12th Workshop on Analytic Algorithmics and Combinatorics 2015

(ANALCO15)

San Diego, California, USA
4 January 2015
# TABLE OF CONTENTS

On k-Connectivity and Minimum Vertex Degree in Random s-Intersection Graphs ...................................................... 1  
*Jun Zhao, Osman Yagan, Virgil Gligor*

On the Algorithmic Lovász Local Lemma and Acyclic Edge Coloring ............................................................... 16  
*Ioannis Giotsis, Lefteris Kirousis, Kostas I. Psaromiligkos, Dimitrios M. Thilikos*

A Bound for the Diameter of Random Hyperbolic Graphs .................................................................................. 26  
*Marcos Kiwi, Dieter Mitsche*

Analytic Samplers and the Combinatorial Rejection Method ........................................................................ 40  
*Olivier Bodini, Jérémie Lumbroso, Nicolas Rolin*

Linear-time Generation of Inhomogeneous Random Directed Walks ........................................................... 51  
*Frédérique Bassino, Andrea Sportiello*

Cuts in Increasing Trees .............................................................................................................................. 66  
*Olivier Bodini, Antoine Genitrini*

Repeated Fringe Subtrees in Random Rooted Trees ................................................................................. 78  
*Dimbinaina Ralaivaosaona, Stephan Wagner*

Bootstrap Percolation on Periodic Trees ........................................................................................................ 89  
*Milan Bradonjic, Iraj Saniee*

Variance of Size in Regular Graph Tries ........................................................................................................ 97  
*Philippe Jacquet, Abram Magner*

Lattice Paths of Slope 2/5 .......................................................................................................................... 105  
*Cyril Banderier, Michael Wallner*

Analysis of Branch Misses in Quicksort ....................................................................................................... 114  
*Conrado Martínez, Markus E. Nebel, Sebastian Wild*

On Distributed Cardinality Estimation: Random Arcs Recycled .............................................................. 129  
*Marcin Kardas, Miroslav Kutylowski, Jakub Lemiez*
