TABLE OF CONTENTS

IEEE SSCI 2014 General Committee ........................................................................................................ vii
IEEE IA 2014 Committee ............................................................................................................................. viii

Friday, December 12

11:00AM-12:00PM
IA’14 Session 1: Multi-agent Systems
Chair: Hani Hagras and Vincenzo Loia
11:00AM Distributed Intelligent Management of Microgrids Using a Multi-Agent Simulation Platform .................................................................................................................. 1
Luis Gomes, Tiago Pinto, Pedro Faria and Zita Vale
11:20AM Data Mining Approach to support the Generation of Realistic Scenarios for Multi-Agent simulation of Electricity Markets ........................................................................ 8
Brigida Teixeira, Francisco Silva, Tiago Pinto, Isabel Praca, Gabriel Santos and Zita Vale
11:40AM Output-Based High-Order Bipartite Consensus under Directed Antagonistic Networks ...........................................................................................................16
Hongwen Ma, Derong Liu, Ding Wang and Hongliang Li

1:30PM-3:10PM
IA’14 Session 2: Applications of Intelligent Agents
Chair: Hani Hagras and Vincenzo Loia
1:30PM Human Activity Recognition in Smart Homes: Combining Passive RFID and Load Signatures of Electrical Devices ...........................................................................................22
Dany Fortin-Simard, Jean-Sebastien Bilodeau, Sebastien Gaboury, Bruno Bouchard and Abdenour Bouzouane
1:50PM Naive Creature Learns to Cross a Highway in a Simulated CA-Like Environment ..........30
Anna Lawniczak, Bruno Di Stefano and Jason Ernst
2:10PM An Agent-based Trading Infrastructure for Combinatorial Reverse Auctions ..........38
Hakan Bayindir, Hurevren Kilic and Mohammed Rehan
2:30PM Human Perceptions of Altruism in Artificial Agents .......................................................................................45
Curry Guinn and Daniel Palmer
2:50PM Developing Game-Playing Agents That Adapt to User Strategies: A Case Study ...........51
Rececca Brown and Curry Guinn

3:30PM-5:10PM
Special Session: IA’14 Session 3: Ambient Computational Intelligence
Chair: Ahmad Lotfi and Giovanni Acampora
3:30PM Distributed Team Formation in Urban Disaster Environments........................................57
Abel Correa
3:50PM Prediction of Mobility Entropy in an Ambient Intelligent Environment..........................65
Saisakul Chernbumroong, Ahmad Lotfi and Caroline Langensiepen
4:10PM A Hybrid Computational Intelligence Approach for Efficiently Evaluating Customer Sentiments in E-Commerce Reviews..........................................................73
Giovanni Acampora and Georgina Cosma
4:30PM Interoperable Services based on Activity Monitoring in Ambient Assisted Living Environments ..............................................................................................................81
Giovanni Acampora, Kofi Appiah, Autilia Vitiello and Andrew Hunter
4:50PM  Semantic-Based Decision Support for Remote Care of Dementia Patients .....................89
Taha Osman, Ahmad Lotfi, Caroline Langensiepen, Mahmoud Saeed and Saisakul Chernbumroong

AUTHOR INDEX .............................................................................................................................................97
