2014 IEEE Real-Time Systems Symposium

(RTSS 2014)

Rome, Italy
2-5 December 2014
# 2014 IEEE 35th Real-Time Systems Symposium

**RTSS 2014**

## Session 1: Wireless Sensor Networks I

Generalized Decision Aggregation in Distributed Sensing Systems ........................................... 1  
Lu Su, Qi Li, Shaohan Hu, Shiguang Wang, Jing Gao, Hengchang Liu,  
Tarek F. Abdelzaher, Jiawei Han, Xue Liu, Yan Gao, and Lance Kaplan

FLOPSYNC-2: Efficient Monotonic Clock Synchronisation ......................................................... 11  
Federico Terraneo, Luigi Rinaldi, Martina Maggio,  
Alessandro Vittorio Papadopoulos, and Alberto Leva

## Session 2: Mixed Criticality I

Adaptive Mixed Criticality Scheduling with Deferred Preemption ........................................... 21  
A. Burns and R.I. Davis

Scheduling Mixed-Criticality Implicit-Deadline Sporadic Task Systems upon a Varying-Speed Processor ......................................................... 31  
Sanjoy Baruah and Zhishan Guo

MC-Fluid: Fluid Model-Based Mixed-Criticality Scheduling on Multiprocessors ......................................................... 41  
Jaewoo Lee, Kieu-My Phan, Xiaozhe Gu, Jiyeon Lee, Arvind Easwaran,  
Insik Shin, and Insup Lee

## Session 3: Cyber-Physical Systems I

Formal Analysis of Timing Effects on Closed-Loop Properties of Control Software ......................................................... 53  
Goran Frehse, Arne Hamann, Sophie Quinton, and Matthias Woehrle

Improving Control Performance by Minimizing Jitter in RT-WiFi Networks ........................................... 63  
Quan Leng, Yi-Hung Wei, Song Han, Aloysius K. Mok, Wenlong Zhang,  
and Masayoshi Tomizuka
Towards Cyber-Physical Systems in Social Spaces: The Data Reliability Challenge ........................................................................................................................................................................................................................................74

Shiguang Wang, Dong Wang, Lu Su, Lance Kaplan, and Tarek F. Abdelzaher

Session 4: Platforms I

vMPCP: A Synchronization Framework for Multi-core Virtual Machines ..........................................................86

Hyoseung Kim, Shige Wang, and Ragunathan (Raj) Rajkumar

Fast on Average, Predictable in the Worst Case: Exploring Real-Time Futexes in LITMUSRT ..........................................................96

Roy Spliet, Manohar Vanga, Björn B. Brandenburg, and Sven Dziadek

On the Complexity of Worst-Case Blocking Analysis of Nested Critical Sections ...........................................................................................................106

Alexander Wieder and Björn B. Brandenburg

Session 5: Design and Verification

A Framework for Automated Competitive Analysis of On-line Scheduling of Firm-Deadline Tasks .................................................................118

Krishnendu Chatterjee, Andreas Pavlogiannis, Alexander Kößler, and Ulrich Schmid

Deriving Unbounded Proof of Linear Hybrid Automata from Bounded Verification ..................................................................................................128

Dingbao Xie, Lei Bu, and Xuandong Li

Real-Time Reachability for Verified Simplex Design ......................................................................................................................138

Stanley Bak, Taylor T. Johnson, Marco Caccamo, and Lui Sha

Session 6: Scheduling Analysis I

Fixed-Relative-Deadline Scheduling of Hard Real-Time Tasks with Self-Suspensions .................................................................149

Jian-Jia Chen and Cong Liu

Integrating Cache-Related Pre-Emption Delays into Analysis of Fixed Priority Scheduling with Pre-Emption Thresholds .................................................................161

Reinder J. Bril, Sebastian Altmeyer, Martijn M.H.P. van den Heuvel, Robert I. Davis, and Moris Behnam

Bursty-Interference Analysis Techniques for Analyzing Complex Real-Time Task Models .................................................................173

Cong Liu and Jian-Jia Chen
Session 7: Mixed-Criticality II

A Wormhole NoC Protocol for Mixed Criticality Systems ................................................................. 184
  A. Burns, J. Harbin, and L.S. Indrusiak

A Synchronous IPC Protocol for Predictable Access to Shared Resources in Mixed-Criticality Systems ........................................................................................................ 196
  Björn B. Brandenburg

A Dual-Criticality Memory Controller (DCmc): Proposal and Evaluation of a Space Case Study .................................................................................................................. 207
  Javier Jalle, Eduardo Quiñones, Jaume Abella, Luca Fossati, Marco Zulianello, and Francisco J. Cazorla

Session 8: Cyber-Physical Systems II

PTEC: A System for Predictive Thermal and Energy Control in Data Centers ......................................................... 218
  Jinzhu Chen, Rui Tan, Guoliang Xing, and Xiaorui Wang

Real-Time Discharge/Charge Rate Management for Hybrid Energy Storage in Electric Vehicles .............................................................................................................. 228
  Eugene Kim, Kang G. Shin, and Jinkyu Lee

Battery- and Aging-Aware Embedded Control Systems for Electric Vehicles ........................................... 238
  Wanli Chang, Alma Pröbstl, Dip Goswami, Majid Zamani, and Samarjit Chakraborty

Session 9: Platforms II

Linux's Processor Affinity API, Refined: Shifting Real-Time Tasks Towards Higher Schedulability ........................................................................................................ 249
  Felipe Cerqueira, Arpan Gujarati, and Björn B. Brandenburg

Exploring the Multitude of Real-Time Multi-GPU Configurations .......................................................... 260
  Glenn A. Elliott and James H. Anderson

Predictable Communication and Migration in the Quest-V Separation Kernel ........................................... 272
  Ye Li, Richard West, Zhuoqun Cheng, and Eric Missimer

The Frame Packing Problem for CAN-FD .................................................................................................. 284
  Unmesh D. Bordoloi and Soheil Samii

Session 10: Scheduling Analysis II

Time-Reversibility of Schedulability Tests .................................................................................................... 294
  Jinkyu Lee

Approximate Response Time Analysis of Real-Time Task Graphs ............................................................. 304
  Nan Guan, Chuancai Gu, Martin Stigge, Qingxu Deng, and Wang Yi
Independence Thresholds: Balancing Tractability and Practicality in Soft Real-Time Stochastic Analysis .................................................................314
  Rui Liu, Alex F. Mills, and James H. Anderson

Session 11: Wireless Sensor Networks II

Gemini: A Non-invasive, Energy-Harvesting True Power Meter ..........................................................324
  Bradford Campbell and Prabal Dutta

CapNet: A Real-Time Wireless Management Network for Data Center Power
Capping ..................................................................................................................................................334
  Abusayeed Saifullah, Sriram Sankar, Jie Liu, Chenyang Lu, Ranveer Chandra,
  and Bodhi Priyantha

Wi-Sleep: Contactless Sleep Monitoring via WiFi Signals .................................................................346
  Xuefeng Liu, Jiannong Cao, Shaojie Tang, and Jiaqi Wen

Author Index ............................................................................................................................................356
