# TABLE OF CONTENTS

## VOLUME 1

**LECTURE SESSION 1: PLENARY LECTURE - I**

(L-101) Supercritical Fluids for Effective Separation Processes ................................................................. 1  
Gerd Brunner

**LECTURE SESSION 2A: BIOMASS AND ENERGY-RELATED CONVERSIONS - I**

(L-102) Technology Innovation for the Next Generation Biodiesel Production .............................................. 6  
Shiro Saka

(L-103) Paper Mill Sludge Hydrolysis using Hot Compressed Water for Biodiesel Production by Oleaginous Yeast .......................................................... 14  
Ana Rita Rodrigues, Pedro Simoes, Alvaro Fonseca, Susana Barreiras, Alexandre Paiva

(L-104) One-Pot Algal Biodiesel Production in Supercritical Carbon Dioxide ............................................... 21  
Lindsay Soh, Julie Zimmerman

(L-105) Optimization of Non-catalytic Supercritical Dimethyl Carbonate for Biodiesel Production ........... 29  
Zal Ilham, Shiro Saka

(L-106) Chemical Conversion of Biomass under Subcritical/Supercritical - Solvent Conditions Using a Pilot Scale Flow Reactor: An Overview of the Iowa Center Energy-BECON Supercritical Fluids Program ......................................................... 37  
Sipho C. Ndlela, Norman K. Olton

(L-107) Supercritical Gasification of Biomass: Implementation of Experimental Results in a Process Simulation in Order to Assess an Energetic Optimization ................................................................. 40  
Olivier Boutin, Felicite Ondze, Jean-Henry Ferrasse, Jean-Christophe Ruiz, Frederic Charton

**LECTURE SESSION 2B: THERMODYNAMICS-PHASE EQUILIBRIA-FLUID PROPERTIES**

(L-108) Supercritical Processing of Fatty Oils: Phase Equilibrium Engineering .................................................. 43  
Pablo Hegel, Guillermo Soto, Alexis Velez, Guillermo Mabe, Selva Pereda, Esteban Brignole, Susana B. Bottini

(L-109) Experimental Supercritical Phase Equilibria Measurements of Multi-component Systems ............. 44  
Frederick Fournier, Cara E. Schwarz, Johannes Knoetze

(L-110) Measuring Reactions in SCF and Properties of SCF with Magnetic Suspension Balances ........... 52  
Frieder Dreesbach

(L-111) Measurement and Correlation of Infinite Dilution Diffusion Coefficients in CO2 Expanded Liquids ........................................................................ 56  
Toshinaka Funazukuri

(L-112) Modeling Tracer Diffusion Coefficients in Supercritical CO2 ............................................................. 60  
Ana L. Magalhaes, Francisco A. Da Silva, Carlos M. Silva

(L-113) Numerical Simulation of Flow of Near-Critical Fluids ..................................................................... 66  
T. Laurila, A. Carlson, M. Do-Quang, T. Ala-Nissila, Gustav Amberger

(L-114) Thermodynamic Model for the Binary Solid Mixtures Solubilities in Supercritical Carbon Dioxide ............................................................................. 69  
Sivamohan N. Reddy, Giridhar Madras

**LECTURE SESSION 2C: INDUSTRIAL APPLICATIONS OF CRITICAL FLUIDS - I**

(L-115) Impregnation via Supercritical Fluids - Principles and Applications ........................................... 76  
Eckhard Weidner

(L-116) Development of Pilot Scale Continuous Sub-Critical Water Plant to Produce Valuable Materials and Energy from Organic Wastes and Their Dynamic and Kinetic Analyses .................................................. 84  
Hiroaki Yoshida

(L-117) Supercritical Water Oxidation – Current Status of Full-scale Commercial Activity for Waste Destruction ................................................................. 92  
Philip A. Marrone

(L-118) Supercritical CO2 Extraction of Omega-3 Fats from Disrupted Yarrowia Lipolytica Yeast ……… 100  
Keith W. Hutchenson, William M. Jack II, Val Krakouis, Shu-Chien Liang, Robert D. Orlandi, Hans Schonemann, Gregg Sunshine

(L-119) Metal Extraction of Spiked Solid with Supercritical Carbon Dioxide ................................................. 104  
Ming-Tsai Liang, Ru-Chien Liang, Chih-Hsiung Lin, Ping-Jui Hsu, Li-Yu Wu, Hong-Fa Chen, Yuh-Wern Wu

(L-120) Extraction of Natural Products for Industrial Applications .............................................................. 116  
Nadine Iggl-Schmid, Andreas Wuzik

(L-121) Hanwha Chemical's Supercritical Hydro Technologies ................................................................. 118  
Keedo Han, Kyu-Ho Song, Sei-Ung Park, Chol-Woo Lee, Soo-Yeong Han

**LECTURE SESSION 2D: NATURAL PRODUCTS, NUTRACEUTICALS AND FOOD RELATED MATERIALS - I**

(L-122) Recovery of Phytochemicals by Hybrid Extraction Process using Supercritical CO2 and Water .................................................................................. 119  
Motonomu Goto, Masahiro Tanaka, Armando Quitain, Mitsuru Sasaki, Ryuichi Fukezato
## LECTURE SESSION 3A: BIOMASS AND ENERGY-RELATED CONVERSIONS - II

<table>
<thead>
<tr>
<th>Title</th>
<th>Authors</th>
</tr>
</thead>
<tbody>
<tr>
<td>Production of Essential Oil and Oleoresin from Eucalyptus citriodora Leaves using Sub and Supercritical CO₂</td>
<td>Miguel Herrero, Maria Castro-Puyana, Lourdes Rocamora-Reverte, Jose A. Ferragut, Alejandro Cifuentes, Elena Ibanez</td>
</tr>
<tr>
<td>A Super Critical Fluid Based Approach to Sample Work-up, Analysis and Purification in Natural Products Research</td>
<td>Bui Chen, Jacquelyn Runco, John P. McCauley Jr., Harbaksh Sidhu, Yongwei Xu, Lei Sang, Jing Huang, Li Yang, Zhengtao Wang, Liping Kang, Heshui Yu, Baiping Ma</td>
</tr>
<tr>
<td>Supercritical Antisolvent Fractionation of Lignans from Ethanolic Extract of Flaxseed</td>
<td>Giuseppe Ferretti, Claudia Virgili, Ombretta Maccioni, Gianfranco Repigoli, Paolo Fantozzi</td>
</tr>
<tr>
<td>Comparative Study Between the Supercritical Extraction and Soxhlet Extraction of Nutmeg Seed</td>
<td>Nik Norulaini, Nik Ab Rahman, Sawsan Alnati, Md. Sohrab Hossain, Ahmad Ibrahim, Mohd. Amin Abdul Majid, Mohd. Omar Ab Kadir</td>
</tr>
<tr>
<td>Lipase-catalyzed Transesterification of CO₂-Expanded Canola Oil and Fully-hydrogenated Canola Oil to Produce Base-stock for Zero-trans Margarines</td>
<td>Ehsan Jenah, Ferial Temelli</td>
</tr>
<tr>
<td>Production of Feruloylated Arabinio-Polysaccharides and Oligosaccharides from Beet Fiber by using the Hydrothermal Treatment</td>
<td>Nobuki Sato, Yohei Takano, Shingo Umemura, Masahiro Mizuno, Koichi Nezaki, Tsutetomo Matsuzawa, Yoshihiko Amano, Satoshi Makishima</td>
</tr>

<td>Miguel Herrero, Maria Castro-Payana, Lourdes Rocamora-Reverte, Jose A. Ferrugat, Alejandro Cifuentes, Elena Ibanez</td>
</tr>
</tbody>
</table>
Lecture Session 4A: Biomass and Energy-Related Conversions - III

(L-143) Production of Supercritical Rosemary Extracts and their Effect on Tumor Progression .......................................................... 251
Gonzalo Vicente, Susana Molina, Margarita Gonzalez-Vallinas, Monica Rodriguez Garcia-Risco, Tiziana Formari, Guillermo Regofero, Ana Ramirez de Molina

(L-144) Evaluation of Essential Oil Extraction of Piptadenia gonoacantha and Piptadenia rigida using Supercritical CO₂ .................................................. 258
Bruna S. Moura, Francisco E.A.C. Junior, Mario G. Carvalho, Marisa F. Mendes

Lecture Session 4B: Polymers, Materials Applications and Processes - II

Qian Wu, Elsa Weiss-Hortala, Radu Barna

(L-146) Carbochemical Production from Switchgrass using Carbonated Subcritical Water at High Temperatures ................................................................. 274
Rohit Dhamdhere, Keerthi Srinivas, Jerry W. King

(L-147) Characterization and Electrochemical Properties of Lithium Titanate Synthesized using Supercritical Fluid ................................................................. 283
Agung Nugroho, Juchoon Kim

(L-148) Two-Step Biomass Hydrothermal Liquefaction Process through Subcritical- followed by Alkaline Supercritical-Water Treatment .................................................................................................................. 288
Hema Ramsurn, Ram Gupta

Lecture Session 4C: Industrial Applications of Critical Fluids - III

(L-153) The Scale up of Continuous Hydrothermal Synthesis to Produce Industrial Quantities of Dispersed and Formulated Nanomaterials ................................................................................................................................................... 315
Edward Lester

(L-154) Mixing of Hydrocarbon Droplets and Water at Supercritical or Near-Critical Conditions ................................................................................................. 323
Guang Wu, Sadek Dubir, Michael T. Timko, Ahmed F. Gholmi

(L-155) Brazilian Ginseng: Use of the Supercritical Technology to Produce the Extract .................................................................................................................. 331
Marcelle Fernanda Carvalho, M. Angela A. Meireles

(L-156) Investigation of Supercritical Water Phenomena for Space and Extraterrestrial Application ......................................................................................... 337
Michael C. Hicks, Uday G. Hegde, John W. Fisher

Lecture Session 4D: Natural Products, Nutraceuticals and Food Related Material - III

(L-157) A Simple Mathematical Model for Supercritical Extraction of Natural Matter .................................................................................................................. 347
Manuel Velasquez, Gustavo Bolanos

(L-158) Hydrolysis of Starch Processing Residues in Subcritical Water Optimal Conditions for Production of Valuable Materials ................................................................................................................................. 355
Junya Iishi, Hideyuki Saito, Koichi Fujie, Hiroaki Daimon

(L-159) Recycling of Bovine Meat and Bone Meal and Inactivation of BSE Prion by Sub-Critical Water Treatment ......................................................................... 362
Yuji Tsutsumi, H. Bang, E. Takata, A. Fushida, Y. Murayama, M. Yoshioka

(L-160) Subcritical Water Extraction/Reaction of Bio-Molecules from Lentil Husk .................................................................................................................. 367
Marley A. Saldana, Amupam Haldar, Victor H. Alvarez

Lecture Session 6: Plenary Lecture - II

(L-201) Supercritical Fluid Technology – Key to the Future ................................................................................................................................. 375
Yoon-Woo Lee
LECTURE SESSION 7A: REACTIONS IN CRITICAL FLUIDS - I

(L-202) Valorization of Aquatic Biomass via Supercritical Fluid Processes ................................................................. 381  
Philip E. Savage, Qingqing Guan, Jacob G. Dickinson, Peter J. Valdez, Shujunnn Chang

(L-203) Polypropylene Grafting in Supercritical Carbon Dioxide .................................................................................. 385  
Jacques Fages, Elisabeth Rodier, Jean-Jacques Letourneau, Martial Saucou, Spiridon Alexandratos

(L-204) Self-Optimizing Continuous Reactors: Accelerating Process Development in Supercritical Fluids ................. 390  
Richard A. Bourne, Ryan A. Skilton, Andrew J. Parrott, Martyn Poliakoff

(L-205) Application of Supercritical Fluids in Power Engineering .................................................................................. 393  
Igor Florio, Sarah Moly, Wartha Pinto, Eugene Soltanov, Lisa Grande

(L-206) Intensified, Highly Selective Ethylene Oxidation with Heterogeneous Catalysts in Gas-Expanded Liquids .......... 402  
Madhav Ghanta, Anand Ramananth, Rala Subramaniam

(L-207) Chemical Modification of Natural Rubber under Supercritical Carbon Dioxide Based Hydroxy Telechelic Liquid Natural Rubber and to Prepare the Polyurethane ........................................... 405  
Ali Duerech, Chokchaik Boonchung, Sarat Arerut

(L-208) Coupling Microwave Irradiation with Supercritical Fluid Reaction System ..................................................... 413  
Rolf Schlake, Ernest Schlegel, Al Kazainas

LECTURE SESSION 7B: MATERIALS APPLICATIONS - I

(L-209) Unleashing the Potential of Supercritical Fluids for Polymer Processing in Tissue Engineering and Regenerative Medicine ................................................................. 416  
Ana Rita Duarte, Victor E. Santo, Ana Berta Alves, Simone S. Silva, Joana Monteiro-Silva, Tiago R. Silva, Alexandra Marques, 
Mamuel E. Gomez, Rui A. Sousa, Joao F. Mamo, Rui L. Reis

(L-210) Use of Supercritical Fluid Technology for the Production of Tailor-Made Aerosol Particles for Delivery Systems .................................................................................. 424  
Carlos A. Garcia-Gonzalez, Irina Smirnova

(L-211) DELOS-susp for the Production of Vesicles with Homogeneous Lipid Supramolecular Organization ............... 432  
Elisa Elice, Jannik Larsen, Nikos S. Hatziuk, Ingrid Cabrera, Thomas Bjoernholm, Dimitrios Stamov, Juame Veciana, Nora 
Ventosa

(L-212) A Dense Gas Process for the Production of Liposomal Encapsulated Active Pharmaceutical Ingredients Formulations .................................................................................. 436  
Chau C. Beh, Thomas E. Jacobs, Raffaela Mummucari, Neil Foster

(L-213) Pressurized Fluid Technology in Extraction and Separation Processes – A Green Chemistry Approach ............. 441  
Charloitta Turner, Victor Abrahamsson, Sofia Lindahl, Jiayin Liu, Firka Jumaah, Arwa Mustafa, Merichel Plaza, Abdelrahman 
Issrail, Irene Rodriguez-Meizoso, Margareta Sendahl

(L-214) Physical Stabilities of Indomethacin via Amorphization using Co-Milling and Supercritical Co- 
Precipitation Processing .................................................................................................................................................. 446  
Ron Tau Tey Lim, Wai Kiong Ng, Reginaid B.H. Tan

(L-215) Microencapsulation of Proteins within Polymeric and Inorganic Particles using Supercritical CO₂ Media .......... 453  
My Kien Tran, Leila Hassani, Brice Calvigne, Thomas Beavir, Françoise Hinde, Alain Gibaud, Frank Bourn

LECTURE SESSION 7C: CO₂ REMEDIATION AND ENVIRONMENTAL ASPECTS

(L-216) Pre-Combustion Capture of CO₂ from Power Generation .................................................................................. 461  
David Luebke

(L-217) Applications of Reversible Ionic Liquids: CO₂ Capture and Nanoparticle Synthesis ........................................ 464  
Steven R. Saunders, Kyle Flack, Emily Nixon, Amy Bohan, Jackson Switzer, Elizabeth Biddinger, Pamela Pollet, Charles Liotta, 
Charles A. Eckert

(L-218) Thermodynamic Modeling of the Solubility of Supercritical CO₂ and Other Gases on Ionic Liquids with the soft-SAFT Equation of State .................................................................................. 469  
Felix Llovet, M. Belo, Oriol Vilaseca, Joao A.P. Coutinho, Lourdes F. Veiga

(L-219) NIRD-inline-Monitoring of Micronization Processes in Supercriitical CO₂ .......................................................... 475  
Dennis Bohm, Thomas Grau, Siegbert Johnsen, Ewelina Kaczewoka, Alexander Klotz, Michael Tuerk, Gabrielle Wiegand, Beat 
Zehnder

(L-220) Reversible Ionic Liquids for CO₂ Capture from High Pressure Streams .............................................................. 479  
Amy L. Rohan, Jackson R. Switzer, Kyle M. Flack, Emily C. Nixon, Amber C. Rampie, Elizabeth J. Biddinger, Manish Talecha, 
Pamela Pollet, Charles L. Liotta, Charles A. Eckert

(L-221) Photo-Reduction of CO₂ to Fuel by Novel Nanocatalysts Produced using Continuous Hydrothermal 
Synthesis .................................................................................................................................................. 485  
Haiping Shen, Edward Lester, Trevor Drage

(L-222) Pre-Combustion Capture of CO₂ with Hydrophobic Polymers ........................................................................ 493  
Robert Enick, Matt Miller, Sam McNulty, Humaid Nalwala, David Luebke

LECTURE SESSION 7D: NOVEL SCF EXPERIMENTAL TECHNIQUES

(L-223) Complementarities Between Supercritical Micro- and Millifluidic Synthesis of Nanocrystals for Advanced 
Nanostructured Materials .................................................................................................................................................. 499  
Cyril Aymonier, Yann Roig, Samuel Marre
(L-224) Jet Cutting with Liquid Carbon Dioxide

(L-225) Novel Supercritical Fluid Deposition Technique of SiO2 using Flow Channel Reactor

(L-226) Preparation of Supported Metallic Nanoparticles using Supercritical Fluids

(L-227) Enzymatic Synthesis of Poly(γ-caprolactone) in Supercritical Carbon Dioxide

(L-228) High-Pressure Microfluidics to Explore Multi-Phase Systems: A Study Towards the Supercritical Fluid Extraction of Emulsions (SFEE)

(L-229) In-situ Spectroscopic Ellipsometry of Cu Deposition Process from Supercritical Fluids - Evidence for a Surface Condensation Layer Formation

LECTURE SESSION 8A: BIOMEDICAL APPLICATIONS - I

(L-230) New Insights in Drug Processing using Supercritical Fluids

(L-231) Supercritical CO2 Assisted Fabrication and Impregnation of PCL-Gelatin Based Scaffolds for Advanced Biomedical Applications

(L-232) Compressed Carbon Dioxide - A Green Washing Fluid for Medical Parts

(L-233) Development of a Supercritical Precipitation Process of Calcium Carbonate for Biomedical Applications

LECTURE SESSION 8B: GREEN CHEMISTRY, ENGINEERING AND SUPERCRITICAL FLUIDS - I

(L-234) Green Solvents for Catalysis: From Molecular Understanding to Continuous-Flow Processes

(L-235) Environmental Solvent Impact Assessment of Conventional and Supercritical Biodiesel Production Processes using the Waste Reduction (WAR) Algorithm

(L-236) Water and Benzyl Alcohol in Subcritical and Supercritical Conditions as Means for Carbon Fiber Recovery from Thermoset Composite Materials

(L-237) Greener Solvents for Old Challenges

LECTURE SESSION 8C: PROCESS DESIGN AND ECONOMICS - I

(L-238) Cost of Manufacturing of Vegetable Extracts Obtained by Supercritical Fluid Extraction and Pressurized Liquid Extraction: Assisted or Not by Ultrasound

(L-239) Free of Water Tanning – Intensified by CO2 Parameter and Scale up Study

(L-240) Economical Analysis of the Supercritical CO2 Fractionation of Capsicum Liquid Oleoresin

(L-241) Modeling and Optimization of the Supercritical Wood Impregnation Process - Focus on Pressure and Temperature

LECTURE SESSION 8D: SEPARATION PROCESSES - I

(L-242) Oxide Nanomaterials in Supercritical CO2 Phase: From Nano-powders to Membrane Preparation using Original Supercritical Carbon Dioxide On-stream Deposition Process

(L-243) Sequential Fractionation of Milk and Whey Proteins with Supercritical Carbon Dioxide for New Health-Promoting Food Ingredients

(L-244) Semi-Preparative Supercritical Chromatography Scale Plant for Polyunsaturated Fatty Acids Purification

(L-245) Supercritical Extraction and Fractionation of Biopolymers and Resins from Plant Materials
**LECTURE SESSION 9A: BIOMEDICAL APPLICATIONS - II**

(L-246) Supercritical Development of Sustained Drug Delivery Intraocular Lenses ................................................................. 642
Yamane Massoudi, Abir Bouloukdi, Olivier Forzano, Jean Marie Andre, Elisabeth Baudrel

(L-247) Fabrication of Porous Chitosan/Bioactive Glass Hydrogels in an Aqueous Media using \( \text{CO}_2 \) as a Gas Foaming Agent ............................................................. 649
Ali Fathi, Michael Bernard, Raya Ravarian, Fariba Dehghani

(L-248) Engineering Supercritical Carbon Dioxide Assisted Lipid Nanocarriers: Statistical Optimization .................................. 656
Megha Swami, Vandana Patrawale

---

**LECTURE SESSION 9B: GREEN CHEMISTRY, ENGINEERING AND SUPERCRITICAL FLUIDS - II**

(L-249) The Applicability of Subcritical Fluids to the Conservation of Actively Corroding Metallic Cultural Heritage ................................................................. 660

(L-250) \( \text{ScCO}_2 \)/Glycerol: A Biphasic Green System for Process Intensification ................................................................. 668
Yaocuhua Medina-Gonzalez, Jean-Stephane Condoret, Thierry Tassign, Severine Camy

(L-251) Supercritical Alcoholysis of Sunflower Wet Sludge to Produce Fatty Esters ................................................................. 675
Guillermo Soto, Alexis Velez, Pablo Hegel, Guillermo Mabe, Selva Pereda

---

**LECTURE SESSION 9C: PROCESS DESIGN AND ECONOMICS - II**

(L-252) De-Oiling of Raw Lecithin by High Pressure Extraction Processes ................................................................. 683
Volkmart Steinhagen, Christoph Luette, Michael Bork, Masa Knez HRnic, Zeljko Knez

(L-253) Costs Estimation for the Supercritical \( \text{CO}_2 \) Extraction of Prepressed Oilseeds ................................................................. 687
Jose M. del Falle, Gonzalo A. Nunez

(L-254) Supercritical \( \text{CO}_2 \) Extraction of Lipids Contained in Three Different Microalgae (Chlorella, Nannochloropsis oculata and Dunaliella salina): Study of the Influence of Water Content and Pre-Treatment on the Extraction Kinetics and Yields ................................................................. 688
Adil Mousahid, Christelle Crampon, Elisabeth Badens

---

**LECTURE SESSION 9D: SEPARATION PROCESSES - II**

(L-255) Going Greener in Achiral and Chiral Separations: Employing Sustainable Technologies to Reduce our Environmental Impact ................................................................................................................................. 695

(L-256) Mathematical Modelling of Palm Kernel’s Oil-Bearing Cell during Supercritical Fluid Extraction: One Dimensional Problem ................................................................................................................................. 701
Abu Hamidah Navi, Mohd Omar Ab Kadir, Nik Norulaini Nik Ab Rahman

(L-257) Adsorption of 2-Phenylethyl Alcohol from Supercritical \( \text{CO}_2 \) on Silica Aerogel ................................................................. 707
Xiaohai Hu, Shengxuan Zheng, Wensheng Lv, Hongqiao Lan, Yanzhen Hong, Yuzhong Su, Hongtao Wang, Jun Li

---

**LECTURE SESSION 10A: PLENARY LECTURE - III**

(L-301) Where Are We Today: May 2012? ................................................................................................................................. 711
Val Kruskonis

---

**LECTURE SESSION 12A: SCF PARTICLE/FILM TECHNOLOGY - I**

(L-302) Supercritical Route for Super Hybrid Materials ................................................................................................................................. 717

(L-303) Reverse Micelle Synthesis of Monodispersed Metallic Nanoparticles in Gas Expanded Liquids ................................................................. 722
Ashley E. Hart, David B. Akers, Samuel Gorosh, Christopher Kuincins

(L-304) Synthesis of Nanocomposites using Supercritical Fluids ................................................................. 729
Zhimin Liu

(L-305) Supersaturation as Criterion for the Appearance of Amorphous Particle Precipitation or Crystallization in the Supercritical Antisolvent (SAS) Process ................................................................................................................................. 730
Matthias Rossman, Andreas Braepuer, Alfred Leipertz, Eberhard Schluender

(L-306) Tunable Steric Stabilization Effects on Size-Selective Nanoparticle Dispersability in Gas Expanded Liquid Systems ................................................................................................................................. 736
Pranav S. Vengsarkar, Jennifer N. Boice, Christopher B. Roberts

(L-307) Supercritical \( \text{CO}_2 \) as a Tool for Nanodevice Formation using Sol-Gel Chemistry ................................................................................................................................. 741
Paul J. Chapenek, Nasrin Farhangi, Serge Ayissi, Golam Moala, Adria Lotus, Qasem Alsharari

(L-308) Preparation and Evaluation of MnOx-CeO2 Nanospheres via a Supercritical Anti-solvent Process ................................................................................................................................. 742
Huaxi Jiang, Dongyu Jiang, Xiaojong Dong, Minhau Zhang

SESSION 13B: PHARMACEUTICAL APPLICATIONS - II

(L-334) Utilization of sc-CO₂ in the Preparation of Hemocompatible, Cell Scaffolding Cellulose Phosphate

Aerogels for In vivo Preparation of Bone Tissue .......................................................... 909

Christian Schimpfer, Ramona Dunareanu, Emmerich Haimer, Martin Wendland, Dieter Loidl, Manfred Maitz, Philipp Seib, Carsten Werner, Mai-Alexandra Neouze, Jean-Marie Nedelec, A. Hardy-Dessources, Antje Potthast, Thomas Rosenau, Falk Liebner

(L-335) Fabrication of Lipid Nanocarriers of Levodopa using Supercritical Fluid Technology .......................................................... 912

Claire F. Fernandes, Vandana B. Patrasvale

(L-336) SC-CO₂ Processing of Biodegradable Nanoparticles with Sustained Release of Functional siRNA .......................................................... 914

Gunilla B. Jacobsson, Emilio Gonzalez-Gonzalez, Roger L. Kaspar, Christopher H. Contag, Richard N. Zare

(L-337) Development of Supercritical Fluid Extraction and Supercritical Fluid Chromatography Purification Methods using Rapid Solubility Screening to Support Drug Discovery .......................................................... 919

Kyoung Gahn, Ke Huang

LECTURE SESSION 13C: REACTIONS IN CRITICAL FLUIDS - II

(L-338) Kinetic Resolution in sc-CO₂ - Design of Continuous Reactor Based on Results of Batch Experiments .......................................................... 920

Edit Szekely, Margita Utczas, Bela Simandi

(L-339) Advancement of Fischer-Tropsch Synthesis with Integrated Product Upgrading via Utilization of Supercritical Fluid Reaction Media .......................................................... 922

Sihe Zhang, Rui Xu, Christopher B. Roberts

(L-340) Simultaneous Assessment of Intrapellet Heat and Mass Transfer Limitations for Supercritical Phase Fischer-Tropsch Synthesis .......................................................... 927

Fiaz S. Mohammmed, Christopher L. Kitchens

(L-341) Reversible Reactions of Carbon Dioxide with Amines Employing a Protection/Deprotection Mechanism .......................................................... 936

LECTURE SESSION 13D: HYDROTHERMAL PROCESSING AND INORGANIC MATERIALS - II

(L-342) New Methane Fermentation Process using Subcritical Water Treatment for Sewage Sludge .......................................................... 943

Eiichi Hasegawa

(L-343) Production of Nano-Oxides with a Continuous Supercritical Water Device .......................................................... 946

Frederic Demoisson, Moustapha Ariane, Romain Piolet, Antoine Leybros, Coralie Quadri, Frederic Bernard

(L-344) Hydrothermal and Solvothermal Syntheses, In situ Surface Modification and Antioxidant Activity of Co-Doped Advanced ZnO Nanoparticles .......................................................... 950

Namratha Keerthiraj, K. Byrappa, S. Rajesh, V. Ravishankar Rai

(L-345) Determination of the Equilibrium Constant for the Decomposition of Potassium Bicarbonate in Water at Near-Critical Conditions .......................................................... 958

Maider Legarra Arizaleta, Ashley Blitz, Daniel Kahoonei, Zsuzsanna Czegeny, Michael Antal

LECTURE SESSION 14A: SCF PARTICLE/FILM TECHNOLOGY - III

(L-346) Hollow Fibers by Electrospinning in Supercritical CO₂ .......................................................... 961

Detlef Freitag, Alexander Guenther, Wolfgang Arlt, Mark Mc Hugh

(L-347) Dielectric Property of Titanium Dioxide Thin Films Fabricated by Supercritical Fluid Deposition .......................................................... 964

Hiroshi Uchida, Yuuki Nakazawa, Yuma Hayakawa, Kazuyuki Sekino, Seichiro Koda

(L-348) A New Supercritical Assisted Atomization Layout for the Micronization of Thermolabile Compounds .......................................................... 972

Renata Adami, Sara Liparoti, Ernesto Reverchon

(L-349) Effect of Solvent Condensation During Rapid Expansion of Supercritical Solutions .......................................................... 979

Victor Stepanov, Lev Krasnoyev

LECTURE SESSION 14B: PHARMACEUTICAL APPLICATIONS - III

(L-350) Preparation of Biodegradable Alginate Aerogels Used as Carriers for Drug Delivery .......................................................... 980

Zoran Novak, Anja Veronovski, Zeljko Knez
(L-351) Use of Supercritical Fluid Chromatography (SFC) to Support in Rapid Development of Pharmaceutical Candidates ................................................................. 985
Farid Gumerov, Rustem Usmanov, Radif Gabitov, Chamil Biktach, Ilmutdin Abdulagatov

(L-352) Precipitation of Ultra-fine Particles by Pressure Reduction of Gas Expanded Liquids: Experiments and Mathematical Modeling ................................................................. 987
K. Arjun Kumar, Mamata Mukhopadhyay, Madhu Vinjamur, Sameer Dalvi

(L-353) Expanding the Versatility of SFC through New Enhancements to MS Directed, Open Bed Fraction Collection Systems .................................................................................................. 995
Steven Zadi, Jonathan L. Jones, Chaping Luo, Timothy P. Martin, Ziqiang Wang, Harbaksh Sidhu

LECTURE SESSION 14C: MATERIALS APPLICATIONS - II

(L-354) Bioactive Glasses Loaded with Dexamethasone by a Supercritical Carbon Dioxide Deposition Process .......................................................... 1001
Luisa Filipe, Ana Paula Piedade, James J. Watkins, Mara E. Braga, Hermínio C. de Sousa

(L-355) Stable Emulsions in Biphasic Whole-cell Biocatalysis: The Potential of sc-CO2 for an Industrial Scale DSP .............................................................. 1007
Christoph Brundenbusch, Jonathan Collins, Bruno Buchler, Andreas Schmid, Gabriele Sadowski

(L-356) Chiral Resolution of Ibuprofen via Diastereomeric Salt Formation in Supercritical Carbon Dioxide ......................................................................................... 1008
Gyorgy Bansagli, David Mendez Sevillano, Bela Simandi, Zoltan Juvancz, Edit Szekely

(L-357) Formation of Drug-Cyclodextrin Inclusion Compounds via Melting in Carbon Dioxide + Co-Solvent Mixtures .............................................................................. 1010
Heather E. Grandelli, Abby Whitington, Erdogan Koran

LECTURE SESSION 14D: HYDROTHERMAL PROCESSING AND INORGANIC MATERIALS - III

(L-358) Etching of Silicon under Subcritical Conditions: A Greener Approach .......................................................................................................................... 1018
Nestor G. Gonzalez-Pereyra, Stephanie A. Crette, Olin Thompson Mefford

(L-359) Applications of Supercritical Water Technologies in Advanced Energy Systems ......................................................................................................................... 1025
Morgan L. Thomas, Gaetle Dupuy, Ian S. Butler, Ajay K. Dalal, Janusz A. Kozinski

(L-360) Hydrothermal Processing of Oxide Materials for Functionalities .......................................................................................................................... 1027
Guangshe Li, Liping Li

(L-361) The Synthesis of Novel BaTeM2O9 (M = Mo or W) Ultrafine Particles in Supercritical Water System ..................................................................................... 1030
Bo Li, Rong Zhang, Xiatang Tao

POSTER SESSION P-0100: BIOMASS AND ENERGY-RELATED CONVERSIONS

Production of Biodiesel with Glycerol Carbonate by Non-Catalytic Supercritical Dimethyl Carbonate .................................................................................................................. 1033
Zul Ilham, Shiro Saka

Effect of Purification of Waste Cooking Oil using Supercritical CO2 Extraction on the Production of Hydrotreated Biodiesel (HBD) ........................................................................................................ 1038
Seok Ki Kim, Jae Young Han, Seung-Ah Hong, Jaehoon Kim

Wood Liquefaction in Supercritical Alcohol .................................................................................................................. 1043
Steffen Brand, Jaehoon Kim

Subcritical Water Pretreatment of Lignocellulosic Biomass .................................................................................................................. 1048
Hun Wook Lee, Aye Aye Myint, Dae Sung Kim, Junho Yoon, Youn-Woo Lee

Continuous Biosynthesis of Biodiesel from Lipids of Corn Distillers’ Dried Grains in Supercritical Carbon Dioxide ......................................................................................... 1052
Ozan Nazim Ciftici, Feral Temelli

Biodiesel Production from Vegetable Oil using Sulfated Zirconia via Supercritical Transesterification: Optimization Study ........................................................................................................ 1057
Sheila Adell, Aline Santana, Cristian Ledeusmu, Eléna Ramirez, Jordi Llorca, Maria Angeles Larrayoz, R. M. Filhol

Optimization of Biodiesel Production by Supercritical Transesterification of Edible, non-edible and Algae Oils ........................................................................................................... 1058
Aline Santana, S. S. Jesus, M. A. Larrayoz, R. M. Filhol

A Greener Approach to Biodiesel Production .................................................................................................................. 1060
Pedro Lisboa, Jose Martin, Ana Rita Rodrigues, Pedro Simoes, Susana Barreiros, Alexandre Paiva

Biomass Conversion for the Microalgae Slurry using the Supercritical Methanol Method .................................................................................................................. 1066
Atsushi Kishita, Diah Ajang Setiawan, Gede Suardika

Liquid and Supercritical CO2 Extraction of Fat from Rendered Materials and Solubility Correlation .................................................................................................................. 1071
Jared L. Orellana, Tyler Smith, Christopher L. Kitchens

Aqueous Reactive Pretreatment of Switchgrass for Oligomeric Sugar Production .................................................................................................................. 1077
Yu-Wu Lu, Keerthi Srinivas, Jerry W. King

Carbochemical Production from Switchgrass using Carbonated Subcritical Water at High Temperatures .................................................................................................................. 1083
Rohit Dhamdhere, Keerthi Srinivas, Jerry W. King

Transesterification of Rapeseed Oil with Supercritical Ethanol at Low Molar Ratios. Extraction of Valuable Components ........................................................................................................ 1092
Zul Ilham, Shiro Saka

Cellulose and Sugarcane Bagasse Hydrolysis using Subcritical Water.................................................................................................................. 1097
Juliana M. Prado, Luiz A. Follegatti-Romero, Fiorella P. Cardenas-Toro, Tania Forster-Carneiro, M. Angela A. Meireles, Mauricio A. Rostagno
Semi-batch Equipment for the Hydrolysis of Lignocellulosic Raw Materials ................................................................. 1105

Biodiesel Production by Transesterification of Borage Oil with Supercritical Methanol and CO2 as Co-Solvent:

Luiz A. Follegatti-Romero, Juliana M. Prado, Tania Fortes-Camargo, Fiorella F. Prado, Tania Furtado-Martins

Effects of the Operation Conditions ................................................................. 1112

M. Belen Garcia-Jaruna, M. Jose Otero, Jezabel Sanchez-Oneto, J. Ramon Portela, Antonio Montes, Lourdes Casas, Casimiro Mantell, Enrique J. Martinez de la Osa

Supercritical Water Gasification of Residue from Ethanol Production Process .................................................................. 1116

Oshana Sato, Atsumi Yamaguchi, Norihito Hayashi, Taka Murakami, Masayuki Shirai

Exploration of the Gasification of Spirulina algae in Supercritical Water .................................................................. 1118

Andrew Miller, Doug Hendry, William Jacoby

Biodiesel Production from Microalgae by Supercritical Methanolysis ........................................................................ 1119

Guillermo Soto, Pablo Hegel, Cecilia Popovich, Cecilia Damian, Selva Pereda, Patricio Leonard

Investigation of Process Variables in Supercritical Carbon Dioxide Extraction of Soybeans ........................................ 1120

Nikolas Wilkinson, Raxmey Hilton, Doug Hendry, Chandrasekar Venkitasamy, William Jacoby

Effect of Heat Treatment in NaOH Sugarcane Bagasse after Pretreatment with Sub and Supercritical CO2 to Facilitate the Hydrolysis of Cellulose in Bioethanol Production ................................................................. 1121

Samira Sousa Melo, Deborha Nascimento Santos, Flavia Rodrigues Santos, Ynicia Rafael Lopes, Alexandra Lopes de Oliveira

Cellulose Hydrolysis in Subcritical Water Associated with CO2 .................................................................................. 1121

Luis Alberto Follegatti-Romero, Juliana M. Prado, Maria Angela A. Meireles

Thermodynamics of Biodiesel Fuel Synthesis in Sub- and Supercritical Low Alcohols ................................................. 1127

Vladimir Anis'kev

Biodiesel Synthesis from Rape Oil in Supercritical Methanol in Flow Type Reactor .................................................. 1135

Vladimir Anis'kev

POSTER SESSION P-0200: THERMODYNAMICS PHASE EQUILIBRIA-FLUID PROPERTIES

Prediction of the Solid Solubility in Carbon Dioxide Expanded Organic Solvent using the Predictive Soave-Redlich-Kwong (PSRK) Equation of State .............................................................................. 1139

Chie-Shaun Su

High-Pressure Separation of CO2 from Supercritical Fluids via Density-Driven Concentration Gradients ............... 1143

Doug Hendry, Andy Miller, Nikolas Wilkinson, William Jacoby

Volume of Mixing and Water Solubility in Water Saturated Athabasca bitumen at High Temperature and Pressure ................................................................................................................................. 1144

Luis Alberto Follegatti-Romero, Juliana M. Prado, Maria Angela A. Meireles

Phase Behavior Measurement for Poly(isobornyl acrylate) + Cosolvent Systems in Supercritical Solvents at High Pressure .................................................................................................................. 1149

Dong-Sun Yang, Sang-Ha Cho, Hun-Soo Byun

High Pressure Phase Behavior of Binary Mixture for Diethylene Glycol Diacrylate and Diethylene Glycol Dimethacrylate in Supercritical Carbon Dioxide ........................................................................ 1157

Hun-Soo Byun, Dong-Sun Yang, Sang-Ha Cho

Phase Equilibria Measurements of Ethyl Esters in Supercritical Ethane ................................................................. 1165

Carsten Schlechter, Caro Schwaeze, Johannes Knasz

Thermodynamical Modelling of Phase Equilibrium for Gas/Liquid Binary Mixtures from Supercritical Water Reforming Processes .................................................................................................................. 1172

Boris Kramberger, Elena Markovic, Masa Knez Hrnec, Zeljko Knez

A New Method Based on Molecular Surface Structure for the Prediction of Physicochemical Properties of Biomolecules ................................................................................................................................. 1177

Carmen Alvarez, Martin W. Cordova, Gustavo A. Alvarez, Marleny D. A. Saldana

Measurements of Infinite Dilution Diffusion Coefficients of Vitamin K3 in Mixtures of CO2 and Methanol ............... 1182

Tomohiro Ishii, Hirofumi Yamada, Kazuko Yui, Toshitaka Funazukiri, Chang Yi Kong, Seichiro Kagei

Study of the Phase Equilibrium in Binary Systems: Drug - Carbon Dioxide at Supercritical Conditions ......................... 1188

Francisco Javier Ramos, Rosario Mazurro, Antonio De Lucas Martinez, Juan Francisco Rodriguez, Ignacio Garcia

Application of Artificial Neural Networks for the Modeling of Lipid Solubility in Supercritical Carbon Dioxide ................................................................. 1194

Ozlem Guclu Ustundag, Umut Guclu, Sevecan Ersan

Tracer Diffusion Coefficients of Solutes in CO2 Expanded Methanol by Molecular Dynamics Simulation .............................. 1200

Kazuko Yui, Minoru Toriumi, Toshitaka Funazukiri

Solubility Modeling of Polychlorinated Aromatic Compounds and Mixtures in Supercritical CO2 ............................... 1206

Ruben Oliveira Chiavone, Dannielle Janinne Silva, Claudio Augusto Oller do Nascimento, Osvaldo Chiavone-Filho, Camila Gambini Pereira

Phase Behavior of Corn Oil in Carbon Dioxide at High Pressure .............................................................................. 1214

Filipe Feitosa, Marcio Silva, Silvia Santiago-Ignacz, Henrique de Sant'Ana

High-pressure Phase Equilibrium Data for the Systems L-lactic Acid + (Propane + Ethanol) and L-lactic Acid + (Carbon Dioxide + Ethanol) ................................................................................................. 1219

Isabel Cristina Deihen, Aline Andreuza Rigo, Marcio Antonio Mazzuti, Jose Vladimir Oliveira, Maria Angela Meireles

High Pressure Phase Equilibria Predictions for Supercritical Extraction and Dehydration of Alcohols with Upgraded Group Contribution with Association Equation of State .............................................................................. 1224

Ticiana Soria, S. Pereda, E. Brignole, S. B. Bottini

Reasons of Unique Properties of Supercritical Fluid ........................................................................................................ 1226

Oleksander Alekhin, Oksana Bilous, Yuriy Ostapchuk, Yev. G. Rudnikov
Measurement and Modeling of Hydrocarbon, Water and Supercritical Carbon Dioxide Mixtures from 313.15 to 333.15 K

Viscosity of Hydrocarbons at Temperatures to 533 K and Pressures to 276 MPa: Experiment and Prediction

Multicomponent High Pressure Phase Equilibrium of Vegetable Oils Ethyl Esters in Carbon Dioxide

Study of the Size and Morphology of Polyoxymethylene-3-octyl Ether (C₃EO₃) Surfactant Aggregates in Liquid Carbon Dioxide (CO₂)

POSTER SESSION P-0300: INDUSTRIAL APPLICATIONS OF CRITICAL FLUIDS

The Technical Feasibility of using Supercritical Fluid Extraction to Extract and Fractionate Raw Sugar Cane Wax

Investigate High Elasticity of Health Stockings in Supercritical Fluid Dyeing Processes

Optimization of CO₂-Extraction Processes by In-line Monitoring

A Subcritical Fluid Plant Applied for Recovering Nitric Acid from Pickling Acids and for Dechlorinating of Waste Solvents

Supercritical CO₂ Drying of Enzyme Containing Aerogels Intended for Anti Fouling Paint

POSTER SESSION P-0400: NATURAL PRODUCTS, NUTRACEUTICALS, AND FOOD-RELATED MATERIALS

Optimization of Isolation of Amaranth Lipophilic Constituents by Pressurized Solvent and Supercritical Carbon Dioxide Extraction

Modeling Physical Properties of Canola Oil and Its Blend with Fully-Hydrogenated Canola Oil in Equilibrium

Extraction of Oleoresin from Jalapeno Peppers (Capsicum annuum) using Supercritical CO₂: Determination of Global Yield Isotherms

Influence of Temperature and Pressure Conditions on the Supercritical CO₂ Extraction of Capsicum Pepper Oleoresin

Maximizing Hop Flavor Profiles through Supercritical Fluid Extraction

A New Cosmetic Active Ingredient Obtained with SCF-CO₂ Extraction of Daniellia oliveri Resin

Carotenoid Partition between Vegetable-oil-modified or Pure Supercritical Carbon Dioxide and Red Peppers

Analysis of Carotenoids in Various Matrices using Supercritical Fluid Extraction and Chromatography

Extraction and Solubility Evaluation of Functional Seed Oils in Supercritical Carbon Dioxide

Thermal Degradation and Synthesis in Apple Waste during Pressurized Hot Water Extraction

Bioactive Extracts Obtained from SFE and Soxhlet Extractions of Casearia sylvestris

Solubility of a Multicomponent Glyceride Mixture in SC-CO₂: Experimental Determination and Correlation

Biological Properties from Pink Shrimp Extracts (P. brasiliensis and P. paulensis) Obtained by Low and High Pressure Systems

Biological Activities of Supercritical Extracts from Pitanga (Eugenia uniflora L.) Seeds
Antioxidant Activity from Guava Seeds (P. guajava) of White Fruits, Pink Fruits and Red Fruits of Colombia .................................................................1509

Biological Activity of Syrah Grape Pomace Extracts ................................................................................................................................. 1514

Sachin Naik, Deepa Patel, Ambikandanand Misra

POSTER SESSION P-1100: GREEN CHEMISTRY, ENGINEERING AND SUPERCRITICAL FLUIDS

Recycling of Crosslinked Poly-olefin using Supercritical Fluids

Giyoung Hong, Hong-shih Lee, Hua Wu, Soomin Hong, Youn Woo Lee

Developing Green Processes: Enzymatic Glycosylation of Flavonoids In SC-CO2

Merchel Plaza, Enrique Sanchez-Perez, Eva Nordberg Karlsson, Irene Rodriguez-Meizoso, Charlotte Turner

Green Technology Education in the Undergraduate Classroom

Bolf Slabace, Alkazaras

Comparative Life Cycle Assessment Study of Green Extraction Processes to Obtain Antioxidants from Rosemary Leaves

Maria Castro-Puyana, Jose Antonio Mendiosha, Irene Rodriguez-Meizoso, Charlotte Turner, Elena Ibanez

Going Greener in Achiral and Chiral Separations: Employing Sustainable Technologies to Reduce our Environmental Impact

Chemical Recycling of Poly(butylene terephthalate) with High-Temperature Liquid Water

Osamu Sato, Noritohi Hyoschi, Arimoto Yamaguch, Yuka Marakadita, Yoshihiro Masuda, Masayuki Shirai

Green Application of Flame Retardant Cotton Fabric using Supercritical Carbon Dioxide

SeChin Chang, Brian Condon, Jade Smith

POSTER SESSION P-1200: PROCESS DESIGN AND ECONOMICS

High-Pressure, High-Temperature, Thermodynamics of Simulated Reservoir Mixtures: Phase Behavior, Density, and Modeling with PC-SAFT and a Volume-Translated, Cubic Equation of State

Babatunde Bamgbose, Yue Wu, Mark McHugh, Hee Kn Bae, Robert Enick, Ward Burgess, Deepak Tapriyal, Bryan Morreale

SFE from Pink Shrimp Residue: Validation of Modeled Mass Transfer Coefficient by Sherwood Correlations and Costs Estimation

Natalia Mezzomo, Julian Martinez, Marcelo Murachsin, Sandra R. S. Ferreira

Monte Carlo Simulation of Methanol and Formamide Adsorption During Nickel Catalyzed Supercritical Water Gasification

Vinod Amar, Kenneth Benjamin

Energy Optimization of a Novel FT-SCF Technology

Fadwa Eljack, Elifatih Elmali, Nimir Elbashir, Mahmoud Elhalwagi

Spray Formation of Water, Rape Seed Oil and Different Polyethyleneglycols Saturated with Carbon Dioxide Under High Pressure

Andreas Kilzer, Pavlinka Ilieva

Production Costs of Supercritical CO2 Oilseed Extraction in Multi-Vessel Plants: Effect of Pressure and Plant Size

Gonzalo A. Nunez, Jose M. del Valle

Optimizing the Potential of Critical Fluids to Support a Sustainable and Integrated Bio-refining Platform with Respect to Oleochemical Production

Muhammad Bashir, Regina Santos, Jerry W. King, Steve Barnes, Daniel Picchi

Application of Response Surface Methodology to Study the Enzymatic Synthesis of Biodiesel in Supercritical Carbon Dioxide

Jose Cleiton Sousa dos Santos, Leonardo Jose Brandao Lima de Matos, Hoxiberto Batista de Sant`Ana, Luciana Rocha Barros Goncalves, Rihvia Sarrave de Santiago-Aguar

Supercritical CO2 Extraction of Tung Oil and Process Simulation with the Lumped Parameter Model

Sachin Naik, Deepa Patel, Ambikandanand Misra

Simulation of Supercritical Multistage Countercurrent Fractionation of Crude Vegetable Oil and Byproduct

Hermans S. Vargens, Fernando F. M. Azevedo, Andreia A. Mancio, Nelio T. Machado, Martile E. Araujo

Supercritical Fluid Extraction of Achiyoine satureioides (LAM) DC: Mathematical Modeling and Potentiality of Extracts as New Aroma Source

Maurice Barrosro, Roberto Goes Neto, Eduardo Cassel, Rubem Vargens

Applying Fuzzy Decision Tree for Modeling the Process of Supercritical Fluid Extraction of Pimpinella anisum L. Seed

Bahman Fakhr, Meysam Davoodi, Gholamreza Zahedi

Neuro Fuzzy and Gray Box Modeling of Supercritical Fluid Extraction of Pimpinella Anisum L. Seed

Meysam Davoodiyah, Gholamreza Zahedh, Mazza Biglari, M. Angela A. Meireles

POSTER SESSION P-1300: SEPARATION PROCESSES

Nonconventional Way Improving Performance of Preparative Supercritical Fluid Chromatography

Chuping Luo, Ziqiang Wang, Harbaksh Sidhu
Measurement and Prediction of VOCs Adsorption Equilibria on Activated Carbon in Supercritical Carbon Dioxide

Comparison of Resolution Methods of cis-Permethric Acid in Supercritical Carbon Dioxide

Experimental Study of a Pilot Plant Deasphalting Process in Supercritical Conditions

Thermodynamic Modeling

Polymer Coating using Supercritical Antisolvent Processes for Paper Applications

Silica-Alumina Supported NiO-WO3 Catalysts Prepared via Sequential Supercritical Deposition

Formation of Anchovy Lecithin Microparticles with Polyethylene Glycol by PGSS Process

Co-Precipitation of Flaxseed Oil and Polyethylene Glycol by Supercritical Anti-Solvent Process

Influence of Mixing Conditions Upon the Crystalline Powder Characteristics Formed with the Supercritical Anti-Solvent Process

Low Temperature Deposition Process for Strontium Ruthenium Oxide Thin Film Deposition in Supercritical Drying Sub-Micron Sized Powders with Supercritical Fluid

Nanoparticle Formation of Lycopene/β-cyclodextrin Inclusion Complex using Supercritical Carbon Dioxide

Recrystallization of HMX and RDX using Supercritical Fluids

Direct Synthesis of DMC from scCO2 – Assistance of Nano-Oxides Produced by an scH2O Device

Reccrystalization of HMX and RDX using Supercritical Fluids

Synthesis of Metal/Metal Oxide Nanoparticles using Supercritical Fluids

Study of Supercritical Fluid Extraction of Uranium from Various Matrices

Removal of Cd and Pb from Tobacco Leaves by Supercritical CO2 Extraction

Determination of 17α-methyltestosterone in Aquatic Products by Subcritical Fluid Extraction and High Liquid Chromatography

Operational Recycling Study on a Preparative Supercritical Fluid Chromatography System

Expanding the Versatility of SFC through New Enhancements to MS Directed, Open Bed Fraction Collection Systems

A Sub-2μm Particle Packed Column Supercritical Fluid Chromatography Coupled to Mass Spectrometry for Polar Lipid Analysis

Drying Sub-Micron Sized Powders with Supercritical Fluid

Encapsulation Efficiency and Capsules Stability of Extracts from Pink Shrimp (P. brasiliensis and P. paulensis) Processing Residue

Low Temperature Deposition Process for Strontium Ruthenium Oxide Thin Film Deposition in Supercritical Carbon Dioxide

Influence of Mixing Conditions Upon the Crystalline Powder Characteristics Formed with the Supercritical Anti-Solvent Process

Micronization of Calcium Salts by using Sub and Supercritical Carbon Dioxide: Equilibrium Measurements and Thermodynamic Modeling

Crystal Growth Mechanism of Anthracene Thin Films Produced by Rapid Expansion of Supercritical Solutions (RESS) Technique using Supercritical Carbon Dioxide

Influence of Processing Parameters on Generation of Lipid Nanoparticles of Genistein using Supercritical Fluid Technology

Powderization of (-)-Menthol via PGSS Phase Equilibrium and Modeling

Silica-Alumina Supported NO-WO3 Catalysts Prepared via Sequential Supercritical Deposition

Polymer Coating using Supercritical Antisolvent Processes for Paper Applications
Supercritical Assisted Atomization: Effect of Operative Conditions on PVP Particle Size and Morphology ............................................................ 2160

PCL Nanoparticle Suspensions Production by Supercritical Assisted Injection in a Liquid Antisolvent ............................................................... 2166

Robera Campardelli, Renata Adami, Ernesto Reverchon

Multilayer Absorption Kinetics in Nickel Thin Film Deposition from Supercritical CO2 ......................................................................................... 2173

Kazuma Osada, Mitsuhiro Watanabe, Eiichi Kondoh

 Modeling of Nanoparticles Formation During the Rapid Expansion of Supercritical Fluid ............................................................................... 2177

Denis Stefanov, Y. I. Anikeev

Micronization and Encapsulation of 5-Fluorouracil using Dense Gas Technology ......................................................................................... 2184

Wen Hsi Teo, Liu thai Dinh, Peta Nelson, Un Teng Lam, Raffaella Mummucari, Neil Russell Foster

POSTER SESSION P-1500: PHARMACEUTICAL APPLICATIONS

Development of PURE-Type Dendrimer Copolymers for Drug Delivery .......................................................................................... 2187

Rita B. Restani, Ana Aguilar-Ricardo, Vasco D. B. Bonifacio

Modeling High Pressure Phase Behavior of the Binary System Solvent/Antisolvent for SAS Processing of Pharmaceuticals using PR-LCMV-UNIFAC Equation of State ................................................................................................................ 2188

Gloria Costa, Ravenna Matos, Silvio A. B. Vieira de Melo, V. J. Pereira, G. L. Santana

Antioxidant and Antimicrobial Activity of PGSS\(^{TM}\) Micronized Curcuma Powder ....................................................................................... 2196

Talitko Knez, Tina Perko, Mojca Skrgjeta

Supercritical Solvent Impregnation of Natamycin into Calcium Cross-Linked Alginate Films ........................................................................ 2201

Andrea Cristiana Krause Bierbach, Marianna Alie Hofen da Silva, Herminio C. de Sousa, Mara E. Medeiros Braga, Theo G. Kieckbusch

Production of Nanoparticles of Theophylline using Rapid Expansion of Supercritical Solutions (RESS) Technique ........................................... 2207

Junichi Suhbae, Kohei Demoto, Ayumu Katoaka, Takashi Kokubun, Masayoshi Ito, Nobuhiro Sagimoto, Hirokoush Uchida

Crystallization of Pharmaceutical Solids through Supercritical Fluid Extraction of Emulsions ........................................................................ 2213

Johannes Kluge, Lisa Joss, Sebastian Vierke, Marco Mazzotti

SCF-Assisted Fabrication of Dexamethasone-Loaded Poly(e-caprolactone)/MCM-41 Composite Materials ........................................... 2215

Maria Betania de Matos, Ana Paula Piedade, Carmen Alvarez-Lorenzo, Angel Concheiro, Mara Elga Braga, Herminio C. de Sousa

Effect of Temperature on the Encapsulation of Amoxicillin Microparticles by Sas Process ........................................................................ 2221

Antonio Montes, Dolores Gordillo, Clara Pereyra, Enrique Martinez de la Ossa

Correlation of the Solid Solubilities of Pharmaceutical Compounds in Supercritical Carbon Dioxide using Solution Model Approach .... 2223

Chue-Shaun Su

Dispersion of Pharmaceutical Substances by Rapid Expansion of Supercritical Solutions Method ......................................................................... 2228

Aydar Sabirzyanov, Irina Kuznetcova, I. M. Gilmudinov, I. I. Gilmudinov

Liposomes Production by Ethanol Injection and Solvent Elimination by Supercritical CO2 ........................................................................ 2233

Islane Espirito Santo, Roberta Campardelli, Elaine Cabral Albuquerque, Silvio Vieira de Melo, Giovanna Della Porta, Ernesto Reverchon

Superabsorbent Alginate Aerogels ........................................................................................................................................................................... 2238

Bajendar Reddy Mallepally, Mark McHugh, Kevin Ward

Precipitation of Penicillin G Potassium Salt Microparticles by using Supercritical Carbon Dioxide Anti-solvent Method ..................................... 2243

Ruey-Chi Hsu, Wei-Ann Hong, Hsin-Chun Lu, Chi-Ping Fang

SCF Particle Design for Novel DDS Preparations ......................................................................................................................................................... 2249

Yongda Sun, Haishi Jiang, Xiaoping Dong, Minhua Zhang

POSTER SESSION P-1600: SUPER CRITICAL FLUIDS-IONIC LIQUIDS/COUPLED MEDIA

Utilizing Gas-Expanded Liquids for Efficient Reactions and Separations .......................................................................................... 2255

Pamela Pollet, Charles Liotta, Charles Eckert, Elizabeth Biddingger

On the Chemical Fixation of Supercritical Carbon Dioxide with Epoxides Catalyzed by Ionic Liquids: A Combined Spectroscopic and Computational Study .............................................................................................................................................. 2258

Stephanie Follrhn, Jerome Alsarraf, Frederic Robert, Yannick Landais, Eric Cloutet, Henri Cramail, Raphael Mereau, Thierry Tassart

Nanoparticle Dispersibility in a DMSO/CO2-Rapid Expanded Liquid System .............................................................................................. 2266

Jennifer Boice, Pranav Vengsarkar, Christopher Roberts

Dynamics of the Expansion of the Ionic Liquid [Emim][Tf2N] with Carbon Dioxide at High Pressure ................................................................. 2274

Elif Yildiz, Melek Sekerci, Cerag Dilek, Betul Unlusu

Linear Solvation Energy Relationship-Solubility Parameter Model for Correlating Partition Coefficients in Ionic Liquid- Supercritical CO2 Biphasic Systems ..................................................................................................................................................................................... 2280

Yuya Hiraga, Atsushi Hayasaka, Yoshiyuki Sato, Masaru Watanabe, Richard Lee Smith Jr.

Chiral Resolution of Benzene Derivative Enantiomers with Chiral Ionic Liquids and Supercritical CO2 ..................................................................... 2286

Shiori Baba, Atsushi Hayasaka, Yuya Hiraga, Yoshiyuki Sato, Masaru Watanabe, Richard Lee Smith Jr.

Ionic Liquid Production in a CO2 Expanded Systems .................................................................................................................................................. 2290

Sylvia O. Nwosu, Aaron M. Scuro
A Two Phase Flow Microcapillary Device to Study Ionic Liquid - Supercritical CO2 Binary Systems ................................................................. N/A
Nayane Macedo Portella da Silva, Jean-Jacques Letourneau, Fabienne Espitalier, Laurent Prat

POSTER SESSION P-1700: HYDROTHERMAL PROCESSING AND INORGANIC MATERIALS

Inorganic Salt Removal Process using Titanium as a Pretreatment in Supercritical Water Gasification of Sewage Sludge .................................................................................................................. 2291
Yasunobu Tanaka, Teppei Nanoura, Osamu Sawai, Kazuo Yamamoto

Solid Acid Catalyzed Reactions of Glycerol in Supercritical Water ......................................................................................... 2298
Makoto Akizuki, Yoshito Oshima

Modeling of Zinc Oxide Nanoparticle Formation in a Continuous Supercritical Water Synthesis Process ............................................. 2305
Romain Piolet, Antoine Leybros, Mouna Cheah, Frederic Demotiss, Frederic Bernard

Supercritical Water and Ion Association in GEN IV Nuclear Power Cycle .............................................................................. 2312
Igor Sviatchev

Multi-Stage Oxidation of Ammonia/Methanol Mixture in Supercritical Water .................................................................................. 2313
Yasunobu Tanaka, Teppei Nunoura, Osamu Sawai, Kazuo Yamamoto

The Use of Continuous Hydrothermal Synthesis in the Formulation and Functionalization of Flame Retardant Polymers ................................................................. 2321
Sherif ElBasuney, Derek Irvine, Ed Lester

Glycerol and Bioglycerol Valorization by Superheated Water Conversion .................................................................................... 2327
Quan Wu, Hélène Boucard, Elsa Weiss-Hortala, Radu Barna

Hydrothermal Conversion of Black Liquor in Supercritical Water ......................................................................................... 2335
Helene Boucard, Elsa Weiss-Hortala, Radu Barna, Qian Wu

Photocatalytic Degradation of Pesticides using Nanoparticles from Continuous Hydrothermal Synthesis ........................................... 2342
Mutsee Termtanun, Trevor Drage, Ed Lester

Uncatalyzed Wet Oxidation of D-glucose with Hydrogen Peroxide and Its Combination with Hydrothermal Electrolysis ................................................................. 2347
Mitsuru Sasaki, Teresa Moreno, Goushi Kouzaki, Motonobu Goto, Maria Jose Cocero

Hydrothermal Degradation and Hydrolysis of Cellulosic Materials for High Yield of Dicarboxylic Acids from Cellulosic Biomass with Hydrothermal Electrolysis ................................................................. 2355
Mitsuru Sasaki, Goushi Kouzaki, Armando T. Quitain, Motonobu Goto

Production of Heavy Oil from Rice Husk by Hydrothermal Processing .................................................................................... 2361
Yaping Zhao, Wen Shi, Shining Li, Jongiu Jia

Hydrothermal Carbonization of Glucose in the Presence of Sulfuric Acid .................................................................................... 2368

Reductive Supercritical Hydrothermal Synthesis of Cobalt Nanoparticles ................................................................. 2371
Gimyeong Seong, Tadafumi Adschiri

The Theory of Water Phase Transitions Controlling Hydrothermal Mineralization .................................................................................... 2376
Baoqun Hu, Guoxian Lu, Fangzhang Wang, Zhansue Sun, Tao Guo, Lihong Bai

Continuous Hydrothermal Synthesis of Stabilized Zinc Sulphide Nanoparticles with Fluorescent Properties ........................................... 2382
Selina Tang, Andrei Khlobystov, Stephen Bridston, Edward Lester

Continuous Supercritical Hydrothermal Generation of Hexagonal Tungsten Oxide and Its Bronzes ................................................................. 2388
Miquel Gimeno-Fabra, Cristina Marcos Martin, David Grant, Darren Walsh, Ed Lester

Continuous Hydrothermal Synthesis of Functional Nanomaterials for High-Performance Textiles ................................................................. 2393
Miquel Gimeno-Fabra, David Grant, Ed Lester

Hydrothermal Extraction of Fucoidan from Sargassum Muticum .................................................................................... 2398
Elena M. Balboa, Sandra Rivas, Noelia Gonzalez-Lopez, Andras Moure, Herminia Dominguez, Juan Carlos Parajo
