Technical Session 1: Dynamic Adaptation

A Self-Adaptation Strategy for Service-Based Architectures .............................................. 1
    Nuno Oliveira and Luis S. Barbosa

An Approach for Managing Quality Attributes at Runtime Using Feature Models ......................................................... 11
    Luis Emiliano Sánchez, J. Andrés Diaz-Pace, Alejandro Zunino, Sabine Moisan, and Jean-Paul Rigault

Reference Architectures for Self-Managed Software Systems: A Systematic Literature Review .............................................. 21
    Frank J. Affonso, Katia R.F. Scannavino, Lucas B.R. Oliveira, and Elisa Y. Nakagawa

Technical Session 2: Process

Is Exception Handling a Reusable Aspect? .................................................................................. 32
    Adauto Almeida, Emanoel Barreiros, Juliana Saraiva, Fernando Castor, and Sérgio Soares
SPLICE: A Lightweight Software Product Line Development Process for Small and Medium Size Projects .................................................................42
  Tassio Vale, Bruno Cabral, Loreno Alvim, Larissa Soares, Alcemir Santos,
  Ivan Machado, Iuri Souza, Ivonei Freitas, and Eduardo Almeida

Domain Engineering: A Practical Application in Analysis and Design of a Generative Query Language .................................................................53
  Daniella Rodrigues Bezerra and Raimundo da Silva Barreto

**Technical Session 3: Secondary Studies**

How to Describe SPL Variabilities in Textual Use Cases: A Systematic Mapping Study .........................................................................................64
  Ismayle Sousa Santos, Rossana M.C. Castro Andrade, and Pedro A. Santos Neto

  Paulo Gabriel Gadelha Queiroz and Rosana Teresinha Vaccare Braga

Bad Smells in Software Product Lines: A Systematic Review .................................................................................................................84
  Gustavo Vale, Eduardo Figueiredo, Ramon Abilio, and Heitor Costa

**Technical Session 4: Formal Composition, Concurrency and Reliability**

On the Formal Interpretation of SysML Blocks Using a Safety Critical Case Study .................................................................................................95
  Jaco Jacobs and Andrew Simpson

Analysis of the Impact of Implied Scenarios on the Reliability of Computational Concurrent Systems ......................................................................105
  Alexandre Vaz Roriz, Genaina Nunes Rodrigues, and Luiz A. Laranjeira

**Author Index** .....................................................................................................................................................................................115
