
TABLE OF CONTENTS

IEEE SSCI 2014 General Committee ........................................................................................................ vi
IEEE CICA 2014 Committee...................................................................................................................... vii
Keynote Talk: CICA’14............................................................................................................................. viii

Thursday, December 11
9:20AM-10:00AM
CICA’14 Keynote Talk

Fuzzy and Fuzzy-Polynomial Systems for Nonlinear Control: Overview and Discussion
Antonio Sala

10:20AM-12:00PM
CICA’14 Session 1: System Identification and Learning with Applications
Chair: G. N. Pillai and Eduardo M. A. M. Mendes

10:20AM One-Class LS-SVM with Zero Leave-One-Out Error .............................................................. 1
Geritt Kampmann and Oliver Nelles

10:40AM Extreme Learning ANFIS for Control Applications ............................................................... 7
G. N. Pillai, Jagtap Pushpak and Germin Nisha

11:00AM Collaborative Fuzzy Rule Learning for Mamdani Type Fuzzy Inference System with
Mapping of Cluster Centers ................................................................................................... 15
Mukesh Prasad, Kuang-pen Chou, Amit Saxena, Om Prakash Kawrtiya, Dong-Lin Li
and Chin-Teng Lin

11:20AM An Input-Output Clustering Approach for Structure Identification of T-S Fuzzy Neural
Networks ................................................................................................................................ 21
Wei Li, Honggui Han and Junfei Qiao

Neuro-Fuzzy Network ............................................................................................................. 29
Alisson Silva, Walmir Caminhas, Andre Lemos and Fernando Gomide

1:30PM-3:10PM
CICA’14 Session 2: Fuzzy Systems and Control with Applications
Chair: Li-Xin Wang and Tadanari Taniguchi

1:30PM Speculative Dynamical Systems: How Technical Trading Rules Determine
Price Dynamics ....................................................................................................................... 37
Li-Xin Wang

1:50PM Adaptive Dynamic Output Feedback Control of Takagi-Sugeno Fuzzy Systems with
Immeasurable Premise Variables and Disturbance ............................................................ 45
Balaje Thumati and Al Salour

2:10PM Optimal Robust Control for Generalized Fuzzy Dynamical Systems: A Novel Use on
Fuzzy Uncertainties ............................................................................................................. 53
Jin Huang, Jiaguang Sun, Xibin Zhao and Ming Gu

2:30PM SOFC for TS fuzzy systems: Less Conservative and Local Stabilization Conditions..... 61
Leonardo Mozelli, Fernando Souza and Eduardo Mendes

2:50PM Quadrotor Control Using Dynamic Feedback Linearization Based on Piecewise
Bilinear Models .................................................................................................................. 68
Tadanari Taniguchi, Luka Eciolaza and Michio Sugeno
3:30PM-5:10PM

CICA’14 Session 3: Neural Network Systems and Control with Applications I
Chair: Ming Zhang Edgar N. Sanchez

3:30PM Ultra High Frequency Polynomial and Sine Artificial Higher Order Neural Networks for Control Signal Generator ................................................................. 75 Ming Zhang

3:50PM Robust Pinning Control of Complex Dynamical Networks using Recurrent Neural Networks ........................................................................................................ 83 Edgar N. Sanchez and David I. Rodriguez

4:10PM Dissolved Oxygen Control of Activated Sludge Bioreactors using Neural-Adaptive Control ........................................................................................................... 90 Seyedhossein Mirghasemi, Chris J.B. Macnab and Angus Chu

4:30PM Estimation of States of a Nonlinear Plant using Dynamic Neural Network ...................... 96 Alok Kanti Deb and Dibyendu Guha

4:50PM Cascaded Free Search Differential Evolution Applied to Nonlinear System Identification Based on Correlation Functions and Neural Networks.............................102 Helon Vicente Hultmann Ayala, Luciano Cruz, Roberto Zanetti Freire and Leandro dos Santos Coelho

5:10PM-6:45PM

Poster Session: SSCI’14 Poster Session

P180 Evolutionary Fixed-Structure Mu-Synthesis ................................................................. 109 Philippe Feyel, Gilles Duc and Guillaume Sandou

Friday, December 12

9:30AM-10:30AM

CICA’14 Session 4: Evolutionary Computation in Control and Automation
Chair: Alok Kanti Deb and Chixin Xiao

9:30AM Constrained Multi-objective Evolutionary Algorithm Based on Decomposition for Environmental/Economic Dispatch .....................................................................................117 Yin Jianping, Xiao Chixin and Zhou Xun

9:50AM Grasping Novel Objects with a Dexterous Robotic Hand through Neuroevolution ...... 125 Pei-Chi Huang, Joel Lehman, Aloysius K. Mok, Risto Miikkulainen and Luis Sentis

10:10AM New Multiagent Coordination Optimization Algorithms for Mixed-Binary Nonlinear Programming with Control Applications ......................................................... 133 Haopeng Zhang and Qing Hui

11:00AM-12:00PM

CICA’14 Session 5: Neural Network Systems and Control with Applications II
Chair: Jose Mario Araujo and Daniel Yuh Chao

11:00AM Enumeration of Reachable, Forbidden, Live States of Gen-Left K-net System (with a non-sharing resource place) of Petri Nets ...........................................................................141 Daniel Yuh Chao and Tsung Hsien Yu

11:20AM Glucose Level Regulation for Diabetes Mellitus Type 1 Patients using FPGA Neural Inverse Optimal Control ......................................................................................... 148 Jorge C. Romero-Aragon, Edgar N. Sanchez and Alma Y. Alanis
11:40AM  Neural Network Fitting for Input-Output Manifolds of Online Control Laws in Constrained Linear Systems .............................................................. 155
Samarone Nascimento do Carmo, Marconi Oliveira de Almeida, Rafael Campos, Flavio Castro, Jose Mario Araujo and Carlos Eduardo Trabuco Dorea

1:30PM-3:10PM
CICA’14 Session 6: Applications of CI to Control and Automation
Chair: Alexander Kochegurov and Li-Xin Wang
1:30PM  What Happens When Trend-Followers and Contrarians Interplay in Stock Market ...... 161
Li-Xin Wang
1:50PM  An efficient Method to Evaluate the Performance of Edge Detection Techniques by a two-dimensional Semi-Markov Model ......................................................... 169
Dmitry Dubinin, Viktor Geringer, Alexander Kochegurov and Konrad Reif
2:10PM  Design and Implementation of a Robust Fuzzy Controller for a Rotary Inverted Pendulum using the Takagi-Sugeno Descriptor Representation ...................................... 176
Quoc Viet Dang, Benyamine Allouche, Laurent Vermeiren, Antoine Dequidt and Michel Dambrine
2:30PM  Ensuring safe prevention and reaction in smarthome systems dedicated to people becoming disabled ................................................................. 182
Sebastien Guillet, Bruno Bouchard and Abdenour Bouzouane
2:50PM  How to Detect Big Buyers in Hong Kong Stock Market and Follow Them Up to Make Money ........................................................................ 190
Li-Xin Wang

3:30PM-5:10PM
CICA’14 Session 7: Computational Intelligence in Robotics
Chair: Yongping Pan Andrei Petrovski
3:30PM  Calibration between a Laser Range Scanner and an Industrial Robot Manipulator ................................................................. 198
Thomas Timm Andersen, Nils Axel Andersen and Ole Ravn
3:50PM  Context-based Adaptive Robot Behavior Learning Model (CARB-LM)........................... 206
Joohee Suh and Dean Hougen
4:10PM  Biomimetic Hybrid Feedback Feedforward Adaptive Neural Control of Robotic Arms ......................................................... 214
Yongping Pan and Haoyong Yu
4:30PM  Improved Multiobjective Particle Swarm Optimization for Designing PID Controllers Applied to Robotic Manipulator................................................................. 221
Juliano Pierezan, Helon V. H. Ayala, Luciano F. Cruz, Leandro dos S. Coelho and Roberto Z. Freire
4:50PM  Automated Inferential Measurement System for Traffic Surveillance: Enhancing Situation Awareness of UAVs by Computational Intelligence ........................................ 229
Prapa Rattadilok and Andrei Petrovski

AUTHOR INDEX .................................................................................................................. 237
