TABLE OF CONTENTS

PAPERS (INVITED REVIEW PAPERS)

QA PROCEDURES NEEDED FOR ADVANCED RT TECHNIQUES AND ITS IMPACT ON TREATMENT OUTCOME ................................................................. 1
T Knöös

AUDITS FOR ADVANCED TREATMENT DOSIMETRY .............................................................................................................................. 9
G S Ibbott, D I Thwaites

TRUE 3D CHEMICAL DOSIMETRY (GELS, PLASTICS): DEVELOPMENT AND CLINICAL ROLE ................................................................. 20
L J Schreiner

PATIENT-SPECIFIC QA USING 4D MONTE CARLO PHASE SPACE PREDICTIONS AND EPID DOSIMETRY .......................................................................................................................... 31
I A Popescu, P Atwal, J Lobo, J Lucido, B M C McCurdy

REAL-TIME VOLUMETRIC SCINTILLATION DOSIMETRY ........................................................................................................................... 41
S Beddar

RADIOCHROMIC 3D DETECTORS ......................................................................................................................................................... 49
M Oldham

THE QUEST FOR SENSIBLE DATA ANALYSIS IN CLINICAL ROUTINE: STUDY CASE ON THE NEW OCTAVIUS1500 ARRAY AND ITS ASSOCIATED PHANTOMS ......................................................................................................................... 58
A V Esch, D P Huyskens, K Basta, M Ghislain, R Delvaux

UNCERTAINTY IN 3D GEL DOSIMETRY ................................................................................................................................. 65
Y De Deene, A Jirasek

THE IMPORTANCE OF 3D DOSIMETRY ......................................................................................................................................................... 75
D Low

QUANTIFICATION OF THE ABSORBED DOSE IN 3D BY MEANS OF ADVANCED OPTICAL DIAGNOSTICS BASED ON STRUCTURED ILLUMINATION ................................................................................................................................. 82
E Kristensson, S Ceberg, S Bäck, K Jordan

CLINICAL APPLICATIONS OF 3-D DOSIMETERS ................................................................................................................................................................. 86
C-S Wuu

QUASI 3D DOSIMETRY (EPID, CONVENTIONAL 2D/3D DETECTOR MATRICES) .......................................................................................... 93
A Bäck

CHERENKOV RADIATION DOSIMETRY IN WATER TANKS – VIDEO RATE IMAGING, TOMOGRAPHY AND IMRT & VMAT PLAN VERIFICATION ............................................................................................................ 98
B W Pogue, A K Glaser, R Zhang, D J Gladstone

THE ROLE FOR 3D DOSIMETRY IN QA

CURRENT STATUS OF 3D EPID-BASED IN VIVO DOSIMETRY IN THE NETHERLANDS CANCER INSTITUTE ................................................................................................................................. 102
B Mijnheer, J Olaciregui-Ruiz, R Rozendaal, H Spreeuw, M van Herk, A Mans

STRATEGIES FOR QUALITY ASSURANCE OF INTENSITY MODULATED RADIATION THERAPY ................................................................................................................................................................. 106
H Benedek, U Isacsson, M Olevik-Dunder, M Westermark, P Hållström, J Olafsson, M Gustafsson

COMPLEXITY METRIC AS A COMPLEMENT TO MEASUREMENT BASED IMRT/VMAT PATIENT-SPECIFIC QA ................................................................................................................................................................. 110
J Götstedt, A K Hauer, A Bäck

VALIDATION OF HIGH-RESOLUTION 3D PATIENT QA FOR PROTON PBS AND IMPT USING LASER CT OF IMPROVED POLYMER GEL DOSIMETERS ................................................................................................................................................................. 114
A Cardin, X Ding, A Kassaee, L Lin, M J Maryanski, S Avery

CLINICAL DOSIMETRY

MULTICENTRE KNOWLEDGE SHARING AND PLANNING/DOSE AUDIT ON FLATTENING FILTER FREE BEAMS FOR SBRT LUNG ................................................................................................................................................................. 118
C R Hansen, J R Sykes, J Barber, K West, R Bromley, K Szymura, S Fisher, J Sim, M Bailey, D Chrystal, S Deshpande, I Franji, T B Nielsen, C Brink, D I Thwaites
