Program

2014 IEEE Global Communications Conference

GC14 AHSN: Globecom 2014 - Ad Hoc and Sensor Networking Symposium

Wireless Sensor Networks I

Performance Analysis of Evolutionary Multi-Objective Based Approach for Deployment of Wireless Sensor Network with The Presence of Fixed Obstacles
Abdusy Syarif (University of Haute Alsace & IUT - Colmar, France), Abdelhafid Abouaissa (University of Haute Alsace, France), Lhassane Idoumghar (University of Haute Alsace, France), Riri Fitri Sari (Universitas Indonesia, Indonesia), Pascal Lorenz (University of Haute Alsace, France)

Compressive Sleeping Wireless Sensor Networks With Active Node Selection
Wei Chen (Beijing Jiaotong University, P.R. China), Ian James Wassell (University of Cambridge, United Kingdom)

Distributed Compressed Sensing for Sensor Networks with Packet Erasures
Christopher Lindberg (Chalmers University of Technology, Sweden), Alexandre Graell i Amat (Chalmers University of Technology, Sweden), Henk Wymeersch (Chalmers University of Technology, Sweden)

Hardware-Software Co-design for Heterogeneous Multiprocessor Sensor Nodes
Jingyao Zhang (Virginia Tech, USA), Srikrishna Iyer (Virginia Polytechnic Institute and State University, USA), Xiangwei Zheng (Virginia Tech, USA), Zhenhe Pan (Virginia Tech, USA), Patrick Schaumont (Virginia Tech, USA), Yaling Yang (Virginia Tech, USA)

Location Information Dissemination Scheme for RFID-based Distributed Localization Systems
Lobna Eslim (Queen's University, Canada), Hossam S. Hassanein (Queen's University, Canada), Walid M. Ibrahim (Queen's University, Canada)

Extending Volunteer Computing through Mobile Ad Hoc Networking
Colin Funai (University of Rochester, USA), Cristiano Tapparello (University of Rochester, USA), He Ba (University of Rochester, USA), Bora Karaoglu (University of Rochester, USA), Wendi Heinzelman (University of Rochester, USA)

Vehicular Networks I

Detection and Prevention From Misbehaving Intruders in Vehicular Networks
Hichem Sedjelmaci (University of Bourgogne, DRIVE Lab, France), Tarek Bouali (DRIVE Lab, ISAT Nevers, France), Sidi-Mohammed Senouci (University of Bourgogne - ISAT Nevers, France)

A Traffic Balanced Mechanism for Path Recommendations in Vehicular ad-hoc Networks
Maram Bani Younes (University of Ottawa, Canada), Azzedine Boukerche (University of Ottawa, Canada)

Contention-based Adaptive Position Update for Intermittently Connected VANETs
Qiang Zhang (Harbin Institute of Technology, P.R. China), Hongli Zhang (Harbin Institute of Technology, P.R. China), Xiaojian Du (Temple University, USA), Zhiqiang Zhou (Harbin Institute of Technology, P.R. China), Shen Su (Harbin Institute of Technology, P.R. China), Rui Jin (Harbin Institute of Technology, P.R. China)

Performance Modeling of the IEEE 802.11p EDCA Mechanism for VANET
Qiong Wu (Southeast University, P.R. China), Jun Zheng (Southeast University, P.R. China)

Red or Green: Analyzing the Data Delivery with Traffic Lights in Vehicular Ad Hoc Networks
Chao Song (University of Electronic Science and Technology of China, P.R. China), Wei-Shih Yang (Temple University, USA), Jie Wu (Temple University, USA), Ming Liu (University of Electronic Science and Technology of China, P.R. China)
Routing I

**Efficient Safety Message Forwarding using Multi-Channels in Low Density VANETs**
Jinyoun Cho (Georgia Institute of Technology, USA), A. Selcuk Uluagac (Florida International University & Electrical and Computer Engineering, USA), John A. Copeland (Georgia Institute of Technology, USA), Yusun Chang (Southern Polytechnic State University & The Georgia Institute of Technology, USA) .................................................................................................................. 70

**How Well Do Yao Graph and Theta Graph Support Greedy Forwarding?**
Weisheng Si (University of Western Sydney, Australia), Quincy Tse (University of Sydney, Australia), Guoqiang Mao (The University of Technology, Sydney, Australia), Albert Zomaya (The University of Sydney, Australia) .................................................................................................................. 76

**A Secure Intersection-Based Routing Protocol for Data Collection in Urban Vehicular Networks**
Tarek Bouali (DRIVE Lab, ISAT Nevers, France), El-hassane Aglzim (DRIVE Lad, IAST Nevers, France), Sidi-Mohammed Senouci (University of Bourgogne - ISAT Nevers, France) .................................................................................................................. 82

**Revisiting Routing in Multi-Hop Wireless Networks: Spatial Reusability-Aware Routing**
Tong Meng (Shanghai Jiao Tong University, P.R. China), Fan Wu (Shanghai Jiao Tong University, P.R. China), Guihai Chen (Shanghai Jiao Tong University, P.R. China), Athanasios V. Vasilakos (National Technical University of Athens & Kuwait University, Greece) .................................................................................................................. 88

**Toward a Packet Duplication Control for Opportunistic Routing in WSNs**
Georghiou Z. Papadopoulos (University of Strasbourg - ICube Lab, France), Julien Beaudaux (NTNU Trondheim, Norway), Antoine Gallais (University of Strasbourg, France), Periklis Chatzimisios (Alexander TEI of Thessaloniki, Greece), Thomas Noel (University of Strasbourg, France) .................................................................................................................. 94

**CROR: Coding-Aware Opportunistic Routing in Multi-Channel Cognitive Radio Networks**
Xiaoxiong Zhong (Harbin Institute of Technology, P.R. China), Yang Qin (Harbin Institute of Technology Shenzhen Graduate School, P.R. China), Yuanyuan Yang (Stony Brook University, USA), Li Li (HIT Shenzhen Graduate School, P.R. China) .................................................................................................................. 100

**Multi-commodity Online Maximum Lifetime Utility Routing for Energy-harvesting Wireless Sensor Networks**
Gina Martinez (Illinois Institute of Technology, USA), Shufang Li (Beijing University of Posts and Telecommunications, P.R. China), Chi Zhou (Illinois Institute of Technology, USA) .................................................................................................................. 106

Wireless Sensor Networks II

**Call Admission Control and Adaptive Bandwidth Management Approach for HWNs**
Nouri Omheni (University of Sfax, Tunisia), Amina Gharsallah (University of Sfax, Tunisia), Faouzi Zarai (Sfax University, Tunisia), Mohammad S. Obaidat (Monmouth University, USA) .......... 112

**Maximum Lifetime Coverage Problems with Battery Recovery Effects**
Norie Fu (National Institute of Informatics, Japan), Vorapong Suppakitpaisarn (National Institute of Informatics & JST, ERATO, Kawarabayashi Large Graph Project, Japan), Kei Kimura (The University of Tokyo, Japan), Naonori Kakimura (The University of Tokyo, Japan) .......... 118

**Optimal Energy Replenishment and Data Collection in Wireless Rechargeable Sensor Networks**
Miao Pan (Texas Southern University, USA), Hongyan Li (Xidian University, P.R. China), Yawei Pang (Texas Southern University, USA), Rong Yu (Guangdong University of Technology, P.R. China), Zaixin Lu (Marywood University, USA), Wei Li (Texas Southern University, USA) .......... 125

**Towards Optimal Barrier Coverage in Wireless Sensor and Actor Networks**
Ruiqi Wang (Zhejiang University, P.R. China), Qianqian Yang (Zhejiang University, P.R. China), Shibo He (Zhejiang University, P.R. China), Jiming Chen (Zhejiang University, P.R. China) .................................................................................................................. 131

**Split-Cache: A Holistic Caching Framework for Improved Network Performance in Wireless Ad Hoc Networks**
Nahid Ebrahimi Majd (California State University San Marcos, USA), Satyajayant Misra (New Mexico State University, USA), Reza Tourani (New Mexico State University, USA) .......... 137
Vehicular Networks II

Hotspot Discovery Algorithms in Coverage Selection Model over VANETs
Huang Cheng (University of Ottawa, Canada), Xin Fei (University of Ottawa, Canada),
Azzedine Boukerche (University of Ottawa, Canada), Mohammed Almulla (Kuwait University,
Kuwait) .......................................................................................................................... 143

A Novel Predictive Link State Indicator for Ad-Hoc Networks
Hanene Gabteni (University of Haute Alsace, France), Benoit Hilt (University of Haute Alsace,
France), Frederic Drouhin (University of Haute-Alsace, France), Jonathan Ledy (University of
Haute Alsace, France), Michel Basset (University of Haute Alsace, France), Pascal Lorenz
(University of Haute Alsace, France) .................................................................................. 149

Delivery Delay Analysis for Roadside Unit Deployment in Intermittently Connected VANETs
Yu Wang (Southeast University, P.R. China), Jun Zheng (Southeast University, P.R. China),
Nathalie Mitton (Inria Lille - Nord Europe, France) .......................................................... 155

Wireless Sensor Networks III

QoE-aware Routing for Video Streaming over Ad-hoc Networks
Quang Pham (INRIA/IRISA Research Center, France), Kandaraj Piamrat (CReSTIC /
University of Reims Champagne-Ardenne, France), Cesar Viho (IRISA / INRIA Rennes &
University of Rennes I, France) ......................................................................................... 181

Outage Analysis of integrated Mesh LTE Femtocell Networks
Anthony Busson (Ecole Normale Superieure & Laboratoire de l'Informatique du Parallelisme,
France), Lynda Zitoune (ESIEE-Paris, France), Veronique Veeque (University of Paris-Sud 11,
France), Bijan Jabbari (George Mason University, USA) .................................................. 187

Delay Performance Modeling and Analysis in Clustered Cognitive Radio Networks
Nadia Adem (Oregon State University, USA), Bechir Hamdaoui (Oregon State University,
USA) .................................................................................................................................. 193

FC-MAC: Fine-grained Cognitive MAC for Wireless Video Streaming
Lu Wang (Hong Kong University of Science and Technology, Hong Kong), Jiang Xiao (Hong
Kong University of Science and Technology, Hong Kong), Xiaoke Qi (Institute of Automation,
Chinese Academy of Sciences, P.R. China), Kaishun Wu (HKUST & Shenzhen University, Hong
Kong), Mounir Hamdi (Hong Kong University of Science and Technology, P.R. China) .......... 199
Coverage Analysis and Training Optimization for Uplink Cellular Networks with Practical Channel Estimation
Prashant Khanduri (Indian Institute of Science, USA), Bharath Bettagere Nagaraja (PESIT SOUTH CAMPUS, India), Chandra R Murthy (Indian Institute of Science, India) ........................................ 205

Opportunistic WiFi Offloading in Vehicular Environment: A Queueing Analysis
Nan Cheng (University of Waterloo, Canada), Ning Lu (University of Waterloo, Canada), Ning Zhang (University of Waterloo, Canada), Sherman Shen (University of Waterloo, Canada), Jon Mark (University of Waterloo, Canada) .......................................................... 211

Wireless Sensor Networks IV

Interference Analysis for Square-Shaped Wireless Networks With Uniformly Distributed Nodes
Vahid Naghshin (University of New South Wales, Australia), Amir Masoud Rabiei (University of Tehran, Iran), Norman Beaulieu (Beijing University of Posts and Telecommunication, Canada), Mark C Reed (University of New South Wales, Australia), Behrouz Maham (University of Tehran, Iran) ................................................................. 217

Adaptive Time Slots Control in Wireless Sensor Networks for Delay-aware Applications
Irfan S. Al-Anbagi (University of Ottawa, Canada), Hussein T Mousfah (University of Ottawa, Canada) .................................................................................................................................................. 222

Multi-Flows in Duty-Cycling Multi-hop Wireless Sensor Networks
Xiaohua Xu (Michigan Technological University, USA), Min Song (Michigan Technological University, USA) .................................................................................................................................................. 228

Efficient Data Collection for Wireless Rechargeable Sensor Clusters in Harsh Terrains Using UAVs
Yawei Pang (Texas Southern University, USA), Yanru Zhang (University of Houston, USA), Yunan Gu (University of Houston, USA), Miao Pan (Texas Southern University, USA), Zhu Han (University of Houston, USA), Pan Li (Mississippi State University, USA) ................................................................. 234

Bayesian Game Based Power Control Scheme for Inter-WBAN Interference Mitigation
Lei Zou (University of Science and Technology of China, P.R. China), Bin Liu (University of Science and Technology of China, P.R. China), Chang Chen (University of Science and Technology of China, P.R. China), Chang Wen Chen (State University of New York at Buffalo, USA) .................................................................................................................................................. 240

On the Stability of Random Access with Energy Harvesting and Collision Resolution
Ahmed Bedewy (Alexandria University & American University in Cairo, Egypt), Karim G Seddik (American University in Cairo & Alexandria University, Egypt), Amr Ei-Sherif (Alexandria University, Egypt) .................................................................................................................................................. 246

Delay Tolerant Networks and Crowdsensing

Load Balance vs Utility Maximization in Mobile Crowd Sensing: A Distributed Approach
Juan Li (Shanghai Jiao Tong University, P.R. China), Yanmin Zhu (Shanghai Jiao Tong University, P.R. China), Jiadi Yu (Shanghai Jiao Tong University, P.R. China) ................................................................. 265

Multi-Class Labeling with BCH codes for Mobile Crowdsensing
Xia Xin (Shanghai Jiao Tong University, P.R. China), Xiaohua Tian (Shanghai Jiao Tong University, P.R. China), Xiaoying Gan (Shanghai Jiao Tong University, P.R. China), Xinbing Wang (Shanghai Jiaotong University, P.R. China) .................................................................................................................................................. 271

An Efficient Adaptive MAC Frame Aggregation Scheme in Delay Tolerant Sensor Networks
Xiaoli Zhou (University of Ottawa, Canada), Azzedine Boukerche (University of Ottawa, Canada) .................................................................................................................................................. 277

A Distributed Utility-Maximizing Algorithm for Data Collection in Mobile Crowd Sensing
Yang Han (Shanghai Jiao Tong University, P.R. China), Yanmin Zhu (Shanghai Jiao Tong University, P.R. China), Jiadi Yu (Shanghai Jiao Tong University, P.R. China) ................................................................. N/A
Straight Skeleton Based Reconnection in a Wireless Sensor Network
Yatish K Joshi (University of Maryland Baltimore County, USA), Mohamed Younis (University of Maryland Baltimore County, USA) ................................................................. 283

A Two-phase Broadcast Scheme for Underwater Acoustic Networks
Haining Mo (University of Connecticut, USA), Zheng Peng (University of Connecticut, USA), Zhong Zhou (Amazon Inc, USA), Jun-Hong Cui (University of Connecticut, USA) ........................................ 289

Intercluster Beamforming using Selection Combining
Stefan Jorgensen (Stanford University, USA) .......................................................................... 295

Maximizing Lifetime for k-barrier Coverage in Energy Harvesting Wireless Sensor Networks
Jonathan DeWitt (Haverford College, USA), Hongchi Shi (Texas State University, USA) ........ 300

3D Percolation Theory-Based Exposure-Path Prevention for Optimal Power-Coverage Tradeoff in Clustered Wireless Camera Sensor Networks
Jingqing Wang (Texas A&M University, USA), Xi Zhang (Texas A&M University, ECE Department, USA) ............................................................................................................. 305

Security and QoS

QoS-Constrained Sensing Task Assignment for Mobile Crowd Sensing
Zhijie Wang (Arizona State University, USA), Dijiang Huang (Arizona State University, USA), Huijun Wu (Arizona State University, USA), Yuli Deng (Arizona State University, USA), Alilxier Aikebaier (National Institute of Information and Communications Technology, Japan), Yuuchi Teranishi (NICT & Osaka University, Japan) ................................................................. 311

Connectivity of Wireless Information-Theoretic Secure Networks
Tao Yang (University of Sydney, Australia), Guoqiang Mao (The University of Technology, Sydney, Australia), Wei Zhang (The University of New South Wales, Australia) ......................................................... 317

A Frequency Hopping Algorithm against Jamming Attacks under Asynchronous Environments
Guey-Yun Chang (National Central University, Taiwan), Jen-Feng Huang (National Taiwan University, Taiwan), Zheng-Hua Wu (National Central University, Taiwan) ................................................................. 324

Exploiting Channel-Aware Reputation System Against Selective Forwarding Attacks in WSNs
Ju Ren (Central South University, P.R. China), Yaoxue Zhang (Tsinghua University, P.R. China), Kuan Zhang (University of Waterloo, Canada), Sherman Shen (University of Waterloo, Canada) ............................................................................................................. 330

Secure Key Establishment for Device-to-Device Communications
Wenlong Shen (Illinois Institute of Technology, USA), Weisheng Hong (Illinois Institute of Technology, USA), Xianghui Cao (Illinois Institute of Technology, USA), Bo Yin (Illinois Institute of Technology, USA), Devu Manikantan Shila (IIT, USA), Yu Cheng (Illinois Institute of Technology, USA) ............................................................................................................. 336

Novel Measurement Matrix Optimization for Source Localization Based on Compressive Sensing
Kun Yan (Guilin University of Electrical Technology, P.R. China), Hsiao-Chun Wu (Louisiana State University, USA), Hailin Xiao (Guilin University of Electronic Technology of China, P.R. China), Xiangli Zhang (Gulin University of Electronic Technology, P.R. China) ............................................................................................................. 341

Scheduling and Coding

Social-Similarity-based Multicast Algorithm in Impromptu Mobile Social Networks
Yuan Xu (Texas State University, USA), Xiao Chen (Texas State University, USA) ................. 346

SOCRATIC: A Social Approach to Network Coding Rate Control
Samuel Wood (University of California Santa Cruz, USA), Hamid Sadjadpour (University of California, Santa Cruz, USA), JJ Garcia-Luna-Aceves (University of California at Santa Cruz, USA) ............................................................................................................. 352
A Dynamic Slot Scheduling for Wireless Sensors Networks
Bandar Alghamdi (Université de Reims Champagne-Ardenne, France), Marwane Ayaida (University of Reims Champagne-Ardenne & CReSTIC, France), Hacene Fouchal (Université de Reims Champagne-Ardenne, France) ................................................................. 357

Scheduling Protocol with Load Management for EV Charging
Dhaou Said (University of Sherbrooke & INTERLAB Research Laboratory, Canada), Soumaya Cherkaoui (Université de Sherbrooke, Canada), Lyes Khoukhi (University of Technology of Troyes, France) ........................................................................................................... 362

Time Petri Net based Performance evaluation of traffic scheduling in WIMAX networks
Abdelkrim Abdelli (USTHB University- Algiers, Algeria), Lynda Mokdad (Univ PARIS 12, France) ............................................................................................................................................. 368

Inter Street Interference Cancelation in Urban Vehicular Networks Using Network Coding
Pratap Kumar Sahu (University of Montreal, Canada), Abdelhakim Hafid (University of Montreal, Canada), Soumaya Cherkaoui (Université de Sherbrooke, Canada) .............................................................. 374

Wireless Sensor Networks VI

Item-Level Tagging Sees More Tags: Analyzing the Performance of EPC Gen-2 Protocol in Large-Scale RFID Systems
Chandrika Satyavolu (The University of Oklahoma, USA), Veeramani Mahendran (University of Oklahoma, USA), Sridhar Radhakrishnan (University of Oklahoma, USA) ................................................................. 380

Learning-Based Relay Selection for Cooperative Networks
Apurba Saha (Concordia University, Canada), Amiotosh Ghosh (Concordia University, Canada), Walaa Hamouda (Concordia University, Canada) .................................................................................................................. 386

Distributed load balancing using Alternating Direction Method of Multipliers
Alireza Sheikhattar (University of Maryland College Park, USA), Mehdi Kalantari (University of Maryland, College Park, USA) .......................................................................................................................... 392

Wireless Ad Hoc Networks Connectivity Assessment and Relay Node Deployment
Maggie Cheng (Missouri University of Science and Technology, USA), Yi Ling (Missouri University of Science and Technology, USA), Brian Sadler (Army Research Laboratory, USA) ................................................................. 399

Are We Still Friends: Kernel Multivariate Survival Analysis
Shiyu Liang (Shanghai Jiaotong University, P.R. China), Ruotian Luo (Shanghai Jiao Tong University, P.R. China), Ge Chen (Shanghai Jiaotong University, P.R. China), Songjun Ma (Shanghai Jiao Tong University, P.R. China), Weijie Wu (Shanghai Jiao Tong University, P.R. China), Li Song (Shanghai Jiao Tong University, P.R. China), Xiaohua Tian (Shanghai Jiao Tong University, P.R. China), Xibing Wang (Shanghai Jiaotong University, P.R. China) ........................................ 405

Hierarchical Cooperative Caching in Mobile Opportunistic Social Networks
Yunsheng Wang (Kettering University, USA), Jie Wu (Temple University, USA), Mingjun Xiao (University of Science and Technology of China, P.R. China) ................................................................. 411

Localization and Tracking I

Propagation Controlled Cooperative Positioning in Wireless Networks Using Bootstrap Percolation
Hong Cai (Beijing University of Posts and Telecommunications, P.R. China), Hui Gao (Beijing University of Posts and Telecommunications, P.R. China), Tiejun Lv (Beijing University of Posts and Telecommunications, P.R. China), Yueming Lu (Beijing University of Posts and Telecommunications, P.R. China), Xin Su (Tsinghua University, P.R. China) ................................................................. 417

Robust Indoor Localization based on Hybrid Bayesian Graphical Models
Ryangsoo Kim (Gwangju Institute of Science and Technology, Korea), Hyuk Lim (Gwangju Institute of Science and Technology, Korea), Sun-Nyoung Hwang (Catholic University of Korea, Korea), Brownson Obaridoo Obele (Hyundai MOBIS Multimedia Research Center, Korea) .................................................................................................................. 423
Device-Free Passive Localization from Signal Subspace Eigenvectors
Jihoon Hong (Keio University, Japan), Tomoaki Ohtsuki (Keio University, Japan) ........................................... 430

A Feature Scaling Based k-Nearest Neighbor Algorithm for Indoor Positioning System
Dong Li (University of Chinese Academy of Sciences, P.R. China), Baoxian Zhang (University of
the Chinese Academy of Sciences, P.R. China), Zheng Yao (Graduate University of the
Chinese Academy of Sciences, P.R. China), Cheng Li (Memorial University of Newfoundland,
Canada) ......................................................................................................................................................... 436

An Extended Centroid Localization Algorithm Based on Error Correction in WSN
Dekun Zhang (Harbin Institute of Technology & Harbin Institute of Technology, P.R. China),
Weixiao Meng (Harbin Institute of Technology, P.R. China), Yuxin Wang (Harbin Institute of
Technology, P.R. China), Cheng Li (Memorial University of Newfoundland, Canada) ................................. 442

Millimeter Accuracy Passive Tag Ranging via Second Harmonics RF Backscattering Against Body
Movement Interference
Yunfei Ma (Cornell University, USA), Hongqian Rong (Cornell University, USA), Edwin Kan
(Cornell University, USA) ............................................................................................................................... 448

Wireless Communications

Energy-Delay Analysis of Full Duplex Wireless Communication for Sensor Networks
Tom Vermeulen (KU Leuven, Belgium), Sofie Pollin (KU Leuven, USA) ....................................................... 455

A Novel Wake-up Communication System using Solar Panel and Visible Light Communication
Carolina Carrascal (Universitat Politècnica de Catalunya, Spain), Ilker Demirkol (Universitat
Politecnica de Catalunya & i2CAT Foundation, Spain), Josep Paradells (Universitat Politècnica
de Catalunya, Spain) ..................................................................................................................................... 461

A Survey of Two Kinds of Complementary Coded CDMA Wireless Communications
Siyue Sun (Harbin Institute of Technology, P.R. China), Qiyue Yu (Harbin Institute of
Technology, P.R. China), Shuai Han (Harbin Institute of Technology, P.R. China), Weixiao
Meng (Harbin Institute of Technology, P.R. China), Cheng Li (Memorial University of
Newfoundland, Canada) ................................................................................................................................. 468

A reliable CSMA protocol for high performance broadcast communications in a WSN
Eugenie Celada-Funes (University of Agder, Norway), Daniel Alonso-Román (Universidad de
Valencia, Spain), César Asensio-Marco (University of Agder, Norway), Baltasar Beferull-
Lozano (Universidad de Valencia, Spain) ...................................................................................................... 473

Capacity and Delay Tradeoff in Correlated Hybrid Ad-Hoc Networks
Siyang Liu (Shanghai Jiao Tong University, P.R. China), Feng Yang (Shanghai Jiaotong
University, P.R. China), Xiaoying Gan (Shanghai Jiao Tong University, P.R. China), Xiaohua
Tian (Shanghai Jiao Tong University, P.R. China), Xining Wang (Shanghai Jiaotong
University, P.R. China), Jing Liu (Shanghai Jiao Tong University, P.R. China) ........................................... 480

Communication-constrained p-Center Problem for Event Coverage in Theme Parks
Gürkan Solmaz (University of Central Florida, USA), Kemal Akkaya (Florida International
University, USA), Damla Turgut (University of Central Florida, USA) .................................................... 486

Location and Tracking II

An Efficient Approach to Node Localisation and Tracking in Wireless Sensor Networks
Martin K Mwila (Tshwane University of Technology & Council for Scientific and Industrial
Research (CSIR), South Africa), Karim Djouani (University Paris Est Créteil (UPEC) & Tshwane
University of Technology, South Africa), Anish Mathew Kurien (Tshwane University of
Technology, South Africa) ............................................................................................................................. 492

On the Value of Collaboration in Multidimensional Location Estimation
Javier Schloemann (Virginia Tech, USA), Michael Buehrer (Virginia Tech, USA) ........................................ 498

A Linear Estimator for Joint Synchronization and Localization in Wireless Sensor Networks
Reza Monir Vaghefi (Virginia Tech, USA), Michael Buehrer (Virginia Tech, USA) ..................................... 505
GC14 CISS: Globecom 2014 - Communication and Information System Security Symposium

Attacks, Anomalies, and Traffic Analysis

Fast Physical-layer Unknown Tag Identification in Large-scale RFID Systems
Feng Zhu (Nanjing University, P.R. China), Jia Liu (Nanjing University, P.R. China), Li-jun Chen (Nanjing University, P.R. China) ................................................................. 511

An Empirical Study of Indoor Localization Algorithms with Densely Deployed APs
Xin Chen (Peking University, P.R. China), Junjun Kong (Peking University & The Hong Kong Polytechnic University, P.R. China), Yao Guo (Peking University, P.R. China), Xiangqun Chen (Peking University, P.R. China) ................................................................. 517

Minimum Hop and/or Minimum Distance Robot Movement with Connectivity Constraints in WSNs
Andrew Wichmann (University of Texas at San Antonio, USA), Turgay Korkmaz (University of Texas at San Antonio, USA), Ali Saman Tosun (University of Texas at San Antonio, USA) ............ 523

Privacy-preserving Technologies

Too Big or Too Small? The PTB-PTS ICMP-based Attack against IPSec Gateways
Ludovic Jacquin (INRIA, France), Roca Vincent (INRIA Rhone-Alpes, France), Jean-Louis Roch (University of Grenoble, France) ................................................................. 530

Implications and Detection of DoS Attacks in OpenFlow-based Networks
Stefan Hommes (University of Luxembourg, Luxembourg), Radu State (University of Luxembourg, Luxembourg), Thomas Engel (University of Luxembourg, Luxembourg) ................................................................. 537

Network Anomaly Detection Using Autonomous System Flow Aggregates
Thienne Johnson (University of Arizona, USA), Loukas Lazos (University of Arizona, USA) ............ 544

Correlational Paraconsistent Machine for anomaly detection
Eduardo H. M. Pena (State University of Londrina, Brazil), Luiz F. Carvalho (State University of Londrina, Brazil), Sylvio Barbon Junior (State University of Londrina, Brazil), Joel J. P. C. Rodrigues (Instituto de Telecomunicações, University of Beira Interior, Portugal), Mario Lemes Proenca Jr. (State University of Londrina, Brazil) ................................................................. 551

Website Fingerprinting using Traffic Analysis of Dynamic Webpages
Yan Shi (Michigan State University, USA), Subir Biswas (Michigan State University, USA) ............ 557

GuidedTracker: Track the Victims with Access Logs to Finding Malicious Web Pages
Hongzhou Sha (Beijing University of Posts and Telecommunications, P.R. China), Qingyun Liu (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China), Zhou Zhou (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China), Zheng Chao (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China) ................................................................. 564

Click-Tracking Blocker: Privacy Preservation by Disabling Search Engines’ Click-Tracking
Roberto Alberdeston (University of Central Florida, USA), Erich Dondyk (University of Central Florida, USA), Cliff Zou (University of Central Florida, USA) ................................................................. 570

An Efficient Privacy Preserving Location Based Service System
Xinxin Zhao (Arizona State University, USA), Huiji Gao (Arizona State University, USA), Lingjun Li (Arizona State University, USA), Huan Liu (Arizona State University, USA), Guoliang Xue (Arizona State University, USA) ................................................................. 576

Towards Distributed Privacy-Preserving Mobile Access Control
Zhijie Wang (Arizona State University, USA), Dijiang Huang (Arizona State University, USA), Huijun Wu (Arizona State University, USA), Bing Li (Arizona State University, USA), Yuli Deng (Arizona State University, USA) ................................................................. 582
A Privacy-Preserving Task Recommendation Framework for Mobile Crowdsourcing
Yanmin Gong (University of Florida, USA), Yuanxiong Guo (Oklahoma State University, USA), Yuguang Fang (University of Florida, USA) ................................................................. 588

Privacy-preserving Ranked Multi-Keyword Search Leveraging Polynomial Function in Cloud Computing
Yanzhi Ren (Stevens Institute of Technology, USA), Yingying Chen (Stevens Institute of Technology, USA), Jie Yang (Florida State University, USA), Bin Xie (InfoBeyond Technology LLC, USA) ................................................................. 594

Privacy-Preserving Granular Data Retrieval Indexes for Outsourced Cloud Data
Zhigang Zhou (Harbin Institute of Technology, P.R. China), Hongli Zhang (Harbin Institute of Technology, P.R. China), Qiang Zhang (Harbin Institute of Technology, P.R. China), Yang Xu (Harbin Institute of Technology, P.R. China), Panpan Li (Harbin Institute of Technology, P.R. China) .................................................................................. 601

Wireless Network Security

Optimal Deployment of Wireless Small Cell Base Stations with Security Considerations
Ali K Houjeij (University of Illinois at Urbana-Champaign, USA), Walid Saad (Virginia Tech, USA), Tamer Başar (University of Illinois at Urbana-Champaign, USA) ......................................................... 607

Relay Authentication by Exploiting I/Q Imbalance in Amplify-and-Forward System
Peng Hao (The University of Western Ontario, Canada), Xianbin Wang (The University of Western Ontario, Canada), Aydin Behnad (The University of Western Ontario, Canada) ..................... 613

Optimal Decentralized Security Software Deployment in Multihop Wireless Networks
Rakpong Kaewpuang (University of Manitoba, Canada), Dusit Niyato (Nanyang Technological University, Singapore), Ping Wang (Nanyang Technological University, Singapore), Zhu Han (University of Houston, USA), Rongxing Lu (Nanyang Technological University, Singapore) ......................................................... 619

DIARY: A Differentially Private and Approximately Revenue Maximizing Auction Mechanism for Secondary Spectrum Markets
Chunchun Wu (Shanghai Jiao Tong University, P.R. China), Zuying Wei (Shanghai Jiao Tong University, P.R. China), Fan Wu (Shanghai Jiao Tong University, P.R. China), Guilhai Chen (Shanghai Jiao Tong University, P.R. China) .................................................................................. 625

Real-Time Misbehavior Detection in IEEE 802.11e Based WLANs
Xianghui Cao (Illinois Institute of Technology, USA), Lu Liu (Illinois Institute of Technology, USA), Wenlong Shen (Illinois Institute of Technology, USA), Jin Tang (Illinois Institute of Technology, USA), Yu Cheng (Illinois Institute of Technology, USA) ................................................................. 631

A Resilient Pressure Routing Scheme for Underwater Acoustic Networks
Michael Zuba (University of Connecticut, USA), Michael Fagan (University of Connecticut, USA), Zhijie Shi (University of Connecticut, USA), Jun-Hong Cui (University of Connecticut, USA) .................................................................................. 637

Smart Grid Security

LPAttack: Leverage Point Attacks against State Estimation in Smart Grid
Song Tan (Georgia State University, USA), Wen-Zhan Song (Georgia State University, USA), Michael Stewart (Georgia State University, USA), Lang Tong (Cornell University, USA) ......................................................... 643

A Security Protocol for Advanced Metering Infrastructure in Smart Grid
Feng Ye (University of Nebraska–Lincoln, USA), Yi Qian (University of Nebraska–Lincoln, USA), Rose Qingyang Hu (Utah State University, USA) ................................................................. 649

Coordinated Attacks against Substations and Transmission Lines in Power Grids
Yihai Zhu (University of Rhode Island, USA), Jun Yan (URI, USA), Yufei Tang (University of Rhode Island, USA), Yan Lindsay Sun (University of Rhode Island, USA), Haibo He (University of Rhode Island, USA) .................................................................................. 655
Joint Encryption and Compressed Sensing in Smart Grid Data Transmission
Juntao Gao (State Key Laboratory of Integrated Services Networks, Xidian University, P.R. China), Xiuming Zhang (National University of Singapore, Singapore), Hao Liang (University of Alberta, Canada), Sherman Shen (University of Waterloo, Canada) ................................................................. 662

A Lightweight Lattice-based Security and Privacy-Preserving Scheme for Smart Grid
Asmaa R Abdallah (University of Waterloo, Canada), Sherman Shen (University of Waterloo, Canada) ................................................................. 668

PMQC: A Privacy-Preserving Multi-Quality Charging Scheme in V2G network
Miao He (University of Waterloo, Canada), Kuan Zhang (University of Waterloo, Canada), Sherman Shen (University of Waterloo, Canada) ................................................................. 675

Security and Privacy for P2P and OSN

Modeling Leechers Attack in BitTorrent
Lin Ye (Harbin Institute of Technology, P.R. China), Hongli Zhang (Harbin Institute of Technology, P.R. China), Xiaojiang Du (Temple University, USA) ................................................................. 681

Breaching IM Session Privacy Using Causality
Saad Saleh (National University of Sciences and Technology (NUST), Islamabad, Pakistan), Mamoon Raja (NUST & WISNET Lab, Pakistan), Muhammad Shah Nawaz (SEECs, NUST, Islamabad, Pakistan), Muhammad Usman Ilyas (National University of Sciences and Technology & School of Electrical Engineering and Computer Science (SEECs), Pakistan), Khawar Khurshid (Supervisor, Pakistan), M. Zubair Shafiq (Michigan State University, USA), Alex X. Liu (Michigan State University, USA), Hayder Radha (Michigan State University, USA), Shirish S Karande (TRDCC, India) ................................................................. 686

Sybil-aware Least Cost Rumor Blocking in Social Networks
Yabin Ping (Shanghai Jiao Tong University, P.R. China), Zhenfu Cao (Shanghai Jiao Tong University, P.R. China), Haojin Zhu (Shanghai Jiao Tong University, P.R. China) ................................................................. 692

You are Where You Have Been: Sybil Detection via Geo-location Analysis in OSNs
Xiaokuan Zhang (Shanghai Jiao Tong University, P.R. China), Haizhong Zheng (Shanghai Jiao Tong University, P.R. China), Xiaolong Li (Shanghai Jiao Tong University, P.R. China), Suguo Du (Shanghai Jiao Tong University, P.R. China), Haojin Zhu (Shanghai Jiao Tong University, P.R. China) ................................................................. 698

Control of Photo Sharing over Online Social Networks
Kaihe Xu (University of Florida, USA), Yuanxiong Guo (Oklahoma State University, USA), Linke Guo (Binghamton University, USA), Yuguang Fang (University of Florida, USA), Xiaolin Li (University of Florida, USA) ................................................................. 704

Privacy-preserving Outsourcing of Image Global Feature Detection
Zhan Qin (SUNY at Buffalo, USA), Jingbo Yan (Xidian University & State University of NewYork at Buffalo, USA), Cong Wang (City University of Hong Kong, Hong Kong), Kui Ren (State University of New York at Buffalo, USA), Chang Wen Chen (State University of New York at Buffalo, USA), Xinwen Fu (University of Massachusetts Lowell, USA) ................................................................. 710

Physical and Lower Layer Security

PHY layer authentication via drifting oscillators
Muhammad Mahboob Ur Rahman (KTH, Sweden), Aneela Yasmeen (University of Iowa, USA), James Gross (Royal Institute of Technology (KTH), Sweden) ................................................................. 716

New Physical Layer Security Measures for Wireless Transmissions over Fading Channels
Biao He (The Australian National University, Australia), Xiangyun Zhou (The Australian National University, Australia) ................................................................. 722
Quantum Key Distribution for Security Guarantees Over Quantum-Repeater-Based QoS-Driven 3D Satellite Networks
Ping Wang (Texas A&M University, Department of Electrical and Computer Engineering, USA), Xi Zhang (Texas A&M University, ECE Department, USA), Genshe Chen (Intelligent Fusion Technology, Inc, USA), Khanh Pham (Air Force Research Laboratory, USA), Erik Blasch (Air Force Research Lab, USA) ................................................................. 728

Resilience of LTE Networks Against Smart Jamming Attacks
Farhan M. Aziz (Georgia Institute of Technology, USA), Jeff Shamma (Georgia Institute of Technology & King Abdullah University of Science and Technology (KAUST), USA), Gordon Stuber (Georgia Institute of Technology, USA) ................................................................. 734

Packetized Wireless Communication under Jamming; A Constrained Bimatrix Game
Koorosh Firouzbakht (Northeastern University, USA), Guevara Noubir (Northeastern University, USA), Masoud Salehi (Northeastern University, USA) ................................................................................................................. 740

Prospect Theoretic Analysis of Anti-jamming Communications in Cognitive Radio Networks
Liang Xiao (Xiamen University, P.R. China), Jinliang Liu (Xiamen University, P.R. China), Yan Li (Xiamen University, P.R. China), Narayan Mandayam (WINLAB, Rutgers University, USA), H. Vincent Poor (Princeton University, USA) ................................................................................................................. 746

Theoretical Studies for Security and Privacy

Optimal Power Allocation in Block Fading Gaussian Channels with Causal CSI and Secrecy Constraints
Arsenia Chorti (University of Essex & Princeton University, United Kingdom), Katerina Papadaki (London School of Economics, United Kingdom), H. Vincent Poor (Princeton University, USA) ................................................................................................................. 752

CBDI: Combined Banzhaf & Diversity Index for Finding Critical Nodes
Waqar Asif (National University of Science and Technology (NUST), Pakistan), Hassaan Khaliq Qureshi (National University of Sciences & Technology (NUST) & City University, London, Pakistan), Muttukrishnan Rajarajan (City University London, United Kingdom), Marios Lestas (Frederick University, Cyprus) ................................................................................................................. 758

Optimal Multiuser Spread-Spectrum Data Embedding in Videos Streams
Lili Wei (Intel Corporation, USA), Rose Qingyang Hu (Utah State University, USA), Dimitris A. Pados (The State University of New York at Buffalo, USA), Geng Wu (Intel Corporation, USA) .......... 764

Secure Regenerating Code
Jian Li (Michigan State University, USA), Tongtong Li (Michigan State University, USA), Jian Ren (Michigan State University, USA) ................................................................................................................. 770

Secure Dynamic Searchable Symmetric Encryption with Constant Document Update Cost
Yi Yang (University of Electronic Science and Technology of China, P.R. China), Hongwei Li (University of Electronic Science and Technology of China, P.R. China), Wenchao Liu (University of Electronic Science and Technology of China, P.R. China), Haomiao Yang (University of Electronic Science and Technology of China, P.R. China), Mi Wen (Shanghai University of Electric Power, P.R. China) ................................................................................................................. 775

Adrian Lara (University of Nebraska-Lincoln, USA), Byrav Ramamurthy (University of Nebraska-Lincoln, USA) ................................................................................................................. 781

GC14 CogRN: Globecom 2014 - Cognitive Radio and Networks Symposium

Spectrum Sensing in Cognitive Radio Networks I

A Practical Subspace Multiple Measurement Vectors Algorithm for Cooperative Spectrum Sensing
Tsung-Hsun Chien (Academia Sinica, Taiwan), Wei-Jie Liang (National Cheng Kung University, Taiwan), Chun-Shien Lu (Institute of Information Science, Academia Sinica, Taiwan) .......... 787
Spectrum Sensing in Cognitive Radio Networks II

Optimal Multi-slot Spectrum Sensing in Energy Harvesting Cognitive Radio Systems
Sixing Yin (Beijing University of Posts and Telecommunications, P.R. China), Zhaowei Qu (Beijing University of Posts and Telecommunications, P.R. China), Shufang Li (Beijing University of Posts and Telecommunications, P.R. China) ........................................................................................................... 793

Multiple Antenna Cyclostationary-Based Detection of Primary Users with Multiple Cyclic Frequency in Cognitive Radios
Saeid Sedighi (Qazvin International University, Iran), Abbas Taherpour (Imam Khomeini International University, Iran), Tamer Khattab (Qatar University, Qatar), Mazen Omar Hasna (Qatar University, Qatar) ........................................................................................................... 799

A New and Generalized Model for the Multitaper Detector with Nonzero Mean Signals
Ebtihal H. G. Yousif (Sudan University of Science and Technology, United Kingdom), Emad Alsusa (Manchester University, United Kingdom) ........................................................................................................... 805

Cooperative Spectrum Sensing Scheduling Optimization in Multi-Channel Dynamic Spectrum Access Networks
Arash Azarfar (Ecole Polytechnique de Montréal, Canada), Chun-Hao Liu (University of California, Los Angeles, USA), Jean-François Frigon (Ecole Polytechnique de Montreal and GERAD, Canada), Brunilde Sansò (Ecole Polytechnique de Montreal, Canada), Danijela Cabric (University of California Los Angeles, USA) ........................................................................................................... 810

Spectrum Sensing for Cognitive Radio using Multicoset Sampling
Babar Aziz (IFSTTAR, LEOST, Villeneuve D’Ascq, France), Samba Traore (IETR / SUPELEC, Campus de Rennes, France), Amor Nafkha (Supélec, France), Daniel Le Guennec (IETR/Supélec-Campus de Rennes, France) ........................................................................................................... 816

Spectrum Sensing in Cognitive Radio Networks II

Cooperative Sensing Scheduling in Cognitive Radio Networks with Multiple Primary Networks
Ye Wang (University of Ontario Institute of Technology, Canada), Xiaodong Lin (University of Ontario Institute of Technology, Canada) ........................................................................................................... 822

Collaborative Compressive Spectrum Sensing with Missing Observations for Cognitive Radio Networks
Xi Zhang (Texas A&M University, ECE Department, USA), Shan Jin (Texas A&M University, College Station, USA) ........................................................................................................... 828

An Efficient Method for Collaborative Compressive Spectrum Sensing in Cognitive Radio Networks
Xi Zhang (Texas A&M University, ECE Department, USA), Shan Jin (Texas A&M University, College Station, USA) ........................................................................................................... 834

A New Spectrum Sensing Strategy When Primary User Has Multiple Power Levels
Jiachen Li (Carnegie Mellon University & School of Computer Science, USA), Feifei Gao (Tsinghua University, P.R. China), Tao Jiang (Huazhong University of Science and Technology, P.R. China), Wen Chen (Shanghai Jiao Tong University, P.R. China) ........................................................................................................... 840

Bounds on the Overhead of Spectrum Sensing in Cognitive Radio
Pengda Huang (Southern Methodist University, USA), Dinesh Rajan (Southern Methodist University, USA) ........................................................................................................... 846

A Nonparametric Approach for Spectrum Sensing Using Bootstrap Techniques
Qi Huang (The University of Edinburgh, United Kingdom), Pei-Jung Chung (The University of Edinburgh, United Kingdom), John Thompson (University of Edinburgh, United Kingdom) ........................................................................................................... 851

Spectrum Allocation and Resource Management in Cognitive Radio Networks I

Adaptive Multi-Objective Optimization Scheme for Cognitive Radio Resource Management
Ismail AlQerm (KAUST, Saudi Arabia), Basem Shihada (KAUST, Saudi Arabia) ........................................................................................................... 857

Distributed Matching Based Spectrum Allocation in Cognitive Radio Networks
Yanru Zhang (University of Houston, USA), Yunan Gu (University of Houston, USA), Miao Pan (Texas Southern University, USA), Zhu Han (University of Houston, USA) ........................................................................................................... 864
Spectrum Allocation and Resource Management in Cognitive Radio Networks II

Cross-layer Optimization and Analysis for Overlay Cognitive Radio
Ying-lei Teng (Beijing University of Posts and Telecommunications, P.R. China), Haoman Xu (Beijing University of Posts and Telecommunications, P.R. China), Victor C.M. Schober (Beijing University of Posts and Telecommunications, P.R. China), Mei Song (Beijing University of Posts and Telecommunications, P.R. China) ...................................................... 870

Joint Channel Assignment and Power Allocation in Cognitive Radio Networks
Georgios I Tsiropoulos (National Technical University of Athens, Greece), Octavia A. Dobre (Memorial University of Newfoundland, Canada), Mohamed Hossam Ahmed (Memorial University, Canada), Kareem E. Baddour (Communications Research Centre, Canada) ............... 876

Adaptive Antenna Selection by Parallel QR-Factorization for Cognitive Radio Cloud Network
Shih Yu Chang (National Tsing Hua University of Taiwan, Taiwan), Hsiao-Chun Wu (Louisiana State University, USA) ........................................................................................................ 882

Contract-Based Cooperative Spectrum Sharing in Cognitive Radio Networks
Bahareh Nazari (University of Sydney, Australia), Abbas Jamalipour (University of Sydney, Australia) ........................................................................................................ 888

Spectrum Allocation and Resource Management in Cognitive Radio Networks II

Spectrum Refarming: A New Paradigm of Spectrum Sharing for Cellular Networks
Shiying Han (Nanyang Technological University, Singapore), Ying-Chang Liang (Institute for Infocomm Research, Singapore), Boon Hee Soong (Nanyang Technological University, Singapore) ........................................................................................................ 893

Optimal Resource Allocation for Sensing Based Spectrum Sharing Cognitive Radio Networks
Hao Chen (The University of Kansas, USA), Lingjia Liu (University of Kansas, USA), John D. Matyjas (Air Force Research Laboratory, USA), Michael Medley (Air Force Research Laboratory, USA) ........................................................................................................ 899

Distributed Optimization of Transmission Strategies in Reactive Cognitive Networks
Marco Levorato (University of California, Irvine, USA), Pradeep Chathuranga Weeraddana (KTH, Stockholm, Sweden), Carlo Fischione (KTH, Sweden) ........................................................................................................ 905

Bandwidth and Power Allocation for Two-Way Relaying in Overlay Cognitive Radio Systems
Ahmad Alsharoa (King Abdullah University of Science and Technology (KAUST), Saudi Arabia), Hakim Ghazzai (King Abdullah University of Science and Technology (KAUST) & KAUST, Saudi Arabia), Elias Yaacoub (Strategic Decisions Group, Lebanon), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia) ........................................................................................................ 911

Resource Allocation in OFDM-Based Cognitive Two-Way Multiple-Relay Networks
Musbah Shaat (CTTC, Spain), Telex Magloire Nkouatchah Ngatched (Grenfell Campus - Memorial University of Newfoundland, Canada), Octavia A. Dobre (Memorial University of Newfoundland, Canada) ........................................................................................................ 917

Random Access for a Cognitive Radio Transmitter with RF Energy Harvesting
Yue Lu (Zhejiang University, P.R. China), Wei Wang (Zhejiang University, P.R. China), Zhaoyang Zhang (Zhejiang University, P.R. China), Aiping Huang (Zhejiang University, P.R. China), Vincent Lau (Hong Kong University of Science and Technology, Hong Kong) ........................................................................................................ 923

Interactive Session: Emerging Topics in Cognitive Radio Networks

Primary User-aware Network Coding for Multi-hop Cognitive Radio Networks
Arsany Guirguis (Alexandria University, Egypt), Raymond Guirguis (Alexandria University, Egypt), Moustafa Youssef (Egypt-Japan University of Science and Technology (EJUST), USA) .... N/A

Locating Primary Users in Cognitive Radio Networks by Generalized Method of Moments
Soumya Basu (IIT Kharagpur, India), Maryam Ahmadi (University of Victoria, Canada), Minming Ni (Beijing Jiaotong University, P.R. China), Jianping Pan (University of Victoria, Canada) ........................................................................................................ 929
Interference Issues in Cognitive Radio Networks

Characterization of Aggregate Interference in Arbitrarily-shaped Underlay Cognitive Networks
Jing Guo (The Australian National University, Australia), Salman Durrani (The Australian National University, Australia), Xiangyun Zhou (The Australian National University, Australia) ...

Hybrid Underlay/Overlay Cognitive Radio System With Hierarchical Modulation in the Presence of Channel Estimation Error
Reza Shakeri (Imam Khomeini International University(IKIU), Iran), Hamidreza Khakzad (Imam Khomeini International University, Iran), Abbas Taherpour (Imam Khomeini International University, Iran), Tamer Khattab (Qatar University, Qatar), Mazen Omar Hasna (Qatar University, Qatar) ...

Cognitive Relay-Sharing by Using hierarchical Modulation Under Interference Constraints
Hamidreza Khakzad (Imam Khomeini International University, Iran), Reza Shakeri (Imam Khomeini International University(IKIU), Iran), Abbas Taherpour (Imam Khomeini International University, Iran), Tamer Khattab (Qatar University, Qatar), Mazen Omar Hasna (Qatar University, Qatar) ...

Interference Alignment with Frequency-Clustering for Efficient Resource Allocation in Cognitive Radio Networks
Mohammed El- Absi (University of Duisburg-Essen, Germany), Musbah Shaat (CTTC, Spain), Faouzi Bader (SUPELEC, France), Thomas Kaiser (Universität Duisburg-Essen, Germany) ...

An IEEE 802.11 DCF-based Optimal Data Link Layer Spectrum Sensing Scheme in Cognitive Radio Networks
Yi Song (Wichita State University, USA) ...

Security Issues in Cognitive Radio Networks

Mitigating Malicious Attacks using Bayesian Nonparametric Clustering in Collaborative Cognitive Radio Networks
Muhammad Ejaz Ahmed (POSTECH, Korea), Ju Bin Song (Kyung Hee University, Korea), Zhu Han (University of Houston, USA) ...

Channel Detecting Jamming Attacks on Symmetric Blind Rendezvous Algorithms for Cognitive Radio Networks
Young-Hyun Oh (North Carolina State University, USA), David Thuente (North Carolina State University, USA) ...
Secure Degrees of Freedom in MIMO Cognitive Radio Systems
Hua Mu (Florida Institute of Technology, USA), Jitendra Tugnait (Auburn University, USA) .......... 1011

A Predictive Methodology for Truthful Double Spectrum Auctions in Cognitive Radio Networks
Zhe Liu (Xidian University, P.R. China), Sinong Wang (Shanghai Jiao Tong University, P.R. China), Weijie Wu (Shanghai Jiao Tong University, P.R. China), Xiaohua Tian (Shanghai Jiao Tong University, P.R. China), Changle Li (Xidian University, P.R. China), Xining Wang (Shanghai Jiaotong University, P.R. China) ........................................................................................................ 1017

Using Belief Propagation to Counter Correlated Reports in Cooperative Spectrum Sensing
Mihir Laghate (University of California, Los Angeles, USA), Danijela Cabric (University of California Los Angeles, USA) .................................................................................................................. 1023

Robust Precoding with QoS Guarantee for Cognitive Radio Networks
Lu Lu (Georgia Institute of Technology, USA), Geoffrey Li (Georgia Tech, USA) ...................... 1029

Game theory in Cognitive Radio Networks

Load Balancing and Pricing for Spectrum Access Control in Cognitive Radio Networks
Nguyen H. Tran (Kyung Hee University, Korea), Hoang Dai Tran (Kyung Hee University, Korea), Long Bao Le (INRS, University of Quebec, Canada), Zhu Han (University of Houston, USA), Choong Seon Hong (Kyung Hee University, Korea) .................................................................................................................. 1035

A Machine Learning Approach for Dynamic Spectrum Access Radio Identification
Matthew La Pan (Virginia Tech, USA), T. Charles Clancy (Virginia Tech, USA), Robert McGwier (Virginia Tech & Allied Communications, AMSAT, and Flex Radio System, Inc., USA) ................................................. 1041

Location-Oriented Evolutionary Games for Spectrum Sharing
Feixiang Zhang (Southern Illinois University Carbondale, USA), Xiangwei Zhou (Southern Illinois University Carbondale, USA) .................................................................................................................. 1047

A Game Theoretic Approach for Robust Power Control in Cognitive Radio Networks
Shimin Gong (Nanyang Technological University, Singapore), Ping Wang (Nanyang Technological University, Singapore), Lingjie Duan (Singapore University of Technology and Design (SUTD), Singapore) ........................................................................................................ 1053

Energy Efficient Power Control Game Applied to Cognitive Radio Networks
Majed Haddad (INRIA, France), Piotr Wiecek (Wroclaw University of Technology, Poland), Habachi Oussama (LIA, France), Yezekael Hayel (LIA, University of Avignon, France) .......... N/A

On the performance of Subcarrier Allocation Techniques for Multiuser OFDM Cognitive Networks with Reconfigurable Antennas
Mustafa H Yilmaz (University of South Florida, USA), Mohamed M. Abdallah (Texas A&M University at Qatar & Cairo University at Cairo, Qatar), Khalid A. Qaraqe (Texas A&M University at Qatar, USA), Huseyin Arslan (University of South Florida, USA) ....................................................... 1059

Performance Issues in Cognitive Radio Networks

Spatial Throughput Characterization in Cognitive Radio Networks with Primary Receiver Assisted Carrier Sensing Based Opportunistic Spectrum Access
Xiaoshi Song (Beijing University of Posts and Telecommunications, P.R. China), Changchuan Yin (Beijing University of Posts and Telecommunications, P.R. China), Dan Pu Liu (BUPT, P.R. China) .................................................................................................................. 1065

Effective Capacity in Cognitive Radio Broadcast Channels
Marwan Hammouda (Leibniz Universität Hannover, Germany), Sami Akin (Leibniz Universität Hannover, Germany), Jürgen Peissig (Leibniz Universität Hannover, Germany) ....................................................... 1071

Local Connectivity of Cognitive Radio Ad Hoc Networks
Daoen Zhai (Xidian University, P.R. China), Min Sheng (Xidian University, P.R. China), Xijun Wang (Xidian University, P.R. China), Yan Zhang (Xidian University, P.R. China) ....................................................... 1078
Cloud Computing and Networking

Latency Versus Survivability in Geo-Distributed Data Center Design
Rodrigo S. Couto (Federal University of Rio de Janeiro, Brazil), Stefano Secchi (University Pierre et Marie Curie - Paris 6, France), Miguel Elias Mitre Campista (Federal University of Rio de Janeiro & GTA, Brazil), Luis Henrique M. K. Costa (Federal University of Rio de Janeiro, Brazil) .......................... 102

Cost-aware caching: optimizing cache provisioning and object placement in ICN
Andrea Araldo (Université Paris Sud & Telecom Paris Tech, France), Michele Mangili (Université Paris-Sud & Laboratoire de Recherche en Informatique (LRI), France), Fabio Martignon (Université Paris-Sud, France), Dario Rossi (Telecom ParisTech, France) .......................... 108

Large-scale Network Protocol Emulation on Commodity Cloud
Anirup Dutta (University of Houston, USA), Omprakash Gnawali (University of Houston, USA) .... 114

Green MapReduce for Heterogeneous Data Centers
Derya Çavdar (Bogazici University & IBM Research Zurich Lab, Turkey), Lydia Y. Chen (IBM Zurich Research Laboratory, Switzerland), Fatih Alagoz (Bogazici University, Turkey) .......................... 112

Refining the Estimation of the Available Bandwidth in Inter-Cloud Links for Task Scheduling
Thiago Genez (University of Campinas, Brazil), Luiz F. Bittencourt (University of Campinas, Brazil), Nelson L. S. da Fonseca (State University of Campinas, Brazil), Edmundo Madeira (State University of Campinas, Brazil) .......................... 117

Optimizing Quality of Resilience in the Cloud
Bruno Miguel Sousa (University of Coimbra, Portugal), Kostas Pentikousis (EICT, Germany), Marilia Curado (University of Coimbra, Portugal) .......................... 113

Video Streaming

Optimizing Video Quality in Dense Small-Cell Wireless Networks with Packet Overhearing
Dimitrios Kosmanos (University of Thessaly, Greece), Antonios Argyriou (University of Thessaly, Greece), Leandros Tassiulas (Yale University, USA) .......................... 139

Interaction of AQM Schemes with Adaptive Streaming and Internet Traffic on Access Networks
Shahid Akhtar (Alcatel-Lucent, USA) .......................... 145

A Screening Methodology for Crowdsourcing Video QoE Evaluation
Louis Anegekuh (University of Plymouth, United Kingdom), Lingfen Sun (University of Plymouth, United Kingdom), Emmanuel Ifeachor (University of Plymouth, United Kingdom) .... 152
Traffic Control and Network Virtualization

Fast then Inefficient? Engineering the Traffic in Edge-server Relay Network
Yuanjian Xing (Peking University, P.R. China), Yafei Dai (Peking University, P.R. China) ............................................. 1176

Admission Control with Flow Aggregation for QoS Provisioning in Software-Defined Network
Jun Huang (Chongqing University of Posts and Telecomm, P.R. China), Yunlong He (Chongqing University of Posts and Telecomm, P.R. China), Qiang Duan (The Pennsylvania State University, USA), Qing Yang (Montana State University, USA), Wei Wang (San Diego State University, USA) ................................................................................................................................. 1182

A distributed rate allocation scheme in the two-sided network
Jonghoon Yun (Korea Telecom, Korea), Hyang-Won Lee (Konkuk University, Korea), Young-Myoung Kim (Korea Telecom, Korea) ................................................................................................................................... 1187

An extended Hop-by-hop Interest shaping mechanism for Content-Centric Networking
Natalya Rozhnova (UPMC Sorbonne Universités, France), Serge Fdida (UPMC Sorbonne Universités, France) ........................................................................................................................................ N/A

Resource Pooling in Network Virtualization and Heterogeneous Scenarios using Stochastic Petri Nets
Rainer Schoenen (RWTH Aachen University, Faculty 6, Germany), Halim Yanikomeroglu (Carleton University, Canada) ....................................................................................................................... 1193

Traffic Modeling for Machine-to-Machine (M2M) Last Mile Wireless Access Networks
Obada Al Khatib (The University of Sydney, Australia), Wibowo Hardjawana (The University of Sydney, Australia), Branka Vucetic (The University of Sydney, Australia) ................................................................. 1199

Network Coding

NC-CELL: Network Coding-based Content Distribution in Cellular Networks for Cloud Applications
Claudio Fiandrino (University of Luxembourg, Luxemburg), Dzmitry Kliazovich (University of Luxembourg, Luxemburg), Pascal Bouvry (University of Luxembourg, Luxemburg), Albert Zomaya (The University of Sydney, Australia) ........................................................................................................ 1205

Structured Random Linear Codes (SRLC): Bridging the Gap between Block and Convolutional Codes
Kazuhisa Matsuzono (National Institute of Information and Communication Technology (NICT), Japan), Vincent Roca (INRIA Rhône-Alpes, France), Hitoshi Asaeda (National Institute of Information and Communications Technology (NICT), Japan) .................................................................................................................. 1211

Analysis of a Network Coding-Aware MAC Protocol for IEEE 802.11 Wireless Networks with Reverse Direction Transmissions
Raul Palacios (University of Trento, Italy), Habtegebreil Haile (University of Trento, Italy), Jesus Alonso-Zarate (Centre Tecnologic de Telecomunicacions de Catalunya - CTTC, Spain), Fabrizio Granelli (University of Trento, Italy) ............................................................................................................. 1218

Random Linear Network Coding for Reliable Broadcasting
Mohammad Hamed Firooz (University of Washington, USA), Zixia Hu (Qualcomm, USA) .......... N/A
Resource Allocation in Wireless Networks

Power Efficient Uplink Resource Allocation in LTE Networks under Delay QoS Constraints
Adnan Aijaz (King’s College London, United Kingdom), Mohammad Reza Nakhai (King’s College London, United Kingdom), Hamid Aghvami (King’s College London, United Kingdom) ...... 1239

On-line Learning and Prediction of Link Quality in Wireless Sensor Networks
Dana Marinca (PRiSM Laboratory & University of Versailles St. Quentin, France), Pascale Minet (INRIA, France) .................................................................................................................. 1245

Performance Analysis of Energy-Efficient MAC Protocols using Bidirectional Transmissions and Sleep Periods in IEEE 802.11 WLANs
Raul Palacios (University of Trento, Italy), El Moatez Billah Larbaa (University of Constantine1, Algeria), Jesus Alonso-Zarate (Centre Tecnologic de Telecomunicacions de Catalunya - CTT, Spain), Fabrizio Granelli (University of Trento, Italy) .................................................. 1252

Resource Allocation for D2D Communications Under Proportional Fairness
Tuong Hoang (University of Quebec, Canada), Long Bao Le (INRS, University of Quebec, Canada), Tho Le-Ngoc (McGill University, Canada) ........................................................................................................ 1259

Spectrum Sharing for Delay-Sensitive Applications With Continuing QoS Guarantees
Yuanzhang Xiao (University of California, Los Angeles, USA), Kartik Ahuja (University of California Los Angeles, USA), Mihaela van der Schaar (University of California, Los Angeles (UCLA), USA) ....................................................................................... 1265

Ant Colony Optimization for Joint Resource Allocation and Relay Selection in LTE-Advanced Networks
Ahmed H Zainaldin (Ericsson Canada, Canada), Hassan Halabian (Ericsson Canada, Canada), Ioannis Lambadaris (Carleton University, Canada) ........................................................................................................ 1271

Routing and Reliability

Algorithm for FIPP p-cycle Path Protection in Flexgrid Networks
Helder Oliveira (University of Campinas, Brazil), Nelson L. S. da Fonseca (State University of Campinas, Brazil) .................................................................................................................................................. 1278

Traffic Grooming of Batches of Deadline-Driven Requests in Elastic Optical Networks
Pedro Moura (State University of Campinas, Brazil), Nelson L. S. da Fonseca (State University of Campinas, Brazil), Rafael Scarafici (University of Campinas, Brazil) ......................................................... 1284

Reliability Prediction of Diffused Pathset Routing in Wireless Multihop Networks
Trisha Biswas (North Carolina State University, USA), Rudra Dutta (North Carolina State University, USA) ......................................................................................................................... 1290

A Hierarchical Hashing Scheme to Accelerate Longest Prefix Matching
Hai Sun (Washington State University, USA), Yan Sun (Huawei, USA), Victor C. Valgenti (Petabi, Inc, USA), Min S Kim (Petabi, USA) ....................................................................................................................... 1296

Methods for time-dependent combined network design and routing optimization
Dimitri Papadimitriou (Alcatel-Lucent & UGent, Belgium), Bernard Fortz (Université Libre de Bruxelles, Belgium) ....................................................................................................................... 1303

Using Linear System Reliability to Obtain Theoretical Understanding of Wireless Routing
Trisha Biswas (North Carolina State University, USA), Kendra Lesser (University of New Mexico, USA), Rudra Dutta (North Carolina State University, USA), Meeko Oishi (University of New Mexico, USA) ....................................................................................................................... 1310
Towards QoE-aware Video Streaming using SDN
Hyunwoo Nam (Columbia University, USA), Kyung Hwa Kim (Columbia University, USA), Jong Yul Kim (Columbia University, USA), Henning Schulzrinne (Columbia University, USA) .......................... 1317

A Multicast Architecture of SVC Streaming Over OpenFlow Networks
Enzhong Yang (University of Science and Technology of China, P.R. China), Yongyi Ran (University of Science and Technology of China, P.R. China), Shuangwu Chen (University of Science and Technology of China, P.R. China), Jian Yang (University of Science and Technology of China, P.R. China) ....................................................... 1323

Scheduling Policy Analysis of Cloud Video Service
Zhen Zhao (Comcast, USA) .................................................................................................................................................. 1329

Content-Aware Adaptation Scheme For QOE Optimized DASH Applications
Shenghong Hu (Hubei University of Economics, P.R. China), Lingfen Sun (University of Plymouth, United Kingdom), Chao Gui (Hubei University of Economics, P.R. China), Emmanuel A. Jammeh (University of Plymouth, United Kingdom), Is-Haka Mkawaw (University of Plymouth, United Kingdom) .......................................................................................................................... 1336

Non-Buffered Rate Control for Real Time Video Compression
Yu Sun (University of Central Arkansas, USA), Zhidan Feng (UAMS, USA), Reshma Ginnvaram (University of Central Arkansas, USA) .......................................................................................................................... 1342

Choosing the Best Video Compression Codec Depending on the Recorded Environment
Jose Miguel Jimenez Herranz (Polytechnic University of Valencia, Spain), Juan Ramon Diaz Santos (Polytechnic University of Valencia, Spain), Sandra Sendra (Universidad Politécnica de Valencia, Spain), Jaime Lioret (Universidad Politécnica de Valencia, Spain) ................................................................. 1347

Energy-Efficient Communication-Based Train Control (CBTC) systems with Random Delay and Packet Drop
Wenzhe Sun (Carleton University & Beijing Jiaotong University, Canada), F. Richard Yu (Carleton University, Canada), Tao Tang (Beijing Jiaotong University, P.R. China), Bing Bu (State Key Lab of Rail Control and Safety, Beijing Jiaotong University, P.R. China) .......................................................................................................................... 1353

Extending the Detection Range of Vision-based Driver Assistance Systems Application to Pedestrian Protection System
Abdelhamid Mammeri (University of Ottawa, Canada), Tianyu Zuo (University of Ottawa, Canada), Azzedine Boukerche (University of Ottawa, Canada) .......................................................................................................................... 1358

A Novel Frequency Selective Sounding Scheme for TDD LTE-Advanced Systems
Shengjie Zhao (Tongji University, P.R. China), Baolong Zhou (Shanghai Jiaotong University, Alcatel-Lucent Shanghai Bell & Alcatel-Lucent Shanghai Bell Company Ltd, P.R. China), Daqiang Zhang (Tongji University, P.R. China) .......................................................................................................................... 1364

Service Provision for Incompatible Polarization Satellite Assets via Wavefront Multiplexing Techniques
Donald Chang (Spatial Digital Systems, USA), Joe Lee (SDS, Inc., USA), Tzer-Hso Lin (SDS, USA) .................................................................................................................................................. 1370

Predictive Delay-Aware Network Selection in Data Offloading
Haoran Yu (The Chinese University of Hong Kong, Hong Kong), Man Hon Cheung (The Chinese University of Hong Kong, Hong Kong), Longbo Huang (Tsinghua University, P.R. China), Jianwei Huang (The Chinese University of Hong Kong, Hong Kong) .......................................................................................................................... 1376
Proactive Content Caching utilizing Transportation Systems and its Evaluation by Field Experiment
Kenji Kanai (Waseda University, Japan), Takeshi Muto (Waseda University, Japan), Hirotoki Kisara (Waseda University, Japan), Jiro Katto (Waseda University, Japan), Toshitaka Tsuda (Waseda University & Formerly Fujitsu, Japan), Kameyama Wataru (Waseda University, Japan), Yong Jin Park (Waseda University, Japan), Takuro Sato (Waseda University, Japan) .......................... 1382

Wireless Video

QoE Driven Video Streaming in Cognitive Radio Networks: The Case of Single Channel Access
Zhifeng He (Auburn University, USA), Shiwen Mao (Auburn University, USA), Sastry Kompella (Naval Research Laboratory, USA) ........................................................................................................... 1388

SSIM-Based Cross-Layer Optimized Video Streaming over LTE Downlink
Pinghua Zhao (Institute of Acoustics, Chinese Academy of Sciences, P.R. China), Yanwei Liu (Institute of Acoustics, Chinese Academy of Sciences, P.R. China), Jinxia Liu (Zhejiang Wanli University, P.R. China), Ruixiao Yao (Institute of Acoustics, Chinese Academy of Sciences, P.R. China), Song Ci (University of Nebraska-Lincoln, USA) .................................................................................................................. 1394

Hierarchical-Matching based Scalable Video Streaming over Multi-channel Cognitive Radio Networks
Ruixiao Yao (Institute of Acoustics, Chinese Academy of Sciences, P.R. China), Yanwei Liu (Institute of Acoustics, Chinese Academy of Sciences, P.R. China), Jinxia Liu (Zhejiang Wanli University, P.R. China), Pinghua Zhao (Institute of Acoustics, Chinese Academy of Sciences, P.R. China), Song Ci (University of Nebraska-Lincoln, USA) .................................................................................................................. 1400

An Optimal Code Rate Design of Multilevel Coded Modulation for Multimedia Data Transmission Employing Unequal Error Protection
Yoshito Watanabe (Yokohama National University, Japan), Hideki Ochiai (Yokohama National University, Japan) .................................................................................................................................................. 1406

Multi-view Video Streaming with Mobile Cameras
Kodera Shiho (Shizuoka University, Japan), Takuya Fujihashi (Osaka University, Japan), Shunsuke Saruwatari (Shizuoka University, Japan), Takashi Watanabe (Osaka University, Japan) .................................................................................................................................................. 1412

Video-QoE Aware Resource Management at Network Core
Vishwanath Ramamurthi (Intel Corporation, USA), Ozgur Oyman (Intel Corporation, USA), Jeffrey Foerster (Intel Corporation, USA) .................................................................................................................................................. 1418

GC14 CT: Globecom 2014 - Communication Theory Symposium

Communications with Energy Harvesting

The Energy Harvesting and Energy Cooperating Two-way Channel with Finite-Sized Batteries
Kaya Tutuncuoglu (Pennsylvania State University, USA), Aylin Yener (Pennsylvania State University, USA) .................................................................................................................................................. 1424

User Cooperation in Wireless Powered Communication Networks
Hyungsik Ju (National University of Singapore, Singapore), Rui Zhang (National University of Singapore, Singapore) .................................................................................................................................................. 1430

Charging and Transmission Time Minimization for Wireless Powered Communication Networks
Xin Kang (Institute for Infocomm Research, Singapore), Chin Keong Ho (Institute for Infocomm Research, A*STAR, Singapore), Sumei Sun (Institute for Infocomm Research, Singapore) .................................................................................................................................................. 1436
A Harvest-Then-Cooperate Protocol for Wireless Powered Cooperative Communications
He Chen (The University of Sydney, Australia), Yonghui Li (University of Sydney, Australia), Jun Li (University of Sydney, Australia), João Luiz Rebelatto (Federal University of Technology - Parana, Brazil), Bartolomeu F. Uchôa-Filho (Federal University of Santa Catarina & Communications Research Group, Brazil), Branka Vucetic (The University of Sydney, Australia) ............................................................... N/A

Energy Harvesting Communications with Energy and Data Storage Limitations
Burak Varan (The Pennsylvania State University, USA), Aylin Yener (Pennsylvania State University, USA) ......................................................... 1442

Performance Analysis of Ambient RF Energy Harvesting: A Stochastic Geometry Approach
Ian Flint (Nanyang Technological University, Singapore), Xiao Lu (Nanyang Technological University, Singapore), Nicolas Privault (Nanyang Technological University, Singapore), Dusit Niyato (Nanyang Technological University, Singapore), Ping Wang (Nanyang Technological University, Singapore) ................................................................. 1448

Selected Topics in Communication Theory

Source-Channel Coding over Gaussian Sensor Networks with Active Sensing
Emrah Akyol (University of Illinois at Urbana-Champaign, USA), Urbashi Mitra (University of Southern California, USA) ........................................................................................................ 1454

A Recursive Partitioning Algorithm for Space Information Flow
Jiaqing Huang (Huazhong University of Science and Technology, P.R. China), Zongpeng Li (University of Calgary, Canada) ............................................. 1460

The Role of Computational Outage in Dense Cloud-Based Centralized Radio Access Networks
Matthew Valenti (West Virginia University, USA), Salvatore Talarico (West Virginia University, USA), Peter Rost (NEC Laboratories Europe, Germany) ........................................................................ 1466

Variance-Constrained Capacity of the Molecular Timing Channel with Synchronization Error
Malcolm Egan (Czech Technical University in Prague, Czech Republic), Yansha Deng (Queen Mary, University of London, United Kingdom), Maged Elkashlan (Queen Mary, University of London, United Kingdom), Trung Q. Duong (Queen's University Belfast, United Kingdom) ..................................................................................... 1473

Power Control in Fading Broadcast Channels With Random Arrivals and QoS Constraints
Mustafa Ozmen (Syracuse University, USA), M. Cenk Gursoy (Syracuse University, USA) ........................................................................................................... 1479

Increasing the Throughput of HARQ via Multi-packet Transmission
Aata El Hamss (INRS-EMT, Canada), Leszek Szczecinski (INRS-EMT, Canada), Pablo Piantanida (SUPELEC, France) .................................................................................................................. 1485

Coding Theory

Approaching the Ergodic Capacity with Lattice Coding
Ahmed Hindy (University of Texas at Dallas, USA), Aria Nosratinia (University of Texas, Dallas, USA) .............................................................. 1492

A Merry-Go-Round Decoding Scheme for Non-binary Quasi-Cyclic LDPC Codes
Keke Liu (Department of ECE, University of California, Davis, USA), Juane Li (University of California at Davis, USA), Shu Lin (UC Davis, USA), Khaled Abdel-Ghaffar (University of California, USA) ............................................................................. 1497

Asynchronous Compute-and-Forward/Integer-Forcing with Quasi-Cyclic Codes
Ping-Chung Wang (Texas A&M University, USA), Yu-Chih Huang (Texas A&M University, USA), Krishna Narayanan (Texas A&M University, USA) .................................................................................. 1504

Predicting the Performance of an Iterative MIMO MMSE Receiver with Vertical Encoding
Jarkko Huusko (University of Oulu, Finland), Juha Pyhtila (University of Oulu, Finland), Markku Juntti (University of Oulu, Finland) .......................................................................................................... 1510

Distributed Source Coding for Controlling Cyber Physical Systems with Application in Smart Grids
Husheng Li (University of Tennessee, USA), Zhu Han (University of Houston, USA) ........................................................................................................ 1516
Heterogeneous Networks

A Heterogeneous Cellular Network Model with Inter-tier Dependence
Na Deng (University of Science and Technology of China, P.R. China), Wuyang Zhou (University of Science and Technology of China, P.R. China), Martin Haenggi (University of Notre Dame, USA) 1522

Cooperative Retransmission in Heterogeneous Cellular Networks
Gaurav Nigam (University of Notre Dame, USA), Paolo Minero (University of Notre Dame, USA), Martin Haenggi (University of Notre Dame, USA) 1528

Downlink Coverage Probability in MIMO HetNets with Flexible Cell Selection
Abhishek Kumar Gupta (University of Texas At Austin, USA), Harpreet S Dhillon (Virginia Tech, USA), Sriram Vishwanath (University of Texas Austin, USA), Jeffrey Andrews (The University of Texas at Austin, USA) 1534

Distributed SIR-Aware Opportunistic Access Control for D2D Underlaid Cellular Networks
Zheng Chen (SUPELEC, France), Marios Kountouris (Supélec, France) 1540

Traffic Driven Resource Allocation in Heterogenous Wireless Networks
Binnan Zhuang (Northwestern University, USA), Dongning Guo (Northwestern University, USA), Michael Honig (Northwestern University, USA) 1546

Analysis on the SINR Performance of Dynamic TDD in Homogeneous Small Cell Networks
Ming Ding (National Information and Communications Technology Australia, Australia), David López-Pérez (Bell Labs Alcatel-Lucent, Ireland), Athanasios V. Vasilakos (National Technical University of Athens & Kuwait University, Greece), Wen Chen (Shanghai Jiao Tong University, P.R. China) 1552

Network Coding

Space-Time Physical-Layer Network Coding: Harnessing Interference in Multi-Way Communication
Namyoon Lee (The University of Texas at Austin, USA), Robert Heath (The University of Texas at Austin, USA) 1559

Joint Network and Dirty-Paper Coding for Multi-way Relay Networks with Pairwise Information Exchange
Jin Sima (Tsinghua University, P.R. China), Wei Chen (Tsinghua University, P.R. China) 1565

Physical-Layer Shaped Network Coding with M-PAM Modulation
Yaozhe Hou (Shanghai Jiao Tong University, P.R. China), Zhiyong Chen (Shanghai Jiao Tong University, P.R. China), Bin Xia (Shanghai Jiao Tong University, P.R. China), Hui Liu (Shanghai JiaoTong University, P.R. China) 1571

Detection of Imperfectly Synchronized Data Streams in Physical Layer Network Coding
Scott Miller (Texas A&M University, USA) 1577

A Game Theoretic Approach to Minimize the Completion Time of Network Coded Cooperative Data Exchange
Ahmed Douik (King Abdullah University of Science and Technology (KAUST), Saudi Arabia), Sameh Sorour (King Fahd University of Petroleum and Minerals (KFUPM), Saudi Arabia), Hamidou Tembine (Supelec, France), Tareq Y. Al-Naffouri (King Abdullah University of Science and Technology, USA), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia) 1583

Delay Constrained Throughput-Reliability Tradeoff in Network-Coded Wireless Systems
David Adams (MIT, USA), Jinfeng Du (MIT & KTH (Sweden), USA), Muriel Mèdard (MIT, USA), Christopher Yu (The Charles Stark Draper Laboratory, USA) 1590
Physical Layer Security

**On the Security of Cooperative Single Carrier Systems**
Lifeng Wang (Queen Mary, University of London, United Kingdom), Kyeong Jin Kim (Mitsubishi Electric Research Laboratories (MERL), USA), Trung Q. Duong (Queen's University Belfast, United Kingdom), Maged Elkashlan (Queen Mary, University of London, United Kingdom), H. Vincent Poor (Princeton University, USA) ................................................................. 1596

**On the Secrecy Capacity of the MISO Wiretap Channel under Imperfect Channel Estimation**
Zouheir Rezki (King Abdullah University of Science and Technology (KAUST), Saudi Arabia), Basel Alomair (King Abdulaziz City for Science and Technology, Saudi Arabia), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia) ..................... 1602

**On the Secrecy Capacity of the Broadcast Wiretap Channel with Imperfect Channel State Information**
Amal Hyadi (King Abdullah University of Science and Technology, Saudi Arabia), Zouheir Rezki (King Abdullah University of Science and Technology (KAUST), Saudi Arabia), Ashish Khisti (University of Toronto, Canada), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia) ............................................................... 1608

**Joint Information- and Jamming-Beamforming for Full Duplex Secure Communication**
Fengchao Zhu (University of Tsinghua, P.R. China), Feifei Gao (Tsinghua University, P.R. China), Minli Yao (The High-Tech Institute of Xi’an, P.R. China), Li Jian (The High-Tech Institute of Xi’an, P.R. China) ........................................................................................................ 1614

**Optimal Jamming Strategies in Digital Communications-Impact of Modulation**
SaiDhiraj Amuru (Virginia Tech, USA), Michael Buehrer (Virginia Tech, USA) ........................................ 1619

**Transmitter Optimization in MISO Broadcast Channel with Common and Secret Messages**
Sanjay Vishwakarma (Indian Institute of Science, Bangalore, India), A. Chockalingam (Indian Institute of Science, India) .................................................................................................................. 1625

MIMO Systems

**Downlink training codebook design and hybrid precoding in FDD massive MIMO Systems**
Song Noh (Purdue University, USA), Michael Zoltowski (Purdue University, USA), David Love (Purdue University, USA) ........................................................................................................ 1631

**Broadcast precoding for massive MIMO subject to an instantaneous total power constraint**
Mohammad Ali Sedaghat (Norwegian University of Science and Technology, Norway), Ralf R. Müller (University of Erlangen-Nuremberg, Germany), Georg Fischer (University of Erlangen-Nuremberg & Eesy-id, Germany) ........................................................................................................ 1637

**Throughput Optimization for Training-Based Large-Scale Virtual MIMO Systems**
Zhiyan Wang (The Chinese University of Hong Kong, Hong Kong), Xiaojun Yuan (ShanghaiTech University, P.R. China), Ying Jun (Angela) Zhang (The Chinese University of Hong Kong, Hong Kong) ........................................................................................................ 1642

**Exploiting Large-Scale MIMO Techniques for Physical Layer Security with Imperfect Channel State Information**
Xiaoming Chen (Nanjing University of Aeronautics and Astronautics, P.R. China), Chau Yuen (Singapore University of Technology and Design, Singapore), Zhaoyang Zhang (Zhejiang University, P.R. China) ........................................................................................................ 1648

**Faster Information Propagation on Highways: a Virtual MIMO Approach**
Hui Wu (Zhejiang University, P.R. China), Zhaoyang Zhang (Zhejiang University, P.R. China), Huazi Zhang (Zhejiang University, P.R. China) ........................................................................................................ 1654

**Generalized Signal Alignment For Arbitrary MIMO Two-Way Relay Channels**
Kangqi Liu (Shanghai Jiao Tong University, P.R. China), Meixia Tao (Shanghai Jiao Tong University, P.R. China), Dingcheng Yang (Nanchang University, P.R. China) ............................................................. 1661
### Interference Management

**Settling Conjectures on the Collapse of Degrees of Freedom under Finite Precision CSIT**  
Arash Gholami-Davoodi (University of California Irvine, USA), Syed Ali Jafar (University of California Irvine, USA) .......................................................... 1667

**System-level Performance of Interference Alignment**  
Ratheesh K. Mungara (Universitat Pompeu Fabra (UPF), Spain), David Morales (Hong Kong University of Science and Technology, Hong Kong), Angel Lozano (Universitat Pompeu Fabra (UPF), Spain) .......................................................... 1673

**On Design of Improper Signaling for SER Minimization in K-User Interference Channel**  
Hieu Duy Nguyen (Institute for Infocomm Research (I2R), The Agency for Science, Technology and Research (ASTAR), Singapore), Rui Zhang (National University of Singapore, Singapore), Sumei Sun (Institute for Infocomm Research, Singapore) .......................................................... 1679

**Degrees of Freedom for a two-cell relay network with soft handoffs**  
Ahmed Zamzam (Nile University, Egypt), Amr El-Keyi (Nile University, Egypt), Mohammed Nafie (Cairo University and Nile University, Egypt), Yahya Mohasseb (Nile University, Egypt) .......... 1685

**Achievable Degrees of Freedom of MIMO Multiway Relaying with Pairwise Data Exchange**  
Rui Wang (The Chinese University of Hong Kong, P.R. China), Xiaojun Yuan (ShanghaiTech University, P.R. China) ........................................................................... 1692

**Distributed Channel Quantization for Two-User Interference Networks**  
Xiaoyi Liu (University of California, Irvine, USA), Erdem Koyuncu (University of California, Irvine, USA), Hamid Jafarkhani (University of California, Irvine, USA) .......................................................... 1698

### Relay Channels

**Rank-Matching for Multihop Multiflow**  
Sundar Rajan Krishnamurthy (University of California Irvine, USA), Syed Ali Jafar (University of California Irvine, USA) ........................................................................... 1704

**Half-Duplex Relaying Over Slow Fading Multiple Access Channel**  
Ming Lei (Concordia University, Canada), M. Reza Soleymani (Concordia University, Canada) ...... 1710

**Achievable Rates for the Fading Three-Hop Half-Duplex Relay Network using Buffer-Aided Relaying**  
Hebatallah Shoukry (Friedrich-Alexander-University Erlangen-Nurnberg, Germany), Nikola Zlatanov (University of British Columbia, Canada), Vahid Jamali (Friedrich-Alexander-University Erlangen-Nurnberg, Germany), Robert Schober (University of British Columbia, Canada) ........................................................................... 1716

**Outage Analysis for Half-Duplex Partial Decode-Forward Relaying over Fading Channels**  
Ahmad Abu Al Haija (McGill University, Canada), Mai Vu (Tufts University, USA) ......................... 1722

**Stochastic Throughput Optimization for Two-hop Systems with Finite Relay Buffers**  
Bo Zhou (Shanghai Jiao Tong University, P.R. China), Ying Cui (MIT, USA), Meixia Tao (Shanghai Jiao Tong University, P.R. China) ........................................................................... 1728

**Beamforming for Secure Two-Way Relay Networks with Physical Layer Network Coding**  
Cong Zhang (Beijing University of Posts and Telecommunications, P.R. China), Hui Gao (Beijing University of Posts and Telecommunications, P.R. China), Tiejun Lv (Beijing University of Posts and Telecommunications, P.R. China), Yueming Lu (Beijing University of Posts and Telecommunications, P.R. China), Xin Su (Tsinghua University, P.R. China) ......................... 1734
Communication System Performance

**Characterization of Coded Random Access with Compressive Sensing based Multi-User Detection**
Yalei Ji (University of Bremen, Germany), Čedomir Stefanović (Aalborg University & University of Novi Sad, Denmark), Carsten Bockelmann (University of Bremen, Germany), Armin Dekorsy (University of Bremen & Institute for Telecommunications and High-Frequency Techniques, Germany), Petar Popovski (Aalborg University, Denmark) .................................................. 1740

**Capacity per Unit Area of Distributed Antenna Systems with Centralized Processing**
Laura Cottatellucci (EURECOM, France) .................................................................................................................. 1746

**The Asymptotic Equivalence between Sensing Systems with Energy Harvesting and Conventional Energy Sources**
Jingxian Wu (University of Arkansas, USA), Jing Yang (University of Arkansas, USA) .......................... 1753

**Cooperative Versus Noncooperative Cellular Wireless Systems**
Dushyantha Basnayaka (The University of Edinburgh, United Kingdom), Harald Haas (The University of Edinburgh, United Kingdom) ................................................................. 1759

**Closed-Form CRLBs for SNR Estimation from Turbo-Coded Square-QAM-Modulated Signals**
Faouzi Bellili (INRS, Canada), Achref Methenni (Institut National de la Recherche Scientifique, INRS-EMT, Montreal, Canada), Sofiene Affes (INRS-EMT, Canada) ........................................................................... 1765

**Truncated Multi-hop ARQ Type-I: Outage Probability and Throughput Analysis**
Ali Asghar Haghighi (INRS-EMT, Canada), Leszek Szczecinski (INRS-EMT, Canada), Fabrice Labeau (McGill University, Canada) ...................................................................................................... 1772

---

**GC14 NGN: Globecom 2014 - Next Generation Networking Symposium**

**Next Generation Wireless Network Design**

**Energy-Efficient Base Station Cooperation in Downlink Heterogeneous Cellular Networks**
Weili Nie (Southeast University, P.R. China), Xiaoming Wang (Southeast University, P.R. China), Fu-Chun Zheng (The University of Reading, United Kingdom), Wenyi Zhang (University of Science and Technology of China, P.R. China) ................................................................................................. 1779

**A Novel Intelligent Mobile Backhaul RAN Architecture for Emerging Heterogeneous Networks**
Shahab Hussain (The City University of New York & Alcatel-Lucent, USA), Syed Rashid Zaidi (City University Of New York, USA), Ajaz Sana (Bronx Community College of the City University of New York, USA), Mohamed A Ali (City University of New York, USA) ........................................................................ 1785

**An Interference Cancellation Strategy for Broadcast in Hierarchical Cell Structure**
Yuli Yang (Meliksah University, Turkey), Sonia Aïssa (INRS, University of Quebec, Canada), Ahmed M. Eltawil (University of California, Irvine, USA), Khaled Nabil Salama (KAUST, Saudi Arabia) ...................................................................................................................... 1792

**Downlink and Uplink Decoupling: a Disruptive Architectural Design for 5G Networks**
Hisham ElShaer (King's College London - Vodafone Group, United Kingdom), Federico Boccardi (Vodafone Group, United Kingdom), Mischa Dohler (King's College London, United Kingdom), Ralf Irmer (Vodafone Group, United Kingdom) ................................................................................................. 1798

**QoE-Centric Localized Mobility Management for Future Mobile Networks**
Esmat Mirzamany (Middlesex University, United Kingdom), Vasilis Friderikos (King's College London, United Kingdom) ........................................................................................................... N/A

**Base Station Density Optimization for High Energy Efficiency in Two-Tier Cellular Networks**
Lei Li (BUPT, P.R. China), Mugen Peng (Beijing University of posts & Telecommunications, P.R. China), Changqing Yang (Huawei Technologies Co., Ltd., P.R. China), Yong Wu (Huawei Technologies Co., Ltd., P.R. China), Wenqian Xue (Beijing University of Posts and Telecommunications, P.R. China), Yong Li (Beijing University of Posts and Telecommunications, P.R. China) .................................................................................. 1804
Virtual Network Design

Efficient Joint Approaches for Location-Constrained Survivable Virtual Network Embedding
Huihui Jiang (University of Science and Technology of China, P.R. China), Long Gong (University of Science and Technology of China, P.R. China), Zuqing Zhu (University of Science and Technology of China, P.R. China) ............................................................... 1810

Evaluation of parallel processing control of virtual switch architecture on large-scale network
Hiroki Date (NTT, Japan), Kenichi Higuchi (NTT, Japan), Masaru Katayama (NTT Network Service Systems Labs, Japan), Hiroaki Ogawa (NTT, Japan) ............................................................... 1816

Topology-Aware Virtual Network Embedding to Survive Multiple Node Failures
Ailing Xiao (Beijing University of Posts and Telecommunications, P.R. China), Ying Wang (Beijing University of Posts and Telecommunications, P.R. China), Luoming Meng (Beijing University of Posts and Telecommunications, P.R. China), Qiu Xue-song (Beijing University of Posts and Telecommunications, P.R. China), Li Wenjing (Beijing University of Posts and Telecommunications, P.R. China) ........................................................................ 1823

Network Virtualization with Dynamic Resource Pooling and Trading Mechanism
Weisheng Xie (University of Texas at Dallas, USA), Jiafeng Zhu (Huawei Technologies Co., Ltd., USA), Changcheng Huang (Carleton University, Canada), Min Luo (Huawei Technologies, USA), Wu Chou (Huawei Technologies Co., Ltd., P.R. China) ........................................................................ 1829

Network Virtualization and Direct Ethernet Transport for Packet Data Network Connections in 5G Wireless
John Kaippallimalil (Huawei Technologies (USA), USA), H Anthony Chan (Huawei Technologies, USA) ........................................................................ 1836

VNE-RFD: Virtual Network Embedding with Resource Fragmentation Consideration
Xing Li (University of Science and Technology of China, P.R. China), Hancheng Lu (University of Science and Technology of China, P.R. China), Wei Zhou (Huawei, P.R. China), Peilin Hong (Dept. EEIS & USTC, P.R. China) ........................................................................ 1842

Content Centric Network Design

A Distributed Energy Consumption Optimization Algorithm for Content-Centric Networks via Dual Decomposition
Chao Fang (Beijing University of Posts and Telecommunications, Canada), F. Richard Yu (Carleton University, Canada), Tao Huang (Beijing University of Posts and Telecommunications, P.R. China), Jiang Liu (Beijing University of Posts and Telecommunications, P.R. China), Yunjie Liu (Beijing University of Posts and Telecommunications, P.R. China) ........................................................................ 1848

Content-Aware Planning Models for Information-Centric Networking
Michele Mangili (Université Paris-Sud & Laboratoire de Recherche en Informatique (LRI), France), Fabio Martignon (Université Paris-Sud, France), Antonio Capone (Politecnico di Milano, Italy), Federico Malucelli (Politecnico di Milano, Italy) ........................................................................ 1854

Quality of Service in an Information-Centric Network
Mays F Al-Naday (University of Essex, United Kingdom), Andreas Bontozoglou (University of Essex, United Kingdom), Vassilios G. Vassilakis (University of Surrey, United Kingdom), Martin J Reed (University of Essex, United Kingdom) ........................................................................ 1861

Pending-Interest-Driven Cache Orchestration Through Network Function Virtualization
Kalika Suksomboon (KDDI R&D Laboratories Inc., Japan), Masaki Fukushima (KDDI R&D Laboratories Inc., Japan), Michiaki Hayashi (KDDI R&D Laboratories Inc., Japan), Yusheng Ji (National Institute of Informatics, Japan) ........................................................................ 1867

Minimizing Bandwidth Cost of CCN: a Coordinated In-network Caching Approach
Yuemei Xu (Beijing Foreign Studies University, P.R. China), Yang Li (Institute of Acoustics, Chinese Academy of Sciences, P.R. China), Wei An (High Performance Network Lab, IOA, Chinese Academy of Sciences, P.R. China), Tao Lin (Institute of Acoustics, Chinese Academy of Sciences, P.R. China), Song Ci (University of Nebraska-Lincoln, USA) ........................................................................ N/A
Software Defined Network Design

Control Traffic Protection in Software-Defined Networks
Yannan Hu (Beijing University of Posts and Telecommunications, P.R. China), Wendong Wang (Beijing University of Posts and Telecommunications, P.R. China), Gong Xiangyang (Beijing University of Posts and Telecommunications P.R. China, P.R. China), Chi Harold Liu (Beijing Institute of Technology, P.R. China), Xirong Que (Institute of Networking Technology, P.R. China), Shiduan Cheng (Beijing University of Posts & Telecommunications, P.R. China) ........................................ 1878

Flow-level consistent update in SDN based on K-prefix covering
Kun Zhao (Tsinghua University & Graduate School at Shenzhen, P.R. China), Qing Li (Graduate School at Shenzhen, Tsinghua University, P.R. China), Yong Jiang (Graduate School at Shenzhen, Tsinghua University, P.R. China) ................................................................. 1884

Scalable and Bandwidth-Efficient Multicast for Software-Defined Networks
Liang-Hao Huang (Academia Sinica, Taiwan), Hui-Ju Hung (Academia Sinica, Taiwan), Chih-Chung Lin (Academia Sinica, Taiwan), De-Nian Yang (Academia Sinica, Taiwan) .................................................. 1890

AHTM: Achieving Efficient Flow Table Utilization in Software Defined Networks
Linlian Zhang (University of Electronic Science and Technology of China, P.R. China), Rongping Lin (University of Electronic Science and Technology of China, P.R. China), Shizhong Xu (University of Electronic Science and Technology of China, P.R. China), Sheng Wang (University of Electronic Science and Technology of China, P.R. China) ............................................... 1897

A Robust SDN Network Architecture for Service Providers
Fernando López Rodríguez (Universidade de Brasilia (UNB), Brazil), Divanilson R. Campelo (Universidade Federal de Pernambuco, Brazil) ........................................................... 1903

Survivor: an Enhanced Controller Placement Strategy for Improving SDN Survivability
Lucas F. Müller (Federal University of Rio Grande do Sul, Brazil), Rodrigo Ruas Oliveira (Federal University of Rio Grande do Sul (UFRGS), Brazil), Marcelo Caggiani Luizelli (Federal University of Rio Grande do Sul, Brazil), Luciano Paschoal Gaspar (Federal University of Rio Grande do Sul, Brazil), Marinho P. Barcellos (Federal University of Rio Grande do Sul, Brazil) .......... 1909

Next Generation Network Design I

Design of Bandwidth Guaranteed OpenFlow Virtual Networks Using Robust Optimization
Steven S. W. Lee (National Chung Cheng University, Taiwan), Kuang-Yi Li (National Chung Cheng University, Taiwan), Kwan Yee Chan (National Chung Cheng University, Taiwan), Yao Chuan Chung (National Chung Cheng University, Taiwan), Guan-Hao Lai (National Chung Cheng University, Taiwan) .......................................................... 1916

An Autonomous Decentralized Adaptive Function for Retaining Control Strength in Large-Scale and Wide-Area System
Yusuke Sakumoto (Tokyo Metropolitan University, Japan), Masaki Aida (Tokyo Metropolitan University, Japan), Hideyuki Shimonishi (NEC, Japan) ..................................................... 1923

Leveraging Locality for FIB Aggregation
Nadi Sarrar (TU Berlin, Germany), Robert Wuttke (TU Berlin & Telekom Innovation Laboratories, Germany), Stefan Schmid (T-Labs & TU Berlin, Germany), Marcin Bienkowski (University of Wroclaw, Poland), Steve Uhlig (UK & Queen Mary, University of London, United Kingdom) ............................................................... 1930

Flow Aggregation for Traffic Engineering
Noriaki Kamiyama (Osaka University & NTT Network Technology Laboratories, Japan), Yousuke Takahashi (NTT, Japan), Keisuke Ishibashi (NTT, Japan), Kohei Shiomoto (NTT, Japan), Tatsuya Otoshi (Osaka University, Japan), Yuichi Ohsita (Osaka University, Japan), Masayuki Murata (Osaka University, Japan) .................................................. 1936
Route Leak Detection Using Real-Time Analytics on local BGP Information
Muhammad Shuaib Siddiqui (Universitat Politecnica de Catalunya & CRAAX and NetIT Lab, Spain), Diego Montero (Technical University of Catalonia (UPC) & Networking and Information Technology Lab NetIT Lab, Spain), Marcelo Yannuzzi (Technical University of Catalonia (UPC) & Networking and Information Technology Lab, Spain), René Serral-Gracià (Technical University of Catalonia (UPC), Spain), Xavier Masip-Bruin (Universitat Politècnica de Catalunya & Advanced Network Architectures Lab (CRAAX), Spain), Wilson Ramirez (Technical University of Catalonia (UPC) & CRAAX, Networking and Information Technology Lab, Spain) .......................................................... 1942

A Fast Lagrangian Relaxation Algorithm for Finding Multi-Constrained Multiple Shortest Paths
Gang Feng (University of Wisconsin, Platteville, USA) ......................................................... 1949

Next Generation Network Design II

Adding Geographic-awareness to DHT-based Object Naming Service Architectures
Ahmed Jedda (University of Ottawa, Canada), Hussein T Mouftah (University of Ottawa, Canada) .......................................................... N/A

FlowCover: Low-cost Flow Monitoring Scheme in Software Defined Networks
Zhiyang Su (Hong Kong University of Science and Technology, Hong Kong), Ting Wang (Hong Kong University of Science and Technology, Hong Kong), Yu Xia (Hong Kong University of Science and Technology, P.R. China), Mounir Hamdi (Hong Kong University of Science and Technology, P.R. China) .......................................................... 1956

Efficient Integration of Software Defined Networking and Information-Centric Networking with CoLoR
Luo Hongbin (Beijing Jiaotong University, P.R. China), Jianbo Cui (Beijing Jiaotong University, P.R. China), Zhe Chen (Beijing Jiaotong University, P.R. China), Mingshuang Jin (Beijing Jiaotong University, P.R. China), Zhang Hongke (Beijing Jiaotong University, P.R. China) .......................................................... 1962

Give Me a Broadcast-Free Network
Po-Wen Chi (National Taiwan University, Taiwan), Yu-Cheng Huang (National Taiwan University, Taiwan), Jing-Wei Guo (Institute for Information Industry, Taiwan), Chin-Laung Lei (National Taiwan University, Taiwan) .......................................................... 1968

Reliable Video over Software-Defined Networking (RVSDN)
Harold Owens, II (IUPUI, USA), Arjan Durresi (Indiana Un. Purdue University Indianapolis, USA), Raj Jain (Washington University in St. Louis, USA) .......................................................... 1974

Multi-Domain Grooming in Power Source Aware Networks
Thilo Schöndienst (University of Massachusetts Lowell, USA), Vinod M. Vokkarane (University of Massachusetts Lowell, USA) .......................................................... 1980

Forwarding Design and Next Generation Network Management

A Scalable and Flexible Packet Forwarding Method for Future Internet Networks
Andrzej Beben (Warsaw University of Technology, Poland), Piotr Wiśniewski (Warsaw University of Technology, Poland), Jordi Mongay Batalla (National Institute of Telecommunications & Warsaw University of Technology, Poland), George K Xilouris (NCSR Demokritos, Greece) .......................................................... 1986

Discounted Integral Priority Routing For Data Networks
Michael Zargham (University of Pennsylvania, USA), Alejandro Ribeiro (University of Pennsylvania, USA), Ali Jadabaie (University of Pennsylvania, USA) .......................................................... 1993

Bandwidth Efficient Multicast in HetNets
Dong Ma (Soochow University, P.R. China), Maode Ma (Nanyang Technological University, Singapore) .......................................................... 1999
An Architecture for Dynamic Resource Adjustment in VSDNs based on Traffic Demand
Rafael Gomes (University of Campinas (UNICAMP) & UCLA, Brazil), Luiz F. Bittencourt (University of Campinas, Brazil), Edmundo Madeira (State University of Campinas, Brazil), Eduardo Cerqueira (Federal University of Para & UCLA & UFPA & UCLA, Brazil), Mario Gerla (University of California at Los Angeles, USA) .............................................................................................................. 2005

Joint Resource Allocation for eICIC in Heterogeneous Networks
Weijun Tang (South China University of Technology, P.R. China), Rongbin Zhang (South China University of Technology & School of Electronic and Information Engineering, P.R. China), Yuan Liu (South China University of Technology, P.R. China), Suili Feng (South China University of Technology, P.R. China) .............................................................................................................. 2011

Experimental evaluation of a Recursive InterNetwork Architecture prototype
Sander Vrijders (Ghent University - iMinds, Belgium), Dimitri Staessens (Ghent University - iMinds, Belgium), Didier Colle (iMinds - Ghent University, Belgium), Francesco Salvestrini (Nextworks s. r. l., Italy), Vincenzo Maffione (Nextworks, Italy), Leonardo Bergesio (i2CAT, Spain), Miquel Tarzan-Lorente (i2Cat Foundation, Spain), Bernat Gastón (Fundació i2CAT, Internet i Innovació Digital a Catalunya, Spain), Eduard Grasa (Fundació i2CAT, Internet i Innovació Digital a Catalunya, Spain) .............................................................................................................. 2017

GC14 ONS: Globecom 2014 - Optical Networks and Systems Symposium

Switching and Routing in Optical Networks

Minimum-Cost Survivable Virtual Optical Network Mapping in Flexible Bandwidth Optical Networks
Bowen Chen (School of Electronic and Information Engineering, Soochow University & Beijing University of Posts and Telecommunications, P.R. China), Jie Zhang (Beijing University of Posts and Telecommunications, P.R. China), Weisheng Xie (University of Texas at Dallas, USA), Jason P. Jue (University of Texas at Dallas, USA), Yongli Zhao (Beijing University of Posts and Telecommunications, P.R. China), Xi Wang (Fujitsu Network Communications & Southern Methodist University, USA), Motoryoshi Sekiya (Fujitsu Laboratories of America, Inc., USA) .............................................................................................................. 2023

Grooming Demands instead of Traffic: Benefits of a Choice-Based Approach to Green Optical Networks
Ahmet C Babaoglu (North Carolina State University, USA), Rudra Dutta (North Carolina State University, USA) .............................................................................................................. 2029

Metropolitan and Access Network Architecture Design for Optical Flow Switching
Anny Xijia Zheng (Massachusetts Institute of Technology, USA), Lei Zhang (MIT, USA), Vincent Chan (Massachusetts Institute of Technology, USA) .............................................................................................................. 2036

Virtual Optical Network Embedding in Multi-Domain Optical Networks
Sangjin Hong (University of Texas at Dallas, USA), Jason P. Jue (University of Texas at Dallas, USA), Qiong Zhang (Fujitsu Laboratories of America, USA), Xi Wang (Fujitsu Laboratories of America, USA), Hakki Candan Cankaya (Fujitsu Network Communications & Southern Methodist University, USA), Qingya She (Fujitsu Network Communications, USA), Motoryoshi Sekiya (Fujitsu Laboratories of America, Inc., USA) .............................................................................................................. 2042

Design of Optical and Electronic Combined Buffer Architecture for Optical Packet Switches
Takahiro Hirayama (National Institute of Information and Communications Technology, Japan), Takaya Miyazawa (National Institute of Information and Communications Technology (NICT), Japan), Hiroaki Harai (National Institute of Information and Communications Technology, Japan) .............................................................................................................. 2048

Multiple input single output optical buffers for asynchronous optical packet switched networks
Shuna Yang (ITEM, Norwegian University of Science and Technology, Norway), Norvald Stol (Norwegian University of Science and Technology, Norway) .............................................................................................................. 2054
Multiplexing, Modulation and Channel Capacity

Improved Indoor VLC MIMO Channel Capacity Using Mobile Receiver with Angular Diversity Detectors
Paul Fahamuel (University of Edinburgh & Dar Es Salaam Institute of Technology-Tanzania, United Kingdom), John Thompson (University of Edinburgh, United Kingdom), Harald Haas (The University of Edinburgh, United Kingdom) ................................................................. 2060

Capacity Bounds for Dimmable Visible Light Communications Using PIN Photodiodes with Input-Dependent Gaussian Noise
Jin-Yuan Wang (Southeast University, P.R. China), Jun-Bo Wang (Southeast University, P.R. China), Ming Chen (Southeast University, P.R. China), Jiangzhou Wang (University of Kent, United Kingdom) ........................................................................................................... 2066

Analysis of downlink transmission in DCO-OFDM-based optical attocell networks
Cheng Chen (University of Edinburgh, United Kingdom), Muhammad Ijaz (University of Edinburgh, United Kingdom), Dobroslav A. Tsonev (University of Edinburgh, United Kingdom), Harald Haas (The University of Edinburgh, United Kingdom) ........................................................................................................... 2072

Secret Key Agreement for Free-Space Optical Communications Over Strong Turbulence Channels
Ning Wang (The University of British Columbia, Canada), Xuegui Song (University of British Columbia, Canada), Julian Cheng (University of British Columbia, Canada), Victor CM Leung (The University of British Columbia, Canada) ........................................................................................................... 2078

Mohammadreza Aminikashani (The Pennsylvania State University, USA), Mohsen Kavehrad (The Pennsylvania State University -- University Park, USA) ........................................................................................................... 2084

Quadrature Diversity Combining for Pulse-Amplitude Modulated DMT in IM/DD Channels
Celio K H Vasconcelos (University of Brasilia (UnB), Brazil), Andre N Barreto (University of Brasilia (UnB), Brazil), Darli Mello (University of Campinas (UNICAMP), Brazil) ........................................................................................................... 2090

Wireless-Optical Communications

A Compact Signal Constellation for Wireless Optical Communications
Xian Liu (University of Arkansas at Little Rock, USA) ........................................................................................................... 2096

Hadamard Coded Modulation: An Alternative to OFDM for Wireless Optical Communications
Mohammad Noshad (University of Virginia, USA), Maite Brandt-Pearce (University of Virginia, USA) ........................................................................................................... 2102

Single Photon Avalanche Diode (SPAD) VLC System and Application to Downhole Monitoring
Yichen Li (The University of Edinburgh, United Kingdom), Stefan Videv (University of Edinburgh, United Kingdom), Mohamed M. Abdallah (Texas A&M University at Qatar & Cairo University at Cairo, Qatar), Khalid A. Qaraqe (Texas A&M University at Qatar, USA), Murat Uysal (Ozyegin University, Turkey), Harald Haas (The University of Edinburgh, United Kingdom) ........................................................................................................... 2108

Particle Stream Channel Modeling and Estimation for Non-line of Sight Optical Wireless Communication
Chen Gong (University of Science and Technology of China, P.R. China), Zhengyuan Xu (University of Science and Technology of China, P.R. China) ........................................................................................................... 2114

On the Performance of Hybrid Line of Sight RF and RF-FSO Fixed Gain Dual-Hop Transmission Systems
Emna Zedini (KAUST, Saudi Arabia), Imran Shafique Ansari (King Abdullah University of Science and Technology, Saudi Arabia), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia) ........................................................................................................... 2119

A Novel Double-Source Cell Configuration for Indoor Optical Attocell Networks
Zhe Chen (University of Edinburgh, United Kingdom), Dobroslav A. Tsonev (University of Edinburgh, United Kingdom), Harald Haas (The University of Edinburgh, United Kingdom) .......... 2125
Optical Access Network, Metro Area Network, and Elastic Optical Network

Advanced Sleep-Aware Dynamic Bandwidth Allocation for 10G-EPONs
Dung Pham Van (Scuola Superiore Sant’Anna, Italy), Maluge Pubuduni Imali Dias (NICTA Victoria Research Laboratory, Australia), Koteswararao Kondepu (Scuola Superiore Sant’Anna, Italy), Piero Castoldi (Scuola Superiore Sant’Anna, Italy), Elaine Wong (The University of Melbourne, Australia), Luca Valcarenghi (Scuola Superiore Sant’Anna, Italy) 2131

Optimal FSO Relay Nodes Placement With Link Obstacles and Infeasible Regions
Bingcheng Zhu (Southeast University, China), Julian Cheng (University of British Columbia, Canada), Lenan Wu (Southeast University, P.R. China) 2137

Bandwidth Efficient Multi-Level MPPM Encoding Decoding Algorithms for Joint Brightness-Rate Control in VLC Systems
Abu Bakar Siddique (Pakistan Telecommunication Company Limited, Pakistan), Muhammad Tahir (University of Engineering and Technology Lahore, Pakistan) 2143

A Techno-Economic Study of Network Coding Protection Schemes
Wilson Ramirez (Technical University of Catalonia (UPC) & CRAAX, Networking and Information Technology Lab, Spain), Xavier Masip-Bruin (Universitat Politècnica de Catalunya & Advanced Network Architectures Lab (CRAAX), Spain), Eva Marín-Tordera (Technical University of Catalonia UPC, Spain), Marcelo Yannuzzi (Technical University of Catalonia (UPC) & Networking and Information Technology Lab, Spain), Anny Martinez (Technical University of Catalonia (UPC), Spain), Sergio Sánchez-López (Technical University of Catalonia, Spain), Muhammad Shuaib Siddiqui (Universitat Politècnica de Catalunya & CRAAX and NetIT Lab, Spain), Victor López (Telefónica I+D, Spain) 2148

MODE DIVISION MULTIPLEXING NETWORK: A Deployment Scenario in Metro Area Network
Ken’ichi Kitayama (Osaka University, Japan), Akihiro Maruta (Osaka University, Japan), Yuki Yoshida (Osaka University, Japan), Nikolaos Panteleimon Diamantopoulos (Osaka University, Japan), Masaya Nakazawa (Osaka University, Japan), Tomoki Isoda (Osaka University, Japan) 2154

Virtual Network Embedding and Reconfiguration in Elastic Optical Networks
Sunny Shakya (Georgia State University, USA), Nabina Pradhan (Georgia State University, USA), Xiaojun Cao (Georgia State University, USA), Zilong Ye (SUNY-Buffalo, USA), Chunming Qiao (State University of New York at Buffalo, USA) 2160

SDN, Datacenter, and Cloud

Field Trial of a Software Defined Network (SDN) using Carrier Ethernet and Segment Routing in a Tier-1 Provider
Sarvesh Sanjay Bidkar (University of Bristol, United Kingdom), Ashwin A Gumaste (Indian Institute of Technology, Bombay, India), Puneet Ghodasara (Indian Institute of Technology Bombay, India), Saurabh Hote (Indian Institute of Technology Bombay, India), Aniruddha Kushwaha (IIT-Bombay, India), Geetha Patil (BARC, India), Shivalprasad Sonnis (BARC, India), Rishav Ambasta (ECIL, India), Braja Nayak (ECIL, India), Piyush Agrawal (MTNL, India) 2166

Software-Defined DWDM Optical Networks: OpenFlow and GMPLS Experimental Study
Halima Elbiaze (University of Quebec at Montreal, Canada), Karim Idoudi (UQAM, Canada), Mahmoud Bahnasy (UQAM, Canada) 2173

Holding-Time-Aware Routing, Modulation, and Spectrum Assignment for Elastic Optical Networks
Nannan Wang (University of Texas at Dallas, USA), Jason P. Jue (University of Texas at Dallas, USA) 2180

Reliable Resource Allocation with Weighted SRGs for Optically Interconnected Clouds
Yi Zhu (Hawaii Pacific University, USA), Yan Liang (Hawaii Pacific University, USA), Qiong Zhang (Fujitsu Laboratories of America, USA), Xi Wang (Fujitsu Laboratories of America, USA), Paparao Palcharla (FLA, USA), Motoyoshi Sekiya (Fujitsu Laboratories of America, Inc., USA) 2186
GC14 SAC Access Networks and Systems: Globecom 2014 - Symposium on Selected Areas in Communications: GC14 SAC Access Networks and Systems

Access Networks and Systems

I've heard you have problems: Cellular signal monitoring through UE participatory sensing
Huiguang Liang (Carnegie Mellon University, USA), Hyong Kim (Carnegie Mellon University, USA), Wai-Leong Yeow (Institute for Infocomm Research, Singapore), Hwee Pink Tan (Institute for Infocomm Research, Singapore) ........................................................... 2205

Self Organising Network Techniques to Maximise Traffic Offload onto a 3G/WCDMA Small Cell Network using MDT UE Measurement Reports
Robert M Joyce (University of Leeds & University of Leeds, United Kingdom), Li Zhang (University of Leeds, United Kingdom) .......................................................................................................................... 2212

Radio-on-Terahertz over Fiber System for Future Mobile Fronthauling
Atsushi Kanno (National Institute of Information and Communications Technology, Japan), Tien Dat Pham (National Institute of Information and Communications Technology, Japan), Iwao Hosako (National Institute of Information & Communications Technology, Japan), Tetsuya Kawanishi (National Institute of Information and Communications Technology, Japan), Hiroyo Ogawa (National Institute of Information and Communications Technology & Association of Radio Industries and Businesses, Japan) .......................................................................................................................... 2218

Power Optimization in Vectored and Non-Vectored G.fast Transmission
Mamoun Guenach (Bell Laboratories, Alcatel-Lucent, Antwerp, Belgium), Carl Nuzman (Bell Labs, Alcatel-Lucent, USA), Paschalis Tsiaflakis (Bell Labs, Alcatel-Lucent, Belgium), Jochen Maes (Alcatel-Lucent Bell Labs, Belgium) .......................................................................................................................... 2229

Experimental Evaluation of TCP Performance over 10Gb/s Passive Optical Networks (XG-PON)
Jerome A Arokkiam (University College Cork & CTVR, Ireland), Xiuchao Wu (University College Cork, Ireland), Kenneth N Brown (University College Cork, Ireland), Cormac J. Sreenan (University College Cork, Ireland) .......................................................................................................................... 2223

Coexistence Analysis of Asynchronous Digital Subscriber Lines with Different Sampling Rate and Carrier Frequency Spacing
Sanda Drakulić (Forschungszentrum Telekommunikation Wien (FTW), Austria), Martin Wolkerstorfer (FTW Telecommunications Research Center Vienna, Austria), Driton Statovci (FTW Telecommunications Research Center Vienna, Austria) .......................................................................................................................... 2234

GC14 SAC Cloud Networks: Globecom 2014 - Symposium on Selected Areas in Communications: GC14 SAC Cloud Networks

(Cloud): Evaluation of Data Center Network Topologies and Multipath Protocols

A Perturbation Algorithm for Embedding Virtual Data Centers in Multipath Networks
Jian Zou (Shanghai Jiao Tong University, P.R. China), Fangfang Yan (Shanghai Jiao Tong University, P.R. China), Tony Lee (SJTU, P.R. China), Weisheng Hu (Shanghai Jiao Tong University, P.R. China) .......................................................................................................................... 2240
Dynamic Topology Management in Optical Datacenter Networks
Yangming Zhao (University of Electronic Science and Technology of China, P.R. China), Sheng Wang (University of Electronic Science and Technology of China, P.R. China), Shouxi Luo (University of Electronic Science and Technology of China, P.R. China), Hongfang Yu (University of Electronic Science and Technology of China, P.R. China), Shizhong Xu (University of Electronic Science and Technology of China, P.R. China), Xiaoning Zhang (University of Electronic Science and Technology of China, P.R. China) ........................................................................................................ 2246

NovaCube: A Low Latency Torus-Based Network Architecture for Data Centers
Ting Wang (Hong Kong University of Science and Technology, Hong Kong), Zhiyang Su (Hong Kong University of Science and Technology, Hong Kong), Yu Xia (Hong Kong University of Science and Technology, P.R. China), Bo Qin (The Hong Kong University of Science and Technology, Hong Kong), Mounir Hamdi (Hong Kong University of Science and Technology, P.R. China) ........................................................................................................ 2252

Balancing Traffic Load for Devolved Controllers in Data Center Networks
Wanchao Liang (Shanghai Jiao Tong University, P.R. China), Xiaofeng Gao (Shanghai Jiao Tong University, P.R. China), Fan Wu (Shanghai Jiao Tong University, P.R. China), Guihai Chen (Shanghai Jiao Tong University, P.R. China), Wei Wei (Stanford University, USA) ........................................................................................................ 2259

Elephant Flow Detection in Datacenters Using OpenFlow-based Hierarchical Statistics Pulling
Chun-Yu Lin (National Chiao Tung University, Taiwan), Chien Chen (National Chiao Tung University, Taiwan), Yu-Huang Chu (Chunghwa Telecom Co., Ltd., Taiwan) ........................................................................................................ 2264

A Two-Phase Multipathing Scheme based on Genetic Algorithm for Data Center Networking
Lyno Ferraz (Universidade Federal do Rio de Janeiro & Grupo de Teleinformática e Automação, Brazil), Diogo Mattos (Universidade Federal do Rio de Janeiro & GTA, Brazil), Otto Carlos M. B. Duarte (Universidade Federal do Rio de Janeiro, Brazil) ........................................................................................................ 2270

(Cloud): Mobile Cloud Networking

Optimizing Mobile Computational Offloading with Delay Constraints
Yi-Hsuan Kao (University of Southern California, USA), Bhaskar Krishnamachari (University of Southern California, USA) ........................................................................................................ 2289

Virtualization of Cellular Network EPC Gateways based on a Scalable SDN Architecture
Xueli An (DOCOMO Euro-Labs, Germany), Wolfgang Kiess (DOCOMO Euro-Labs, Germany), David Perez-Caparrós (Huawei European Research Center, Germany) ........................................................................................................ 2295

Minimum Latency Server Selection for Heterogeneous Cloud Services
He Chang (Hong Kong Baptist University, Hong Kong), Hai Liu (Hong Kong Baptist University, Hong Kong), Yu-Wing Leung (Hong Kong Baptist University, Hong Kong), Xiaowen Chu (Hong Kong Baptist University, Hong Kong) ........................................................................................................ 2276

On the Statistical Multiplexing Gain of Virtual Base Station Pools
Jingchu Liu (Tsinghua University, P.R. China), Sheng Zhou (Tsinghua University, P.R. China), Jie Gong (Tsinghua University, P.R. China), Zhisheng Niu (Tsinghua University, P.R. China), Shugong Xu (Intel Labs, P.R. China) ........................................................................................................ 2283

Traffic-Aware Graph-Based Dynamic Frequency Reuse for Heterogeneous Cloud-RAN
Kaiwei Wang (University of Science and Technology of China, P.R. China), Ming Zhao (University of Science and Technology of China, P.R. China), Wuyang Zhou (University of Science and Technology of China, P.R. China) ........................................................................................................ 2308

A Dynamic Execution Offloading Model For Efficient Mobile Cloud Computing
Yong Jiang (Graduate School at Shenzhen, Tsinghua University, P.R. China), Juhua He (Graduate School at Shenzhen, Tsinghua University, P.R. China), Qing Li (Graduate School at Shenzhen, Tsinghua University, P.R. China), Xi Xiao (Graduate School at Shenzhen, Tsinghua University, P.R. China) ........................................................................................................ 2302
To Migrate or to Wait: Delay-Cost Tradeoff for Cloud Data Centers
Xiumin Wang (Hefei University of Technology, P.R. China), Xiaoming Chen (Nanjing University of Aeronautics and Astronautics, P.R. China), Chau Yuen (Singapore University of Technology and Design, Singapore), Weiwei Wu (Southeast University of China, P.R. China), Wei Wang (Hefei University of Technology, P.R. China) ................................................................. 2314

Joint Virtual Machine Placement and Migration Scheme for Datacenters
Thuan Duong-Ba (Oregon State University, USA), Thinh Nguyen (Oregon State, USA), Bella Bose (Oregon State University, USA), Tuan Tran (University of Louisville, USA) .................................................. 2320

XenFlow: Seamless Migration Primitive and Quality of Service for Virtual Networks
Diogo Mattos (Universidade Federal do Rio de Janeiro & GTA, Brazil), Otto Carlos M. B. Duarte (Universidade Federal do Rio de Janeiro, Brazil) .............................................................. 2326

Optimal VM Migration Planning for Data Centers
Jiaqiang Liu (Tsinghua University, P.R. China), Li Su (Tsinghua University, P.R. China), Yuchen Jin (Tsinghua University, P.R. China), Yong Li (Tsinghua University, P.R. China), Depeng Jin (Tsinghua University, P.R. China), Lieguang Zeng (Tsinghua University, P.R. China) .................................................. 2332

Dynamic Resource Reservation via Broker Federation in Cloud Service: A Fine-grained Heuristic-Based Approach
Kaiyang Liu (School of Information Science & Engineering, Central South University, P.R. China), Jun Peng (School of Information Science & Engineering, Central South University, P.R. China), Weirong Liu (Central South University, P.R. China), Pingping Yao (School of Information Science & Engineering, Central South University, P.R. China), Zhiwu Huang (School of Information Science & Engineering, Central South University, P.R. China) .................................................. 2338

Resource Management in Cloud Computing with Frictions and Congestion Weather
Martin Valdez-Vivas (Stanford University, USA), Nicholas Bambos (Stanford University, USA), John Apostolopoulos (Cisco Systems, USA) ................................................................. 2344

GC14 SAC Data Storage: Globecom 2014 - Symposium on Selected Areas in Communications: GC14 SAC Data Storage

Data Storage

Fundamental Limits on Communication for Oblivious Updates in Storage Networks
Preetum Nakkiran (University of California, Berkeley, USA), Nihar B Shah (University of California, Berkeley, USA), K. v. Rashmi (University of California at Berkeley, USA) ................. 2363

New MDS Array Code Correcting Multiple Disk Failures
Hanxu Hou (Peking University Shenzhen Graduate School, P.R. China), Kenneth W. Shum (Institute of Network Coding, Hong Kong), Minghua Chen (The Chinese University of Hong Kong, P.R. China), Hui Li (Peking University Shenzhen Graduate School, P.R. China) ................................. 2369

Modelling of the Threshold Voltage Distributions of Sub-20nm NAND Flash Memory
Thomas Parnell (IBM Research - Zurich, Switzerland), Nikolaos Papandreou (IBM Research - Zurich, Switzerland), Thomas Mittelholzer (IBM Zurich Research Laboratory, Switzerland), Haralampos Pozidis (IBM Research - Zurich, Switzerland) .................................................. 2351

Polar Code Design for Intersymbol Interference Channels
Ubaid Ullah Fayyaz (Georgia Institute of Technology, USA), John Barry (Georgia Institute of Technology, USA) ................................................................. 2357

On the Latency of Heterogeneous MDS Queue
Akshay Kumar (Virginia Polytechnic Institute and State University, USA), Ravi Tandon (Virginia Tech, USA), T. Charles Clancy (Virginia Tech, USA) .................................................. 2375

Beyond Proofs of Data Possession: Finding Defective Blocks in Outsourced Storage
Juan Camilo Corena (Personal, Japan), Anirban Basu (KDDI R&D Laboratories Inc., Japan), Shinsaku Kiyomoto (KDDI R&D Laboratories Inc., Japan), Yutaka Miyake (KDDI R&D Laboratories Inc., Japan), Tomoaki Ohtsuki (Keio University, Japan) .................................................. 2381
(eHealth): Body Area Networks

Cooperative Compressed Sensing schemes for Telemonitoring of Vital Signals in WBANs
Aris S. Lalos (Technical University of Catalonia (UPC), Spain), Elli Kartsakli (Universitat Politècnica de Catalunya (UPC), Spain), Angelos Antonopoulos (Telecommunications Technological Centre of Catalonia (CTTC), Spain), Stefano Tennina (University of L'Aquila, Italy), Marco Di Renzo (French National Center for Scientific Research (CNRS), France), Luis Alonso (Universidad Politecnica de Catalunya-BarcelonaTECH & Telecommunications and Aerospatial Engineering School of Castelldefels, Spain), Christos Verikoukis (Telecommunications Technological Centre of Catalonia, Spain) .................................................. 2387

Prioritized Payload Tuning Mechanism for Wireless Body Area Network-Based Healthcare Systems
Soumen Moulik (Indian Institute of Technology, Kharagpur, India), Sudip Misra (Indian Institute of Technology-Kharagpur, India), Chandan Chakraborty (IIT Kharagpur, India), Mohammad S. Obaidat (Monmouth University, USA) .......................................................................................... 2393

Cost-Effective Reliability-and Energy-Based Intra-WBAN Interference Mitigation
Hassine Moungla (University of Paris Descartes, France), Abdallah Jarray (University of Ottawa, Canada), Ahmed Karmouch (University of Ottawa, Canada), Ahmed Mehaoua (University of Paris Descartes, France) .................................................................................. 2399

Adaptive BCH Code for High Throughput of IEEE802.15.6 based WBAN
Pham Thanh Hiep (Yokohama National University, Japan), Ryuji Kohno (Yokohama National University, Japan) ........................................................................................................................................ 2446

Selected Areas in Communications Interactive Presentations I: (eHealth) (Human Centric Computing)

Energy Efficient in Medical Ad Hoc Sensors Network by Exploiting Routing Protocols
Pascal Lorenz (University of Haute Alsace, France), Sofiane Hamrioui (USTHB, Algeria), Jaime Lloret (Universidad Politécnica de Valencia, Spain), Lalam Mustapha (University of Tizi, Algeria) .................................................................................................................. 2417

Context-Driven Online Learning for Activity Classification in Wireless Health
Jie Xu (University of California, Los Angeles, USA), James Xu (University of California, Los Angeles, USA), Linqi Song (University of California, Los Angeles, USA), Gregory Pottie (University of California at Los Angeles, USA), Mihaela van der Schaar (University of California, Los Angeles (UCLA), USA) ........................................................................................................... 2423
Analysis of Dependency Evaluation Models for eHealth Services
Haider Mshali (CampusFranc, University of Bordeaux and Rennes 1- LaBRI/IRISA Labs, France), Tayeb Lemlouma (IRISA Lab and Rennes 1 University, France), Damien Magoni (University of Bordeaux, France) .................................................................

A Cloud-based Interference-aware Remote Health Monitoring System for Non-hospitalized Patients
Ghada Almashaqbeh (University of Notre Dame, USA), Thaier Al-Hayajneh (Hashemite University, Jordan), Athanasios V. Vasilakos (National Technical University of Athens & Kuwait University, Greece) .................................................................

Energy-efficient In-network Encryption/Decryption for Wireless Body Area Sensor Networks
Ye Yan (Oakland University, USA), Tao Shu (Oakland University, USA) .................................................................

eBPlatform: An IoT-based System for NCD Patients Homecare in China
Yu Liu (Beihang University, P.R. China), Jianwei Niu (Beihang University, P.R. China), Lianjun Yang (Institute of Microelectronics of CAS, P.R. China), Lei Shu (Guangdong University of Petrochemical Technology, P.R. China) .................................................................

Comparison of Situation Awareness Algorithms for Remote Health Monitoring with Smartphones
Igor Bisio (University of Genoa, Italy), Fabio Lavagetto (University of Genoa, Italy), Mario Marchese (DIST- University of Genoa, Italy), Andrea Sciarrone (University of Genoa, Italy) ........

Analysis of Reliability and Throughput under Saturation Condition of IEEE 802.15.6 CSMA/CA for Wireless Body Area Networks
Subhadeep Sarkar (Indian Institute of Technology, Kharagpur, India), Sudip Misra (Indian Institute of Technology-Kharagpur, India), Chandan Chakraborty (IIT Kharagpur, India), Mohammad S. Obaidat (Monmouth University, USA) .................................................................

Cost-Efficient Radio Resource Allocation in Hybrid Energy Cellular Networks
Hussein Al Haj Hassan (Telecom Bretagne, France), Alexander Pelov (Institut Mines-Telecom / Telecom Bretagne, France), Loutfi Nuaymi (Telecom Bretagne, France) .................................................................

Traffic Management for Sustainable LTE Networks
Andres Kwasinski (Rochester Institute of Technology, USA), Alexis Kwasinski (University of Texas, USA) .................................................................
Green Cellular Networks

Coalition-Assisted Energy Efficiency Optimization via Uplink Macro-Femto Cooperation
Xiao Tang (Xi'an Jiaotong University, P.R. China), Pinyi Ren (Xi'an Jiaotong University, P.R. China), Yichen Wang (Xi'an Jiaotong University, P.R. China), Qinghe Du (Xi'an Jiaotong University, P.R. China), Li Sun (Xi'an Jiaotong University, P.R. China) .................................................. 2479

Reducing the Energy Consumption of Small Cell Networks subject to QoE constraints
Nikolaos Sapountzis (EURECOM, France), Stylianos Sarantidis (EURECOM, France), Thrasyvoulos Spyropoulos (EURECOM, France), Navid Nikaein (Eurecom, France), Umer Salim (Intel Mobile Communications, France) .................................................................................................................. 2485

Efficient Packet Detection for D2D Power-Saving Communications Over Mobile Wireless Cellular Networks
Fan Yang (University of Electronic Science and Technology of China, P.R. China), Xi Zhang (Texas A&M University, ECE Department, USA) .......................................................................................................................... 2492

Resource Provisioning and Dimensioning for Solar Powered Cellular Base Stations
Vinay Chamola (National University of Singapore, Singapore), Biplab Sikdar (Rensselaer Polytechnic Institute, USA) .................................................................................................................. 2498

Green Clouds and Data Centers

Scalable Workload Management for Water Efficiency in Data Centers
Lanchao Liu (University of Houston, USA), Shaolei Ren (Florida International University, USA), Zhu Han (University of Houston, USA) .................................................................................................................. 2504

A General Framework For Performance Guaranteed Green Data Center Networking
Ting Wang (Hong Kong University of Science and Technology, Hong Kong), Yu Xia (Hong Kong University of Science and Technology, P.R. China), Jogesh K. Muppala (Hong Kong University of Science and Technology, Hong Kong), Mounir Hamdi (Hong Kong University of Science and Technology, P.R. China) .................................................................................................................. 2510

Dynamic Power Capping for Multilayer Hybrid Power Networks
Jacek Rzasa (AGH University of Science and Technology, Poland), Piotr Borylo (AGH University of Science and Technology, Poland), Artur Lason (AGH University of Science and Technology, Poland), Andrzej Jajszczyk (AGH University of Science and Technology, Poland) .................................................................................................................. 2516

Optimizing Rule Placement in Software-Defined Networks for Energy-aware Routing
Frederic Giroire (CNRS, France), Joanna Moulierac (MASCOTTE, I3S (CNRS UNS) INRIA, France), Truong Khoa Phan (MASCOTTE, CNRS-UNS, INRIA, France) .................................................................................................................. 2523

A Green Network-Aware VMs Placement Mechanism
Albert P. M. De La Fuente Vigliotti (University of Sào Paulo, Brazil), Daniel M. Batista (University of Sào Paulo, Brazil) .................................................................................................................. 2530

Achieving Energy-Proportionality in Fat-tree DCNs
Qing Yi (Portland State University, USA), Suresh Singh (Portland State University, USA) ............. 2536

Selected Areas in Communications Interactive Presentations II: Green Communication Systems and Networks

Experimental Study of Concurrent Data and Wireless Energy Transfer for Sensor Networks
M. Yousof Naderi (Northeastern University, USA), Kaushik Chowdhury (Northeastern University, USA), Stefano Basagni (Northeastern University, USA), Wendi Heinzelman (University of Rochester, USA), Swades De (Indian Institute of Technology Delhi, India), Soumya Jana (Indian Institute of Technology, Hyderabad, India) ................................................................. 2543

Energy-Harvesting Powered Transmissions of Delay-limited Data Packets
Xiaojing Chen (Fudan University, P.R. China), Xin Wang (Fudan University, P.R. China) ............. 2550
Green Optical Networking

Energy-aware de-allocation of lightpaths in WDM networks
Juliana De Santi (State University of Campinas, Brazil), Nelson L. S. da Fonseca (State University of Campinas, Brazil) ................................................................. 2586

Fitting Green Anycast Strategies to Cloud Services in WDM Hybrid Power Networks
Piotr Boryło (AGH University of Science and Technology, Poland), Artur Lason (AGH University of Science and Technology, Poland), Jacek Rzasa (AGH University of Science and Technology, Poland), Andrzej Szymanski (AGH University of Science and Technology, Poland), Andrzej Jajszczyk (AGH University of Science and Technology, Poland) ................................................................. 2592

Fine-Grain Power Control for Combined Input-Crosspoint Queued Switches
Yu Xia (Hong Kong University of Science and Technology, P.R. China), Ting Wang (Hong Kong University of Science and Technology, P.R. China), Zhiyang Su (Hong Kong University of Science and Technology, P.R. China), Mounir Hamdi (Hong Kong University of Science and Technology, P.R. China) ..................................................................................... 2599

Radio over Fiber Based Networks for the Smart Grid
Abolfazl Ghassemi (University of Tehran, Iran), T. Aaron Gulliver (University of Victoria, Canada), John Cioffi (Stanford University, USA), George K. Karagiannidis (Aristotle University of Thessaloniki, Greece) ..................................................................................... 2605

On Forecasting the ONU Sleep Period in XG-PON Systems Using Exponential Smoothing Techniques
Panagiotis Sarigiannidis (University of Western Macedonia, Greece), Athanasios Gkaliouris (University of Western Macedonia, Greece), Vasiliki Kakali (Aristotle University of Thessaloniki, Greece), Malamati Louta (University of Western Macedonia, Greece), Georgios Papadimitriou (Aristotle University of Thessaloniki, Greece), Petros Nicipolitis (Aristotle University of Thessaloniki, Greece), Mohammad S. Obaidat (Monmouth University, USA) ..................................................................................... 2580

Energy consumption of Indoor Radio-over-Fiber Distribution Links: Experimental Findings
Apurva Gowda (Stanford University, USA), Hejie Yang (Corning Incorporated, USA), Solomon Abraha (Corning Incorporated, USA), Anthony Ng’oma (Corning Incorporated, USA), Ahmad R. Dhaini (American University of Beirut, Lebanon), Leonid Kazovsky (Stanford University, USA), Kadir Albeyoglu (Stanford University, USA) ..................................................................................... 2612
Green Wireless Networks I

Joint Energy and Delay-aware Scheme for 5G Mobile Cognitive Radio Networks
Constandinos X. Mavromoustakis (University of Nicosia, Cyprus), George Mastorakis (Technological Educational Institute of Crete, Greece), Athina Bourdena (Technological Educational Institute of Crete, Greece), Evangelos Pallis (Technological Educational Institution of Crete, Greece), Georgios Kormentzas (University of the Aegean, Greece), Christos Dimitriou (Dept. of Computer Science, University of Nicosia, Cyprus) ................................................................. 2624

Energy-Efficient Resource Allocation in Shared Full-Duplex Relaying Cellular Networks
Gang Liu (Beijing University of Posts and Telecommunications, P.R. China), F. Richard Yu (Carleton University, Canada), Hong Ji (Beijing University of Posts and Telecommunications, P.R. China), Victor CM Leung (The University of British Columbia, Canada) ................................................................. 2631

A Stochastic Power Control Game for Two-Tier Cellular Networks with Energy Harvesting Small-Cells
Kien Tran (University of Manitoba, Canada), Hina Tabassum (University of Manitoba, Canada), Ekram Hossain (University of Manitoba, Canada) ................................................................. 2637

Joint Uplink and Downlink Cell Selection in Cognitive Small Cell Heterogeneous Networks
Agapi Mesodiakaki (Universitat Politècnica de Catalunya, Spain), Ferran Adelantado (Universitat Oberta de Catalunya, Spain), Luis Alonso (Universidad Politecnica de Catalunya-BarcelonaTECH & Telecommunications and Aerospatial Engineering School of Castelldefels, Spain), Christos Verikoukis (Telecommunications Technological Centre of Catalonia, Spain) .......... 2643

Smart Grid Communications

Optimal Joint Transmission Scheduling for Green Energy Powered Coordinated Multi-Point Transmission System
Zejue Wang (Institute of Acoustics, Chinese Academy of Sciences, P.R. China), Hongjia Li (Institute of Acoustics, Chinese Academy of Sciences & Beijing University of Posts and Telecommunications, P.R. China), Xin Chen (Chinese Academy of Sciences, P.R. China), Song Ci (University of Nebraska-Lincoln, USA) ......................................................................................... 2690

Green Wireless Networks I

Sharing the Small Cells for Energy Efficient Networking: How much does it cost?
Alexandra Bousia (UPC, Spain), Elli Kartsakli (Universitat Politècnica de Catalunya (UPC), Spain), Angelos Antonopoulos (Telecommunications Technological Centre of Catalonia (CTTC), Spain), Luis Alonso (Universidad Politecnica de Catalunya-BarcelonaTECH & Telecommunications and Aerospatial Engineering School of Castelldefels, Spain), Christos Verikoukis (Telecommunications Technological Centre of Catalonia, Spain) ......................................................... 2649

Green Wireless Networks II

Resource Allocation in Self-Sustainable Green Wireless Networks with Combinatorial Auction
Wenbo Wang (Rochester Institute of Technology, USA), Andres Kwasinski (Rochester Institute of Technology, USA), Alexis Kwasinski (University of Texas, USA) ........................................................................ 2655

Offloading With IFOM: The Uplink Case
Vasileios Miliotis (Universitat Politècnica de Catalunya, Spain), Luis Alonso (Universidad Politecnica de Catalunya-BarcelonaTECH & Telecommunications and Aerospatial Engineering School of Castelldefels, Spain), Christos Verikoukis (Telecommunications Technological Centre of Catalonia, Spain) ........................................................................................................... 2661
### Smart Grid Communications

**Antenna Selection and Power Splitting for Simultaneous Wireless Information and Power Transfer in Interference Alignment Networks**
Xuanheng Li (Dalian University of Technology, P.R. China), Yi Sun (Dalian University of Technology, P.R. China), F. Richard Yu (Carleton University, Canada), Nan Zhao (Dalian University of Technology, P.R. China)  ................................................................. 2667

**Green communication via Type-I ARQ: Finite block-length analysis**
Behrooz Makki (Chalmers University of Technology, Sweden), Tommy Svensson (Chalmers University of Technology, Sweden), Michele Zorzi (Università degli Studi di Padova, Italy) .............. 2673

**Low Complexity Energy-Efficient Design for OFDMA Systems with an Elaborate Power Model**
Qingqing Wu (Shanghai Jiao Tong University, P.R. China), Wen Chen (Shanghai Jiao Tong University, P.R. China), Jun Li (University of Sydney, Australia), Jinsong Wu (Bell Laboratories, Alcatel-Lucent, P.R. China) ........................................................................... 2678

**HePNC: Design of Physical Layer Network Coding with Heterogeneous Modulations**
Haoyuan Zhang (UVic, Canada), Lei Zheng (UVic, Canada), Lin Cai (University of Victoria, Canada) ......................................................................................................................... 2684

### Green Cellular Networks

**Cooperative Energy Trading in CoMP Systems Powered by Smart Grids**
Jie Xu (National University of Singapore, Singapore), Rui Zhang (National University of Singapore, Singapore) ......................................................................................................................... 2697

**Economic Coalition Strategies for Cost Reductions in Microgrids Distribution Networks**
Yi Xu (New Jersey Institute of Technology, USA), Edwin Hou (New Jersey Institute of Technology, USA), Nirwan Ansari (NJIT, USA) ......................................................................................................................... 2703

**SmartCar: Smart Charging and Driving Control for Electric Vehicles in the Smart Grid**
Lei Rao (General Motors Research Lab, USA), Jianguo Yao (Shanghai Jiao Tong University, P.R. China) ......................................................................................................................... 2709

**Self-Sustaining Wireless Neighborhood Area Network Design for Smart Grid**
Feng Ye (University of Nebraska-Lincoln, USA), Yi Qian (University of Nebraska–Lincoln, USA), Rose Qingyang Hu (Utah State University, USA) ......................................................................................................................... 2715

**Data Offloading with Renewable Energy Powered Base Station Connected to a Microgrid**
Yeow-Khiang Chia (Institute for Infocomm Research & Agency for Science, Technology and Research, Singapore), Chin Keong Ho (Institute for Infocomm Research, A*STAR, Singapore), Sumei Sun (Institute for Infocomm Research, Singapore) ......................................................................................................................... 2721

**Energy Efficient Smart Metering for Green Smart Grid Communication**
Samaresh Bera (Indian Institute of Technology Kharagpur, India), Sudip Misra (Indian Institute of Technology-Kharagpur, India), Mohammad S. Obaidat (Monmouth University, USA) ......................................................................................................................... 2466
A novel location prediction based on activity patterns
Yang Liu (Huazhong University of Science and Technology, P.R. China), Chen Yu (Huazhong University of Science and Technology & School of Computer Science and Technology, P.R. China), Dezhong Yao (Huazhong University of Science and Technology, P.R. China), Hai Jin (Huazhong University of Science and Technology, P.R. China), Hanhua Chen (HUST, P.R. China), Qiang Ding (Huawei Technologies Co., P.R. China) .................................................. N/A

Cloud Augmentative and Alternative Communication for People with Complex Communication Needs
Rosanna Yuen-Yan Chan (The Chinese University of Hong Kong, Hong Kong) ........................................ 2727

Answer Inference for Crowdsourcing based Scoring
Kaikai Sheng (Shanghai Jiao Tong University, P.R. China), Zhicheng Gu (Shanghai Jiao Tong University, P.R. China), Xueyu Mao (Shanghai Jiao Tong University, P.R. China), Xiaohua Tian (Shanghai Jiao Tong University, P.R. China), Xiaoqing Gan (Shanghai Jiao Tong University, P.R. China), Xibing Wang (Shanghai Jiaotong University, P.R. China) .................................................. 2733

State-machine driven Opportunistic Sensing by Mobile Devices
Radhika Loomba (TSSG, Waterford Institute of Technology, Ireland), Lei Shi (Waterford Institute of Technology, Ireland), Brendan Jennings (Waterford Institute of Technology, Ireland) .................................................. 2739

Adyson Magalhães Maia (Federal University of Cearâ, Brazil), Dario Vieira (EFREI, France), Miguel Franklin de Castro (Federal University of Cearâ, Brazil), Yacine Ghamri-Doudane (University of la Rochelle, France) ................................................................. 2776

DeepSense: A Novel Learning Mechanism for Traffic Prediction with Taxi GPS Traces
Xiaoguang Niu (Wuhan University, P.R. China), Ying Zhu (Wuhan University, P.R. China), Xining Zhang (Wuhan University, P.R. China) ................................................................. 2745

Service-Oriented Middleware for the Mobile Internet of Things: A Scalable Solution
Sara Hachem (University of California Berkeley, France), Animesh Pathak (Inria Paris-Rocquencourt, France), Valerie Issarny (INRIA, France) ................................................................. N/A

DTNs BACK: DTNs Broadcasting ACK
Patrice Raveneau (Université de Toulouse - IRT - ENSEEIHT, France), Riadh Dhao (IRIT/ENSEEIHT, University of Toulouse, France), Emmanuel Chaput (Irit-Enseeiht, France), André-Luc Beylot (University of Toulouse, France) ................................................................. 2789
Managing and Building New Internet of Things Applications

Privacy-Preserving Aggregation for Participatory Sensing with Efficient Group Management
Jianwei Chen (Beijing University of Posts and Telecommunications, P.R. China), Huadong Ma (Beijing University of Posts and Telecommunications, P.R. China) .................................................. 2757

Distinguishing Uncertain Objects with Multiple features for Crowdsensing
Bin Liu (UESTC & HUAWEI, P.R. China), Chao Song (University of Electronic Science and Technology of China, P.R. China), Ming Liu (University of Electronic Science and Technology of China, P.R. China), Nianbo Liu (University of Electronic Science and Technology of China, P.R. China) ......................................................................................................... 2751

Extending the Internet of Things through Mobile Wireless Networks, RFID, and Cloud Computing

A CoAP-compliant solution for efficient inclusion of RFID in the Internet of Things
Ivan Farris (University Mediterranea of Reggio Calabria, Italy), Antonio Iera (University Mediterranea of Reggio Calabria, Italy), Antonella Molinaro (University Mediterranea of Reggio Calabria, Italy), Sara Pizzi (University "Mediterranea" of Reggio Calabria, Italy) .................................................. 2795

Managing and Building New Internet of Things Applications

A case for ICN usage in IoT environments
José Quevedo (Instituto de Telecomunicações & Universidade de Aveiro, Portugal), Daniel Corujo (Instituto de Telecomunicações Aveiro & Universidade de Aveiro, Portugal), Rui L Aguiar (University of Aveiro & Instituto de Telecomunicações, Portugal) .................................................. 2770

Extending the Internet of Things through Mobile Wireless Networks, RFID, and Cloud Computing

Google Cloud Messaging (GCM): An Evaluation
Yavuz Selim Yilmaz (University at Buffalo, SUNY, USA), Bahadir I Aydin (University at Buffalo, SUNY, USA), Murat Demirbas (University at Buffalo, SUNY, USA) ................................................................................................. 2807

Transient Clouds: Assignment and Collaborative Execution of Tasks on Mobile Devices
Terry Penner (LeTourneau University, USA), Alison Johnson (Texas State University, USA), Brandon Van Slyke (Texas State University, USA), Mina Guirguis (Texas State University, USA), Qijun Gu (Texas State University, USA) ................................................................................................. 2801

A User-Satisfaction Based Offloading Technique for Smart City Applications
Daniela Mazza (University of Bologna, Italy), Daniele Tarchi (University of Bologna, Italy), Giovanni Emanuele Corazza (University of Bologna, Italy) ................................................................................................. 2783

Managing and Building New Internet of Things Applications

ADHT: Agent-based DHT Architecture for Constrained Devices
Erkki Harjula (University of Oulu, Finland), Teemu Leppänen (University of Oulu & Intelligent Systems Group, Finland), Timo Ojala (University of Oulu, Finland), Mika Ylianttila (University of Oulu, Finland) ................................................................................................. 2763
GC14 SAC Nanotechnology: Globecom 2014 - Symposium on Selected Areas in Communications: GC14 SAC Nanotechnology

Selected Areas in Communications Interactive Presentations III: (Nanotechnology) (Power Line Communication)

**Bounds on Distance Estimation via Diffusive Molecular Communication**
Adam Noel (University of British Columbia, Canada), Karen C Cheung (University of British Columbia, Canada), Robert Schober (University of British Columbia, Canada) ........................................... 2813

**Analysis and Design of Two-Hop Diffusion-Based Molecular Communication Networks**
Arman Ahmadzadeh (University of Erlangen-Nuremberg, Germany), Adam Noel (University of British Columbia, Canada), Robert Schober (University of British Columbia, Canada) ......................... 2820

**Diffusion-Controlled Enzyme-Catalyzed Molecular Communication System for Targeted Drug Delivery**
Uche Kennedy Okonkwo (University of Pretoria, South Africa) ............................................................... 2826

GC14 SAC Satellite & Space Communication: Globecom 2014 - Symposium on Selected Areas in Communications: GC14 SAC Satellite & Space Communication

(Satellite and Space Communications): Satellite Communications

**An Energy Detector based Radio Environment Mapping Technique for Cognitive Satellite Systems**
Vincenzo Icolari (University of Bologna, Italy), Daniele Tarchi (University of Bologna, Italy), Alessandro Vanelli-Coralli (University of Bologna, Italy), Matteo Vincenzi (University of Bologna, Italy) ................................................................. 2892

**Modeling Air-to-Ground Path Loss for Low Altitude Platforms in Urban Environments**
Akram Al-Hourani (RMIT University, Australia), Sithamparanathan Kandeepan (RMIT University, Australia), Abbas Jamalipour (University of Sydney, Australia) ........................................ 2898

(Satellite and Space Communications) Satellite Networking

**On Routing for Extending Satellite Service Life in LEO Satellite Networks**
Mohammed Hussein (University of Toulouse, France), Gentian Jakllari (University of Toulouse, France), Beatrice Paillassa (ENSEEIHT, France) ...................................................................................... 2832

**On the delay distribution and maximum message length in DTNs with long propagation delays**
Dmitri Moltchanov (Tampere University of Technology, Finland), Yevgeni Koucheryavy (Tampere University of Technology, Finland) .......................................................................................... 2844

**Reducing Latency in Satellite Emergency Networks through a Cooperative Transmission Control**
Maurizio Casoni (University of Modena and Reggio Emilia, Italy), Carlo Augusto Grazia (University of Modena and Reggio Emilia, Italy), Martin Klapetz (University of Modena and Reggio Emilia, Italy), Natale Patriciello (University of Modena and Reggio Emilia, Italy) ................. 2850

**Optimized GSE Packet Scheduling over DVB-S2**
Jean-Baptiste Dupé (Université de Toulouse & TéSA, France), Emmanuel Chaput (Irit-Enseeiht, France), Cédric Baudoin (Thales Alenia Space, France), Caroline Bes (CNES, France), Arnaud Deramecourt (Centre National d’Etudes Spatial, France), André-Luc Beylot (University of Toulouse, France) .................................................................................................................................................. 2856
Performance Evaluation of Transmission System for 8K Super Hi-Vision Satellite Broadcasting
Yoichi Suzuki (NHK Science & Technology Research Laboratories, Japan), Kenichi Tsuchida (NHK Science & Technology Research Laboratories, Japan), Yoshifumi Matsusaki (NHK Science & Technology Research Laboratories, Japan), Akinori Hashimoto (NHK Science and Technical Research Laboratories, Japan), Shoji Tanaka (NHK Science and Technical Research Laboratories, Japan), Tetsuomi Ikeda (Japan Broadcasting Corporation, Japan), Naoji Okumura (Association of Radio Industries and Businesses, Japan) .................................................. 2886

Performance Analysis of Routing Algorithms in Satellite Network Under Node Failure Scenarios
Ziluan Liu (Beijing University of Posts and Telecommunications, P.R. China), Jiangxue Han (Beijing University of Posts and Telecommunications, P.R. China), Ying Wang (Beijing University of Posts and Telecommunications & Beijing University of Posts and Telecommunications, P.R. China), Xin Li (Beijing University of Posts and Telecommunications, P.R. China), Shanzhi Chen (Beijing University of Posts and Telecommunications, P.R. China) ........ 2838

Enabling CP Terminals for Accessing LP Satellite Transponders via Wavefront Multiplexing Techniques
Donald Chang (Spatial Digital Systems, USA), Joe Lee (SDS, Inc., USA), Tzer-Hso Lin (SDS, USA) ................................................................. 2868

Distortion Modeling and Analysis for Multilevel Coded APSK with Memoryless Nonlinearity
Daiki Yoda (Yokohama National University, Japan), Hideki Ochiai (Yokohama National University, Japan) .................................................................................................................................................. 2874

An Efficient Utilization of Intermittent Satellite-to-Ground Links by Using Mass Storage Device Embedded in Satellites
Kazuma Kaneko (Tohoku University, Japan), Yuichi Kawamoto (Tohoku University, Japan), Hiroki Nishiyama (Tohoku University, Japan), Nei Kato (Tohoku University, Japan), Morio Toyoshima (National Institute of Information and Communications Technology, Japan) ........ 2862

Cooperative Transmission for Geostationary Orbiting Satellite Collocation System
Shengyue Dou (Beihang University, P.R. China), Lin Bai (Beihang University, P.R. China), Jindong Xie (Beihang University, P.R. China), Zhenyu Xiao (Beihang University, P.R. China) ........ 2880
GC14 SAC Social Networks: Globecom 2014 - Symposium on Selected Areas in Communications: GC14 SAC Social Networks

(Social Networks): Community Enabled Networking

**Evolutionary Social Information Diffusion Analysis**
Chunxiao Jiang (Tsinghua University, Beijing, P.R. China), Yan Chen (University of Maryland, College Park, USA), K. J. Ray Liu (University of Maryland, USA) ................................................................. 2911

**Community Classification in Decentralized Social Networks Using Local Topological Information**
Pili Hu (The Chinese University of Hong Kong, Hong Kong), Wing Cheong Lau (The Chinese University of Hong Kong, Hong Kong) ........................................................................................................ 2929

**A Neighborhood Vector Propagation Algorithm for Community Detection**
Xiao Liang (Shanghai Jiao Tong University, P.R. China), Junhua Tang (Shanghai Jiao Tong University, P.R. China), Li Pan (Shanghai Jiao Tong University, P.R. China) ................................................................. 2923

(Social Networks): Privacy, Security and Networking

**EMVideo: User Collaboration Framework for Generating Multimedia Contents in Social Networks**
Suk Kyu Lee (Korea University, Korea), Seungho Yoo (Korea University, Korea), Eugene Kim (Korea University, Korea), Hyunsoo Kim (Korea University, Korea), Kangho Kim (Korea University, Korea), Hwangnam Kim (Korea University, Korea) ................................................................. 2941

(Social Networks): Community Enabled Networking

**Community evolutions in social interactions**
Zhenyu Wu (Beihang University, P.R. China), Yu Liu (Beihang University, P.R. China), Jianwei Niu (Beihang University, P.R. China), Joel J. P. C. Rodrigues (Instituto de Telecomunicações, University of Beira Interior, Portugal) ........................................................................................................ 2988

(Social Networks): Privacy, Security and Networking

**An Evaluation of User Importance When Integrating Social Networks and Mobile Cloud Computing**
Chunsheng Zhu (The University of British Columbia, Canada), Hai Wang (Pohang University of Science and Technology, Korea), Victor CM Leung (The University of British Columbia, Canada), Lei Shu (Guangdong University of Petrochemical Technology, P.R. China), Laurence T. Yang (St. Francis Xavier University, Canada) ........................................................................................................ 2935

**Twitter Structure as a Composition of Two Distinct Networks**
Meng Tong (University at Buffalo, USA), Ameya M Sanzgiri (University at Buffalo, USA), Dimitrios Koutsonikolas (University at Buffalo, SUNY, USA), Shambhu Upadhyaya (University at Buffalo, USA) ........................................................................................................ N/A

**k-hop Centrality Metric for Identifying Influential Spreaders in Dynamic Large-scale Social Networks**
Jianwei Niu (Beihang University, P.R. China), Jinyang Fan (Beihang University, P.R. China), Lei Wang (Beihang University, P.R. China), Milica Stojmenovic (Swinburne University of Technology, Australia) ........................................................................................................ 2954

**Distributed Discovery of User Handles with Privacy**
Thomas Paul (TU Darmstadt, Germany), Marius Hornung (TU Darmstadt, Germany), Thorsten Strufe (TU Dresden, Germany) ........................................................................................................ 2947
(Social Networks): Community Enabled Networking

Trustworthy Crowdsourcing via Mobile Social Networks
Burak Kantarci (Clarkson University, USA), Hussein T Mouftah (University of Ottawa, Canada) ........................................................................................................ 2905

A Mutual-Community-Aware Routing Protocol for Mobile Social Networks
Pitiphol Pholpabu (University of Southampton, United Kingdom), Lie-Liang Yang (University of Southampton, United Kingdom) ........................................................................................................ 2917

(Social Networks): Privacy, Security and Networking

Privacy-Preserving Attribute-Based Ring Signcryption for Health Social Network
Xiaoyan Zhu (Xidian University, P.R. China), Shuang Shuang Shi (Xidian University, P.R. China), Jian Sun (Xi'an Communications Institute, P.R. China), Shunrong Jiang (Xidian University, P.R. China) ........................................................................................................ N/A

GC14 SAC/PLC: Globecom 2014 - Symposium on Selected Areas in Communications: Power Line Communications

Selected Areas in Communications Interactive Presentations III: (Nanotechnology) (Power Line Communication)

Throughput Optimization Based on Access Impedance of PLC Modems with Limited Power Consumption
George Hallak (University of Applied Sciences Ruhrwest, Germany), Gerd Bumiller (Hochschule Ruhr West & University of Applied Sciences, Germany) ........................................................................................................ 2960

Power Line Communications

Narrowband-PLC/Wireless Diversity for Smart Grid Communications
Mostafa Sayed (University of Texas at Dallas, USA), Naofal Al-Dhahir (University of Texas at Dallas, USA) ........................................................................................................ 2966

Performance of Wireless/Power Line Media Diversity in the Office Environment
Stephen W. Lai (University of Calgary, Canada), Nazafarin Shabehpour (University of British Columbia, Canada), Geoffrey G. Messier (University of Calgary, Canada), Lutz Lampe (University of British Columbia, Canada) ........................................................................................................ 2972

Threshold and Scaling Factor Optimization for Enhancing Impulsive Noise Cancellation in PLC Systems
Khaled M. Rabie (University of Manchester, United Kingdom), Emad Alsusa (Manchester University, United Kingdom) ........................................................................................................ 2977

Joint Robust Decoding and Parameter Estimation for Convolutionally Coded Systems Impaired by Unknown Impulse Noise
Der-Feng Tseng (National Taiwan University of Science and Technology, Taiwan) .................................. 2983

Compressive Sensing Based Narrowband Interference Cancellation for Power Line Communication Systems
Sicong Liu (Tsinghua University & Research Institute of Information Technology, Tsinghua National Laboratory of Information Science an, P.R. China), Fang Yang (Tsinghua University, P.R. China), Chao Zhang (Tsinghua University, P.R. China), Jian Song (Tsinghua University, P.R. China) ........................................................................................................ 2989
**GC14 SPC: Globecom 2014 - Signal Processing for Communications Symposium**

**Signal Processing for Channel Estimation**

*Improved Spectrum Agility in Narrow-Band PLC with Cyclic Block FMT Modulation*
Mauro Girotto (University of Udine, Italy), Andrea M Tonello (University of Udine & WiTiKee srl, Italy)

*Robust Channel Estimation Strategy for Two-Way Multi-Antenna Relay Networks with Asynchronous Transmission*
Xinqian Xie (Beijing University of Posts and Telecommunications, P.R. China), Mugen Peng (Beijing University of posts & Telecommunications, P.R. China), Zhongyuan Zhao (Beijing University of Posts and Telecommunications, P.R. China)

*Two Channel Estimators for CP-OQAM-OFDM Systems*
DeJin Kong (Huazhong University of Science and Technology, P.R. China), Xiang-Gen Xia (University of Delaware, USA), Tao Jiang (Huazhong University of Science and Technology, P.R. China), Xiqi Gao (Southeast University, P.R. China)

*Structured Sparse Approximation Via Generalized Regularizers: with application to V2V Channel Estimation*
Sajjad Beygi (University of Southern California, USA), Erik G Ström (Chalmers University of Technology, Sweden), Urbashi Mitra (University of Southern California, USA)

*Blind Channel Estimation Assisted Coherent Demodulation of DPSK Modulated OFDM Systems*
Semih Serbetli (NXP Semiconductors, The Netherlands)

*Robust Pilot Detection Techniques for Channel Estimation and Symbol Detection in OFDM Systems*
Hongting Zhang (Louisiana State University, USA), Hsiao-Chun Wu (Louisiana State University, USA), Hong Jiang (Bell Labs & Alcatel-Lucent, USA), Scott CH Huang (National Tsing Hua University, Taiwan)

*Artificial Noise Design for Discriminatory Channel Estimation in Wireless MIMO Systems*
Ta-Yuan Liu (National Tsing Hua University, Taiwan), Yu-Ching Chen (National Tsing Hua University, Taiwan), Yao-Win Peter Hong (National Tsing Hua University, Taiwan)

**Signal Processing for Cognitive Radio I**

*Second-Order Statistic-Based Detection of Alamouti-Coded OFDM Signals for Cognitive Radio*
Yahia Eldemerdash (Memorial University of Newfoundland, Canada), Octavia A. Dobre (Memorial University of Newfoundland, Canada)

*Circular sparse rulers based on co-prime sampling for compressive power spectrum estimation*
Nuria González-Prelcic (Universidad de Vigo, Spain), Elena Domínguez-Jiménez (Universidad Politécnica de Madrid, Spain)

*Energy Detection based Spectrum Sensing In The Presence of Time-Frequency Double Selective Fading Propagations*
Bin Li (Beijing University of Posts and Telecommunications & Key Lab of Universal Wireless Communications, MOE, P.R. China), Chenglin Zhao (Beijing University of Posts and Telecommunications, P.R. China), Mengwei Sun (BUPT, P.R. China), Arumugam Nallanathan (King's College London, United Kingdom)

*Sum-Rate Maximization for Spectrum-Sharing Cognitive Multiple Access Channels without Successive Interference Cancellation*
Xin Kang (Institute for Infocomm Research, Singapore), Chong Hon Fah (I2R, Singapore), Yeow-Khiang Chia (Institute for Infocomm Research & Agency for Science, Technology and Research, Singapore), Sumei Sun (Institute for Infocomm Research, Singapore)
Detection of Primary User's Signal in Cognitive Radio Networks: Angle of Arrival Based Approach
Yanxiao Zhao (South Dakota School of Mines and Technology, USA), Jun Huang (Chongqing University of Posts and Telecomm, P.R. China), Wei Wang (San Diego State University, USA), Rafida Zaman (South Dakota School of Mines and Technology, USA) .......................................................... 3062

Listen-and-Talk: Full-duplex Cognitive Radio Networks
Yun Liao (Peking University, P.R. China), Tianyu Wang (Peking University, P.R. China), Lingyang Song (Peking University, P.R. China), Zhu Han (University of Houston, USA) ............... 3068

Signal Processing for Cognitive Radio II

Secured Cooperative Cognitive Radio Networks with Relay Selection
Trung Q. Duong (Queen's University Belfast, United Kingdom), Tran Trung Duy (Posts and Telecommunications Institute of Technology, Vietnam), Maged Elkashlan (Queen Mary, University of London, United Kingdom), Nghi H Tran (University of Akron, USA), Octavia A. Dobre (Memorial University of Newfoundland, Canada) ........................................................................... 3074

Cooperative Bargaining Resource Allocation for Cognitive Small Cell Networks
Haijun Zhang (The University of British Columbia, Canada), Chunxiao Jiang (Tsinghua University, Beijing, P.R. China), Lingyang Song (Peking University, P.R. China), Suqin He (Beijing University of Chemical Technology, P.R. China), Xiaoli Chu (University of Sheffield, United Kingdom) .......................................................... 3080

Rate-Interference Tradeoff in OFDM-based Cognitive Radio Networks
Ebrahim Bedeer (University of British Columbia, Canada), Octavia A. Dobre (Memorial University of Newfoundland, Canada), Mohamed Hossam Ahmed (Memorial University, Canada), Kareem E. Baddour (Communications Research Centre, Canada) .......................................................... 3086

Energy-Efficiency and Spectrum-Efficiency trade off in OFDM-based cognitive radio systems
Weijia Shi (Nanjing University, P.R. China), Shaowei Wang (Nanjing University, P.R. China), Dageng Chen (Huawei Technologies Co., Ltd., P.R. China) .......................................................... 3092

Novel Hilbert Spectrum-based Specific Emitter Identification for Single-hop and Relaying Scenarios
Jingwen Zhang (Beijing Jiaotong University, P.R. China), Fanggang Wang (Beijing Jiaotong University, P.R. China), Zhangdui Zhong (Beijing Jiaotong University, P.R. China), Octavia A. Dobre (Memorial University of Newfoundland, Canada) .......................................................... N/A

Resource Management in Cognitive Opportunistic Access Femtocells with Imperfect Spectrum Sensing
Haijun Zhang (The University of British Columbia, Canada), Chunxiao Jiang (Tsinghua University, Beijing, P.R. China), Xiaotao Mao (Beijing University of Chemical Technology, P.R. China), Arumugam Nallanathan (King's College London, United Kingdom) .......................................................... 3098

Signal Processing for Compressive Sensing & Sparse Signals

Decentralized Bayesian Learning of Jointly Sparse Signals
Saurabh Khanna (Indian Institute of Science, India), Chandra R Murthy (Indian Institute of Science, India) ................................................................................................................ 3103

Turbo Analog Error Correcting Codes Based on Analog CRC
Avi Zanko (Bar-Ilan University, Israel), Amir Leshem (Bar-Ilan University, Israel), Ephraim Zehavi (Bar-Ilan University, Israel) .................................................................................... 3109

A Low-Complexity Bayesian Approach to Large-Scale Sparse Image Reconstruction with Structured Constraints
Shaoyang Li (Tsinghua University, P.R. China), Xiaoming Tao (Tsinghua University, P.R. China), Jianhua Lu (Tsinghua University, P.R. China) .......................................................... 3115

Robust 1-bit Compressive Sensing Against Sign Flips
Xi Fu (Tsinghua University, P.R. China), Fang-Ming Han (Tsinghua University, P.R. China), Hongxing Zou (Tsinghua University, P.R. China) .......................................................... 3121
Signal Processing for Designs Under Power & Cost Constraints

Feasibility of Using Discriminate Pricing Schemes for Energy Trading in Smart Grid
Wayes Tushar (Singapore University of Technology and Design, Singapore), Chau Yuen (Singapore University of Technology and Design, Singapore), Bo Chai (Zhejiang University, P.R. China), David B Smith (National ICT Australia, Australia), H. Vincent Poor (Princeton University, USA) 3138

Harvest-and-Jam: Improving Security for Wireless Energy Harvesting Cooperative Networks
Hong Xing (King's College London, United Kingdom), Zheng Chu (Newcastle University, United Kingdom), Zhiguo Ding (Lancaster University, United Kingdom), Arumugam Nallanathan (King's College London, United Kingdom) 3145

Low-Power Dual Quantization-Domain Decoding for LDPC Codes
Shadi Abu-Surra (Samsung Research America – Dallas, USA), Eran Pisek (Samsung Research America – Dallas, USA), Thomas Henige (Samsung Telecommunications America, USA), Sridhar Rajagopal (Samsung Electronics & Samsung Research America - Dallas, USA) 3151

Optimal Time Allocation for Dynamic-TDMA-based Wireless Powered Communication Networks
Xin Kang (Institute for Infocomm Research, Singapore), Chin Keong Ho (Institute for Infocomm Research, A*STAR, Singapore), Sumei Sun (Institute for Infocomm Research, Singapore) 3157

Logarithmic Quantization Scheme for Reduced Hardware Cost and Improved Error Floor in Non-Binary LDPC Decoders
Yuta Toriyama (University of California, Los Angeles, USA), Behzad Amiri (UCLA, USA), Lara Dolecek (UCLA, USA), Dejan Markovic (University of California, Los Angeles, USA) 3162

Energy Harvesting for Self-sustainable OFDMA Communications
Marco Maso (Mathematical and Algorithmic Sciences Lab, Huawei France Research Center & Singapore University of Technology and Design, France), Subhash Lakshminarayana (Singapore University of Technology and Design (SUTD), Singapore), Tony Q. S. Quek (Singapore University of Technology and Design, Singapore), H. Vincent Poor (Princeton University, USA) 3168

Signal Processing for Distributed, Cooperative & Relayed Communications

Distributed Bayesian Hybrid Power State Estimation with PMU Synchronization Errors
Jian Du (University of Macau, Hong Kong), Shaodan Ma (University of Macau, P.R. China), Yik-Chung Wu (The University of Hong Kong, Hong Kong), H. Vincent Poor (Princeton University, USA) 3174

Secure Multiuser Communications in Multiple Decode-and-Forward Relay Networks with Direct Links
Xianfu Lei (Utah State University, USA), Lisheng Fan (Shantou University, P.R. China), Rose Qingsyang Hu (Utah State University, USA), Diomidis S. Michalopoulos (University of Erlangen-Nuremberg & Institute for Digital Communications, Germany), Pingzhi Fan (Southwest Jiaotong University, P.R. China) 3180

Differential Distributed Space-Time Coding with Imperfect Synchronization
M R. Avendi (University of California, Irvine, USA), Sina Pookasmai (University of California, Irvine, USA), Hamid Jafarkhani (University of California, Irvine, USA) 3186
Compress-and-Forward Receiver Cooperation for Virtual MIMO with Finite-Alphabet Modulation
Hongliang Mao (Tsinghua University, P.R. China), Wei Feng (Tsinghua University, P.R. China), Ning Ge (Tsinghua University, P.R. China) .......................................................... 3192

Individual Channel Tracking for One-Way Relay Networks with Particle Filtering
Hong Hu (Tsinghua University, P.R. China), Shun Zhang (Xidian University, P.R. China), Hongyan Li (Xidian University, P.R. China) .......................................................... 3198

Decentralized Nonlinear Precoding Algorithm for Multi-cell Coordinated Systems
Zhirui Hu (Beijing University of Post and Telecommunication, P.R. China), Chunyan Feng (Beijing University of Posts and Telecommunications, P.R. China), Tiankui Zhang (Beijing University of Posts and Telecommunications, P.R. China), Qiubin Gao (China Academy of Telecommunications Technology (CATT), P.R. China), Shaohui Sun (China Academy of Telecommunications Technology (CATT), P.R. China) .......................................................... 3203

Signal Processing for Estimation & Detection

Widely linear sphere decoding by exploiting the hidden properties of PSK signals
Yuehua Ding (South China University of Technology, P.R. China), Nanxi Li (South China Normal University, P.R. China), Yide Wang (IREENA, Polytech’Nantes, university of Nantes, France), Suili Feng (South China University of Technology, P.R. China) .......................................................... 3209

Interacting Multiple Model Particle Filtering Using New Particle Resampling Algorithm
Dah-Chung Chang (National Central University, Taiwan), Meng-Wei Fang (NCU, Taiwan) ............. 3215

Adaptive Cancellation of Self-Interference in Full-Duplex Wireless with Transmitter IQ Imbalance
Manabu Sakai (Osaka Prefecture University, Japan), Hai Lin (Osaka Prefecture University, Japan), Katsumi Yamashita (Osaka Prefecture University, Japan) .......................................................... 3220

Soft-iterative Magnitude Demodulation
Marco A. C. Gomes (University of Coimbra, Portugal), Vitor Silva (Institute of Telecommunications, Portugal), Francisco Cercas (ISCTE-IUL & Instituto de Telecomunicações, Portugal), Martin Tomlinson (University of Plymouth, United Kingdom) ............. 3225

An Enhanced Fixed-Complexity LLL Algorithm for MIMO Detection
Qingsong Wen (Georgia Institute of Technology, USA), Qi Zhou (Georgia Institute of Technology, USA), Xiaoli Ma (Georgia Institute of Technology, USA) .......................................................... 3231

Maximum asymptotic efficiency equalizer with decision feedback
Weiwei Zhou (George Mason University, USA), Jill Nelson (George Mason University, USA) ............. 3237

Signal Processing for OFDM, OFDMA & Multi-Carrier Communications

Low Complexity Precoder and Equalizer for DMT Systems with Insufficient Cyclic Prefix
Igor Freire (Federal University of Pará, Brazil), Chenguang Lu (Ericsson Research, Sweden), Per-Erik Eriksson (Ericsson Research, Sweden), Aldebaro Klautau (Universidade Federal do Para, Brazil) .......................................................... 3243

Interference Suppression Using EM Algorithm in OFDM Transmissions
Naotoshi Yoda (Keio University, Japan), Tomoaki Ohtsuki (Keio University, Japan), Jun Mashino (NTT, Japan), Takatoshi Sugiyama (NTT, Japan) .......................................................... 3249

Maximum A-Posteriori Based Modulation Detection in Adaptive OFDM Systems
Yun Chen (Fraunhofer Institute for Embedded Systems and Communication Technologies ESK, Germany), Barbara Staehle (Fraunhofer ESK, Germany), Ahmad Saad (Fraunhofer Institute for Embedded Systems and Communication Technologies ESK, Germany), Mike Heidrich (Fraunhofer Institute for Communication Systems ESK, Germany) .......................................................... N/A

Boosting Factor Estimation for LTE Control Channel
Dongwoon Bai (Samsung US R&D Center, USA), Jungwon Lee (Samsung US R&D Center, USA), Inyup Kang (Samsung Electronics, USA) .......................................................... 3255
Iterative Detection for Unique Word OFDM
Werner Haselmayr (Johannes Kepler University Linz, Austria), Christian Hofbauer (Johannes Kepler University Linz, Austria), Bernhard Ettlinger (Johannes Kepler University Linz, Austria), Andreas Springer (Johannes Kepler University Linz, Austria), Mario Huemer (Johannes Kepler University Linz, Austria) ................................................................. 3261

OFDM-based analog multiband: a scalable design for indoor mm-wave wireless communication
Hossein Roufeshbaf (University of California, Santa Barbara, USA), Upamanyu Madhow (University of California, Santa Barbara, USA), Sridhar Rajagopal (Samsung Electronics & Samsung Research America - Dallas, USA) ................................................................. 3267

Signal Processing for Massive MIMO

Multiuser Detection in Massive Spatial Modulation (SM-) MIMO with Low-Resolution ADCs
Wang Shengchu (Tsinghua University, P.R. China), Yunzhou Li (Tsinghua University, P.R. China), Jing Wang (Tsinghua University, P.R. China), Xibin Xu (Tsinghua University, P.R. China) ................................................................. 3273

Uplink Rate Analysis of Multicell Massive MIMO Systems in Ricean Fading
Qi Zhang (Nanjing University of Posts and Telecommunications, P.R. China), Shi Jin (Southeast University, P.R. China), Yongming Huang (Southeast University, P.R. China), Hongbo Zhu (Nanjing University of Posts and Telecommunications, P.R. China) ................................................................. 3279

Pilot Decontamination Through Pilot Sequence Hopping in Massive MIMO Systems
Jesper H Sørensen (Aalborg University, Denmark), Elisabeth de Carvalho (Aalborg University, Denmark) ................................................................. 3285

Matrix Inversion-Less Signal Detection Using SOR Method for Uplink Large-Scale MIMO Systems
Xinyu Gao (Tsinghua University, P.R. China), Linglong Dai (Tsinghua University, P.R. China), Yuting Hu (Tsinghua University, P.R. China), Zhongxu Wang (Tsinghua University, P.R. China), Zhaocheng Wang (Tsinghua University, P.R. China) ................................................................. 3291

Multiuser Massive MIMO Uplink Performance with Mutual Coupling Effects
Ran Zi (Huazhong University of Science and Technology, P.R. China), Ge Xiaohu (Huazhong University of Science & Technology, P.R. China), Haichao Wang (Huazhong University of Science and Technology, P.R. China), Jing Zhang (HUST, P.R. China), Chengxiang Wang (Heriot-Watt University, United Kingdom) ................................................................. 3296

Antenna Group Selection based User Scheduling for Massive MIMO Systems
Byungju Lee (Seoul National University, Korea), Byonghyo Shim (Seoul National University, Korea), Lua Ngo (Korea University, Korea) ................................................................. 3302

Signal Processing for Multi-Antenna Systems 2

AMMSE Optimization for Multiuser MISO Systems with Imperfect CSIT and Perfect CSIR
Hamdi Joudeh (Imperial College London, United Kingdom), Bruno Clerckx (Imperial College London & Korea University, United Kingdom) ................................................................. 3308

Low-Complexity Transceiver Design and Antenna Subset Selection for Cooperative Half- and Full-Duplex Relaying Systems
Xiaochen Xia (College of Communication Engineering, PLA University of Science and Technology, P.R. China), Kui Xu (College of Communications Engineering, PLAUST, P.R. China), Dongmei Zhang (PLA University of Science and Technology, P.R. China), Youyun Xu (PLA University of Science & Technology & Shanghai Jiaotong University, P.R. China) ................................................................. 3314

Enhanced MIMOME Wiretap Channel via Adopting Full-Duplex MIMO Radios
Yongkai Zhou (Shanghai Jiaotong University, P.R. China), Yan Zhu (University of Shang Hai JiaoTong, P.R. China), Zhi Xue (Shanghai Jiao Tong University, P.R. China) ................................................................. 3320

Exploiting Spatial Sparsity for Estimating Channels of Hybrid MIMO Systems in Millimeter Wave Communications
Junho Lee (KAIST, Korea), Gye-Tae Gil (KAIST, Korea), Yong H. Lee (KAIST, Korea) ................................................................. 3326
Joint Power Allocation and Mapping Strategy Design for MIMO Two-Way Relay Channels with Finite-Alphabet Inputs
Hao Feng (Shanghai Jiao Tong University, P.R. China), Zhiyong Chen (Shanghai Jiao Tong University, P.R. China), Hui Liu (Shanghai JiaoTong University, P.R. China) ................................................................. 3332

Downlink Blind Interference Alignment for Cellular Networks
Yi Lu (The University of New South Wales, USA), Wei Zhang (The University of New South Wales, Australia) ........................................................................................................ 3337

Signal Processing for Multi-Antenna Systems I

Selective Vector Perturbation for Low-Power Small Cell MISO Downlinks
Christos Masouros (University College London, United Kingdom), Mathini Sellathurai (Heriot-Watt University, United Kingdom), Tharmalingam Ratnarajah (The University of Edinburgh, United Kingdom) ........................................................................................................ 3343

Limited Feedback Vector Perturbation Precoding By MinMax Optimization
Christos Masouros (University College London, United Kingdom), Mathini Sellathurai (Heriot-Watt University, United Kingdom), Tharmalingam Ratnarajah (The University of Edinburgh, United Kingdom) ........................................................................................................ 3349

Sum Rate Maximizing Multigroup Multicast Beamforming under Per-antenna Power Constraints
Dimitrios Christopoulos (University of Luxembourg & SnT, Luxemburg), Symeon Chatzinotas (University of Luxembourg, Luxemburg), Björn Ottersten (University of Luxembourg, Luxemburg) ........................................................................................................ 3354

Min-Max Robust Transmit Beamforming for Power Efficient Quality of Service Guarantee
Saba Nasseri (King's COLLEGE LONDON, United Kingdom), Mohammad Reza Nakhai (King's College London, United Kingdom) ........................................................................................................ 3360

Sum-Rate Improved Interference Alignment in Wireless MIMO Interference Networks
Hongchao Chen (Institute of Computing Technology, P.R. China), Yiqing Zhou (Chinese Academy of Science, P.R. China), Lin Tian (Institute of Computing Technology, Chinese Academy of Sciences, P.R. China), Zhiguo Liu (ICT/CAS, P.R. China), Yanan Ma (ICT/CAS, P.R. China) ........................................................................................................ 3366

Signal Processing for Sensor Networks

Distributed Multiuser MMSE Relaying Strategies for AF Wireless Relay Networks
Kanghee Lee (Wichita State University, USA), Hyuck Kwon (Wichita State University, USA), Jie Yang (Wichita State University, USA), Edwin Sawan (Wichita State University, USA), Hyuncheol Park (KAIST, Korea) ........................................................................................................ 3372

Optimal Sampling of Random Processes under Stochastic Energy Constraints
Jing Yang (University of Arkansas, USA), Jingxian Wu (University of Arkansas, USA) ........................................................................................................ 3377

Physical Layer Binary Consensus Over Fading Wireless Channels and With Imperfect CSI
Venugopalakrishna Y R (Indian Institute of Science, India), Chandra R Murthy (Indian Institute of Science, India) ........................................................................................................ 3383

Narrowband Cooperative Network Localization
Nikos Fasarakis-Hilliard (University of Alberta, Canada), Panos N. Alevizos (Technical University of Crete, Greece), Aggelos Bletsas (Technical University of Crete, Greece) ........................................................................................................ 3389

Factor Graph-Based Distributed Frequency Allocation in Wireless Sensor Networks
Panos N. Alevizos (Technical University of Crete, Greece), Efthymios Vlachos (Technical University of Crete, Greece), Aggelos Bletsas (Technical University of Crete, Greece) ........................................................................................................ 3395

Controlled Sensing: A Myopic Fisher Information Sensor Selection Algorithm
Daphne-Stavroula Zois (University of Southern California, USA), Urbashi Mitra (University of Southern California, USA) ........................................................................................................ 3401
Signal Processing for Synchronization

Joint Synchronization and Equalization in the Uplink of Multi-user OPRFB Transceivers
Siavash Rahimi (McGill University, Canada), Benoit Champagne (McGill University, Canada) .......... 3407

Employing ICA for Inter-Carrier Interference Cancellation and Symbol Recovery in OFDM Systems
Zhongqiang Luo (University of Electronic Science and Technology of China, P.R. China),
Lidong Zhu (University of Electronic Science and Technology of China, P.R. China), Li
Chengjie (University of Electronic Science and Technology of China, P.R. China) ......................... 3413

Low power synchronization design for large bandwidth wireless LAN systems
Sridhar Rajagopal (Samsung Electronics & Samsung Research America - Dallas, USA), Shadi
Abu-Surra (Samsung Research America - Dallas, USA), Eran Pisek (Samsung Research America - Dallas, USA) .............................................................................. 3418

Channel Estimation and Carrier Recovery in the Presence of Phase Noise in OFDM Relay Systems
Rui Wang (Tongji University, P.R. China), Hani Mehrpouyan (California State University,
USA), Meixia Tao (Shanghai Jiao Tong University, P.R. China), Yingbo Hua (University of
California, Riverside, USA) .......................................................................................................... 3424

ICA Based Joint Semi-Blind Equalization and CFO Estimation for OFDMA Systems
Yufei Jiang (University of Liverpool, United Kingdom), Xu Zhu (University of Liverpool, United
Kingdom), Eng Gee Lim (Xi’an Jiaotong-Liverpool University, P.R. China), Yi Huang
(University of Liverpool, United Kingdom), Hai Lin (Osaka Prefecture University, Japan) ................. 3430

Carrier Frequency Recovery in Wireless Transceivers with Transient Impairments
Jin Yuan (University of Texas at Dallas, USA), Murat Torlak (The University of Texas at Dallas,
USA) ........................................................................................................................................... 3435

GC14 WC: Globecom 2014 - Wireless Communications Symposium

MIMO I

Linear Precoder for Codeword Error Minimization in MIMO Systems with Channel Estimation
Errors
Boon Sim Thian (Institute for Infocomm Research, Singapore), Hieu Duy Nguyen (Institute
for Infocomm Research (I2R), The Agency for Science, Technology and Research (ASTAR),
Singapore), Sumei Sun (Institute for Infocomm Research, Singapore) ........................................... 3827

Degrees of Freedom of Relay-Assisted MIMO Interfering Broadcast Channels
Lu Yang (University of New South Wales, Australia), Wei Zhang (The University of New South
Wales, Australia) .......................................................................................................................... 3833

Joint Transmit and Receive Antennas Selection for Full Duplex MIMO Systems
Mingxin Zhou (Peking University, P.R. China), Lingyang Song (Peking University, P.R. China),
Yonghui Li (University of Sydney, Australia) .................................................................................... 3838

Asynchronous Orthogonal Differential Modulation for MAC Systems
Sina Poorkasmaei (University of California, Irvine, USA), Hamid Jafarkhani (University of
California, Irvine, USA) .................................................................................................................. 3844

A POMDP Solution to Antenna Selection for PER Minimization
Sinchu P (NPOL, India), Reuben G. Stephen (National University of Singapore, Singapore),
Chandra R Murthy (Indian Institute of Science, India), Marceau Coupechoux (Telecom
ParisTech, France) .......................................................................................................................... 3850

Globally Optimal Antenna Selection and Power Allocation for Energy Efficiency Maximization in
Downlink Distributed Antenna Systems
Yuzhou Li (Xidian University, P.R. China), Min Sheng (Xidian University, P.R. China), Xijun
Wang (Xidian University, P.R. China), Yan Shi (Xidian University, P.R. China), Yan Zhang
(Xidian University, P.R. China) ..................................................................................................... 3856
Modulation and Transmission Processing

Performance and Spectral Analysis of Q2PSK and CEQ2PSK Systems in Ideal Bandlimited Channels
Milton Quinteros (University of New Orleans, USA), Edit J. Kaminsky (University of New Orleans, USA), Kenneth V. Cartwright (College of The Bahamas, Bahamas) .......................................................... 3862

Pseudo-random Phase Precoded Spatial Modulation and Precoder Index Modulation
T. Lakshmi Narasimhan (Indian Institute of Science, Bangalore, India), Yalagala Naresh (Indian Institute of Science, India), Tanumay Datta (Indian Institute of Science, India), A. Chockalingam (Indian Institute of Science, India) .......................................................... 3868

A Low-Complexity Rate Compatible Modulation via Variable Weight Sets
Wengui Rao (Huazhong University of Science and Technology & South-Central University for Nationalities, P.R. China), Fang Lu (Huazhong University of Science and Technology, P.R. China), Shaoping Chen (South-Central University for Nationalities, P.R. China), Yan Dong (Huazhong University of Science and Technology, P.R. China), Shu Wang (Huazhong University of Science and Technology, P.R. China) .................................................................................................................. 3874

Orthogonal Frequency Division Multiplexing with Generalized Index Modulation
Rui Fan (Nanyang Technological University, Singapore), Ya Jun Yu (Nanyang Technological University, Singapore), Yong Liang Guan (Nanyang Technological University, Singapore) .......................................................... 3880

Continuous Phase Modulated Orthogonal Multiple Access Scheme
Li Bing (Xidian University, P.R. China), Tor M. Aulin (Chalmers University of Technology & AUCOM International Consulting Telecomm, Sweden), Baoming Bai (Xidian University, P.R. China) .................................................................................................................. 3886

Method of Simultaneous Transmission to Coherent and Non-coherent Receivers Using Ternary Sequences
Sujit Jos (Samsung Advanced Institute of Technology India Labs & Samsung R&D Institute Bangalore, India), Chandra Shekhar Thejaswi (Indian Institute of Science, India), Kiran Bynam (Samsung India, India), Young-Jun Hong (Samsung Electronics & Samsung Advanced Institute of Technology, Korea), Chang Soon Park (SAIT, Korea), Manoj Choudhary (Samsung India Software Operations, India) .................................................................................................................. 3892

Multiuser MIMO

Precoding for Multiuser MIMO Systems with Single-Fed Parasitic Antenna Arrays
George C. Alexandropoulos (Huawei Technologies Co. Ltd., Greece), Vlasis Barousis (Athens Information Technology, Greece), Constantinos B. Papadias (Athens Information Technology, Greece) .......................................................................................................................... 3897

Continuous and Discrete Sum-Rate Maximization for Multiuser MIMO-OFDM Systems with CoMP
Chih-yu Hsu (University of Melbourne, Australia), Meng Wang (University of Melbourne, Australia), Phee Lep Yeoh (University of Melbourne, Australia), Brian Krongold (University of Melbourne, Australia) .......................................................................................................................... 3903

Fairness Based Resource Allocation for Multiuser MIMO Communication Networks
Hsin-Jui Chou (National Tsing Hua University, Taiwan), Che-Jui Tsao (National Tsing Hua University, Taiwan), Jen-Ming Wu (National Tsing Hua University, Taiwan), Jen-Yuan Hsu (Industrial Technology Research Institute, Taiwan), Pangan Ting (Tsing Hua University, Taiwan) .......................................................................................................................... 3910

Energy Efficiency Maximization in Downlink Multiuser MIMO Systems: An Asymptotic Analysis Approach
Liwei Yan (Tsinghua University, P.R. China), Bo Bai (Tsinghua University, P.R. China), Wei Chen (Tsinghua University, P.R. China) .......................................................................................................................... 3916

Optimal Linear Precoding in Multi-User MIMO Systems: A Large System Analysis
Luca Sanguinetti (University of Pisa & SUPELEC, Italy), Emil Björnson (Linköping University, Sweden), Mérouane Debbah (Supelec, France), Aris Moustakas (University of Athens, Greece) .......................................................................................................................... 3922
OFDM/Multi-Carrier/Multiple Access

Complex Gaussian Belief Propagation Algorithms for Distributed Multicell Multiuser MIMO Detection
Ziqi Yue (Harbin Institute of Technology, P.R. China), Qing Guo (Harbin Institute of Technology, P.R. China), Wei Xiang (University of Southern Queenslan, Australia) .......................................................... 3928

Least-Squares Iterative Peak-to-Average Ratio Reduction for MIMO-OFDM Systems
Abdul Wakeel (Jacobs University Bremen, Germany), Werner Henkel (Jacobs University Bremen, Germany) .................................................................................................................................................. 3934

On CP Based OQAM-OFDM Systems and Their Power Spectral Densities
Da Chen (Huazhong University of Science and Technology, P.R. China), Xiang-Gen Xia (University of Delaware, USA), Tao Jiang (Huazhong University of Science and Technology, P.R. China), Xiqi Gao (Southeast University, P.R. China) ................................................................. N/A

SCMA for Downlink Multiple Access of 5G Wireless Networks
Hosein Nikopour (Huawei Technologies Canada, Canada), Eric Yi (Huawei Technologies Canada Co., LTD, Canada), Alireza Bayesteh (Huawei Technologies Co., Ltd., Canada), Kelvin Au (Huawei Technologies, Canada), Mark Hawryluck (Huawei, Canada), Hadi Baligh (Huawei Canada, Canada), Jianglei Ma (Huawei, Canada) ........................................................................................................ 3940

Multi-Carrier Circular-Shift Division Multiple Access for Multi-user Wireless Systems
Jingxian Wu (University of Arkansas, USA), Ali Alqatawneh (University of Arkansas, USA), Hai Lin (Osaka Prefecture University, Japan) ........................................................................................................ 3946

Impact of Feedback Delays on EESM-based Wideband Link Adaptation: Modeling and Analysis
Jobin Francis (Indian Institute of Science, India), Neelesh B. Mehta (Indian Institute of Science, India) .............................................................................................................................................. 3952

Precoding for OFDM under Disguised Jamming
Tianlong Song (Michigan State University, USA), Zhaoxi Fang (Zhejiang Wanli University, P.R. China), Jian Ren (Michigan State University, USA), Tongtong Li (Michigan State University, USA) ........................................................................................................ 3958

Performance Analysis and Design Tradeoffs I

Totally Distributed Energy-Efficient Transmission Design in MIMO Interference Channels
Cunhua Pan (Southeast University, P.R. China), Wence Zhang (Southeast University, P.R. China), Bo Du (Southeast University, P.R. China), Hong Ren (Southeast University, P.R. China), Ming Chen (Southeast University, P.R. China) .............................................................................................................................................. 3964

Performance of Hierarchical Diversity Over Correlated Rician Channels
Bingcheng Zhu (Southeast University, Canada), Julian Cheng (University of British Columbia, Canada), Ho Ting Cheng (BlinQ Networks Inc., Canada), Radu Selea (BlinQ Networks Inc., Canada), Lenan Wu (Southeast University, P.R. China) .............................................................................................................................................. 3970

Novel Unified Expressions for Error Rates and Ergodic Channel Capacity Analysis over Generalized Fading Subject to AWGGN
Ehab Salahat (Khalifa University, UAE), Ali Hakam (UA University, UAE) .............................................................................................................................................. 3976

BER and SER Analyses for M-ary Modulation Schemes Under Symmetric Alpha-Stable Noise
Fan Yang (University of Electronic Science and Technology of China, P.R. China), Xi Zhang (Texas A&M University, ECE Department, USA) .............................................................................................................................................. 3983

Francisco Javier Martin-Vega (University of Málaga & IEEE Student Member, Spain), Francisco Javier Lopez-Martinez (Universidad de Malaga & Stanford University, Spain), Gerardo Gomez (University of Malaga, Spain), Mari Carmen Aguayo-Torres (University of Malaga, Spain) ................................................................. 3989

Pairwise Error Probability of Turbo Codes over Joint Fading and Two-Path Shadowing Channels
Indrakshi Dey (University of Calgary, Canada), Geoffrey G. Messier (University of Calgary, Canada), Sebastian Magierowski (York University, Canada) ........................................................................................................ 3995
Performance Analysis and Design Tradeoff II

*I/Q Imbalance in Two-Way AF Relaying: Performance Analysis and Detection Mode Switch*
Jingya Li (Chalmers University of Technology, Sweden), Michail Matthaiou (Queen's University Belfast, United Kingdom), Tommy Svensson (Chalmers University of Technology, Sweden) .......... 4001

*Single User Detection of Continuous Phase Modulated Multiuser Systems*
Li Bing (Xidian University, P.R. China), Tor M. Aulin (Chalmers University of Technology & AUCOM International Consulting Telecomm, Sweden), Baoming Bai (Xidian University, P.R. China) ........................................................................................................................................................................... 4008

*Energy-Delay Tradeoffs in Impulse-based Ultra-Wideband Body Area Networks with Noncoherent Receivers*
Mohammad Sadegh Mohammadi (Aarhus University & Macquary University, Denmark), Qi Zhang (Aarhus University, Denmark), Eryk Dutkiewicz (Macquarie University, Australia), Xiaojing Huang (University of Technology, Sydney, Australia), Rein Vesilo (Macquarie University, Australia) ........................................................................................................................................................................... 4014

*New Asymptotics for Performance of Energy Detector*
Vesh Raj Sharma Banjade (University of Alberta, Canada), Chintha Tellambura (University of Alberta, Canada), Hai Jiang (University of Alberta, Canada) ........................................................................................................................................................................... 4020

*Sum Rate Analysis of Coordinated Beamforming in Multi-Cell Downlink with Imperfect CSI*
Xiaoming Chen (Nanjing University of Aeronautics and Astronautics, P.R. China), Huazi Zhang (Zhejiang University, P.R. China), Xiuming Wang (Hefei University of Technology, P.R. China), Chau Yuen (Singapore University of Technology and Design, Singapore) ........................................................................................................................................................................... 4025

*Two-Way Relaying Networks with Wireless Power Transfer: Policies Design and Throughput Analysis*
Yuanwei Liu (Queen Mary, University of London, United Kingdom), Lifeng Wang (Queen Mary, University of London, United Kingdom), Maged Elkashlan (Queen Mary, University of London, United Kingdom), Trung Q. Duong (Queen's University Belfast, United Kingdom), Arumugam Nallanathan (King's College London, United Kingdom) ........................................................................................................................................................................... 4030

Detection and Estimation

*OMP-Based Detector Design for Space Shift Keying in Large MIMO Systems*
Chien-Hsien Wu (Academia Sinica & Research Center for Information Technology Innovation, Taiwan), Wei-Ho Chung (Academia Sinica, Taiwan), Han-Wen Liang (Academia Sinica, Taiwan) ........................................................................................................................................................................... 4072

*Time Reversal for Ant Trails in wireless networks*
Dinh-Thuy Phan-Huy (Orange-France Telecom, France), Nadine Malhouroux (France Telecom Research & Development, France), Maryline Héard (INSIA Rennes & IETR Institute of Electronics and Telecommunications of Rennes, France) ........................................................................................................................................................................... 4077

*Closed-Form Cramér-Rao Lower Bounds for CFO and Phase Estimation from Turbo-Coded Square-QAM-Modulated signals*
Faouzi Bellili (INRS, Canada), Achref Methenni (Institut National de la Recherche Scientifique, INRS-EMT, Montreal, Canada), Sofiene Affes (INRS-EMT, Canada) ........................................................................................................................................................................... 4083

*Investigation of Short-range High Precision 3D Localization via UWB Radio*
Hailiang Xiong (The School of Information Science and Engineering, Shandong University, P.R. China), Julian Cheng (University of British Columbia, Canada) ........................................................................................................................................................................... 4090

*Joint Equalization and Phase Drift Estimation for Underwater Acoustic Communications*
Pedro Pedrosa (Instituto de Telecomunicações - Lisboa & Instituto Superior Tecnico, Portugal), Rui Dinis (Instituto de Telecomunicaacoes & FCT-UNL, Portugal), Fernando Nunes (Instituto Superior Tecnico & Instituto de Telecomunicações, Portugal) ........................................................................................................................................................................... 4096

*Channel Training Procedures for MIMO Interfering Point-to-Multipoint Channel*
Adrian Agustin (Universitat Politècnica de Catalunya (UPC), Spain), Sandra Lagen (Universitat Politècnica de Catalunya, Spain), Josep Vidal (Universitat Politècnica de Catalunya, Spain) .......... 4102
Physical Layer Security

Secrecy Outage of a Two-User Slow Fading Broadcast Channel
Bo Wang (Xi'an Jiaotong University, P.R. China), Pengcheng Mu (Xi'an Jiaotong University, P.R. China), Hui-Ming Wang (Xi'an Jiaotong University, P.R. China), Qinye Yin (Xi'an Jiaotong University, P.R. China) .................................................................................................................. 4108

Channel-based Physical Layer Authentication
Chengcheng Pei (University of Waterloo, Canada), Ning Zhang (University of Waterloo, Canada), Sherman Shen (University of Waterloo, Canada), Jon Mark (University of Waterloo, Canada) .................................................................................................................. 4114

Secure Multiuser Multiple Amplify-and-Forward Relay Networks in Presence of Multiple Eavesdroppers
Lisheng Fan (Shantou University, P.R. China), Xianfu Lei (Utah State University, USA), Trung Q. Duong (Queen's University Belfast, United Kingdom), Maged Elkashlan (Queen Mary, University of London, United Kingdom), George K. Karagiannidis (Aristotle University of Thessaloniki, Greece) .................................................................................................................. 4120

Analyzing Mobile Phone Vulnerabilities Caused by Camera
Longfei Wu (Temple University, USA), Xiaojiang Du (Temple University, USA), Li Wang (Beijing University of Posts and Telecommunications, P.R. China), Xinwen Fu (University of Massachusetts Lowell, USA), Ralph Mbouna (Temple University, USA), Seong Kong (Temple University, USA) .................................................................................................................. 4126

Secure Wireless Information and Power Transfer in Large-Scale MIMO Relaying Systems with Imperfect CSI
Xiaoming Chen (Nanjing University of Aeronautics and Astronautics, P.R. China), Jian Chen (Nanjing University of Aeronautics and Astronautics, P.R. China), Tao Liu (Nanjing University of Aeronautics and Astronautics, P.R. China) .................................................................................................................. 4131

Relaying I

Cognitive DF Generalized Order Relay Selection Networks with Imperfect Channel Estimation and Interference from Primary User
Anas M. Salhab (King Fahd University of Petroleum & Minerals, Saudi Arabia), Salam A. Zummo (KFUPM, Saudi Arabia) .................................................................................................................. 4137

Interference-Aware Dual-Hop Cooperative Relaying in a Poisson Field of Interferers
Wei Lu (L2S, CNRS, Université Paris-Sud, France), Marco Di Renzo (French National Center for Scientific Research (CNRS), France) .................................................................................................................. 4143

Relay-Assisted Downlink Transmissions to Support Increased Data Rates for Single Antenna Users
Fadhel Alhumaidi (Dalhousie University, Canada), Jacek Ilow (Dalhousie University, Canada) .......... 4150

Achievable Rates for the Fading Half-Duplex Single Relay Selection Network Using Buffer-Aided Relaying
Nikola Zlatanov (University of British Columbia, Canada), Vahid Jamali (Friedrich-Alexander-University Erlangen-Nürnberg, Germany), Robert Schober (University of British Columbia, Canada) .................................................................................................................. 4156

A Delay-Constrained Protocol with Adaptive Mode Selection for Bidirectional Relay Networks
Vahid Jamali (Friedrich-Alexander-University Erlangen-Nürnberg, Germany), Nikola Zlatanov (University of British Columbia, Canada), Robert Schober (University of British Columbia, Canada) .................................................................................................................. 4162

Achievable Rates for Uplink Communications in LTE-Advanced Networks with Decode-and-Forward Relays
Xiaoxia Zhang (University of Waterloo, Canada), Sherman Shen (University of Waterloo, Canada), Liang-Liang Xie (University of Waterloo, Canada) .................................................................................................................. 4168
Relaying III

Performance Analysis of Multiuser 2-hop Systems with Random Placement of Relay Nodes
Alberto Zanella (Istituto di Elettronica e di Ingegneria dell’Inform. e delle Telecomunicazioni, Italy), Alessandro Bazzi (WiLab, IEIIT-BO/CNR, University of Bologna, Italy), Barbara M Masini (CNR - IEIIT & University of Bologna, Italy), Gianni Pasolini (University of Bologna, Italy) .......................................................... 4174

Non-Linear Lattice Precoding for Multiuser Cellular Two-Way Relay Channels
Zhaoxi Fang (Zhejiang Wanli University, P.R. China), Xiaojune Yuan (ShanghaiTech University, P.R. China), Xin Wang (Fudan University, P.R. China) ........................................................................... 4180

Distributed power control over interference channels using ACK/NACK feedback
Riccardo Andreotti (University of Pisa, Italy), Leonardo Marchetti (Università di Pisa, Italy), Luca Sanguinetti (University of Pisa & SUPELEC, Italy), Mërouane Debbah (Supelec, France) .......... 4186

The Impact of Relay Selection on the Tradeoff Between Information Transmission and Wireless Energy Transfer
Diomidis S. Michalopoulos (University of Erlangen-Nuremberg & Institute for Digital Communications, Germany), Himad A Suraweera (University of Peradeniya, Sri Lanka), Robert Schober (Universität Erlangen-Nürnberg, Germany) ......................................................................................... 4191

A Coalition Formation Game for Transmitter Cooperation in OFDMA Uplink Communications
Ali Chelli (King Abdullah University of Science and Technology (KAUST), Saudi Arabia), Hamidou Tembine (Supelec, France), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia) ............................................................................................................ 4197

Spectral Efficiency of Cooperative Full-Duplex Relaying with Imperfect Channel Estimation
Li Li (University of Delaware, USA), Leonard Cimini (University of Delaware, USA), Yao Xiao (University of Delaware, USA) .................................................................................................................. 4203

Resource Allocation

Joint Downlink and Uplink Resource Allocation for Energy-efficient Carrier Aggregation
Guanding Yu (Zhejiang University, P.R. China), Qimei Chen (Zhejiang University, P.R. China), Rui Yin (Zhejiang Gongshang University & Zhejiang University, P.R. China), Huazi Zhang (Zhejiang University, P.R. China), Geoffrey Li (Georgia Tech, USA) .................................................................................................................... 4209

Random Access with Multipacket Reception and Adaptive Filtering
Majid Ghanbarinejad (University of Alberta, Canada), Christian Schlegel (Dalhousie University, Canada), Majid Khabbazian (University of Alberta, Canada) .................................................................................. 4215

Optimal Power and Polarization for the Capacity of Polarization Division Multiple Access Channels
Seok-Chul Kwon (Georgia Institute of Technology, USA) ......................................................................................................................... 4221

Resource Allocation for HARQ-IR Systems with QoS Constraints and Limited Feedback
Duc To (Aeroflex Limited, United Kingdom), Huan X Nguyen (Middlesex University, United Kingdom), Quoc-Tuan Vien (Middlesex University, United Kingdom), Li-Ke Huang (Aeroflex, United Kingdom) ......................................................................................................................... 4226

Joint Resource Allocation and User Association in Downlink Three-tier Heterogeneous Networks
Chunshan Liu (Macquarie University, Australia), Philip Whiting (Macquarie University, Australia), Stephen Hanly (Macquarie University, Australia) .................................................................................. 4232

Energy-Optimal Probabilistic Base Station Sleeping under a Separation Network Architecture
Shan Zhang (Tsinghua University, P.R. China), Jian Wu (Tsinghua University, P.R. China), Jie Gong (Tsinghua University, P.R. China), Sheng Zhou (Tsinghua University, P.R. China), Zhisheng Niu (Tsinghua University, P.R. China) ........................................................................................................ 4239
Small Cells

Enhancing Cell Edge Users Performance in Open Access Small Cells Networks: A Cross Layer Approach
Ali Y. Al-Zahrani (Carleton University, Canada), F. Richard Yu (Carleton University, Canada) 4245

Designing Femtocell Exclusion Zones to Minimize Power in a Heterogeneous Network
Chenlong Jia (National University of Singapore, Singapore), Teng Joon Lim (National University of Singapore, Singapore) 4251

Power Control and Rate Allocation for Outage Balancing in Femtocell Networks
Haining Wang (University of California, Davis, USA), Zhi Ding (University of California at Davis, USA) 4257

Areal Capacity Limit on the Growth of Small Cell Density in Heterogeneous Networks
Jaewon Kim (Samsung Electronics, Korea), Cheol Jeong (Samsung Electronics, Korea), Hyunkyu Yu (Samsung Electronics, Korea), Jeongho Park (Samsung Electronics, Korea) 4263

Cognitive Spectrum Access in Macro-Femto Heterogeneous Networks
Lu Yang (The Hong Kong University of Science and Technology, Hong Kong), Shenghui Song (The Hong Kong University of Science and Technology, Hong Kong), Khaled B. Letaief (The Hong Kong University of Science and Technology, Hong Kong) 4269

Analytical Evaluation of Fractional Frequency Reuse for MIMO Heterogeneous Cellular Networks
Zhuang He (Keio University, Japan), Tomoaki Ohtsuki (Keio University, Japan) 4275

Wireless Energy Transfer/ Energy Harvesting

Resource Allocation for Coordinated Multipoint Networks with Wireless Information and Power Transfer
Derrick Wing Kwan Ng (Friedrich-Alexander-University Erlangen-Nürnberg, Germany), Robert Schober (University of British Columbia, Canada) 4281

Effect of Opportunistic Scheduling on the Efficiency of Wireless Power Transfer
Minghua Xia (Institut National de la Recherche Scientifique (INRS), Canada), Sonia Aïssa (INRS, University of Quebec, Canada) 4288

Optimal Energy-Efficient Transmission for Fading Channels with an Energy Harvesting Transmitter
Qingqing Wu (Shanghai Jiao Tong University, P.R. China), Meixia Tao (Shanghai Jiao Tong University, P.R. China), Wen Chen (Shanghai Jiao Tong University, P.R. China), Jinsong Wu (Bell Laboratories, Alcatel-Lucent, P.R. China) 4294

Data Acquisition with RF-based Energy Harvesting Sensor: From Information Theory to Green System
Tao Li (Tsinghua University, P.R. China), Pingyi Fan (Tsinghua University, P.R. China), Khaled B. Letaief (The Hong Kong University of Science and Technology, Hong Kong) 4300

Energy Harvesting Transmitter with Finite-Alphabet Inputs and Statistical CSI: Online Preceding by Dynamic Programming
Weiliang Zeng (Missouri University of Science and Technology, USA), Yahong Rosa Zheng (Missouri University of Science and Technology, USA), Chengshan Xiao (Missouri University of Science and Technology, USA) 4306

Optimal Training for Wireless Energy Transfer
Yong Zeng (National University of Singapore, Singapore), Rui Zhang (National University of Singapore, Singapore) 4312

Cognitive Networks

Multi-Objective Clustering Optimization for Multi-Channel Cooperative Sensing in CRNs
Abdulkadir Celik (Iowa State University, USA), Ahmed E. Kamal (Iowa State University, USA) 3441
Cooperative Communications

Kalman Filter Based Incumbent User Active Area Detection for Licensed Shared Access
Beeshanga Abewardana Jayawickrama (Macquarie University, Australia), Eryk Dutkiewicz (Macquarie University, Australia), Markus Dominik Mueck (Intel Mobile Communications, Germany)  N/A

Resource Allocation schemes for Cognitive LTE-A Femto-cells using Zero Forcing Beamforming and Users Selection
Giulio Bartoli (University of Florence, Italy), Romano Fantacci (University of Florence, Italy), Dania Marabissi (University of Florence, Italy), Marco Pucci (University of Florence, Italy)  3447

Optimal Power Control for Underlay Cognitive Radio Systems with Arbitrary Input Distributions
Gozde Ozcan (Syracuse University, USA), M. Cenk Gursoy (Syracuse University, USA)  3453

LTE in the Unlicensed Spectrum: A Novel Coexistence Analysis with WLAN Systems
Jeongho Jeon (Intel Corporation, USA), Qian (Clara) Li (Intel Corporation, USA), Huaning Niu (Intel, USA), Apostolos Papathanassiou (Intel Corporation & Intel Architecture Group, USA), Geng Wu (Intel Corporation, USA)  3459

Wireless Energy Harvesting and Information Transfer in Cognitive Two-Way Relay Networks
Zihao Wang (Shanghai Jiao Tong University, P.R. China), Zhiyong Chen (Shanghai Jiao Tong University, P.R. China), Yao Yao (Huawei Technologies Co., Ltd., P.R. China), Bin Xia (Shanghai Jiao Tong University, P.R. China), Hui Liu (Shanghai JiaoTong University, P.R. China)  3465

Heterogeneous networks

Pricing-based Distributed Power Control for Weighted Sum Energy-Efficiency Maximization in Ad Hoc Networks
Cunhua Pan (Southeast University, P.R. China), Bingyang Wu (Southeast University, P.R. China), Nuo Huang (Southeast University, P.R. China), Hong Ren (Southeast University, P.R. China), Ming Chen (Southeast University, P.R. China)  3579

Selection Decode-and-Forward Cooperative FSO Systems with Adaptive Rate Strategy over Gamma-Gamma Fading Channels
Bach Vu (The University of Aizu, Japan), Truong Cong Thang (The University of Aizu, Japan), Anh T. Pham (The University of Aizu, Japan)  3585

Scalable Coordinated Uplink Processing in Cloud Radio Access Networks
Congmin Fan (The Chinese University of Hong Kong, Hong Kong), Ying Jun (Angela) Zhang (The Chinese University of Hong Kong, Hong Kong), Xiaojun Yuan (ShanghaiTech University, P.R. China)  3591

Outage Probability of Underlay Cognitive Relay Networks with Spatially Random Nodes
Yamuna Dhungana (University of Alberta, Canada), Chinthu Tellambura (University of Alberta, Canada)  3597

Scalable Coordinated Beamforming for Dense Wireless Cooperative Networks
Yuanming Shi (The Hong Kong University of Science and Technology, Hong Kong), Jun Zhang (The Hong Kong University of Science and Technology, Hong Kong), Khaled B. Letaief (The Hong Kong University of Science and Technology, Hong Kong)  3603

The Exact Outage Probability of Multiuser Linear Network Coded Cooperation System
Zhenzhou Tang (Wenzhou University, P.R. China), Hongyu Wang (Dalian University of Technology, P.R. China), Qian Hu (Wenzhou University, P.R. China), Xiaojie Shi (Wenzhou University, P.R. China)  3609

Load Balancing with Almost Blank Subframe Control in Heterogeneous Cellular Networks
Doo-hyun Sung (University of Maryland, College Park, USA), John S. Baras (University of Maryland College Park, USA)  3615
Utility-based Almost Blank Subframe Optimization in Heterogeneous Cellular Networks
Doo-hyun Sung (University of Maryland, College Park, USA), John S. Baras (University of Maryland College Park, USA).................................................................................................................................................................................. 3622

Analytical Modeling of Cognitive Heterogeneous Cellular Networks over Nakagami-m Fading
Fereidoun H. Panahi (Keio University, Japan), Tomoaki Ohtsuki (Keio University, Japan) ...................... 3628

Heterogeneous Network Throughput with Hybrid-Duplex Systems
Jemin Lee (Singapore University of Technology and Design (SUTD), Singapore), Tony Q. S. Quek (Singapore University of Technology and Design, Singapore) .......................................................................................................................... 3635

Fitting Determinantal Point Processes to Macro Base Station Deployments
Yingzhe Li (The University of Texas at Austin, USA), Francois Baccelli (UT Austin & The University of Texas at Austin, USA), Harpreet S Dhillon (Virginia Tech, USA), Jeffrey Andrews (The University of Texas at Austin, USA) .................................................................................................................................................................. 3641

Statistical Modeling of Spatial Traffic Distribution with Adjustable Heterogeneity and BS-Correlation in Wireless Cellular Networks
Meisam Mirahsan (Carleton University, Canada), Rainer Schoenen (RWTH Aachen University, Faculty 6, Germany), Halim Yanikomeroglu (Carleton University, Canada) ................................................................. 3647

Joint Multiuser Downlink Beamforming and Admission Control in Heterogeneous Networks
Duy H. N. Nguyen (McGill University, Canada), Long Bao Le (INRS, University of Quebec, Canada), Tho Le-Ngoc (McGill University, Canada) ...................................................................................................................... 3653

Overlaid Device-to-Device Communication in Cellular Networks
Geordie George (Universitat Pompeu Fabra, Spain), Ratheesh K. Mungara (Universitat Pompeu Fabra (UPF), Spain), Angel Lozano (Universitat Pompeu Fabra (UPF), Spain) ......................... 3659

Distributed and QoS-Driven Cell Association in HetNets to Minimize Global Outage Probability
Hamidreza Boostanimehr (University of British Columbia, Canada), Vijay Bhargava (University of British Columbia, Canada) ................................................................................................................. 3665

Coverage Analysis for Two-tier Dynamic TDD Heterogeneous Networks
Hongguang Sun (Xidian University, P.R. China), Min Sheng (Xidian University, P.R. China), Matthias Wildemeersch (Singapore University of Technology and Design (SUTD), Singapore), Tony Q. S. Quek (Singapore University of Technology and Design, Singapore) ..................................................... 3672

Improved MPSO Based eICIC Algorithm for LTE-A Ultra Dense HetNets
Huiliin Jiang (Southeast University, P.R. China), Pei Li (Southeast University, P.R. China), Zhihang Li (Southeast University, P.R. China), En Tong (Southeast University, P.R. China), Zhiwen Pan (Southeast University, P.R. China), Nan Liu (Southeast University, P.R. China), Xiaohu You (National Mobile communication Research Lab., Southeast University, P.R. China) ....... 3678

Spatial Multiplexing in Heterogeneous Networks with MMSE Receiver
Sreejith Thazhathe Veetil (Indian Institute of Technology Hyderabad, India), Kiran Kuchi (IIT Hyderabad, India), Radha Krishna Ganti (Indian Institute of Technology Madras, India) ......................... 3684

Interference coordination

Cognitive Blind Interference Alignment for Macro-Femto Cellular Networks
Maximo Morales (Universidad Carlos III de Madrid, Spain), Jorge Plata-Chaves (Katholieke Universiteit Leuven (KU Leuven), Belgium), Dimitris Toumpakaris (University of Patras, Greece), Ana Garcia Armada (Universidad Carlos III de Madrid, Spain) ......................................................................................................................... 3725

On Interference Alignment over Frequency Selective Channel
Ahmed Ali (University of Texas at Dallas, USA), Murat Torlak (The University of Texas at Dallas, USA) ........................................................................................................................................................................... 3731

Self-Mixed Self-Interference Analog Cancellation in Full-Duplex Communications
Hongtao Lu (University of Electronic Science and Technology of China, P.R. China), Shihai Shao (University of Electronic Science and Technology of China, P.R. China), Youxi Tang (University of Electronic Science and Technology of China, P.R. China) ......................................................................................... 3737
Massive MIMO I

New Approach for Massive MIMO Detection Using Sparse Error Recovery
Jun Won Choi (Hanyang University, Korea), Byonghyo Shim (Seoul National University, Korea) ................................................................. 3754

Analysis of Rate Optimized Throughput for Large-Scale MIMO-(H)ARQ Schemes
Peter Larsson (KTH Royal Institute of Technology, Sweden), Lars K. Rasmussen (KTH Royal Institute of Technology, Sweden), Mikael Skoglund (KTH Royal Institute of Technology, Sweden) ................................................................. 3760

Data-Assisted Channel Estimation for Uplink Massive MIMO Systems
Rui Wang (The South University of Science and Technology of China, P.R. China), Yifan Chen (South University of Science and Technology of China, P.R. China), Haisheng Tan (Jinan University, P.R. China) ................................................................................. 3766

Achievable Rates of Uplink Multiuser Massive MIMO Systems with Estimated Channels
Songtao Lu (Iowa State University, USA), Zhengdao Wang (Iowa State University, USA) ................................................................. 3772

Achievable Rate Analysis of Large Scale Antenna Systems with Hardware Mismatch in UL/DL
Wence Zhang (Southeast University, P.R. China), Cunhua Pan (Southeast University, P.R. China), Bo Du (Southeast University, P.R. China), Ming Chen (Southeast University, P.R. China), Rodrigo C. de Lamare (University of York, United Kingdom) ................................................................................. 3778

Constant-Envelope Omni-Directional Transmission with Diversity in Massive MIMO Systems
Xin Meng (Southeast University, P.R. China), Xiang-Gen Xia (University of Delaware, USA), Xiqi Gao (Southeast University, P.R. China) ................................................................................. 3784

Millimeter Wave and Tera Hz Communications

Indoor Terahertz Communications with Antenna Subarrays
Cen Lin (Georgia Institute of Technology, USA), Geoffrey Li (Georgia Tech, USA) ......................... 3790

Pulsed Terahertz Time-Domain Communication
Farnoosh Moshir (Portland State University, USA), Suresh Singh (Portland State University, USA) ................................................................................. 3796

On the feasibility of beamforming in millimeter wave communication systems with multiple antenna arrays
Jaspreet Singh (Samsung Telecommunications America, USA), Sudhir Ramakrishna (Samsung, USA) ................................................................................. 3802

Coverage and Rate Trends in Dense Urban mmWave Cellular Networks
Mandar N. Kulkarni (The University of Texas at Austin, USA), Sarabjot Singh (The University of Texas at Austin, USA), Jeffrey Andrews (The University of Texas at Austin, USA) ......................... 3809

Low Complexity RF Beam Search Algorithms for Millimeter-Wave Systems
Md Saifur Rahman (Samsung Research America - Dallas & Samsung Information Systems America, USA), Kaushik Josiam (Samsung Research America - Dallas, USA) ................................................................................. 3815
Experimental Demonstration of 16 Gbit/s millimeter-wave Communications using MIMO Processing of 2 OAM Modes on Each of Two Transmitter/Receiver Antenna Apertures
Yongxiong Ren (University of Southern California, USA), Long Li (University of Southern California, USA), Guodong Xie (University of Southern California, USA), Yan Yan (University of Southern California, USA), Yinwen Cao (University of Southern California, USA), Hao Huang (University of Southern California, USA), Nisar Ahmed (University of Southern California, USA), Martin Lavery (University of Glasgow, United Kingdom), Zhe Zhao (University of Southern California, USA), Chongfu Zhang (University of Electronic Science and Technology of China, P.R. China), Moshe Tur (Tel Aviv University, Israel), Miles Padgett (University of Glasgow, United Kingdom), Giuseppe Caire (Technische Universität Berlin, Germany), Andreas Molisch (University of Southern California, USA), Alan Willner (University of Southern California, USA) .................................................................................................................. 3821

Channel Measurement and Modeling (Interactive)

Effect of LOS/NLOS Propagation on Area Spectral Efficiency and Energy Efficiency of Small-Cells
Carlo Galiotto (CTVR, Trinity College Dublin, Ireland), Ismael Gomez-Miguelez (Trinity College Dublin, Ireland), Nicola Marchetti (CTVR Trinity College, Ireland), Linda Doyle (Trinity College Dublin, Ireland) .......................................................................................................................... 3471

Capture Analysis of Mobile Multi-Packet Networks Adopting Spatial Reuse: An Alternative Study
Fulvio Babich (University of Trieste, Italy), Massimiliano Comisso (University of Trieste, Italy) .......... 3477

Ultra-Wideband Statistical Channel Model for Non Line of Sight Millimeter-Wave Urban Channels
Mathew Samimi (2 MetroTech Center, USA), Theodore Rappaport (New York University & NYU WIRELESS, USA) ............................................................................................................................................. 3483

The Area Under a Receiver Operating Characteristic Curve Over Enriched Multipath Fading Conditions
Paschalis C. Sofotasios (Tampere University of Technology & Aristotle University of Thessaloniki, Finland), Mulugeta K Fikadu (Tampere University of Technology, Finland), Khuong Ho-Van (HoChiMinh City University of Technology, Vietnam), Mikko Valkama (Tampere University of Technology, Finland), George K. Karagiannidis (Aristotle University of Thessaloniki, Greece) ..................................................................................................................... 3490

Method for Obtaining Full Channel State Information for RF Beamforming
Timothy A. Thomas (Nokia Solutions and Networks, USA), Frederick W. Vook (Nokia Solutions and Networks, USA) ........................................................................................................................................................................ 3496

A Variable-Length Channel Quantizer for Multicast Networks with Two Users
Xiaoyi Liu (University of California, Irvine, USA), Erdem Koyuncu (University of California, Irvine, USA), Hamid Jafarkhani (University of California, Irvine, USA) ......................................................................................................................... 3501

Massive MIMO II (Interactive)

Constellation Design in Noncoherent Massive SIMO Systems
Alexandros Manolakos (Stanford University, USA), Mainak Chowdhury (Stanford University, USA), Andrea Goldsmith (Stanford University, USA) ....................................................................................................................... 3690

Conjugate Gradient-based Soft-Output Detection and Precoding in Massive MIMO Systems
Bei Yin (Rice University, USA), Michael Wu (Rice University, USA), Joseph R. Cavallaro (Rice University, USA), Christoph Studer (Cornell University, USA) ........................................................................................................... 3696

Sub-Sector-Based Codebook Feedback for Massive MIMO with 2D Antenna Arrays
Dawei Ying (Purdue University, USA), Frederick W. Vook (Nokia Solutions and Networks, USA), Timothy A. Thomas (Nokia Solutions and Networks, USA), David Love (Purdue University, USA) ......................................................................................................................... 3702

Reciprocity calibration methods for Massive MIMO based on antenna coupling
Joao Vieira (Lund University, Sweden), Fredrik Rusek (Lund University, Sweden), Fredrik Tufvesson (Lund University, Sweden) ........................................................................................................................................... 3708
User Capacity of Pilot-Contaminated TDD Massive MIMO Systems
Juei Chin Shen (Hong Kong University of Science and Technology, Hong Kong), Jun Zhang (The Hong Kong University of Science and Technology, Hong Kong), Khaled B. Letaief (The Hong Kong University of Science and Technology, Hong Kong) .......................................................... 3713

Semi-orthogonal Pilot Design for Massive MIMO Systems Using Successive Interference Cancellation
Xinru Zheng (Southeast University, P.R. China), Hua Zhang (Southeast University, P.R. China), Wei Xu (Southeast University, P.R. China), Xiaohu You (National Mobile communication Research Lab., Southeast University, P.R. China) .......................................................... 3719

MIMO II (Interactive)

Energy Efficiency in Multi-Cell MIMO Broadcast Channels with Interference Alignment
Jie Tang (University of Manchester, United Kingdom), Daniel K. C. So (University of Manchester, United Kingdom), Emad Alsusa (Manchester University, United Kingdom), Khairi A. Hamdi (University of Manchester, United Kingdom), Arman Shojaeifard (University of Manchester, United Kingdom) .......................................................... 4036

Scalable algorithms for joint beam and null-forming using distributed antenna arrays
Amy Kumar (University of Iowa, USA), Raghuraman Mudumbai (University of Iowa, USA), Soura Dasgupta (The University of Iowa, USA) .......................................................... 4042

Degrees of Freedom of Cellular Networks: Gain from Full-duplex Operation at a Base Station
Sung Ho Chae (Samsung Electronics, Korea), Sung Hoon Lim (EPFL, Switzerland) .......................................................... 4048

Joint Coordinated Beamforming and Admission Control for Fronthaul Constrained Cloud-RANs
Vu Nguyen Ha (INRS, University of Quebec, Canada), Long Bao Le (INRS, University of Quebec, Canada) .......................................................... 4054

Convex-Concave Procedure for Weighted Sum-Rate Maximization in a MIMO Interference Network
Seungil You (California Institute of Technology, USA), Lijun Chen (University of Colorado at Boulder, USA), Youjian (Eugene) Eugene Liu (University of Colorado at Boulder, USA) .......................................................... 4060

Beamforming for Multiuser Massive MIMO Systems: Digital versus Hybrid Analog-Digital
Tadilo Endeshaw Bogale (University du Quebec, Institute National de la Recherche Scientifique (INRS), Canada), Long Bao Le (INRS, University of Quebec, Canada) .......................................................... 4066

Relaying II (Interactive)

Peak Power Constrained Closed-Form Transceiver Designs for MIMO AF Relaying Systems with Direct Link
Han-Bae Kong (Korea University, Korea), Changick Song (Korea National University of Transportation, Korea), Haewook Park (Korea University, Korea), Inkyu Lee (Korea University, Korea) .......................................................... 4318

Layered Compress-and-Forward Cooperation in Wireless Multicast with M-ary PAM transmissions
Ismar Tariq (Lahore University of Management Sciences, Pakistan), Mirza Uzair Baig (University of Hawaii, USA), Momin Uppal (Lahore University of Management Sciences, Pakistan) .......................................................... 4324

Doubly Hermitian Precoding for Parallel MIMO Relay Networks
Jianwen Zhang (City University of Hong Kong, Hong Kong), Xiaojun Yuan (ShanghaiTech University, P.R. China), Li Ping (City University of Hong Kong, Hong Kong) .......................................................... 4330

Degrees of Freedom of Half-duplex MIMO Multi-way Relay Channel with Full Data Exchange
Tao Huang (University of New South Wales, Australia), Xiaojun Yuan (ShanghaiTech University, P.R. China), Jinhong Yuan (University of New South Wales, Australia) .......................................................... 4336
On the Achievable Rates of Full-duplex Gaussian Relay Channel
Zhengchuan Chen (Tsinghua University, P.R. China), Pingyi Fan (Tsinghua University, P.R. China), Dapeng Oliver Wu (University of Florida, USA), Ke Xiong (Beijing Jiaotong University, P.R. China), Khaled B. Letaief (The Hong Kong University of Science and Technology, Hong Kong) .......................................................................................................................... 4342

Energy Efficient Bit and Power Loading for OFDM-based Two-Way Relay Systems
Qi Sun (China Mobile Research Institute, P.R. China), Lihua Li (Beijing University of Posts and Telecommunications, P.R. China), Markku Juntti (University of Oulu, Finland), Junling Mao (Beijing University of Posts and Telecommunications, P.R. China), Antti Tölli (University of Oulu, Finland) .......................................................................................................................... N/A

Channel Coding and ARQ

On the Design of Binary Polar Codes for High-Order Modulation
Corina Ioana Ionita (Rice University, USA), Mohamed Mansour (TI, USA), June Chul Roh (Texas Instruments, Inc., USA), Srinath Hosur (Texas Instruments, USA) .................................................................................................................................. 3507

On the Finite Blocklength Performance of HARQ in Modern Wireless Systems
Cenk Sahin (University of Kansas, USA), Lingjia Liu (University of Kansas, USA), Erik S. Perrins (University of Kansas, USA) .................................................................................................................................. 3513

Sparse Event Detection in Wireless Sensor Networks using Analog Fountain Codes
Mahyar ShirvaniMohaddam (University of Sydney, Australia), Yonghui Li (University of Sydney, Australia), Branka Vucetic (The University of Sydney, Australia) .................................................................................................................................. 3520

Energy-Efficient Delay-Tolerant Communication: Revisiting Optimality of Superposition Coding in Broadcast Channels
Muryong Kim (The University of Texas at Austin, USA), Harish Viswanathan (Bell Labs, Alcatel-Lucent, USA) .................................................................................................................................. 3526

Blind Identification of Binary LDPC Codes for M-QAM Signals
Tian Xia (Louisiana State University, USA), Hsiao-Chun Wu (Louisiana State University, USA), Shih Yu Chang (National Tsing Hua University of Taiwan, Taiwan), Xian Liu (University of Arkansas at Little Rock, USA), Scott CH Huang (National Tsing Hua University, Taiwan) .................................................................................................................................. 3532

LDPC Encoder Identification in Time-Varying Flat-Fading Channels
Tian Xia (Louisiana State University, USA), Hsiao-Chun Wu (Louisiana State University, USA), Supratik Mukhopadhyay (Louisiana State University, USA) .................................................................................................................................. 3537

Channel Estimation/Prediction

Joint Time Synchronization and Channel Estimation for Two-Way Amplify-and-Forward Relay Systems
Chin-Liang Wang (National Tsing Hua University, Taiwan), Po-Chun Chiu (National Tsing Hua University, Taiwan), Hung-Chin Wang (National Tsing Hua University, Taiwan) .................................................................................................................................. 3543

Channel Prediction and Network Coding for Smart Gateway Diversity in Terabit Satellite Networks
Muhammad Muhammad (German Aerospace Center (DLR), Germany), Giovanni Giambene (University of Siena, Italy), Tomaso De Cola (German Aerospace Center (DLR), Germany) .................................................................................................................................. 3549

Nested Sampling for Higher-Order Statistics with Application to LTE Channel Estimation
Qiong Wu (University of Texas at Arlington, USA), Qilian Liang (University of Texas at Arlington, USA) .................................................................................................................................. 3555

Optimal Training Design and Individual Channel Estimation for MIMO Two-Way Relay Systems in Colored Environment
Rui Wang (Tongji University, P.R. China), Hani Mehrpouyan (California State University, USA), Meixia Tao (Shanghai Jiao Tong University, P.R. China), Yingbo Hua (University of California, Riverside, USA) .................................................................................................................................. 3561
**Time Varying Individual Channel Estimation for One-Way Relay Networks with UKF and URTSS**
Shun Zhang (Xidian University, P.R. China), Feifei Gao (Tsinghua University, P.R. China), Hongyan Li (Xidian University, P.R. China) ................................................................. 3567

**Simultaneous Time-Frequency Channel Estimation Based on Compressive Sensing for OFDM System**
Wenbo Ding (Tsinghua University, P.R. China), Fang Yang (Tsinghua University, P.R. China), Chao Zhang (Tsinghua University, P.R. China), Linglong Dai (Tsinghua University, P.R. China), Jian Song (Tsinghua University, P.R. China) ................................................................. 3573

**GC14 WN: Globecom 2014 - Wireless Networking Symposium**

**Architectural Design and Operation Models**

*Relieving Hotspots in Data Center Networks with Wireless Neighborways*
Liqin Shan (Shanghai Jiao Tong University, P.R. China), Chang Zhao (Shanghai Jiao Tong University, P.R. China), Xiaohua Tian (Shanghai Jiao Tong University, P.R. China), Yu Cheng (Illinois Institute of Technology, USA), Peng Yang (Shanghai Jiaotong University, P.R. China), Xiaoying Gan (Shanghai Jiao Tong University, P.R. China) ................................................................. 4347

*Coverage Study of Dense Device-to-Device Communications Underlaying Cellular Networks*
Xue Chen (Utah State University, USA), Zekun Zhang (Utah State University, USA), Rose Qingyang Hu (Utah State University, USA), Yi Qian (University of Nebraska–Lincoln, USA) ............... 4353

*Silence is Gold: Strategic Small Cell Interference Management Using Tokens*
Cong Shen (Qualcomm, USA), Jie Xu (University of California, Los Angeles, USA), Mihaela van der Schaar (University of California, Los Angeles (UCLA), USA) ................................................................. 4359

*Pre-coding for Multi-User Physical Network Coding over a Flat Fading Channel*
Desi Luo (Harbin Institute of Technology, P.R. China), Qiyue Yu (Harbin Institute of Technology, P.R. China), Weixiao Meng (Harbin Institute of Technology, P.R. China), Cheng Li (Memorial University of Newfoundland, Canada) ................................................................. 4366

*Opportunistic Relay Selection for Cooperative Energy Harvesting Communication Networks*
Yong Xiao (Singapore University of Technology and Design, Singapore), Zhu Han (University of Houston, USA), Luiz A. DaSilva (Virginia Polytechnic Institute and State University & Trinity College Dublin, Ireland) ................................................................. 4371

*A Novel Communication-Based Train Control (CBTC) System with Coordinated Multi-Point Transmission and Reception*
Li Zhu (Carleton University, Canada), F. Richard Yu (Carleton University, Canada), Hongwei Wang (Carleton University, Canada), Tao Tang (Beijing Jiaotong University, P.R. China), Bing Ning (State Key Laboratory of Rail Traffic Control and Safety, P.R. China) ................................................................. 4377

**Self-Organizing Networks**

*Zero-Determinant Strategy in Cheating Management of Wireless Cooperation*
Huaqing Zhang (University of Houston, USA), Dusit Niyato (Nanyang Technological University, Singapore), Lingyang Song (Peking University, P.R. China), Tao Jiang (Huazhong University of Science and Technology, P.R. China), Zhu Han (University of Houston, USA) ............... 4382

*Adaptive Proportional Fair Parameterization Based LTE Scheduling Using Continuous Actor-Critic Reinforcement Learning*
Ioan Sorin Comsa (University of Bedfordshire & University of Applied Sciences of Western Switzerland, Switzerland), Sijing Zhang (University of Bedfordshire, United Kingdom), Mehmet Emin Aydin (University of Bedfordshire, United Kingdom), Jianping Chen (University of Neuchatel, Switzerland), Pierre Kuonen (University of Applied Sciences of Western Switzerland, Switzerland), Jean-Frederic Wagen (University of Applied Sciences of Western Switzerland, Fribourg, Switzerland) ................................................................. 4387
Power Management and Energy Conservation Techniques

On Placement and Dynamic Power Control of Femtocells in LTE HetNets
Vanlin Sathya (Indian Institute of Technology Hyderabad, India), Arun Ramamurthy (IIT Hyderabad, India), Bheemarjuna Reddy Tamma (IIT Hyderabad, India)

Cross-Layer Design and Optimization

Connectivity in Mobile Tactical Networks
Minming Ni (Beijing Jiaotong University, P.R. China), Lei Zhang (University of Victoria, Canada), Jianping Pan (University of Victoria, Canada), Lin Cai (University of Victoria, Canada), Humphrey Rutagemwa (Communications Research Centre (CRC) Canada, Canada), Li Li (Communication Research Centre of Canada, Canada), Tianming Wei (University of Victoria, Canada)

Low Complexity SON Coordination using Reinforcement Learning
Ovidiu Iacoboaiea (OrangeLabs and Telecom ParisTech, France), Berna Sayrac (Orange Labs, France), Sana Ben Jemaa (Orange Labs, France), Pascal Bianchi (Telecom ParisTech - LTCI, France)

Cognitive Radio Based Adaptive SON for LTE-A Heterogeneous Networks
Fei Qi (Beijing University of Posts and Telecommunication, P.R. China), Sun Songlin (Beijing University of Posts and Telecommunications, P.R. China), Bo Rong (Communications Research Center Canada, Canada), Rose Qingyang Hu (Utah State University, USA), Yi Qian (University of Nebraska–Lincoln, USA)

Optimal Reader Location for Collision-Free Communication in WRSN
Yuelong Tian (Zhejiang University, P.R. China), Peng Cheng (Zhejiang University & Singapore University of Technology and Design, P.R. China), Liang He (Singapore University of Technology and Design, Singapore), Yu Gu (IBM Research-Austin, USA), Jiming Chen (Zhejiang University, P.R. China)

Implementation of Energy Efficient Transmission Scheduling Policies on Software Defined Radio
Goksel Uctu (Middle East Technical University, Turkey), Omer M Gul (Middle East Technical University, Turkey), Baran Tan Bacinoglu (Middle East Technical University, Turkey), Elif Uysal-Biyikoglu (METU, Turkey)

Joint Power Control and User Association for Traffic Offloading in Heterogeneous Networks
Po-Han Chiang (National Taiwan University, Taiwan), Po-Han Huang (National Taiwan University, Taiwan), Shi-Sheng Sun (National Taiwan University, Taiwan), Wanjiun Liao (National Taiwan University, Taiwan), Wen-Tsuen Chen (Academia Sinica, Taiwan)

Renewable Energy Aware Cluster Formation for CoMP Transmission in Green Cellular Networks
Yi-Han Chiang (National Taiwan University, Taiwan), Wanjiun Liao (National Taiwan University, Taiwan)

On Optimizing Energy Efficiency in Multi-Radio Multi-Channel Wireless Networks
Lu Liu (Illinois Institute of Technology, USA), Xianghui Cao (Illinois Institute of Technology, USA), Yu Cheng (Illinois Institute of Technology, USA), Li Wang (Beijing University of Posts and Telecommunications, P.R. China)

An Energy-Efficient Scheduling Algorithm for Real-Time Machine-to-Machine (M2M) Data Reporting
Yi-Bei Chen (NTHU, Taiwan), Shun-Ren Yang (NTHU, Taiwan), Jenq-Neng Hwang (University of Washington, USA), Ming-Zoo Wu (Institute for Information Industry, Taiwan)

Cross-Layer Design and Optimization

Resource Sharing for Software Defined D2D Communications in Virtual Wireless Networks with Imperfect NSI
Yegui Cai (Carleton University, Canada), F. Richard Yu (Carleton University, Canada), Chengchao Liang (Carleton University, Canada)
Distributed Interference-Aware Energy-Efficient Resource Allocation for Device-to-Device
Communications Underlaying Cellular Networks
Zhenyu Zhou (North China Electric Power University & Waseda University, P.R. China),
Mianxiong Dong (Muroran Institute of Technology, Japan), Kaoru Ota (Muroran Institute of
Technology, Japan), Jun Wu (Shanghai Jiao Tong University, P.R. China), Takuro Sato
(Waseda University, Japan) ............................................................................................................. 4454

Pulse-level Beam-switching MAC with Energy Control in Picocell Terahertz Networks
Jian Lin (Georgia Institute of Technology, USA), Mary Ann Weitnauer (Georgia Institute of
Technology, USA) .......................................................................................................................... 4460

Activation of Nomadic Relay Nodes in Dynamic Interference Environment for Energy Saving
Zhe Ren (BMW Group Research and Technology, Germany), Slawomir Stanczak (Fraunhofer
Heinrich Hertz Institute & Technische Universität Berlin, Germany), Peter Fertl (BMW Group
Research and Technology, Germany) ............................................................................................. 4466

Disjoint Path Protection in Multi-Hop Wireless Networks with Interference Constraints
Gregory Kuperman (MIT, USA), Eytan Modiano (MIT, USA) ................................................................ 4472

QoS-Aware Energy-Efficient Multicast for Multi-view Video in Indoor Small Cell Networks
Quanxin Zhao (University of Electronic Science and Technology of China, P.R. China), Yuming
Mao (SCIE, P.R. China), Supeng Leng (University of Electronic Science and Technology of
China, P.R. China), Yuming Jiang (Norwegian University of Science and Technology (NTNU),
Norway) ........................................................................................................................................... 4478

WiMAX, LTE, WMAN, and Other Emerging Broadband Wireless Networks

Cooperative-MIMO for Vehicular Relaying
Mohamed F. Feteiha (Queens University, Canada), Hossam S. Hassanein (Queen's University,
Canada) ......................................................................................................................................... N/A

Buffering-Aided Resource Allocation for Type I Relay in LTE-Advanced Cellular Networks
Long Wang (Xi'an Jiaotong University, P.R. China), Qinghe Du (Xi'an Jiaotong University, P.R.
China), Pinyi Ren (Xi'an Jiaotong University, P.R. China), Li Sun (Xi'an Jiaotong University,
P.R. China), Yichen Wang (Xi'an Jiaotong University, P.R. China) ..................................................... 4484

IISRA: Inter-cell Interference Separation-based Resource Allocation for VoLTE
Byungkab Jo (Seoul National University & Korea Electric Power Corporation, Korea), Taejun
Park (Seoul National University, Korea), Wonbo Lee (Seoul National University, Korea), Bo
Ryu (EpiSys Science, USA), Sunghyun Choi (Seoul National University, Korea) .................................. 4490

Auction-Based Relay Assignment in Cooperative Communications
Bin Cao (University of Electronic Science and Technology of China, P.R. China), Gang Feng
(University of Electronic Science and Technology of China, P.R. China), Yun Li (Chongqing
University of Posts and Telecommunications of China, P.R. China), Mahmoud Daneshmand
(Howe School of Technology Management Stevens Institute of Technology, USA) ........................... 4496

Retransmission Mechanism with Probabilistic Network Coding in Wireless Networks
Yun Li (Chongqing University of Posts and Telecommunications of China, P.R. China), Yangyang
Wu (Chongqing University of Posts and Telecommunications, P.R. China), Bin Cao
(University of Electronic Science and Technology of China, P.R. China), Li Qiao (Chongqing
University of Posts and Telecommunications, P.R. China), Wei Yi Zhang (AT&T Labs Research,
USA), Weiwen Tang (Sichuan Communication Research Planning & Designing Co., Ltd., P.R.
China) .................................................................................................................................................. 4502

Mobile Relay Deployment Based on Markov chains in WiMAX Networks
Zhuofan Liao (Changsha University of Science & Technology, P.R. China), Xi Zhang (Texas
A&M University, ECE Department, USA), Chaochao Feng (School of Computer, National
University of Defense Technology, P.R. China) ..................................................................................... 4508
Femtocell Networks

Cognitive Femtocell Market: How to Price?
Chunxiao Jiang (Tsinghua University, Beijing, P.R. China), Yan Chen (University of Maryland, College Park, USA), K. J. Ray Liu (University of Maryland, USA), Yong Ren (Tsinghua University, Beijing, P.R. China) .................................................................................................................. 4514

Multi-leader Multi-follower Stackelberg Game among Wi-Fi, Small Cell and Macrocell Networks
Huaqing Zhang (University of Houston, USA), Mehdi Bennis (Centre of Wireless Communications, University of Oulu, Finland), Luiz A. DaSilva (Virginia Polytechnic Institute and State University & Trinity College Dublin, Ireland), Zhu Han (University of Houston, USA) .................................................................................................................. 4520

Analysis of Multi-tier Uplink Cellular Networks with Energy Harvesting and Flexible Cell Association
Ahmed Hamdi Sakr (University of Manitoba, Canada), Ekram Hossain (University of Manitoba, Canada) .................................................................................................................. 4525

Data Offloading in Two-tier Networks: A Contract Design Approach
Zilong Zhou (Shanghai Jiao Tong University, P.R. China), Xinxin Feng (Shanghai Jiao Tong University, P.R. China), Xiaoying Gan (Shanghai Jiao Tong University, P.R. China), Feng Yang (Shanghai Jiaotong University, P.R. China), Xiaohua Tian (Shanghai Jiao Tong University, P.R. China), Xinbing Wang (Shanghai Jiaotong University, P.R. China) .................................................................................................................. 4531

MobiCacher: Mobility-Aware Content Caching in Small-Cell Networks
Yang Guan (University of Delaware, USA), Yao Xiao (University of Delaware, USA), Hao Feng (University of Delaware, USA), Chien-Chung Shen (University of Delaware & Department of Computer and Information Sciences, USA), Len Cimini (University of Delaware, USA) .................................................................................................................. 4537

Adaptive Modulation and Coding for QoS-based Femtocell Resource Allocation with Power Control
Rima Hatoum (Laboratoire Informatique de Paris6-LIP6/Université de Pierre et Marie Curie UPMC, France), Abbas Hatoum (LIP6/Université de Pierre et Marie Curie UPMC, France), Alaa Ghaith (Faculty of Sciences I, Lebanese University, Lebanon), Guy Pujolle (University Pierre et Marie Curie - Paris 6, France) .................................................................................................................. 4543

Vehicular Networks

Capacity Analysis for Urban Vehicular Ad Hoc Networks with Graph-Theory Based Construction
Yan Huang (Heilongjiang University, P.R. China), Min Chen (Huazhong University of Science and Technology, P.R. China), Zhipeng Cai (Georgia State University, USA), Xin Guan (Heilongjiang University, P.R. China), Cong Liu (Sun Yat-sen University, P.R. China), Tomoaki Ohtsuki (Keio University, Japan) .................................................................................................................. N/A

User Cooperation and Incentive Schemes

Detecting Greedy Behavior By Linear Regression And Watchdog In Vehicular Ad Hoc Networks
Mohamed Nidhal Mejri (University of Paris 13 & Paris, France), Jalel Ben-Othman (University of Paris 13, France) .................................................................................................................. 5032

Vehicular Networks

A Semi-distributed V2V Fast Charging Strategy Based on Price Control
Miao Wang (University of Waterloo, Canada), Muhammad Ismail (Texas A&M University at Qatar, Qatar), Ran Zhang (University of Waterloo, Canada), Sherman Shen (University of Waterloo, Canada), Erchin Serpedin (Texas A&M University, USA), Khalid A. Qaraqe (Texas A&M University at Qatar, USA) .................................................................................................................. 4550
Routing

V2V Data Dissemination with Network Coding in Two-Way Road Networks
Fang Liu (Shanghai Jiao Tong University, P.R. China), Zhiyong Chen (Shanghai Jiao Tong University, P.R. China), Fei Ye (University Washington, USA), Bin Xia (Shanghai Jiao Tong University, P.R. China), Hui Liu (Shanghai Jiao Tong University, P.R. China) .................................................. 4691

Sensing Phone Use of Motorcycle Drivers
Jyh-Cheng Chen (National Chiao Tung University, Taiwan), Chun-Feng Wu (Academia Sinica, Taiwan), Wei-Ho Chung (Academia Sinica, Taiwan), Ping-Fan Ho (National Chiao Tung University, Taiwan) ........................................................................................................... 4556

Modeling and Verification Tools for jamming attacks in VANETS
Jalel Ben-Othman (University of Paris 13, France), Lynda Mokdad (Université de Paris 12 & Laboratoire LACL, France) ....................................................................................................................... 4562

Routing

A Cooperative Routing Protocol Based on Geographic Information for Two-Way Amplify-and-Forward Relay Networks
Chin-Liang Wang (National Tsing Hua University, Taiwan), Ting-Nan Cho (National Tsing Hua University, Taiwan), Po-Hsiang Yu (National Tsing Hua University, Taiwan) .......................................................... 4574

A Lightweight Ring-based Routing Protocol for Wireless Sensor Networks with Mobile Sinks
Sheng Yu (Graduate University of China Academy of Science, P.R. China), Dezhong Shang (University of the Chinese Academy of Sciences, P.R. China), Zheng Yao (Graduate University of the Chinese Academy of Sciences, P.R. China), Baoxian Zhang (University of the Chinese Academy of Sciences, P.R. China), Cheng Li (Memorial University of Newfoundland, Canada) .......... 4580

Evolving to 5G: A Fast and Near-optimal Request Routing Protocol for Mobile Core Networks
Jun He (University of New Brunswick, Canada), Wei Song (University of New Brunswick, Canada) ................................................................................................................................................................................... 4586

Joint Channel Assignment and Opportunistic Routing for Maximizing Throughput in Cognitive Radio Networks
Yang Qin (Harbin Institute of Technology, Shenzhen Graduate School, P.R. China), Xiaoxiong Zhong (Harbin Institute of Technology, P.R. China), Yuanyuan Yang (Stony Brook University, USA), Yanlin Li (Harbin Institute of Technology, P.R. China), Li Li (HIT Shenzhen Graduate School, P.R. China) ........................................................................................................ 4592

Quadtree-based Optimal Path Routing with the Smallest Routing Table Size
Tingting Wu (University of Science and Technology of China, P.R. China), Chi Zhang (University of Science and Technology of China, P.R. China), Nenghai Yu (University of Science and Technology of China, P.R. China), Miao Pan (Texas Southern University, USA) .......... 4598

Deactivation-Controlled Epidemic Routing in Disruption Tolerant Networks with Multiple Sinks
Huawei Huang (The University of Aizu, Japan), Song Guo (The University of Aizu, Japan), Peng Li (The University of Aizu, Japan), Toshiaki Miyazaki (The University of Aizu, Japan) .......... 4604

Performance Analysis and Optimization

Performance Analysis of the 802.11aa Intra-Access Category Prioritization under Saturated Condition
Yijing Zeng (University of California, Santa Barbara, USA) .................................................................................................................. 4610

Mai Abdelhakim (Michigan State University, USA), Jian Ren (Michigan State University, USA), Tongtong Li (Michigan State University, USA) ........................................................................................................ 4616

Heterogeneous Statistical QoS Provisioning for Downlink Transmissions Over Mobile Wireless Cellular Networks
Wenchi Cheng (Xidian University, P.R. China), Xi Zhang (Texas A&M University, ECE Department, USA), Hailin Zhang (Xidian University, P.R. China) .......................................................................................................... 4622
Heterogeneous Networks

An Application-Level Approach for Seamless Mobility Support across Heterogeneous Networks
Yifan Yu (Intel Labs China, P.R. China) ................................................................. 4647

Dynamic Network Selection in HetNets: A Social-Behavioral (SoBe) Approach
Yang Cao (Huazhong University of Science and Technology, P.R. China), Dongliang Duan
(University of Wyoming, USA), Xiang Cheng (Peking University, P.R. China), Liuqing Yang
(Colorado State University, USA), Jiaolong Wei (Huazhong University of Science and
Technology, P.R. China) .......................................................................................... 4653

Downlink and Uplink Splitting User Association in Two-tier Heterogeneous Cellular Networks
Zebing Feng (Beijing University of Posts and Telecommunications & Wireless Technology
Innovation Lab, P.R. China), Zhiyong Feng (Beijing University of Posts and
Telecommunications, P.R. China), Wei Li (University of Victoria, Canada), Wenping Chen
(Beijing University of Posts and Telecommunications, P.R. China) ........................................ 4659

On Minimum-Collisions Assignment in Heterogeneous Self-Organizing Networks
Mathew Pradeep Goonewardena (University of Quebec & École de Technologie Supérieure,
Canada), Hoda Akbari (Simon Fraser University (SFU), Canada), Wessam Ajib (Université du
Québec à Montréal, Canada), Halima Elbiaze (University of Quebec at Montreal, Canada) .......... 4665

A Software-Defined Network based Vertical Handoff Scheme for Heterogeneous Wireless
Networks
Li Qiang (University of Tsukuba, Japan), Jie Li (University of Tsukuba, Japan), Changcheng
Huang (Carleton University, Canada) ........................................................................... 4671

Downlink Capacity Optimization in a Heterogeneous Home Area Network with Application to
Smart Grid
Zhuo Li (The University of Texas at Arlington, USA), Qilian Liang (University of Texas at
Arlington, USA) ........................................................................................................ 4677

Resource Allocation

Robust Resource Allocation for Predictive Video Streaming Under Channel Uncertainty
Ramy Atawia (Queen's University, Canada), Hatem Abou-zeid (Queen's University, Canada),
Hossam S. Hassanein (Queen's University, Canada), Aboelmagd Noureldin (RMC Canada,
Canada) ....................................................................................................................... 4683

Joint Resource Allocation and Admission Control in OFDMA-Based Multi-tier Cellular Networks
Amr Abdelnasser (University of Manitoba, Canada), Ekram Hossain (University of Manitoba,
Canada) ..................................................................................................................... 4689

QoE-aware Mobile Association and Resource Allocation Over Wireless Heterogeneous Networks
Yiran Xu (Utah State University, USA), Rose Qingyang Hu (Utah State University, USA), Lili
Wei (Intel Corporation, USA), Geng Wu (Intel Corporation, USA) .................................... 4695
Delay Minimization by Optimizing Antenna Allocation in SIMO System
Tao Huang (Nanjing University, P.R. China), Baoliu Ye (Nanjing University, P.R. China), Song Guo (The University of Aizu, Japan), Sanglu Lu (Nanjing University, P.R. China), Toshiaki Miyazaki (The University of Aizu, Japan) ................................................................. 4702

Distributed Energy-Efficient Resource Allocation with Fairness in Wireless Multicell OFDMA Networks
Shengrong Bu (University of Glasgow, United Kingdom), F. Richard Yu (Carleton University, Canada) ................................................................. 4708

Channel-Hopping on Multiple Channels for Full Rendezvous Diversity in Cognitive Radio Networks
Utku Tefek (National University of Singapore, Singapore), Teng Joon Lim (National University of Singapore, Singapore) ................................................................. 4714

WLAN, WPAN, and Other Home/Personal Networking Technologies I

An ElGamal-Based Efficient and Privacy-Preserving Data Aggregation Scheme for Smart Grid
Xiaolei Dong (Shanghai Jiao Tong University, P.R. China), Jun Zhou (Shanghai Jiao Tong University, P.R. China), Khalid Alharbi (Northern Borders University, Saudi Arabia), Xiaodong Lin (University of Ontario Institute of Technology, Canada), Zhenfu Cao (Shanghai Jiao Tong University, P.R. China) ................................................................. 4720

Dynamic Bandwidth Control MAC Protocol for WPAN/IEEE 802.11aj Networks
Qian Chen (Institute for Infocomm Research, Singapore), Xiaoming Peng (Institute for InfoComm Research, Singapore), Khiam Boon Png (Institute for InfoComm Research, Singapore), David Tung Chong Wong (Institute for InfoComm Research, Singapore), Francois Chin (Institue for InfoComm Research, Singapore) ................................................................. 4726

Medium Access Control for a Wireless LAN with a Full Duplex AP and Half Duplex Stations
Aimin Tang (Shanghai Jiao Tong University, P.R. China), Xudong Wang (Shanghai Jiao Tong University, P.R. China) ................................................................. 4732

Power-Controlled Multiple Access with a Queue-Dependent Backoff Threshold
Jeffrey Mounzer (Stanford University, USA), Kevin Schubert (Stanford University, USA), Nicholas Bambos (Stanford University, USA), Andrea Goldsmith (Stanford University, USA) ................................................................. 4738

Joint Power and Channel Allocation for Multimedia Content Delivery using Millimeter Wave in Smart Home Networks
Bojiang Ma (University of British Columbia, Canada), Binglai Niu (University of British Columbia, Canada), Zehua Wang (University of British Columbia, Canada), Vincent W.S. Wong (University of British Columbia, Canada) ................................................................. 4745

Vertex Multi-coloring Scheduling Algorithm for Concurrent Transmission in 60 GHz Networks
Waheed Ur Rehman (Beijing University of Posts and Telecommunications, P.R. China), Tabinda Salam (Beijing University of Posts and Telecommunications, Beijing, P.R. China), Xiaofeng Tao (Beijing University of Posts and Telecommunications, P.R. China) ................................................................. 4751

Cellular Networks I

Stochastic analysis of a cellular network with mobile relays
Yangyang Chen (Telecom Bretagne, France), Philippe Martins (Telecom Paristech, France), Laurent Decreusefond (Telecom ParisTech & CNRS LTCI, France), Feng Yan (Telecom Bretagne, France), Xavier Lagrange (Institut Mines Telecom / Telecom Bretagne & IRISA, France) ................................................................. 4758

Optimal Power Allocation for Full-Duplex D2D Communications Over Wireless Cellular Networks
Wenchi Cheng (Xidian University, P.R. China), Xi Zhang (Texas A&M University, ECE Department, USA), Hailin Zhang (Xidian University, P.R. China) ................................................................. 4764
Trade-offs in Sum-Rate Maximization and Fairness in Relay-Enhanced OFDMA-based Cellular Networks
Davut Incebacak (Middle East Technical University, Turkey), Halim Yanikomeroglu (Carleton University, Canada), Bulent Tavli (TOBB University of Economics and Technology, Turkey) 4770

Full Duplex: Coming Into Reality in 2020?
Shuangfeng Han (China Mobile, Hong Kong), Chih-Lin I (China Mobile Research Institute, P.R. China), Zhikun Xu (China Mobile Research Institute, P.R. China), Chengkang Pan (China Mobile Research Institute, P.R. China), Zhengang Pan (University of Hong Kong, Hong Kong) 4776

Shunqing Zhang (Huawei Technologies, Co. Ltd., P.R. China), Xiuliang Xu (Huawei Technologies Co., Ltd., P.R. China), Lei Lu (Huawei Technologies Co., Ltd., P.R. China), Yiqun Wu (Huawei, P.R. China), Gaoning He (Huawei Technologies, P.R. China), Yan Chen (Huawei, P.R. China) 4782

Centralized vs. distributed: on the placement of gateway functionality in 5G cellular networks
Wolfgang Kies (DOCOMO Euro-Labs, Germany), Ashiq Khan (NTT DOCOMO, Inc. & DOCOMO R&D Center, Japan) 4788

WLAN, WPAN, and Other Home/Personal Networking Technologies II

Contention Window Adaptation using the Busy-Idle Signal in 802.11 WLANs
Michael Krishnan (University of California, Berkeley, USA), Shicong Yang (University of California, Berkeley, USA), Avideh Zakhor (University of California at Berkeley, USA) 4794

Privacy-Preserving Location Authentication in WiFi with Fine-Grained Physical Layer Information
Yingjie Chen (Hong Kong University of Science and Technology, Hong Kong), Wei Wang (Hong Kong University of Science and Technology, Hong Kong), Qian Zhang (Hong Kong University of Science and Technology, Hong Kong) 4827

Multi-Path Transport over Heterogeneous Wireless Networks: Does it really pay off?
Simone Ferlin (University of Oslo & Simula Research Laboratory, Norway), Thomas Dreibholz (Simula Research Laboratory, Norway), Ozgu Alay (Simula Research Laboratory, Norway) 4807

Concurrent Transmission Scheduling for WPANs with Adaptive Data Rate
Maggie Cheng (Missouri University of Science and Technology, USA), Quanmin Ye (Missouri University of Science and Technology, USA), Lin Cai (University of Victoria, Canada) 4814

Distributed Timely-Throughput Optimal Scheduling for Wireless Networks
Shuang Xia (Wichita State University, USA), Pu Wang (Wichita State University, USA), Zhi Sun (State University of New York at Buffalo, USA) 4820

On Optimum Time Division Multiple Access for Energy Harvesting Channels
Juan Liu (NCSU, USA), Huaiyu Dai (NC State University, USA), Wei Chen (Tsinghua University, P.R. China) 4801

Cellular Networks II

Joint Transmission Scheduling and Power Allocation in CoMP via Geometric Programming
Shu Fu (UESTC as well as TJU, P.R. China), Bin Wu (Tianjin University, P.R. China), Hong Wen (UESTC, P.R. China), Pin-Han Ho (University of Waterloo, Canada) N/A

3D Beamforming for Capacity Improvement in Macrocell-Assisted Small Cell Architecture
Bo Yu (Colorado State University, USA), Liuqiang Yang (Colorado State University, USA), Hiroyuki Ishii (DOCOMO Innovations, Inc, Japan) 4833

Expediting D2D Discovery by Using Temporary Discovery Resource
Seungil Park (Seoul National University, Korea), Sunghyun Choi (Seoul National University, Korea) 4839

On the Selection of Best Devices for Cooperative Wireless Content Delivery
Bidushi Barua (University of Oulu, Finland), Zaheer Khan (University of Oulu, Finland), Zhu Han (University of Houston, USA), Matti Latva-aho (UOOUlu, Finland), Marcos Katz (University of Oulu, Finland) 4845
Emerging Wireless Technologies

On Large Throughputs in High Density Enterprise Wireless LAN(s)
Mridula Singh (Xerox Research Centre India & IIIT DELHI, India), Sanjit Kaul (IIIT Delhi, India), Pravesh Biyani (IIIT Delhi, India) .................................................. 4864

Power Synergy to Enhance DCI Reliability for OFDM-based Mobile System Optimization
Min Chen (Peking University, P.R. China), Anpeng Huang (Peking University, P.R. China), LinZhen Xie (Peking University, P.R. China) .................................................. 4870

C2M: Mobile Data Offloading to Mesh Networks
Apostolos Apostolaras (University of Thessaly & The Centre for Research & Technology Hellas, CERTH, Greece), George Iosifidis (CERTH & University of Thessaly, Greece), Kostas Chounos (University of Thessaly, Greece), Thanasis Karakis (Polytechnic Institute of New York University, USA), Leandros Tassulas (Yale University, USA) .................................................. 4877

Rise of Mini-Drones: Applications and Issues
Zhongli Liu (University of Massachusetts Lowell, USA), Zupei Li (University of Massachusetts Lowell, USA), Xinwen Fu (University of Massachusetts Lowell, USA), Raptis Ioannis (University of Massachusetts Lowell, USA), Benyuan Liu (University of Massachusetts Lowell, USA), Kui Ren (State University of New York at Buffalo, USA) .................................................. N/A

Distributed On-demand MAC Scheduling for Underwater Acoustic Networks
Yibo Zhu (Google, USA), Son N Le (University of Connecticut, USA), Zheng Peng (University of Connecticut, USA), Jun-Hong Cui (University of Connecticut, USA) .................................................. 4884

Mobile Trace Inference Based on Tensor Voting
Erté Pan (University of Houston, USA), Miao Pan (Texas Southern University, USA), Zhu Han (University of Houston, USA), Vernaldo Wright (Texas Southern University, USA) .................................................. 4891

Resource Management and Admission Control I

HOL Delay Based Scheduling in Wireless Networks with Flow-Level Dynamics
Yi Chen (University of Victoria, Canada), Xuan Wang (University of Victoria, Canada), Lin Cai (University of Victoria, Canada) .................................................. 4898

Incentive Mechanism Design for Crowdsourcing-Based Cooperative Transmission
Qinglei Kong (Harbin Institute of Technology Shenzhen Graduate School, P.R. China), Jia Yu (Harbin Institute of Technology Shenzhen Graduate School, P.R. China), Rongxing Lu (Nanyang Technological University, Singapore), Qinyu Zhang (Shenzhen Graduate School, Harbin Institute of Technology, P.R. China) .................................................. 4904

Cheating in Matching of Device to Device Pairs in Cellular Networks
Yunan Gu (University of Houston, USA), Yanru Zhang (University of Houston, USA), Miao Pan (Texas Southern University, USA), Zhu Han (University of Houston, USA) .................................................. 4910

SARA: A Service-Aware Resource Allocation Scheme for Device-to-Device Communication Underlaying Cellular Networks
Biwei Chen (Southeast University, P.R. China), Jun Zheng (Southeast University, P.R. China), Yuan Zhang (Southeast University, P.R. China), Hidekazu Murata (Kyoto University, Japan) ............. 4916
On Joint Optimal Placement of Access Points and Partially Overlapping Channel Assignment for Wireless Networks
Wei Zhao (Tohoku University, Japan), Zubair Fadlullah (Tohoku University, Japan), Hiroki Nishiyama (Tohoku University, Japan), Nei Kato (Tohoku University, Japan), Kiyoshi Hamaguchi (NICT, Japan) ................................................................. 4922

Service Time Prediction Based Dynamic Resource Allocation for Device-to-Device Communication Underlaying Cellular Networks
Jun Zheng (Southeast University, P.R. China), Renpeng Chen (Southeast University, P.R. China), Yuan Zhang (Southeast University, P.R. China) .................................................................................................................. 4928

Resource Management and Admission Control II

Provisioning Green Energy for Small Cell BSs
Tao Han (New Jersey Institute of Tech, USA), Nirwan Ansari (NJIT, USA) ................................................................. 4935

Asymptotic Behavior of Ultra-Dense Cellular Networks and Its Economic Impact
Ji Hong Park (Yonsei University, Korea), Seong-Lyun Kim (Yonsei University, Korea), Jens Zander (KTH Royal Institute of Technology, Sweden) .............................................................................................................. 4941

Distributed Resource and Power Allocation for Device-to-Device Communications Underlaying Cellular Network
Xue Chen (Utah State University, USA), Rose Qingyang Hu (Utah State University, USA), Yi Qian (University of Nebraska–Lincoln, USA) ................................................................................................................. 4947

MoRule: Optimized Rule Placement for Mobile Users in SDN-enabled Access Networks
He Li (University of Aizu, Japan), Peng Li (The University of Aizu, Japan), Song Guo (The University of Aizu, Japan) ............................................................................................................................... 4953

Distributed Resource Allocation in Full-duplex Relaying Networks with Wireless Virtualization
Gang Liu (Beijing University of Posts and Telecommunications, P.R. China), F. Richard Yu (Carleton University, Canada), Hong Ji (Beijing University of Posts and Telecommunications, P.R. China), Victor CM Leung (The University of British Columbia, Canada) ........................................................................................................ 4959

Predictive Allocation of Resources in the LTE Uplink Based on Maximum Likelihood Estimation of Event Propagation Characteristics for M2M Applications
Jason Brown (University of Newcastle, Australia), Jamil Y Khan (The University of Newcastle, Australia) ...................................................................................................................... 4965

Wireless Computing and Scheduling

You Better Be Honest: Discouraging Free-Riding and False-Reporting in Mobile Crowdsourcing
Xiang Zhang (Arizona State University, USA), Guoliang Xue (Arizona State University, USA), Ruozhou Yu (Arizona State University, USA), Dejun Yang (Colorado School of Mines, USA), Jian Tang (Syracuse University, USA) .................................................................................. 4971

Joint Cloud Computing and Wireless Networks Operations: A Game Theoretic Approach
Zhiyuan Yin (Carleton University, Canada), F. Richard Yu (Carleton University, Canada), Shengrong Bu (University of Glasgow, United Kingdom) .................................................................................................. 4977

BIRD-VNE: Backtrack-Avoidance Virtual Network Embedding in Polynomial Time
Sherif Abdelwahab (Oregon State University, USA), Bechir Hamdaoui (Oregon State University, USA), Mohsen Guizani (QU, USA) ........................................................................................................... 4983

Cloud Server Job Selection and Scheduling in Mobile Computation Offloading
Jianting Yue (McMaster University, Canada), Dongmei Zhao (McMaster University, Canada), Terence D. Todd (McMaster University, Canada) ......................................................................................... 4990

iCoMe: A Novel Incentivized Cooperative Mobile Resource Management Mechanism
Hamed Shah-Mansouri (University of British Columbia, Canada), Vincent W.S. Wong (University of British Columbia, Canada) ................................................................................................................ 4996
Informative Mobility Scheduling for Mobile Data Collector in Wireless Sensor Networks
Sheng Yu (Graduate University of China Academy of Science, P.R. China), Jie Hao (University of the Chinese Academy of Sciences, P.R. China), Baoxian Zhang (University of the Chinese Academy of Sciences, P.R. China), Cheng Li (Memorial University of Newfoundland, Canada) .......... 5002

User Cooperation and Incentive Schemes

Completion Time Reduction in Instantly Decodable Network Coding Through Decoding Delay Control
Ahmed Douik (King Abdullah University of Science and Technology (KAUST), Saudi Arabia), Sameh Sorour (King Fahd University of Petroleum and Minerals (KFUPM), Saudi Arabia), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia), Tareq Y. Al-Naffouri (King Abdullah University of Science and Technology, USA) .................. 5008

A Bayesian Game Analysis of Cooperative MAC with Incentive for Wireless Networks
Peijian Ju (University of New Brunswick, Canada), Wei Song (University of New Brunswick, Canada), A-Long Jin (University of New Brunswick, Canada) ......................................................... 5014

An incentive-based evolutionary algorithm for participatory sensing
Teerawat Kumrai (Chiang Mai University, Thailand), Kaoru Ota (Muroran Institute of Technology, Japan), Mianxiong Dong (Muroran Institute of Technology, Japan), Paskorn Champrasert (Chiang Mai University, Thailand) ................................................................................. 5021

Vehicular Networks

Game-Theoretic Source Selection and Power Control for Quality-Optimized Wireless Multimedia Device-to-Device Communications
Qin Wang (Nanjing University of Posts and Telecommunications, P.R. China), Wei Wang (San Diego State University, USA), Shi Jin (Southeast University, P.R. China), Hongbo Zhu (Nanjing University of Posts and Telecommunications, P.R. China), Naitong Zhang (Communication Research Center, Harbin Institute of Technology, P.R. China) .................................................. 4568

User Cooperation and Incentive Schemes

A Novel Double-threshold User Division Method Based on Channel Isolation and Scheduling for Downlink CoMP
Jian Liu (University of Electronic Science and Technology of China, P.R. China), Xuchao Feng (University of Science and Technology Beijing, P.R. China), Chonggang Wang (InterDigital Communications, USA), Xiumei Yang (Shanghai Research Center for Wireless Communications, P.R. China) ................................................................................. 5026

Additional Papers

k-Throwbox Placement Problem in Throwbox-Assisted Delay Tolerant Networks
Fan Li, Zhiyuan Yin, Shaojie Tang, Chao Zhang, Yu Cheng, Yu Wang .................................................. 253

Closeness-based Routing with Temporal Constraint for Mobile Social Delay Tolerant Networks
Libo Jiang, Fan Li, Chenfei Tian, Liehuang Zhu, Yu Wang .................................................. 259

Control Information Exchange in Cognitive Radio Ad Hoc Networks with Heterogeneous Spectrum
Xuesong Jonathan Tan, Wen Zhan .................................................. 986
