31st Annual International Pittsburgh Coal Conference (PCC 2014)

Coal – Energy, Environment and Sustainable Development

Pittsburgh, Pennsylvania, USA
6-9 October 2014

Volume 1 of 4

Editor:

Badie I. Morsi

ISBN: 978-1-63439-807-7
# TABLE OF CONTENTS

## VOLUME 1

### ORAL SESSIONS

**SESSION 1 – CLEAN COAL DEMONSTRATION AND COMMERCIAL PRODUCTS: FUTURE OF COAL**

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Evolving Role of Declining US Coal</td>
<td>1</td>
</tr>
<tr>
<td>Coal: Fuel of the Past, Present and Future</td>
<td>13</td>
</tr>
<tr>
<td>Making Room for Coal Generation under the NSPS Rule</td>
<td>28</td>
</tr>
<tr>
<td>The Importance of Baseload Power Renewal</td>
<td>36</td>
</tr>
<tr>
<td>Coal's Future in a Carbon-Constrained World: How Did We Get Here, and Where Do We Go Now?</td>
<td>51</td>
</tr>
</tbody>
</table>

- James Stevenson
- John Bridges, Anant Inani
- Joel Theis
- Eric J. Grol, Tom Davis, Bob Wallace

**SESSION 2 – COAL MINING: GEOLOGICAL AND GROUND CONTROL ISSUES IN MINING**

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Geotechnical Studies Related to Crossing a Geologic Fault Using the Longwall Mining Method</td>
<td>61</td>
</tr>
<tr>
<td>Using Shield Leg Pressure Data to Assess Longwall Ground Control Performance in the Face Area</td>
<td>72</td>
</tr>
</tbody>
</table>

- Yoginder P. Chugh, Harrold Gurley, Behroz Abbasi, Joseph Hirschi
- Yoginder P. Chugh, Harrold Gurley, Joseph Hirschi, Greg Smittle

**SESSION 3 – GASIFICATION: GENERAL - 1**

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Advanced Energy Systems -- Gasification Systems/ Coal and Coal-Biomass to Liquids</td>
<td>82</td>
</tr>
<tr>
<td>Dry Solids Pump Coal Feed Technologies Program</td>
<td>90</td>
</tr>
<tr>
<td>Intermediate-Scale Validation of ITM Oxygen Technology</td>
<td>97</td>
</tr>
<tr>
<td>Simulation Research on the Fixed-bed Gasification Process in a Two-stage Combined Gasifier</td>
<td>127</td>
</tr>
<tr>
<td>Syngas-based Annex Concepts for Chemical Energy Storage Within Pulverized Coal Power Plants</td>
<td>159</td>
</tr>
</tbody>
</table>

- Jenny B. Tennant
- Alan Darby
- Andrew W. Wang, Mark Hucieon, Charles Woods, Lori Anderson, Phillip Armstrong, Fuecher Stein
- Yifei Wang, Weilong Jin, Longcha Zhu, Guangyao Yu, Fuchen Wang
- Christian Wolfersdorf

**SESSION 4 – COMBUSTION: OXY-COMBUSTION AND CHEMICAL LOOPING - 1**

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chemical Looping Combustion Reference Plant Designs and Sensitivity Studies</td>
<td>167</td>
</tr>
<tr>
<td>Process Design and Parametric Analysis of a Staged, Pressurized Oxy-Combustion Power Plant</td>
<td>178</td>
</tr>
<tr>
<td>Experimental Determination of the Kinetics of Pressurized Oxy-Fuel Char Combustion</td>
<td>187</td>
</tr>
<tr>
<td>Impact of Oxygen Enrichment on Biomass Flame Stability, Emissions and Burnout</td>
<td>202</td>
</tr>
<tr>
<td>Experiments on Mercury Oxidation in an Oxy-Fuel Fluidized Bed Combustor</td>
<td>211</td>
</tr>
</tbody>
</table>

- Robert Stevens, Richard Newby, Vasant Shah, Norma Kuehn, Dale Keairns
- Akshay Gopan, Ben Kumfer, Richard Axelbaum, Jeffrey Phillips, David Thimsen
- Ethan S. Hecht, Christopher R. Shaddix, Manfred Geier
- Steven Owen, Daniel Ellis, Dale Tree, Yuan Xue, Huanho Kim, Kenneth Kaiser
- Hui Wang, Yufeng Duan, Qiang Zhou, Chun Zhu, Min She

**SESSION 5 – CLEAN COAL AND GAS TO FUELS: SYNGAS TO FUELS - 1**

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pilot-Scale CTL Process Development in Korea</td>
<td>226</td>
</tr>
<tr>
<td>Gasification, Warm-Gas Cleanup, and Liquid Fuel Production with Illinois Coal and Biomass Blends</td>
<td>227</td>
</tr>
<tr>
<td>Production of SNG in a Slurry Bubble Column Reactor</td>
<td>248</td>
</tr>
</tbody>
</table>

- Heon Jung
- Joshua J. Stanislofowsk, Scott Tolbert, Tyler Carran, Michael Holms, Jason Smith
- Manuel Gütz, Rainer Reimert, Siegfried Bajohr
SESSION 6 – COAL SCIENCE: GENERAL - 1

Column Flotation Of Hard-to-float Subbituminous Coal Using Trimethyl Pentanediol Derivatives as Surface Active Materials and Pico-nano Bubbles as Secondary Collector ................................................................. 258
Felicia F. Peng, Jinxing Chen, Yu Xiong

Improving the Rail Car Unloading of Solid Fuels .......................................................... 277
George D. Danbraugh

Coal Ash as a Potential Scrubber for Quarry Fine Wastes ........................................... 308
Ray N. Lieberman, Y. Anker, X. Querol, O. Font, Y. Mastai, H. Cohen

Study on Kinetics of Char Gasification with CO2 and Steam by the Method of Shared Active Sites ................................................................. 328
Wei Hao, Zhijie Zhou, Yifei Wang, Zhenghua Dai, Yan Gong, Guangtuo Yu

SESSION 7 – CLEAN COAL DEMONSTRATION AND COMMERCIAL PROJECTS: OPTIMIZING CLEAN COAL TECHNOLOGIES

Public Communication and Collaboration for Carbon Capture, Utilization and Storage Technology: Acceptance, Education, and Outreach ........................................................................................................ 357
Douglas C. Brauer, David Larrick

Four Years of Operating Experience with DryFinishing™ Fuel Enhancement Process at Coal Creek Generating Station ........................................................................................................... 388
Charles Bullinger, Mark Ness, Michael Briggs, Nenad Sarunac

Case Study of an Improved Online Coal Analysis System ............................................ 401
Albert Klein, Anthony Garaventa, Michael Santucci

Improving the Energy Efficiency of a Mid-Size Power Plant by Reduction in Auxiliary Power and Improved Heat Transfer .......................................................... 417
Jeffrey Green, Justin Harrell, James Mathias

SESSION 8 – COAL MINING: MONITORING AND MANAGING GAS IN MINES

Coal Mine Methane Developments in the United States ................................................ 450
Jayne Somers

The Technical and Economic Feasibility of Flaring to Reduce Greenhouse Gas Emissions from the Global Coal Mining Industry .......................................................... 461
Felicia Ruiz, Clark Talkington

SESSION 9 – GASIFICATION: GAS CLEANING

Advanced Acid Gas Separation: Sour Gas PSA .......................................................... 472
Fabrice Amy, Jeff Kloserman, Shubhra Bhadra, Jeff Hufston, Ellen O’Connell

Sulfur Release Behavior During Pyrolysis of a Bituminous Coal Fractions: The Relationship with Sulfur Forms, Char Particle Size Distribution and Morphology, and Char Conversion ................................................................. 481
Vijayaragavan, Krishnamoorthy, Aime H. Tchudap, Sarma V. Pispapai

Toward a Technology to Mitigate Syngas Cooler Plugging and Fouling .................... 495
Mike Bockele, Kevin Davis, Rand Pammell, Martin Denison, Tim Shurtz, Huaofeng Wang, Jost Wendt, Kevin Whitney, Mustafa Can Celebi, Andrew Fry, Cristina Jaramillo, Zongtai Zhu, Jost Wenda

Pilot-Scale Capture of Mercury, Arsenic, and Selenium from Warm Syngas at Elevated Pressures by Palladium Sorbents .......................................................... 506

Removal of Carbon Disulfide by CUO During Reactive Milling With Anthracite Carbon as Milling Aid .......................................................... 517
Tao Li, Huiqen Chen, Nuxie Wang, Xiaoli, Shitue Zhou

SESSION 10 – COMBUSTION: OXY-COMBUSTION AND CHEMICAL LOOPING - 2

Techno-Economic Analysis of Coal-Direct Chemical Looping for Power Production .......................................................... 518
Triti Sengchum, Luis G. Velazquez-Vargas, Douglas J. Devaul, Tom J. Flynn, Andrew Tong, Samuel Bayham, L.-S. Fan

Kinetics of Redox CLC Reactions for Selected Carriers Based on Fe Pigments from Pigments Industry .......................................................... 526
Evelina Ksepko, Piotre Babinski, Marek Sciazko

SESSION 11 – CLEAN COAL AND GAS TO FUELS: SYNGAS TO FUELS - 2

High Hydrogen, Low Methane Syngas from Low-Rank Coals for Coal-to-Liquids Production .......................................................... 535
Andrew Lucero, Kevin McCabe, Amit Goyal, August Meng, Jonathan Carroll, Santosh Gangwal

ZnO-ZSM5 Nanocatalysts for Methane Upgrading .......................................................... 546
Yanghieh Liu, Gotz Voser

Methane Reforming Strategies for the CO2 Emission Reduction of Lignite to Liquid-Fuel Production System .......................................................... 554
Yang Fan, Wenyung Li
Economic Analysis of Gas to Liquid and Coal to Liquid Processes
Sara Mohajerani, Samane Ghandehari, Amit Kumar

SESSION 12 – COAL SCIENCE: GENERAL - 2

Measurement of Surface Tension of Coal Slags
Andre Horstenkamp, M. Muller

Investigation of Coal Particle Fragmentation Behavior in a Drop-Tube Reactor
Jan Friedemann, A. Bern, F. Baitalow, B. Meyer

Binding of SO\textsubscript{3} to Fly Ash Components: CaO, MgO, Na\textsubscript{2}O and K\textsubscript{2}O
Benjamin Galloway, Erdem Sasmaz, Bihter Pudak

Research of Fuxian Coal Desulfurization and Ash Reduction by the Floation Method
Meime Lu, Shiyong Zhou, Peijie Wu, Anning Zhou, Zhiyuan Yang

SESSION 13 – CLEAN COAL DEMONSTRATION AND COMMERCIAL PROJECTS: GASIFICATION PROJECTS

Making UCG Technology a Commercial Reality
Brian Dearth

Update on the Kemper IGCC Project
Diane R. Madden

Pre-Commercial Demonstration of High Efficiency, Low Cost Syngas Cleanup Technology for Chemical, Fuel, and Power Applications
David L. Denton, Ben Gardner, Raghubir Gupta, Brian Turk

Texas Clean Energy Project Update
Sasha Mackler

Hydrogen Energy California Project Update
Stefanie Korepin, James Croyle

SESSION 14 – COAL MINING: MINE RECLAMATION AND MINING ECONOMICS

Use of Flue Gas Desulfurization By-products for Coal Mine Reclamation: Laboratory, Pilot, and Full-Scale Studies
Tarunjit S. Batula, W. Wolfe, C.-M. Cheng

Drillability Assessment of Rocks Based on Strength and Brittleness
O. Su, U. Sakiz, E. Koken

GIS Analysis of Coal Values in Evaluation and Design of Model of Flexible Production at TKI Mines
Ebru Ilgas, Ali Bora, Emre Soydemir

Investigation to Define Treatment Requirements for Acid Mine Drainage during Closure of a Fly Ash Reservoir
Bruce M Sass, Alan R. Wood, John Seymour, J. Brady Gatta

SESSION 15 – GASIFICATION: UNDERGROUND COAL GASIFICATION

African Under Ground Gasification Project: An In-Depth Coal Characterization Study of the Theunissen Coal Reserve in South-Africa
J. C. van Dyk, Johan Brand

Bloodwood Creek UCG Pilot 2011-2014
Burl E. Davis, Cliff Mallett

Underground Coal Gasification in China
Feng Chen

Laboratory Studies of Coal Combustion Zone Evaluation Using AE Monitoring During Underground Coal Gasification (UCG)
Faqing Su, Gota Deguchi, Koutarou Ohga, Junichi Kodama

Underground Coal Gasification: Prospects for Carbon Capture and Storage
Alexey Belov, Nikolai Kinaev, Igor Grebenyuk

Pilot Scale Demonstration of MicGAS™ Coal Biotechnology for in situ Biological Gasification of Un-Minable Wyoming Sub-bituminous Coals
Shaban Kotob, Robert Andrews, Shinwoo Lee, Daman Walia, William Orem

SESSION 16 – COMBUSTION: OXY-COMBUSTION AND CHEMICAL LOOPING - 3

Combustion Technologies: FE-NI Bi-Metallic Carriers for Chemical Looping Dry Reforming of Methane
Amev More, Saurabh Bhaswar, Goz Vester

Kinetics of Pressurized Oxycombustion of Coal Using Thermogravimetric Analysis
Piotr Babinski, M. Sciazko, M. Tomaszewicz, J. Zowala

Unsteady CFD Simulation of Hematite Reduction by Methane in a Bubbling Fluidized Bed
SESSION 17 – CLEAN COAL AND GAS TO FUELS: DIRECT LIQUEFACTION

Effect of Reaction Temperature on Hydroprocessing of Medium and Low-Temperature Coal Tar to Clean Liquid Fuel ................................................................. 851
Rui Wang, Xiaofen Guo, Donghui Ci, Pengxiang Song, Xin Cui

SESSION 18 – COAL SCIENCE: GENERAL - 3

The Importance and State of Coal Industry in Turkey’s Energy Policy ................................................................. 928
Bilgehan Kekeç, Niyazi Bilim

Effect of Pretreatment Conditions on the Determination of Trace Elements in Coal by Use of Atomic Spectroscopy ................................................................. 947
Tsunemori Nakajima, Kosei Haraguchi, Misato Taira, Hirokazu Takanashi, Akira Ohki

SESSION 19 – CLEAN COAL DEMONSTRATION AND COMMERCIAL PROJECTS: COMBUSTION PROJECTS

Update to Cost and Performance Baselines for Fossil Energy Plants: Bituminous Coal and Natural Gas to Electricity ................................................................................. 969
Timothy Fout, James Black, Marc Turner

Four Years of Operating Experience with DryFining™: Fuel Enhancement Process at Coal Creek Generating Station ................................................................................. 980
Charles Bullinger, Mark Ness, Michael Briggs, Nenad Sarunac, Sandra Broekema

WA Parish Carbon Capture and Enhanced Oil Recovery Project ................................................................................. 1009
Anthony Armpriester, David Greeson

Technical and Economic Analysis of Alstom’s 550MW, Chemical Looping Combustion Steam Power Plant ................................................................................. 1019
Wei Zhang, Glen D. Jukkola, Iqbal F. Abdulally, Herbert E. Andrus, Shin G. Kang

Flameless Pressurized Oxy-Coal Combustion (FPOC): The Top of Power Cost Competition for CCS - The Best Cost Option for the Transition to Zero Emission ................................................................................. 1042
M. Malavasi

SESSION 20 – COAL MINING: SAFETY AND MINING TECHNOLOGY - 1

Development and Participation in the American National Standards Institute (ANSI) Technical Advisory Group to ISO/TC 82 Committee – Coal Mining ................................................................................. 1053
Steven M. Carpenter

General Assessment and Estimations of Occupational Accidents and Disasters in Turkey Coal Mines ................................................................................. 1069
Niyazi Bilim, Bilgehan Kekeç, Sertac Dundar

Investigation of Spontaneous Combustion of Coal in a Longwall Panel ................................................................................. 1094
Hadi Odemir, Osman Sivrikaya, Sezgin Berberoglu

Development of Moisture Tolerant Rock Dust for Improved Mine Safety ................................................................................. 1121
Dave Anstine, Neil Dudge

SESSION 21 – GASIFICATION: NOVEL TECHNOLOGIES - 1

Pilot-Plant Evaluation Gasification of Illinois No. 6 Coal with Aerojet Rocketdyne (AR) Compact Gasifier and Syngas Upgrading by GTI Morphysorb Process ................................................................................. 1143
Jim Aderhold, Bruce Bryan, Andrew Kramer, Adam Burkhart, Steve Fusselman
Calcium Looping Catalytic Coal Gasification: Experiments and Systems Analysis ................................................................. 1158
Nicholas Siefert

Fuel-Flexible Hybrid Solar Coal Gasification Reactor ........................................................................................................... 1168
Matt Flannery, Tapan Desai

Catalytic Effect of Biomass Ash on Anthracite Coal Gasification .......................................................................................... 1175
Weiping Ren, Zhibing Zhao, Yuhong Qin, Jie Feng, Wenying Li

SESSION 22 – COMBUSTION: OXY-COMBUSTION AND CHEMICAL LOOPING - 4

Improvements in Exergetic Efficiency in High-Temperature Oxyfuel Combined Cycle Systems ................................................... 1200
Thomas Ochs, Rigel Woodsdie, Danylo Oryshchyn, Lauren Kolczynski

Experimental Characterization of the Effect of Dry Recirculation on a Swirled Self-Stabilized Oxycoal Flame .................................... 1225

An Experimental Investigation of Heat Transfer Behaviour in Oxygen-Enriched Coal Combustion ................................................ 1245
Adekwe Adeosun, Fei Xia, Bhupesh Dhungel, Benjamin Kampfer, Richard Axellbaum

A Reduced Order Model for the Design of Oxy-Coal Combustion Systems ........................................................................... 1246
Steven Rowan, Albio Gutierrez, Ismail Celik

Numerical Study on the Effects of Steam to Oxy-Fuel Combustion of Pulverized Coal ............................................................... 1255
Ligz Zhang, Zhilun Mao, Baqian Yi, Cong Pan, Chuguang Zheng

SESSION 23 – CLEAN COAL AND GAS TO FUELS: CATALYSTS

Preparation of Supported Mo-based Catalyst and Its Performance in Hydropyrolysis of Shenfu Coal ................................................ 1266
Yan-Yan Lei, Na Liu, Xin-Hua He, Hai-Kuan Zhang, Jian-Guo Wei, An-Ning Zhai

TGA Reactivity and Recyclability Studies of Fe2O3 and Co3O4 Based Oxygen Carriers Using Steam for Chemical Looping Gasification ................................................................................................................................. 1272
Ankita Majumder, Niranjan Deshpande, Mandal Kathe, Liang-Shih Fan

SESSION 24 – COAL SCIENCE: GENERAL - 4

The Effect of Fixation of Acidic Wastes by Coal Fly Ash on the Properties of the Fly Ashes .......................................................... 1283
Roy Nir Lieberman, Yitzhak Mastai, Nadja Teutsch, Xavier Querol, Oriol Font, Haim Cohen

Effects of Organic Liquids on Coking Properties of a High-Inert Western Canadian Coal ............................................................. 1303
Tony Maqabhe, Maria Holaszko, Melanie Mackay, Ross Leeder, Louis Giroux

Influence of the Mechanical Properties of Coals on the Fragmentation Behavior of Coal Particles Under High-Temperature Conditions ................................................................................................................ 1323
Felix Baistower, A. Heinzle, S. Zhong, J. Friedemann, B. Meyer

Research on the Preparing of Coal Water Sully with Semi-Coke and Pulverized Coal ................................................................. 1331
Peipei Wu

SESSION 25 – CLEAN COAL DEMONSTRATION AND COMMERCIAL PROJECTS: OXY-COMBUSTION AND INDUSTRIAL PROJECTS

Demonstration of Carbon Capture and Storage of Steam Methane Reforming Process Gas Used for Large-Scale Hydrogen Production ......................................................................................................................... 1339
Anthony N. Zain

Illinois Industrial Carbon Capture and Storage Project ........................................................................................................... 1350
Scott McDonald

FutureGen 2.0 - Project Update ............................................................................................................................................... 1374
Mark Williford

SESSION 26 – COAL MINING: SAFETY AND MINING TECHNOLOGY - 2

Gas and Dust Explosion Model for Methane Accidents in Coal Mines ........................................................................................................... 1387
V’Yacheslav Akkerman, Ali S. Rangwala

Design and Implementation of an Innovative Spray System for Continuous Miners for Dust Control in High Mining Areas ................................................................................................................................. 1396
Yoginder P. Clough, Harrold Gurley, Joseph Hirschi

Development of a Novel Noise Measurement System for Coal Preparation Plants ........................................................................ 1409
Jun Qin, Pengfei Sun, Manoj K. Mohanty, Joseph Hirschi

Performance of Full Scale Welded Steel Mesh for Surface Control in Underground Coal Mines ................................................... 1421
Zhijun Shan, Ian Porter, Ian Nemcik
### SESSION 27 – GASIFICATION: MODELING - 1

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Kinetics of Powder River Basin Coal Gasification in Carbon Dioxide Using a Modified Drop Tube Reactor</td>
<td>1439</td>
</tr>
<tr>
<td>A Particle Deposition Model Applied to Fouling of Syngas Coolers</td>
<td>1471</td>
</tr>
<tr>
<td>Gasification Kinetics of Coal Liquefaction Residue and Its Characterization</td>
<td>1484</td>
</tr>
<tr>
<td>Thermochemical Modeling of Coal Slag Formation and Related Corrosion of Various Refractory Materials Under Simulated Gasification Conditions</td>
<td>1495</td>
</tr>
</tbody>
</table>

### SESSION 28 – COMBUSTION: CO-FIRING AND FLAMES

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Catalyst/Support Interactions between Pt Nanoparticles and Amorphous Silica: Impact on CO Oxidation</td>
<td>1503</td>
</tr>
<tr>
<td>Pneumatic Transport of Torrefied Biomass</td>
<td>1511</td>
</tr>
<tr>
<td>Synergy Effect of Biomass Co-Firing on NOx Reduction and Carbon Burnout with Air-Staged Combustion</td>
<td>1534</td>
</tr>
</tbody>
</table>

### SESSION 29 – CLEAN COAL AND GAS TO FUELS: CATALYSTS AND SOLVENTS

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Advances in the Study of Composite Catalysts in Direct Coal Liquefaction</td>
<td>1562</td>
</tr>
<tr>
<td>Cu/SiO2 Based Catalyst For Industrial Ethylene Glycol Production: Synthesis Methods And Scaling Up</td>
<td>1579</td>
</tr>
<tr>
<td>Influence of Potassium-Doping on Activity of Ni2Mo3N Catalyst in the Presence of Thiophene</td>
<td>1595</td>
</tr>
<tr>
<td>The Study on Dewatering and Upgrading of Lignite Through Organic Solvent</td>
<td>1613</td>
</tr>
<tr>
<td>Influence of Solvent Pretreatment on Pyrolysis of Hulunbeier Lignite</td>
<td>1630</td>
</tr>
</tbody>
</table>

### SESSION 30 – COAL SCIENCE: GENERAL - 5

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Modeling Thermal Stress in Coal Particles During Heating-Up in a Drop-Tube Reactor and in a Graphite Furnace</td>
<td>1649</td>
</tr>
<tr>
<td>The Influence of K2CO3 on Powdered Coals with Varying Swelling Properties During Devolatilisation</td>
<td>1660</td>
</tr>
<tr>
<td>System Overview and Preliminary Characterization of the High-Temperature and Pressure Entrained-Flow Lab-Scale Gasifier at CSM</td>
<td>1670</td>
</tr>
<tr>
<td>Determination of Coal Ash Sintering Characteristics by Compression Strength Test at Different Atmospheres</td>
<td>1689</td>
</tr>
</tbody>
</table>

### SESSION 31 – CARBON MANAGEMENT: CAPTURE OF CARBON DIOXIDE - 1

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Novel Sorbents for Oxygen Separation from Air</td>
<td>1702</td>
</tr>
<tr>
<td>Mixed Solid Sorbents for CO2 Capture Technologies: Theoretical Predictions and Experimental Validations</td>
<td>1711</td>
</tr>
<tr>
<td>Discovery of System and Materials Requirements for Solid Sorbent-Based CO2 Capture Using Reduced Order Modeling</td>
<td>1752</td>
</tr>
<tr>
<td>Post-Combustion CO2 Capture Using Metal Organic Frameworks - Thermodynamic Analysis</td>
<td>1768</td>
</tr>
<tr>
<td>Effects of Coal Characteristics on CO2 Ad/Desorption</td>
<td>1779</td>
</tr>
</tbody>
</table>
### SESSION 32 – COMBUSTION: COMBUSTORS

Critical Factors in Understanding the Mechanism of Ash Agglomeration in Fluidized Bed Systems .......................................................... 1805
  Aditi B. Khuddkar, Peter L. Rozelle, Sarma V. Pisupati

Burning Uncleaned Solid Fuels ......................................................................................................................... 1819
  George D. Dambacha

Anomalies When Burning Low Grade Coals in Bubbling Fluidized Bed Combustion (BFBC) .................. 1859
  Rosemary Falcon, R. Taole, D. Brook, S. Bada

Numerical Study of Gas-Solid Fluidized Bed Dynamics with Distributor Design ................................. 1874

Design of a Cyclone Combustor for Mild Combustion ............................................................................... 1882
  Sung-Hoon Shim, Sang-Hyun Jeong, Sung-Sup Lee

### SESSION 33 – GASIFICATION: MODELING - 2

Numerical Simulations of Reacting Porous Char Particles Under Gasification Conditions .................. 1892
  Matthias Kestel, Daniel Friese, Andreas Richter

A Reduced Order Model (ROM) of Entrained-Flow Gasifier Flyash and Slag Generation Rates .......... 1902
  Ramalakshmi Krishnaswamy, John M. Kuhlmans

Modeling High Viscosity Slag Flow in Coal Gasifiers Using a Volume of Fluid Approach .................... 1904
  Konrad Uebel

Direct Numerical Simulation of Reacting Char Particles in Turbulent Environments .......................... 1916
  A. Richter, M. Vassellari, S. Bahl, C. Hase, B. Meyer

Simulation of Coal Gasification in Fluidized Bed Coal Gasifier ............................................................... 1928
  Fengli Zhang, Wenying Li, Xuecheng Hou, Jie Feng

### SESSION 34 – COMBUSTION: POWER PLANT SUPPORT STUDIES

Supercritical Carbon Dioxide (SCO2) Indirect Power Cycles Incorporating Fossil-Fuel Heat Sources ................................................................. 1949
  Arun Iyengar, Charles White, Wally Shelton

Elemental Mercury Absorption in Systems Employing Oxidized Mercury Absorbents ....................... 1959
  Nicholas R. Denny, Bruce A. Kesner, Wayne M. Carlson

Ash Removal Characteristics Evaluated by Fouling Tests Using 1.5MWth Pilot Plant ............................ 1966
  Miki Shimogori, Takahiro Marumoto

Research on Charging and Removal of PM2.5 in Both DC and Pulsed Electric Field ............................ 1973

### SESSION 35 – GASIFICATION: LOW RANK COAL

I-MILENA Gasification Technology for (High Ash) Low Rank Coal ......................................................... 1982
  Christiaan Van Der Meijden, Sander Grootjies, Brum Van Der Drift, Berend Vreugdenhil, G. Aranda

Hydropyrolosis of Tar-Rich Brown Coal Using a Pressurized Drop Tube Reactor ............................... 2009
  Stephan Siegl, Denise Reichel, Steffen Kraack, Berend Meyer

Investigation of Ash Deposition Behavior in an Entrained Flow Coal Gasification Process .................. 2017
  Xia Lu, Ting Wang

### SESSION 36 – COAL SCIENCE: GENERAL - 6

Review of Recent Industrial Applications of Fly Ash Geopolymer Concrete ........................................ 2055
  Carlos Montes

The Reduction of Swelling of Large Coal Particles through Impregnation with K₂CO₃ ........................... 2067
  Sancha Coetzee, Hein W. J. P. Neomagus, John R. Bunt, Christien A. Strydom, Harold H. Schoberth

Analysis of Hydropobicity of Carbonaceous Solids and Their Effect on the Slurry Viscosity .................. 2078
  Anurita Muthayya, Peter Rozelle, Sarma V. Pisupati

Fly Ash Geopolymer Concrete Mix Design Software ................................................................................. 2089
  Carlos Montes, Sergio Gomez, Rajesh Kundepu, Rashadul Islam

Mercury Contents in Various Low-Sulfur Bituminous Coals from Different Countries: Relationship to Coal Properties ......................................................................................... 2100
  Akira Ohki, M. Taira, S. Hirakawa, T. Nakajima, T. Takanashi

### SESSION 37 – CARBON MANAGEMENT: CAPTURE OF CARBON DIOXIDE - 2

Hydrophobic Solvents for Precombustion CO₂ Capture: Experiments and System Analysis .................. 2118
  Nicholas Siebert

Analysis of CO₂ Market Possibilities for Power Plants with Carbon Capture Using CTUS-NEMS ........... 2131
  Jose R. Benitez
SESSION 38 – SHALE AND COAL BED GAS: GENERAL - 1

The Study on Reservoir Properties and Geological Factors of Deep Coalbed Methane .......................................................... 2148
Jian Wu, Shouren Zhang

Use AMD for Development of Unconventional Shale Gas Resources ........................................................................... 2167
Can He, Tieyuan Zhang, Radislav Vidić

Environmental Impacts of CBM & Shale Gas Energy Extraction Operations ............................................................................. 2179
Stephen C. Smith

Gas Processing & Risk Mitigation for CBM & Shale Gas ........................................................................................................ 2191
Joseph S. D'Amico

SESSION 39 – GASIFICATION: GENERAL - 2

Cadmium, Phosphorus and Antimony Adsorption Adsorption on Copper-Palladium Alloy Films ........................................... 2213
Karen Uffelossy, James Miller, Brett Howard, Denis Stanko, Evan Granite

Characterization of Coal and Biomass Chars from High Temperature Pyrolysis in CO2 Atmosphere ........................................................................................................ 2214
Aime Hilaire Tchupala, Sarma Pisupati

Modeling and Experimental Investigation of Internally Circulating Gasifier for High Ash Coals .................................................. 2231
Alexander Langwitz, Martin Schurz, Bernd Meyer

Poison Resistant Water-Gas-Shift Catalyst for Coal Biomass Gasification ........................................................................... 2241
Girish Srinivas, Jeff Martin, Will Spalding, Mike Looker, Steve Gebhardt

SESSION 40 – COMBUSTION: MERCURY REMOVAL RESEARCH IN CHINA

Capture and Oxidation of Elemental Mercury on Raw and Modified Mineral Sorbent in Low-Rank Coal Flue Gas ................................................................. 2256
Yang Li, Lijun Jin, Dong Xiong, Haoquan Hu

Elemental Mercury Adsorption Characteristics and its Kinetics Over Biomass Chars ................................................................. 2257
Ping Lu, Nan He, Xiaming Zhu

Experimental Study and Modeling for In-Duct Mercury Capture by Sorbent Injection ................................................................. 2275
Qiang Zhou, Yufeng Duan, Taguang Hong, Chun Zhu, Min She, Jun Zhang

Investigation into Mercury Removal with Different Sorbents Injection in Simulated and Coal-Fired Flue Gas ............................... 2306
Yufeng Duan, Chun Zhu, Qiang Zhou, Min She, Taguang Hong, Jun Zhang

Experiments on Mercury Removal by Plasma Enhanced Calcium-Based Sorbent ................................................................. 2331
Jun Zhang, Yufeng Duan, Chun Zhu, Qiang Zhou, Min She, Weixin Zhao

SESSION 41 – GASIFICATION: GENERAL - 3

Influence of HCl, H2S and H2O on the Release and Condensation of Heavy Metals in Gasification Processes .................................................. 2343
María Benito Abascal, Marc Blasing, Michael Muller

The New Hitecom Reactor for Single-Particle Conversion: Numerical and Experimental Studies on the Interactions between Measuring Unit and Reacting Particle .................................................................................................. 2364
Arne M. Bronsch, Daniel Szwitala, Stefan Guhl

Results on Experimental Investigation and Modelling of Slag Viscosities with Consideration of Partial Crystallization .................................................................................. 2375

The New Hitecom Reactor for Single-Particle Conversion: Numerical and Experimental Studies on the Interactions between Measuring Unit and Reacting Particle .................................................................................................. 2364

Effects of V2O5 Oxidation on the Viscosity of High Iron and Vanadium Slag .................................................................................. 2405
Myongsook S. Oh, Minkyung Kim

SAXS Measurements of Pore Development During Steam and CO2 Gasification ................................................................. 2415
Hennie Coetzee, Richard Sakurovs, Leigh Morpeth, Hein W. J. P. Neomagus, John R. Bunt, Raymond C. Everson

SESSION 42 – COAL SCIENCE: GENERAL - 7

Rare Element Systematics of Coal Ash from Major U.S. Source .................................................................................. 2425
Allan Kolker, Amrita Desmarino, James C. Hower, Harvey E. Belkin

Low-Cost Recovery of Rare Earth Elements From U.S. Coal Ash .................................................................................. 2427
Prakash B. Joshi, Dorin V. Preda, Michael A. Costolo, John Grupposo, James Hower

Lanthanide-Bearing Coals in the Central Appalachians: Resource or Illusion? ................................................................. 2441
James Hower

Consideration of the Variability of Coals from the Botswana Karoo Basin Using Coal Petrography ................................................................. 2463
N. J. Wagner

Precious Metals in the Lincang Ge Ore Deposits, Yunnan, China .................................................................................. 2476
Shifeng Dai, James C. Hower, Vladimir V. Seredin, Colin R. Ward
SESSION 43 – CARBON MANAGEMENT: STORAGE OF CARBON DIOXIDE - 1

Economic Assessment of Permanent Geologic Storage of CO₂ from a California Power Plant .......................................................... 2485
Wayne Rowe

Project Assessment and Evaluation of the Area of Review (AOR) at the Citronelle SECARB Phase III Site, Alabama USA ........................................................................................................................................................................... 2501
Hunter Jonsson, George J. Kopperna, Steven M. Carpenter, Robin Petruxak, Rob Trautz, Dick Rhudy, Richard Esposito

3 # Coal Seam Injection and Buried CO₂ Improve Coal-Bed Methane Recovery Test and Evaluate in Qinshui Basin Shizhuang North Block .................................................................................................................................................................................. 2517
Bing Zhang, Jianping Ye

SESSION 44 – SHALE AND COAL BED GAS: GENERAL - 2

Assessing Environmental Impacts of Unconventional Gas Development on Water Resources .................................................................................. 2537
Aubrey E. Harris, Daniel J. Soeder

Health and Environmental Impacts of Naturally Occurring Radioactive Materials Produced by Unconventional Gas Extraction from Marcellus Shale ........................................................................................................................................... 2553
Tieyuan Zhang, Radisav Vidic

SESSION 45 – GASIFICATION: NOVEL TECHNOLOGIES - 2

Pressurized Pyrolysis and Gasification of Switchgrass-Lignite Char Blends .......................................................................................................................... 2566
Pradeep K. Agrawal, Gautami Newalkar, Carsten Sievers, Kristitina Ilia

VOLUME 4

Catalytic Fixed Bed Gasification for Remote Sites Power Generation and Industrial/Municipal Waste Utilisation ........................................................................ 2579
Nikolai Kinaev, Alexey Belov, Vyacheslav Panfilov, Igor Grebenyuk, Andrey Babayev

Thiophene Hydrodesulfurization by Composites of Carbon and Magnesium ................................................................................................................. 2596
Xiaoli Zhang, Naifei Wang, Qiangian Zhang, Zongying Han, Shuice Zhou

Municipal Solid Waste Gasification for Coal Retrofit Applications .......................................................................................................................... 2602
Nicholas Stiefert

SESSION 46 – SUSTAINABILITY AND ENVIRONMENT: GENERAL - 1

Greenhouse Gas Mitigation from Underground Coal Gasification (UCG)-based Hydrogen with Carbon Capture and Sequestration (CCS) in Bitumen Upgrading from the Oil Sands ......................................................................................... 2609
Aman Verma, Babatunde Olateju, Amit Kumar, Rajender Gupta

Common Sense Solutions for Management of Global Carbon Emissions ...................................................................................................................... 2610
Kimery C. Vories, J. D. Vories

SESSION 47 – COAL SCIENCE: GENERAL - 10

Upgrading Indian Thermal Coals Using Air-Table Dry Denshaling ....................................................................................................................... 2628
Nikhil Gupta, Robert Bruton, Gerald Luttrell, Tathagata Ghosh, Rich Honaker

Site Selection for Coal Preparation Plant Using Analytic Hierarchy Process Method in Bursa, Turkey ................................................................. 2638
Sercil Colpan, Mahmut Yavuz

Distribution of Sulphur Functional Groups in High Sulphur Bapung Coals of Assam .................................................................................................. 2639
Amritanshu Kumar

Producing Urea Fertilizer From Thar Coal Deposits in Pakistan ....................................................................................................................... 2658
Farid A. Malik, Abid Aziz

SESSION 48 – COAL SCIENCE: GENERAL - 8

Development of Internal Surface Area During Pyrolysis and Combustion of Lignite ........................................................................................................... 2664
Evan Granie, Elliot Roth, Sittichai Nataphan, Dennis Stanko, Christine Thomas

Kinetic Model of Coking Coal Fluidity Development ........................................................................................................................................... 2674
Bartosz Mertas, Marek Sciazko, Aleksander Sobolewski

Binder Briquetting of Hard Coal Fines for Use in Smelting Reduction Processes .................................................................................................. 2683
Reinhard Lohmeier, H.-W. Schroder, H. Heckmann, J.-U. Repke

SESSION 49 – CARBON MANAGEMENT: STORAGE OF CARBON DIOXIDE - 2

Influence of Monitoring Intensity on the Cost of CO₂ Storage .......................................................................................................................... 2691
David Morgan, Timothy Grant, Andrea Poe
Utilization of Fluorinated Tracers to Monitor CO2 Sequestration in Unconventional Reservoirs in Central Appalachia - Results from a Small-Scale Test in Morgan County, Tennessee .......................................................... 2699
A. Kyle Louk, Nino S. Ripepi, Keay D. Lutzbacher, Ellen S. Gilliland, Michael E. Karmis

Nondestructively Determining the Microstructure Evolution of Central Appalachian Basin Coals Through Carbon Sequestration .......................................................... 2716
Joseph Amante, Nino Ripepi

SESSION 50 – SHALE AND COAL BED GAS: GENERAL - 3

International Organization for Standardization (ISO) Technical Committee 265 (TC-265): Carbon Dioxide Capture, Transportation, [Utilization], and Geological Storage ........................................... 2746

Developing Porosity with a Neural Network Application for Geologic Modeling in an Active Oil Field .......................................................... 2760
Steven M. Carpenter

SESSION 51 – GASIFICATION: GENERAL - 4

Characterization of Fine Particulate Material from Syngas in a Pilot Scale Entrained Flow Oxygen Blown Coal Gasifier During Two Stage Gasification ........................................... 2832
Mostafa Can Celebi, Kevin J. Whitly

SESSION 52 – SUSTAINABILITY AND ENVIRONMENT: GENERAL - 2

A Field Evaluation of Alternate Coal Processing Waste Management Technology ........................................................................................................... 2882
Liliana Lepeticaru, Paul T. Beham, Y. Paul Chught, Joseph Hirschi

SESSION 53 – COAL SCIENCE: GENERAL - 11

Effect of Rapid Heating Extraction of Coal in Hyper-Coal Production Process .......................................................... 2892
Koji Sakai, Shigeru Kinoshita, Takaya Yoshida, Noriuyuki Okuyama, Maki Hamaguchi, Naoki Kikuchi

Role of Water on Oxygen Consumption of Brown Coal at Low Temperature ........................................................................................................... 2928
Toshimori Inoue, Maki Hamaguchi, Toru Higuchi, Naoki Kikuchi, Takao Shigehisa, Haruo Kamagai, Takayuki Takarada

SESSION 54 – COAL SCIENCE: GENERAL - 9

The Transient Swelling Behaviour of Large South African Coal Particles during Low-Temperature Devolatilization .......................................................... 2948
Sansha Coetzee, Hein W. J. P. Neomagus, John R. Bunt, Christien A. Strydom, Harold H. Schoebert

A Study of China's Supply-Demand Gap of Coking Coal Resources and the Corresponding Strategies .......................................................... 2983
Shuguang Ouyang, Guanghua Wang, Xuanming He, Di Gao, Xiaojin Wu
PLENARY SESSION

PLENARY SESSION - 1

Reliable & Resilient - The Value of Our Existing Coal Fleet .......................................................... 3005
Janet Gellici

Can We Develop Clean Coal Technologies and CCUS in Light of EPA’s Proposed Carbon Regulations? .......................................................... 3023
Ben Yamagata

PLENARY SESSION - 2

Water Resources Protection and Utilization Technology for Coal Mining in Western China .......................................................... 3033
Dazhuo Gu

When and Why an UCG Project Can Be Successfully Implemented - A Fly-over of the 50 Mwe THEUNISSEN UCG Project in South-Africa .......................................................... 3060
Johan Van Dyk, Johan Brand

Coal in Europe: A Rich Past – What Future? .................................................................................. 3082
Rainer Reimert

PLENARY SESSION - 3

Chemical Looping Technology for Fossil Energy Conversions ........................................................................................................... 3116
L.- S. Fan

Coal’s 2014 Challenges and Opportunities - Role of the States ........................................................................................................ 3133
Kenneth Nemeth

Energy & the Environment: A Way Forward for Coal - the Kemper Project .......................................................... 3151
Ed Holland

POSTER SESSIONS

POSTER SESSION 1 - GASIFICATION

Perovskite Sorbents for Oxygen Separation from Air ...................................................................................................................... 3158
Ashley Ledonne, Elliot Roth, Sheila Hedges, Dennis Stanko, Jonathan Lebke, Evan Granite

Steam Gasification of Tailored Ash-Free Coals at Mild Condition ........................................................................................................ 3159
Jiho Yoo, Y. Kong, D. Chan, S. Kim, H. Choi, Y. Rhim, J. Lim, S. Lee

Numerical Analysis of an Entrained-Flow Coal-Slurry Gasifier with Separated Oxygen-Feeding Streams .................................................................................. 3167
Yin-Chu Chen, Yau-Pin Chyou, Po-Chuang Chen, Tsung Lee Jiang

Evaluation of Palladium-Based Sorbents for Trace Mercury Removal in Electricity Generation .................................................................................. 3179
Karol Kostir, Juraj Durove

The Laboratory Research of Syngas Composition and its Calorific Value in UCG ........................................................................................................... 3195
Haipeng Chen, Dexi Wang, Naiwei Wang, Qianqian Zhang, Shixue Zhou

The Effect of Drying Temperature on Surface Structure of Lignite ........................................................................................................... 3214
Lihua Liu, Mao Chu, Zhixing Chang, Yang Qu

Feasibility Study of Underground Coal Gasification in Western North Dakota .......................................................................................... 3222
Peng Pei, Juinor Nasah, Jarda Solc, Scott F. Korom

POSTER SESSION 2 - COMBUSTION

Behavior of Recirculation Zone as Functions of Swirl-Modes in Pulverized Coal Swirling Flames ........................................................................... 3223
Yonmo Sung, Sangmin Lee, Xing Wang

Factors in Mercury Oxidation for the Co-Combustion of Coal and Dried Sludge .................................................................................. 3224
Sang-Sap Lee

POSTER SESSION 3 – CLEAN COAL AND GAS TO FUELS

Effect of Carbon from Anthracite Coal on Decomposition Enthalpy Change and Heat Absorption of Magnesium Hydride ........................................................................................................... 3225
Xiaoli Zhang, Haipeng Chen, Boga Liu, Dexi Wang, Shixue Zhou

Determination of Total Sulfur Content in Coal Pyrolysis Oil ........................................................................................................... 3232
Yinhua Long, Chengjing Qian, Deting Kong, Xiaofen Guo

Calcination Temperature Influence on the Catalytic Performance of Ni/CoO-ZrO2 for Low Temperature Steam Reforming of Methane ........................................................................................................... 3234
Kai Wu, Jieying Jing, Wenying Li
