2014 Health Innovations and POCT

(HIC 2014)

Seattle, Washington, USA
8-10 October 2014
TABLE OF CONTENTS

Evaluation of a Qualitative Human Immunodeficiency Virus-1 Diagnostic Assay Based on Nucleic Acid Sequence Based Amplification and Lateral Flow Readout ................................................................. 1
Veronica Leautaud, Brittany Rohman, Msandenhi Chiime, Elizabeth Molyneux, Rebecca Richards-Kortum

DNA Ploidy Measure of Feulgen-Stained Cancer Cells using Three-Dimensional Image Cytometry .................................................. 6
Nitin Agarval, Yiting Xie, Florence Patten, Anthony Reeves, Eric Seibel

Low-Cost Disposable Cartridge for Performing a White Blood Cell Count and Partial Differential at the Point-Of-Care ................................................................. 10
Catherine Elizabeth Majors, Michal E. Pawlowski, Tomasz Tkaczyk, Rebecca Richards-Kortum

"HyperShear in a Channel": A Microfluidic Facsimile of Ventricular Assist Devices to Reduce Thrombotic Risk and Enhance Patient Safety ........................................................................ 14
Annalisa Dimasi, Alberto Redaelli, Denny Bluestein, Marco Rasponi, Marvin J. Slepian

Analysis of Optofluidic Coupling for Integrated Lab-On-A-Chip Applications ........................................................................ 18
Narayan Krishnaswamy, P.K. Pattnaik, D B Ghare, T Srinivas

Fast and Inexpensive Detection of Bacterial Viability and Drug Resistance through Metabolic Monitoring ............................................................................................................... 22
Sondos Ayoush, Wen-I Wu, Ponnambalam Ravi Selvaganapathy

Energy Expenditure Estimation in Boys with Duchene Muscular Dystrophy Using Accelerometer and Heart Rate Sensors ........................................................................................................... 26
Amit Pande, Gretchen Casazza, Alina Nicorici, Edmund Seto, Sheridan Miyamoto, Matthew Lange, Richard Ted Abresch, Prasant Mohapatra, Jay Han

An Application-Agnostic Quality of Service Framework for Wireless Body Area Networks .................................................................................. 30
Ehsan Monsef, Thomas Gonnat, Won-Jae Yi, Jafar Saniee

Metabolic Energy Expenditure Estimation Using a Position-Agnostic Wearable Sensor System .................................................................................. 34
Bo Dong, Alexander Monteoye, Kumar Biswas, Sahir, Karin Pfeiffer

Proxy-Care: A Novel Patient Care Tracking System with Wireless Sensor Networks .................................................................................. 38
Alessandro Puiatti, Armando Rivero, Anna Förster, Andrea Bernaschina, Gian Carlo Dozio, Nicola Rizzo, Nuczio De Bitonti, Andrea Cavicchioli

Using Phone-Based Activity Monitors to Promote Physical Activity in Older Adults: A Pilot Study ............................................................................... 42
Harshwardhan Vathsangam, Gaurav Sukhatme

Measuring Gait Symmetry in Children with Cerebral Palsy Using the SmartShoe .................................................................................. 48
Ting Zhang, Jiang Lu, Ed Taub, Gitendra Uswatte, Edward Sazonov

An Algorithm to Screen for Preeclampsia Using a Smart Phone ................................................................................................................................. 52
Hemant Tagare, Kara Rood, Irina Buhimschi

Clinical Validation of a Wrist Actigraphy Mobile Health Device for Sleep Efficiency Analysis ........................................................................ 56
Yusuf Bhagat, Byunghun Choi, Do Yoon Kim, Jaegeol Cho, Ryan Black, Gregory Foster, Insoo Kim

Heart Rate Monitoring Using Kinect and Color Amplification ................................................................................................................................. 60
Tina Smilkstein, Miguel Buenrostro, Alan Kenyon, Matthew Liemenn, Grace Larson

Blue Scale: Early Detection of Impending Congestive Heart Failure Events Via Wireless Daily Self-Monitoring .................................................................................. 63
Joe Chen, Sadia Quadri, Luca Pollonini, Sharan Naribole, Jennifer Ding, Zongjun Zheng, Edward Knightly, Clifford C Daccio

Body-Worn Fully-Passive Wireless Analog Sensors for Physiological Signal Capture through Load Modulation Using Resistive Transducers .................................................................................. 67
Sergi Consul Pacareu, David Arellano, Bashir Morshed

Non-Invasive Monitoring of Eating Behavior using Spectrogram Analysis in a Wearable Necklace .................................................................................. 71
Nabil Alshurafa, Haik Kalantarzian, Mohammad Pourhomayoun, Shruti Saris, Jason Jun Hooi Liu, Majid Sarrafzadeh

A Handsfree Communication Solution for Wearable Devices ................................................................................................................................. 75
Yixin Sun, Yudong Tao, Zhi Hu, Hao Fan, Yuwei Wang

A Finger-Worn Ultrasound Probe for Point-Of-Care Applications ................................................................................................................................. 79
Scott S. Corbett, Ronald W. Schutz, J. Edward Okies

Long-term Remote Monitoring of Vital Signs using a Wireless Patch Sensor ................................................................................................. 83
Nandakumar Selvaraj

A Model of Packet Loss in the Bluetooth Low Energy Component of a Wearable Body Area Network Caused by Interference from a Residential Microwave Oven .................................................................................. 87
William Barge, Te-Shun Chou, Yuetong Lin, Erol Ozan
Integrated Measurement System for Amputee Gait Analysis: A Pilot Study ................................................................. 91
Jochen Schay, Stephan Rinderknecht

Daily Health Assessment System Using Prediction Model for Self-Rated Health by Vital Sign Pattern ........................................... 95
Kuan-Ling Huang, Yu-Hung Chen, Chun-Feng Liao, Li-Chen Fu, Cheryl Chiu-Hui Chen

Non-contact Screening System for Sleep Apnea-Hypopnea Syndrome Using the Time-Varying Baseline of Radar Amplitudes ........................................................................................................ 99
Masayuki Kagawa, Hirokazu Toyima, Takemi Matsui

Polyurethane Nanofibrous Materials As an Efficient Dry Eye Test Strip .......................................................................................... 103
Khyni Patel, Ashish Aplekar, Salewa Khatun, Bashir Morshead, Gavin M. Bidelman

Multiple Model Analyzers for Adverse Event Prediction in Remote Health Monitoring Systems .......................................................... 106
Mehammad Pourhomayoun, Nabil Alshurafa, Bobak Mortazavi, Hassan Ghasempazadeh, Konstantinos Sideris, Bahman Sadeghi, Michael Ong, Lorraine Evangelista, patrick roman, Andrew Auerbach, Asher Kimchi, Majid Sarrafzadeh

Gait Characterization of Pre and Postoperative Patients with Lumbar Spinal Stenosis Utilizing a Body-Mounted Inertial Measurement Unit................................................................................................................... 111
Yusasaki Ohtaki, Naotaka Mamizuka

CGMS • An Automated Solution to Monitor Child’s Growth ........................................................................................................ 115
Avinash Vaidya, Srinivas M.B, Srinivasa Rao, Radhika T S L

Towards a Cyber-Medical Model for Device Configuration Safety in Acute Care ...................................................................................... 118
maryam rahmanishei, Lui sha, richard berlin, Julian Goldman

Controllable Wireless Power Delivery for Biomedical Implants ........................................................................................................ 125
Madhav Venkateswaran, Fred T. Lee Jr., Daniel van der Weide

Four Years Old Children’s Physical Activity: Can We Confirm the Difference of Physical Activity Due to the Difference of Educational Program? .............................................................................................................. 129
Shigenori Shirouzu, Eiko Shirouzu, Shinobu Fujitani, Sotetsu Katayama, Takeo Masaki, HIsanobu Sugano, Yumeka Seino

NeuroMonitor Ambulatory EEG Device: Comparative Analysis and Its Application for Cognitive Load Assessment ................................................................................................................................. 133
Pierre Boulanger, Peter William Wood, Constantin Papadas, Harald Becher

A Multi-Target Tracking Sensor Platform for Dielectrophoresis-Based Characterization of Cells ............................................................................. 137
Samuel F. Dickerson, Stefano Coruluppi, Craig Carcel, Steven Levitan, Donald Chiarulli

Smart Phone Compatible Peak Expiratory Flow Meter ..................................................................................................................... 141
Srinath Ratnajunan, Albert Nile, Jessica Castner

Two Way Communication: How to Test Both Sides of an Emergency Tool ..................................................................................... 145
Juliana Alvarez, Simon Marino Fortier

Wireless Patient Monitoring System ..................................................................................................................................................... 149
scott smith, alexsis bell, Paul Rogers, chris farnell, brett sparrman

A Study on Estimating Blood Pressure During Body Posture Change Based on Pulse Transit Time .......................................................... 153
Hieyoung Jeong, Mari Hayashi, Masaki Sekine, Toshiyo Tamura, Michiko Kido, Kenji Yamada, Yoko OHNO

Vibractile Device for Rehabilitative Training of Persons with Lower-Limb Amputation ........................................................................ 157
Panadda Marayong, J-Hung Khoo, Khuang Nguyen, Naha Bharat, Brian Ruhe, Dana Craig, Will Wu

Spectrogram-Based Audio Classification of Nutrition Intake .................................................................................................................. 161
Haik Kalantarian, Nabil Alshurafa, Mohammad Pourhomayoun, Shruti Sarin, Tuan Le, Majid Sarrafzadeh

Relating Sensor-Based Tremor Metrics to a Conventional Clinical Scale ............................................................................................. 165
David Western, Simon Neild, Richard Hyde, Rosemary Jones, Angela Davies-Smith

Medical Remote Observational and Diagnostic Telemonitoring (MedROAD) ................................................................................................. 177
Pierre Boulanger, Peter William Wood, Constantin Papadas, Harald Becher

Multi-Class SVM Based on Sleep Stage Identification Using EEG Signal .............................................................................................. 181
Khalid Aboulayon, Miad Faezipour

Modeling Iced Bio-Bandage Design for Skin Burns .......................................................................................................................... 185
Arar Alkhader, Junding Hu, Prabir Patra

Four Years Old Children’s Sleep: What can we obtain by using wearable measuring devices at their home? ........................................................................................................ 189
Shigenori Shirouzu, Eiko Shirouzu, Shinobu Fujitani, Sotetsu Katayama, Takeo Masaki, HIsanobu Sugano

A Multi-Scale Tumor Detection Algorithm in Whole Breast Sonography Incorporating Breast Anatomy and Tissue Morphological Information ........................................................................................................ 193
Chun-You Liu, Chia-Yun Hsu, Yi-Hung Chou, Chang-Ming Chen

Whole Population Management of Patients with Diabetes ..................................................................................................................... 197
Malcolm Clarke, Hulya Gokalp, Russell Jones, Joanna Fursse, Urvashi Sharma

Med-Vest: A Textile Based Sensory Array .............................................................................................................................................. 199
Robert Durfee, Jusani Venugopala, Jiachen Ren, Mary D. Wang

</table>
Paper-Based Non-Mechanical Valves for Autonomous Multi-Reagent Lateral Flow Microfluidic Devices ............................................................................................................................... 304
Constantine Anagnostopoulos

Balance Analysis of One Leg Stance for older adults with Inertial Measurement Units ............................................. 307
Weisheng Kong, Salvatore Sessa, Daniele Magistro, Di Zhang, Usama Imtiaz, Sarah Cosentino, Massimiliano Zecca, Hiroaki Ishii, Hikaru Takeuchi, Ryuta Kawashima, Atsuo Takanishi

A Self-Monitoring Water Bottle for Tracking Liquid Intake ........................................................................................ 311
Bo Dong, Ryan Gallant, Kumar Biswas, Sahir

Support Vector Regression for METs of Exergaming Actions .......................................................................................... 315
Bobak Mortazavi, Mohammad Pourhomayoun, Nabil Alshurafa, Michael Chronley, Sunghoon Ivan Lee, Christian K Roberts, Majid Sarrafzadeh

Time Series Forecasts and Volatility Measures As Predictors of Post-Surgical Death and Kidney Injury ............................................................................................................................... 319
Zachary Terner, Timothy Carroll, Donald Brown

Detrended Fluctuation Analysis of Photoplethysmogram Pulse Rate Intervals in Sleep Disordered Breathing .................................................. 323
Parastoo Kheirkhah Dehkordi, Ainara Garde, Walter Karlen, Christian Petersen, J. Mark Ansermino, Guy Dumont

Quantitative Assessment of a Therapeutic Exercise in Mitigating Micrographia Associated with Parkinson's Disease ............................................................................................................................... 327
Naiqian Zhi, Beverly K. Jaeger, Andrew Gouldstone, Samuel Frank, Rifat Sipahi

Breath Sounds Analysis for Asthma Monitoring: A Method for Automated Detection of Flow Events from Tracheal Recordings ............................................................................................................................... 331
Matthew Christensen, Evan Leitner, Benjamin Levy, Bharath Sathiyamoorthy, David Burke, Thomas Sisson

Noise Management in Mobile Speech Based Health Tools ............................................................................................................................... 335
Nikhil Yadav, Louis Daudet, Christian Poellabauer, Patrick Flynn

A Study of Accuracy for a Single Time of Flight Camera Capturing Knee Flexion Movement ............................................................................................................................... 339
Emeric Veron-Tocquet

Evaluating the Effectiveness of Vascular Access Imaging Device in Training of New Graduate Nurses ............................................................................................................................... 343
Yutaka Murakami, Yoko OHNO, Miki Nishimura, Michiko Kudo, Kenji Yamada
