Analysis of Profile Injection Attacks against Recommendation Algorithms on Bipartite Networks .................................................................................................................. 1
   Zhang Fuguo

Study of Multi-attribute Comprehensive Evaluation Method Based on Attribute Theory ......................................................................................................................... 6
   Guanglin XU and Nianzu Liu

Study on Excess Capacity Based on Game among Enterprises ............................................................... 11
   Yi Tong

The Comparative Study between China and South Korea on Online Shopping ....................................... 16
   Cao Shuyang, Sun Meng, and Li Haotong

Research on Bulk Commodity Electronic Trading's Third-Party Payment Company Funds Management Mode .................................................................................................. 20
   Xi Jin and Jin Chen

A Reputation Model of E-Commerce Based on Iterated Prisoner's Dilemma Game .................................. 24
   Jun Hu and Xinzhou Lu

Test on the Validity of Futures Market's High Frequency Volume and Price on Forecast ......................... 28
   Jingren Yuan and Yuhong Luo
Application of E-Commerce Sites Evaluation Based on Factor Analysis and Improved DBSCAN Algorithm ..........................................................33
Yumian Yang, Jianhua Jiang, and Huan Wang

Evaluating Model of Buyers’ Reputation in C2C E-Commerce .........................................................39
Yang Zhang, Tieying Liu, Lirong Chen, and Zhenhai Wan

The Influence of Technical Similarity Relation on Innovation Performance: The Cooperative Relation as Mediator .................................................44
Zhang Xiaoli and Lu Xinhua

Measure the Evolution of Interbank Network Structure: Panel Data Analysis to Shibor Network .................................................................49
Li Li and Chen Bing

Research on Flexible Business Process of Bank Modeling Based on EPC ........................................54
Wang Xia, Liu lan, and Man Junpeng

Hybrid Personalized Tag Recommendation Algorithm Design and Evaluation ...................................61
Wei Zhang and Li Yu

**Session 2: Information Security and Risk Management**

An Improved Network Terminal Security Evaluation Index System ..................................................65
Yuyi Ou, Jinbiao Xie, and Jie Ling

Empirical Study on Risk Preference of Enterprise Managers .........................................................70
Zhuang Ping and Hou Hai-yan

Monoecism Algorithm in the Application of E-Commerce Information Security ............................74
Qingjie Zhang, Jianming Zhu, Xiaoxu Wang, and Yapan Li

Analysis of Interbanking Systemic Risk Contagion - Case from Finland Bank System ...................82
Chao Wu and Wenhe Li

A DSA-Based and Efficient Scheme for Preventing IP Prefix Hijacking ....................................87
Bo Yang

A New Bionic Architecture of Information System Security Based on Data Envelopment Analysis .................................................................93
Jianrong Yao and Minxue Wei

An Improved Provably Secure Identity-Based Authenticated Key Agreement Protocol ...................98
Yang LI, Jianming Zhu, Wei Zhang, and Xin Yang
Session 3: Web 2.0 and Social Media

A Link Prediction Algorithm Based on Trust and Similar Tag .................................................. 104
Yu Jiankun and Fan Sili

Scientific Research Collaboration Hypernetwork Modeling and Node Importance Measuring ................................................................. 108
Quan Xiao

Sentiment Feature Selection Algorithm for Chinese Micro-blog .................................................. 114
Yu Jian Kun and Zhao Lei

Customer Information Sharing in Social Commerce Based on FIRE Model:
The Role of Trust Propensity .................................................................................................................. 119
Bo Shen, Dan Liu, and Liang Tai

Information Diffusion O2O Model Based on Social Learning ..................................................... 124
Bin Du

Accurate and Diverse Recommendations via Integrated Communities of Interest and Trustable Neighbors ................................................................. 132
Qihua Liu

A Hybrid Model for Explaining Older Adults’ Continuance Intention Toward SNSs ................................................................. 138
Wei Liu

Improving Query Expansion Using Wikipedia ................................................................................ 143
Lixin Gan and Wei Tu

A Review of Link Prediction in Social Networks ........................................................................ 147
Tingli Wang and Guoqiong Liao

Session 4: M-Commerce and Ubiquitous Computing

Contribution-Based Incentive Design for Mobile Crowdsourcing .................................................. 151
Nianzu Liu and Xiao Chen

An Empirical Examination of User Adoption Mobile Payment .................................................. 156
Hong Yan and Zhonghua Yang

Moderating Effects of Gender in the Acceptance of Mobile SNS - Based on UTAUT Model ................................................................................ 163
Yong Guo

3G Technology in the Analysis on Problems and Countermeasures of E-Commerce Applications ................................................................................ 168
Zhong Jiahong and Lei Yin
