2015 IEEE 22nd International Conference on Software Analysis, Evolution and Reengineering

(SANER 2015)

Montreal, Quebec, Canada
2-6 March 2015
Contents

Frontmatter

Message from the Chairs ................................................................. iii
Committees ....................................................................................... viii

Keynotes

On Whose Shoulders? (Keynote)
Jane Cleland-Huang — DePaul University, USA .......................... 1

Checkpoint Alpha (Keynote)
Boris Debić — Google, USA ............................................................. 2

Main Research

Information Retrieval

Modeling the Evolution of Development Topics using Dynamic Topic Models
Jiajun Hu, Xiaobing Sun, David Lo, and Bin Li — Yangzhou University, China; Nanjing University, China; Singapore Management University, Singapore ................................................................. 3

Understanding Developers’ Natural Language Queries with Interactive Clarification
Shihai Jiang, Liwei Shen, Xin Peng, Zhaojin Lv, and Wenyun Zhao — Fudan University, China .................................................. 13

APIs and Patterns

Mining Multi-level API Usage Patterns
Mohamed Aymen Saied, Omar Benomar, Hani Abdeen, and Houari Sahraoui — Université de Montréal, Canada ............................. 23

An Observational Study on API Usage Constraints and Their Documentation
Mohamed Aymen Saied, Houari Sahraoui, and Bruno Dufour — Université de Montréal, Canada ...................................................... 33

Improving Pattern Tracking with a Language-Aware Tree Differencing Algorithm
Nicolas Palix, Jean-Rémy Falleri, and Julia Lawall — University of Grenoble, France; LaBRI, France; University of Bordeaux, France; INRIA, France ........................................................................ 43

Measuring the Quality of Design Pattern Detection Results
Shouzheng Yang, Ayesha Manzer, and Vassilios Tzerpos — York University, Canada ................................................................. 53

Analysis of Programming Languages

Are PHP Applications Ready for Hack?
Laleh Eshkevari, Fabien Dos Santos, James R. Cordy, and Giuliano Antoniol — Polytechnique Montréal, Canada; Polytech Montpellier, France; Queen’s University, Canada .................................................. 63

Does JavaScript Software Embrace Classes?
Leonardo Humberto Silva, Miguel Ramos, Marco Tulio Valente, Alexandre Bergel, and Nicolas Anquetil — Federal Institute of Northern Minas Gerais, Brazil; Federal University of Minas Gerais, Brazil; University of Chile, Chile; INRIA, France ........................................................................ 73

Evolution Analysis for Accessibility Excessiveness in Java
Kazuo Kobori, Makoto Matsushita, and Katsuro Inoue — NTT DATA, Japan; Osaka University, Japan .................................................. 83
A Software Quality Model for RPG
  Gergely Ladányi, Zoltán Tóth, Rudolf Ferenc, and Tibor Keresztesi — University of Szeged, Hungary; R&R Software, Hungary

On Crashes and Traces
JCHARMING: A Bug Reproduction Approach using Crash Traces and Directed Model Checking
  Mathieu Nayrolles, Abdelwahab Hamou-Lhdaj, Sofiène Tahar, and Alf Larsson — Concordia University, Canada; Ericsson, Sweden
Towards a Common Metamodel for Traces of High Performance Computing Systems to Enable Software Analysis Tasks
  Luay Alawneh, Abdelwahab Hamou-Lhdaj, and Jameelddine Hassine — Jordan University of Science and Technology, Jordan; Concordia University, Canada; KFUPM, Saudi Arabia
Automated Extraction of Failure Reproduction Steps from User Interaction Traces
  Tobias Roehm, Stefan Nosovic, and Bernd Bruegge — TU München, Germany
Misery Loves Company: CrowdStacking Traces to Aid Problem Detection
  Tommaso Dal Sasso, Andrea Mocci, and Michele Lanza — University of Lugano, Switzerland

Code Reviews
  Patanamon Thongtanunam, Chakkrit Tantithamthavorn, Raula Gaikovina Kula, Norihiro Yoshida, Hajimu Iida, and Kenichi Matsumoto — NAIST, Japan; Osaka University, Japan; Nagoya University, Japan
Code Review: Veni, ViDI, Vici
  Yuriy Tymchuk, Andrea Mocci, and Michele Lanza — University of Lugano, Switzerland
Would Static Analysis Tools Help Developers with Code Reviews?
  Sebastiano Panichella, Venera Arnaoudova, Massimiliano Di Penta, and Giuliano Antoniol — University of Zurich, Switzerland; Polytechnique Montréal, Canada; University of Sannio, Italy
  Rodrigo Morales, Shane McIntosh, and Foutse Khomh — Polytechnique Montréal, Canada; Queen’s University, Canada

Searching and Cloning
Scaling up Evaluation of Code Search Tools through Developer Usage Metrics
  Kostadin Damevski, David C. Shepherd, and Lori Pollock — Virginia State University, USA; ABB, USA; University of Delaware, USA
Optimized Feature Selection towards Functional and Non-functional Requirements in Software Product Lines
  Xiaoli Lian and Li Zhang — Beihang University, China
Threshold-Free Code Clone Detection for a Large-Scale Heterogeneous Java Repository
  Iman Keivanloo, Feng Zhang, and Ying Zhou — Queen’s University, Canada
Detecting Duplicate Bug Reports with Software Engineering Domain Knowledge
  Karan Aggarwal, Tanner Rutgers, Finbarr Timbers, Abram Hindle, Russ Greiner, and Eleni Stroulia — University of Alberta, Canada

Change Impact Analysis
Impact Analysis Based on a Global Hierarchical Object Graph
  Marwan Abi-Antoun, Yibin Wang, Ebrahim Khalaj, Andrew Giang, and Václav Rajlich — Wayne State University, USA
A Framework for Cost-Effective Dependence-Based Dynamic Impact Analysis
  Haipeng Cai and Raul Santelices — University of Notre Dame, USA
Circular Dependencies and Change-Proneness: An Empirical Study
  Tosin Daniel Oyetoyan, Jens Dietrich, Jean-Rémy Falleri, and Kamil Jezek — NTNU, Norway; Massey University, New Zealand; LaBRI, France; University of Bordeaux, France; University of West Bohemia, Czech Republic
An Empirical Study of Work Fragmentation in Software Evolution Tasks
  Heider Sanchez, Romain Robbes, and Victor M. Gonzalez — University of Chile, Chile; ITAM, Mexico
Tool Demonstrations

A Static Code Analysis Tool for Control System Software  
Sreeja Nair, Raoul Jetley, Anil Nair, and Stefan Hauck-Stuttelmann — ABB Research, India; ABB Research, Germany  

RbG: A Documentation Generator for Scientific and Engineering Software  
Michael Moser, Josef Pichler, Günter Fleck, and Michael Wittatschil — Software Competence Center Hagenberg, Austria; Siemens Transformers Austria, Austria  

Historef: A Tool for Edit History Refactoring  
Shinpei Hayashi, Daiki Hoshino, Jumpei Matsuda, Motoshi Saeki, Takayuki Omori, and Katsuhisa Maruyama — Tokyo Institute of Technology, Japan; Ritsumeikan University, Japan  

ClonePacker: A Tool for Clone Set Visualization  
Hiroaki Murakami, Yoshiki Higo, and Shinji Kusumoto — Osaka University, Japan  

GiLA: GitHub Label Analyzer  
Javier Luis Cánovas Izquierdo, Valerio Cosentino, Belén Rolandi, Alexandre Bergel, and Jordi Cabot — AtlanMod, France; University of Chile, Chile  

SPCP-Miner: A Tool for Mining Code Clones That Are Important for Refactoring or Tracking  
Manishankar Mondal, Chanchal K. Roy, and Kevin A. Schneider — University of Saskatchewan, Canada  

TracerJD: Generic Trace-Based Dynamic Dependence Analysis with Fine-Grained Logging  
Haipeng Cai and Raul Santelices — University of Notre Dame, USA  

Umple: A Framework for Model Driven Development of Object-Oriented Systems  
Miguel A. Garzón, Hamoud Aljamaan, and Timothy C. Lethbridge — University of Ottawa, Canada  

Assessing the Bus Factor of Git Repositories  
Valerio Cosentino, Javier Luis Cánovas Izquierdo, and Jordi Cabot — AtlanMod, France  

Industrial Research

Old Habits Die Hard: Why Refactoring for Understandability Does Not Give Immediate Benefits  
Erik Ammerlaan, Wim Veninga, and Andy Zaidman — Exact International Development, Netherlands; Delft University of Technology, Netherlands  

Bash2py: A Bash to Python Translator  
Ian J. Davis, Mike Wexler, Cheng Zhang, Richard C. Holt, and Theresa Weber — University of Waterloo, Canada; Owl Computing Technologies, USA  

On Implementational Variations in Static Analysis Tools  
Tukaram Muske and Prasad Bokil — Tata Consultancy Services, India  

Tracking Known Security Vulnerabilities in Proprietary Software Systems  
Mircea Cadariu, Eric Bouwers, Joost Visser, and Arie van Deursen — Software Improvement Group, Netherlands; Delft University of Technology, Netherlands; Radboud University Nijmegen, Netherlands  

Early Research Achievements

Evolution and Reuse

Trusting a Library: A Study of the Latency to Adopt the Latest Maven Release  
Raula Gaikovina Kula, Daniel M. German, Takashi Ishio, and Katsuro Inoue — Osaka University, Japan; University of Victoria, Canada
