# TABLE OF CONTENTS

## Volume 1

### CONSTRUCTION MANAGEMENT

- **Investment Revenue Analysis of Engineering Construction Based on Probability Theory** ............................................. 1  
  Chong Zhou, Chen Cui, Yongqiang Zhong, Yongfei Sheng
- **SWOT Analysis of the Development and Construction of the Guangzhou Baiyun New District** ............................................. 9  
  Lizhong She, Xin Ning, Linshu Qiu
- **Using the Principles of IE to Eliminate Barriers in the Process of Construction** ........................................................... 17  
  Zijiao Zhang, Renhui Liu, Fengyong Zhai
- **Stakeholder-Based Analysis of Drivers and Constraints in the Use of Off-Site Construction** .............................................. 26  
  Zhengdao Li, Geoffrey Q. P. Shen, Chuang Ji, Jingke Hong
- **Research on the Project-Based Learning Used in the Teaching of Construction Management Specialty** ........................ 37  
  Dequn Zhang
- **An Overview of C&D Waste Management Regulations in Central China** ................................................................. 45  
  Biju Ye, Hongqiang Yuan
- **Benefit Analysis of the Development and Construction of the Guangzhou Baiyun New District** ........................................... 53  
  Lizhong She, Junling Wang, Zhen Wei
- **Evaluation Index System for the Experience That “Experienced Contractors” Should Have** ............................................. 61  
  Jianmin Song, Huimin Liu
- **Comparison of Construction Efficiency between China and the United States: Using the DEA Model** ........................... 68  
  Yulong Li, Chaoyi Liu, Guijun Li
- **Study on the Standardization Strategy of Engineering Construction in China** ............................................................. 75  
  Shoujian Zhang, Jingjing Wei, Rui Wang
- **Re-Surety System As a Governance Innovation in China’s Specialized Construction Contract Bond Market** .................. 82  
  Hui Wang, Xiaomei Deng, Ke Feng, Yu Li
- **An Ontology for Analysing Cognition in Geometric and Parametric Design Platforms: A Review** ................................. 92  
  Rongrong Yu, Olufolale Alfred Olatunji, Abiola Abosede Akanmu
- **Application of the Adaptive CDIO Model in Construction Management Education in China** ........................................ 103  
  Xuezhu Cui, Xiatong Wang

### CONSTRUCTION INNOVATION AND TECHNOLOGY MANAGEMENT

- **Achieving Building Sustainability through the Application of Information Systems and Stakeholder Alignment** ..................... 113  
  Patrick X. W. Zou, Byron Keating, Rebecca J. Yang, John Campbell, Lihua Zhao
- **The Use of BIM in Project Planning and Scheduling in the Australian Construction Industry** ............................................. 126  
  Changxin Cynthia Wang, Oswald Chien
- **BIM Implementation Practices at India’s AEC Firms** ............................................................................................................... 134  
  Aarti Nanajkar, Zhili Gao
- **Application of Thermal Insulation Mortar in Energy Saving Retrofitting on the External Wall of an Existing Structure** ............. 140  
  Guihai Qi, Qiaoqiao Huang, Anxin Zhong, Yulin Wang
- **Research and Application of Key Construction Techniques of Three-in-One Reinforced Concrete Internal Support Platform** .......... 147  
  Ming Zhang, Guoliang Zhu, Yongji Lan, Jingzhen Chen
- **Game Study of Building Energy Efficiency from the Perspective of the Life Cycle Based on System Dynamics** ...................... 157  
  Guijun Li, Lei Du
- **Dynamic Mechanisms of Technology Innovation across Multi-Stakeholders in Mega Infrastructure Projects** ................. 166  
  Linshuang Zhang, Xiaolong Xue
- **Application of Solar Heating System in a Building** ............................................................................................................... 176  
  Gang Li, Qinjin Qiao
Integration Technology and the Application of Wind Power on Civil Construction .................................................. 182
Hong Zhou, Nanding, Feixu Pan, Xiaodong Ma

Environmental Performance Assessment of Exterior Wall External Insulation Materials ........................................... 191
Li Wang, Zhihai Zhang, Ruijie Liu

BIM Information Collaborative Framework Based on Supply Chain Management ......................................................... 199
Yaoyu Wu, Ning Xu

BIM Application Implementation Plan and Roadmap in the Cost Management of Electric Power Engineering .................. 208

A Hybrid Environment and Health Impacts Assessment Model for the Pre-Use Phase of Buildings .............................. 217
Xiaodong Li, Shu Su, Zhihai Zhang

Dynamic Model Analysis on Chain Creativity in Building Design Teams ................................................................. 223
Hai Jiang, Qingpu Zhang

Study on the Application of BIM Technology in Construction Projects under IPD Mode ............................................... 229
Chunyan Ma, Xiaodong Li, Yangyang Meng

Web-Based Text Mining for Extracting Relationships among Policies of Building and the Construction Industry ....... 237
Zhongfu Li, Xiaodan Li, Shaohua Jiang

Information Barriers in BIM Collaborative Application on Site ................................................................................. 246
Qun Tian, Xiaolong Xue

A Comparison of Using Traditional Cost Estimating Software and BIM for Construction Cost Control ..................... 256
Peng Alex Zhao, Changxin Cynthia Wang

Research on the Synergetic Evolution of Collaborative Innovation Systems in Construction ................................... 265
Rui Liu, Yan Xu, Xuean Zeng

Effective Collaboration Model Construction in Science and Technology Involved in Responding to Major Emergencies in Public Buildings ......................................................................................... 273
Xin Wang, Jiuyun Wang

Application of the Fuzzy Comprehensive Evaluation Based on AHP in the BIM Application Maturity Evaluation ........... 280
Yangyang Meng, Xiaodong Li, Chunyan Ma

Research of Chinese Construction Project Document Classifications Combined with the IFC Standard .................. 287
Shaohua Jiang, Jialin Wu

Electronic Health Record Need Analysis and Methods for a Harbin Construction Migrant Worker ......................... 296
Yafei Li

Application of the BIM Technique in Modern Project Management ........................................................................ 302
Pingyu Yan, Xifeng Xie, Yan Meng

Study on the Structure of a Risk Management Framework Based on BIM .............................................................. 312
Hao Wu, Chengshuang Sun, Tao Li

A BIM-Based Collaborative Design Platform for Variegated Specialty Design .................................................... 320
Wenping Liu, Hongling Guo, Martin Skitmore

A BIM-RFID Unsafe On-Site Behavior Warning System ......................................................................................... 330
Hongling Guo, Wenping Liu, Weisheng Zhang, Martin Skitmor

GREEN BUILDING MANAGEMENT

Study on the Technological Innovation of Green Building and Green Construction .................................................. 340
Haowen Ye

The Carbon Emission Model of Sports Venues of Higher Education Institutes in China ........................................... 357
Xiaoduo Cheng, Yi Jian, Hong Wang, Zhanduo Wang

Research of Design and Construction about Green Ecological Technology in the Guiyang International Ecological Conference Center ........................................................................................................ 364
Yaozhu Chen, Hong Liu, Tao Li, Haiwei Long, Junbang Mo

Interest Conflict Analysis in Green Town Construction ............................................................................................ 374
Fengyong Zhai, Qiaoli Zhou

Urban Construction Waste Resource Utilization Inquiry ......................................................................................... 382
Jian Chen, Shuang Liu, Weive Huang

Application of Green Construction Technology in Construction Projects ............................................................ 389
Zhiwei Yu, Chen Lu, Bingbing San
ANP-Based Research on a Financing Decision-Making Model for Energy Performance Contracting .......................................................... 398
Yibin Ao, Yan Wang, Jiuxiao Wang

Study on an Environmental Impact Assessment of a Construction Process Based on the Life Cycle Assessment Approach .......................................................................................................................................................................................... 404
Jen Guan, Zhihui Zhang

Analysis and Application of Cloud Data Center Energy Monitoring and Controlling ............................................................................. 414
Gang Li, Hanbing Cui, Zhengqian Peng, Qingpu Zhang

Research on the Complexity of Beijing’s Construction Waste Problem Based on System Dynamics ..................................................... 420
Chi Xu, Yuejun Hu, Han Kang, Xiong Zhang

A Green Construction Information Management Platform Based on Emerging Information Technology .......................................................................................................................................................................................... 428
Tao Li, Yaowu Wang, Hao Wu

Research on a Carbon Emission Calculation Model of Construction Phase .......................................................................................... 436
Zhen Zhang, Qi Zhao, Zhendong Ma

Analysis of the Embodied Environmental Impact of a Building Project Based on the Ecological Footprint .......................................................................................................................................................................................... 442
Zhuangqin Yin, Chunjing Shang, Chenglong Chu, Yanrong Li

Research on the Fossil Fuel CO2 Emission Factor in the Construction Phase ......................................................................................... 449
Honghao Wu, Qi Zhao, Zhendong Ma

Research on Greenhouse Gases Emission Factors of Electricity in the Construction Stage in China .......................................................... 457
Qingye Ma, Qi Zhao, Zhendong Ma

GLOBAL CONSTRUCTION MANAGEMENT

Improving Safety Communication of Ethnic Minorities in the Construction Industry of Hong Kong .............................................................. 463
Albert P. C. Chan, Arshad Ali Javed, Francis K. W. Wong, Carol K. H. Hon

Handling and Reducing Variation in On-Site Production .......................................................................................................................... 475
Søren Lindhard

A Survey of Risks in Public Private Partnership Highway Projects in Iran .............................................................................................. 482
Alireza Ghorbani, Mehdi Ravanshadnia, Mohamad Bagher Nobakht

Optimizing Ready Mixed Concrete Production Plants via a Genetic Algorithm Approach Used For Batching Plant Equipment Layout .......................................................................................................................................................................................... 493
Mehdi Ravanshadnia, Milad Ghanbari

Legislative Research and Enlightenment of Housing Security in Foreign Countries (Regions) ............................................................................... 505
Xiaoxin Ding, Mengyuan Su

A Conceptual Framework for CSR Implementation in the Construction Industry: A Relational Approach .......................................................................................................................................................................................... 514
Xue Lin, Christabel M. F. Ho, Geoffrey Q. P. Shen

Integration of Video Image Processing and BIM-Based Energy Simulation for Analyzing the Impact of Dynamic User Patterns on Building Energy Consumption .......................................................................................................................................................................................... 526
Peeraya Inyim, Hsin Yu Ha, Long Phan, Yimin Zhu, Shuching Chen

Indonesian Contractors in Overseas Construction Projects: Southeast Asia, the Middle East, and Africa .......................................................................................................................................................................................... 535
Wahyudi P. Utama, Albert P. C. Chan, Hafiz Zahoorn, Ran Guo

Homeownership and Effectiveness of the South African Government Housing Subsidy Scheme ........................................................................ 547
Clinton Algabvbo, Wellington Thwala

Practical Framework for Evaluating the Internationalization of Top Construction Firms ........................................................................... 558
Yan Wang, Tisheng Liu

Learning by Experience: A Game Approach to Teaching Construction Scheduling .................................................................................. 566
Søren Lindhard

PARTNERSHIP, SUPPLY CHAIN, AND VALUE MANAGEMENT

PPP Framework for Public Rental Housing Projects in China .......................................................................................................................... 573
Ting Liu, Albert Chan, Shouqing Wang

Incentive Agreements and Long-Lasting Partnerships As Instruments to Create Continuous Improvement .......................................................................................................................................................................................... 582
