2015 Fifth International Conference on Advanced Computing & Communication Technologies

(ACCT 2015)

Haryana, India
21-22 February 2015
2015 Fifth International Conference on Advanced Computing & Communication Technologies
ACCT 2015

Table of Contents

Message from General Chair..............................................................................................................xv
Message from Program Chair............................................................................................................xvi
Conference Organization...................................................................................................................xvii
Program Committee..........................................................................................................................xviii

Antennas and Propagation

Metamaterial-Based Electrically Small Wide Band L-Shaped Monopole Antenna
Praveen Maurya and Santanu Dwari

Design of Microstrip Patch Antenna Array for Traffic Speed Detector Application
Jagtar Singh, Er. Sunita Rani, and Er. Mandeep Singh

A Compact Multiband Frequency-Agile Microstrip Slot Antenna
Rajeev Kumar and Ritu Vijay

Design of Dual-Frequency CPW-fed Monopole Antenna for Wireless Application
Pawan Kumar and Santanu Dwari

Ultra Wideband PIFA Antenna with Supporting GSM and WiMAX for Mobile Phone Applications
S. Jegadeesan, Zahra Mansouri, A. Veeramani, and Ferdows B. Zarrabi

Compact S-Shaped EBG Structures for Reduction of Mutual Coupling
A. Veeramani, Afsane Saeed Arezomand, J. Vijayakrishnan, and Ferdows B. Zarrabi

Tunable Ring Resonator for Oscillator Application
Hridesh Verma, Mithlesh Kumar, R.S. Meena, and M.D. Upadhyay
Artificial, Biological and Bio-Inspired Intelligence
Facial Behavior Recognition Using Soft Computing Techniques: A Survey .................................................................30
   Khyati J. Kantharia and Ghanshyam I. Prajapati
Optimal Features Set for Extractive Automatic Text Summarization .................................................................35
   Yogesh Kumar Meena, Peeyush Dewaliya, and Dinesh Gopalani
Machine Learning in Bioinformatics: A Novel Approach for DNA Sequencing ..........................................................41
   Pooja Dixit and Ghanshyam I. Prajapati
Detection of Lung Cancer Using Content Based Medical Image Retrieval .............................................................48
   Ritika Agarwal, Ankit Shankhadhar, and Raj Kumar Sagar

Components, Circuits, Devices and Embedded Systems
A Study of Conventional and Junctionless MOSFET Using TCAD Simulations ..........................................................53
   Neeraj Gupta, Janak B. Patel, and A.K. Raghav
Design of Full Adder Circuit Using Double Gate MOSFET ......................................................................................57
   Jagdeep Kaur Sahani and Shiwani Singh
Simulation Based Analysis of I-V Characteristics of ZnO Thin Film Transistor at Channel Length 40nm ..................61
   Anchal Sharma, Charu Madhu, and Jatinder Singh
Calculation of Average Power, Leakage Power, and Leakage Current of FinFET Based 4-Bit Priority Encoder ........65
   Vishwas Mishra and Shyam Akashe
Design & Optimization of FinFET Based Schmitt Trigger Using Leakage Reduction Techniques .........................70
   Pawan Sharma, Saurabh Khandelwal, and Shyam Akashe
Design of Low Leakage Current Average Power CMOS Current Comparator Using SVL Technique ..................75
   Sakshi Saxena and Shyam Akashe
Reduction of Leakage Power & Noise for DRAM Design Using Sleep Transistor Technique ..................................80
   Priyanka Kushwah, Nikhil Saxena, Shyam Akashe, and Saurabh

Computer Vision and Image Processing
Comparison of Scene Change Detection Algorithms for Videos .............................................................................84
   Bindu Reddy and Anita Jadhav
Comparative Analysis of Movement and Tracking Techniques for Indian Sign Language Recognition .................90
   Prema Gupta, Garima Joshi, and Maitreyee Dutta
High Density Noise Removal by Using Cascading Algorithms ...........................................................................96
   Arabinda Dash and Sujaya Kumar Sathua
Steganography in Image Segments Using Genetic Algorithm .......................................................... 102

Masoud Nosrati, Ali Hanani, and Ronak Karimi

Facial Expression Detection Techniques: Based on Viola and Jones Algorithm and Principal Component Analysis ........................................................................................................ 108
Samiksha Agrawal and Pallavi Khatri

A Review on the Strategies and Techniques of Image Segmentation ........................................... 113
Akanksha Bali and Shailendra Narayan Singh

Gait Based Gender Identification Approach ..................................................................................... 121
P.B. Shelke and P.R. Deshmukh

An Improved Half-tone Visual Secret Sharing Scheme for Gray-Level Images Based on Error Diffusion in Forward and Backward Direction ........................................ 125
Aman Kamboj and D.K. Gupta

Various Approaches to Minimise Noises in ECG Signal: A Survey ........................................ 131
Balwinder Singh, Preeti Singh, and Sumit Budhiraja

Dynamic Pattern Search Algorithm with Zero Motion Prejudgment for Fast Motion Estimation .................................................................................................................. 138
Shaifali M. Arora, Navin Rajpal, and Ravinder Purwar

EEG Signal Analysis for BCI Interface: A Review ...................................................................... 143
Swati Vaid, Preeti Singh, and Chamandeep Kaur

Enhanced Steganographic Method Preserving Base Quality of Information Using LSB, Parity and Spread Spectrum Technique ......................................................... 148
Ramandeep Kaur, Abhishek Thakur, Hardeep Singh Saini, and Rajesh Kumar

Computing Systems

Modified Max-Min Algorithm for Game Theory ........................................................................... 153
Virender Ranga, Mayank Dave, and Anil Kumar Verma

Trigonometric Window Functions for Memristive Device Modeling ............................................. 157
Joy Chowdhury, J.K. Das, and N.K. Rout

Chirag H. Bhatt and Harshad B. Bhadka

Shor's Algorithm for Quantum Numbers Using MATLAB Simulator ........................................ 165
Shweta Nagaich and Y.C. Goswami

Developing Postfix-GP Framework for Symbolic Regression Problems ....................................... 169
Vipul K. Dabhi and Sanjay Chaudhary

Reliability Optimization for Distributed Systems through Task Clustering ................................ 176
Sagar Gulati, K. Bhatia, and P.K. Yadav
Control Systems and Power Systems

Utilizing Solar Energy for Room Airconditioning System ................................................................. 183
A.K. Jairath, Saket Kumar, and Gaurav Yadav

Design of Powershift Transmission Control System for Tractor Based on DSP .................................................. 189
Xi Zhiqiang and Zhou Zhili

MATLAB/Simulink Model of Multi-machine (3-Machine, 9-Bus) WSCC System Incorporated with Hybrid Power Flow Controller ................................................................. 194
Garima Aggarwal, Anish Mittal, and Lini Mathew

Robust Stability Analysis of Sun Seeker System by Arguon's Theorem ........................................ 202
Saarang Rastogi, S.K. Jha, and Ratik Oberoi

Database Systems, Data Warehouse and Data Mining

Application Areas of Web Usage Mining ........................................................................................................ 208
Saloni Aggarwal and Veenu Mangat

A Survey on Association Rule Mining ............................................................................................................. 212
Surbhi K. Solanki and Jalpa T. Patel

Comparing Data Mining Techniques for Mining Patents .................................................................................. 217
Nisha Mattas, Smarika, and Deepti Mehrotra

High Performance Computing

Low Power Memristor Based 7T SRAM Using MTCMOS Technique .............................................................. 222
Vijay Singh Baghel and Shyam Akashe

Real-Time Deadline Monotonic Scheduling for Nested-Parallel Task Model on Multi-core Processors ........................................................................................................ 227
Mahesh Lokhande and Mohammad Atique

Optimized Two Head Disk Scheduling Algorithm (OTHDSA) ....................................................................... 234
Karishma Singh, Nidhi, Divya Rastogi, and Dayashankar Singh

A Survey Paper on Task Scheduling Methods in Cluster Computing Environment for High Performance ........................................................................................................ 241
Harvinder Singh and Gurdev Singh

Reducing Features of KDD CUP 1999 Dataset for Anomaly Detection Using Back Propagation Neural Network ........................................................................................................ 247
Bhavin Shah and Bhushan H. Trivedi

Implementation of Low Power Flip Flop Design in Nanometer Regime ....................................................... 252
Pooja Joshi, Saurabh Khandelwal, and Shyam Akashe

Implementation of High Performance SRAM Cell Using Transmission Gate .............................................. 257
Joshika Sharma, Saurabh, and Shyam Akashe

Virtual Memory Behavior around Physical and Virtual System Limits ......................................................... 261
Helidon Karçanaj, Mario Banushi, Igli Tafa, Julian Fejzaj, and Denis Saatciu
Information Theory and Knowledge-Based Systems

Technology and Trends to Handle Big Data: Survey ................................................................. 266
   Sunaina Sharma and Veenu Mangat

A Novel Framework for Privacy Preserving in Location Based Services ........................................ 272
   Udaip Pratap Rao and Harshal Girme

The Based on Rough Set Theory Development of Decision Tree after Redundant Dimensional Reduction ................................................................................................................................. 278
   Priya Pal and Deepak Motwani

Taking a Deep Breath before Jumping into Research in Computer Science and Engineering ................................................................................................................................. 283
   Harshadkumar B. Prajapati, Vipul K. Dabhi, and C.K. Bhensdadia

Mobile Computing and Ad Hoc Networks

An Analysis of the Overhead and Energy Consumption in Flooding, Random Walk and Gossip Based Resource Discovery Protocols in MP2P Networks ................................................................................................................................. 292
   Ajay Arunachalam and Ohm Sornil

Distributed Energy Adaptive Location-Based Cooperative MAC Protocol for Prolonging the Network Lifetime of MANET ................................................................................................................................. 298
   Priyanka Das and Veena Gulhane

Effect of Imperfect Spectrum Sensing on the Protection of Primary User and Performance of Multi-users Environment ................................................................................................................................. 304
   Indu, Rishipal Singh, and Priyanka

Optimization of Topology Update Interval for k-Connected MANETs ................................................................................................................................. 309
   C. Rama Krishna, Shyam Sundar Agrawal, and Amit Garg

Comparative Analysis of Various Routing Protocols in VANET ................................................................................................................................. 315
   Surmukh Singh, Poonam Kumari, and Sunil Agrawal

Performance Analysis of TSDRP and AODV Routing Protocol under Black Hole Attacks in MANETs by Varying Network Size ................................................................................................................................. 320
   Nirbhay Chaubey, Akshai Aggarwal, Savita Gandhi, and Keyurbhai A. Jani

Performance Investigation of Reactive AODV and Hybrid GRP Routing Protocols under Influence of IEEE 802.11n MANET ................................................................................................................................. 325
   Harsukhpreet Singh, Harminder Kaur, Anurag Sharma, and Rahul Malhotra

Enhanced Data Dessimination Techniques for VANETs to Address the Broadcast Storm Problem ................................................................................................................................. 329
   Mohd Umar Farooq, Rubeena Fatima, Mohammad Pasha, and Khaleel Ur Rahman Khan

Cellular Signaling Cascade Based Routing in SANET ................................................................................................................................. 334
   Nipin Gupta, Priyanka, and M.R. Tripathy

Improved Routing Protocol for MANET ................................................................................................................................. 340
   Bijender Bansal, Malay Ranjan Tripathy, Deepak Goyal, and Monika Goyal
Network Architecture & Protocols

Secure-SPIN with Cluster for Data Centric Wireless Sensor Networks .............................................. 347  
Ashutosh Tripathi, Narendra Yadav, and Reena Dadhich

SPIN with Cluster for Data Centric Wireless Sensor Networks .......................................................... 352  
Ashutosh Tripathi, Narendra Yadav, and Reena Dadhich

Revisiting TCP Outcast Problem Using DCTCP in Data Center Networks ........................................ 356  
Ankit Patidar and Mohit P. Tahiliani

Pseudo Random Bit Generation Using Arithmetic Progression ..................................................... 361  
Divyanjali, Ankur, and Trishansh Bhardwaj

Detecting Anomalies Efficiently in SDN Using Adaptive Mechanism ........................................ 367  
Gagandeep Garg and Roopali Garg

Simulation and Modelling of Communication Systems

A Methodology for Behavioral Modeling of 10-Bit Pipelined ADCs with Modified Digital Error Correction Logic ................................................................. 371  
Swina Narula, Sujata Pandey, Vipul Bhatnagar, and Pradeep Kumar

Power Optimization of Communication System Using Clock Gating Technique ................................................................. 375  
Kanika Sahni, Kiran Rawat, Sujata Pandey, and Ziauddin Ahmad

BER Assessment of FEC Incorporated OFDM-MPSK Wireless System ........................................... 379  
Lavish Kansal, Vishal Sharma, and Jagjit Singh

FWM in WDM System, Effects and Techniques to Minimize: A Review ........................................ 385  
Manisha Ajmani and Preeti Singh

Diminution of Optical Impairments for Direct Modulated RoF Link Using Universal DSP Unit for M-QAM Signals .................................................................................. 390  
Ajay Kumar Vyas and Navneet Agrawal

Spatio-Temporal Data Models with Their Different Approaches and Their Features ................................................................. 395  
Sonia Rathee and Rahul Rishi

Performance Analysis of Unsupervised Machine Learning Techniques for Network Traffic Classification ....................................................................................................................... 401  
Hardeep Singh

Performance Evaluation of Zig-Bee 802.15.4 WPAN Designed in Satellite Subnet Using Opnet Modeler .................................................................................................................. 405  
Bhumika and Mukesh Kumar

Channel Management Algorithm for Modeling Network Throughput in IEEE 802.11 WLAN ................................................................................................................................. 409  
Ram Krishan and Vijay Laxmi

Relative Study of Zig-Bee/IEEE 802.15.4 WPAN Performance under Different Topologies ................................................................................................................................. 415  
Bhumika, Mukesh Kumar, Sudhir Narayan Singh, and Bhanuj Taneja
Performance Optimization of DCF-MAC Standard Using Enhanced RTS Threshold under Impact of IEEE 802.11n WLAN .................................................................421

Harsukhpreet Singh, Amandeep Kaur, Anurag Sharma, and Vishal Sharma

Improving Performance of Mobile Agent Based Intrusion Detection System ........................................425

Bhavin Shah and Bhushan H. Trivedi

Improving Classification Accuracy of Intrusion Detection System Using Feature Subset Selection ..........................................................431

Shilpa Bahl and Sudhir Kumar Sharma

BER Analysis in Wavelet Based SC-FDMA for LTE Uplink Transmission ........................................437

Naresh Kumar and Ishu

Design of Improved Performance Voltage Controlled Ring Oscillator ..................................................441

Bhawika Kinger, Shruti Suman, K.G. Sharma, and P.K. Ghosh

An Empirical Comparison of Classifiers to Analyze Intrusion Detection ................................................446

Preeti Aggarwal and Sudhir Kumar Sharma

Shannon Capacity Analysis of Spectrum Sharing System for Rayleigh Fading Channel .................................................................451

Indu Bala, Manjit Singh Bhamrah, and Ghanshyam Singh

A Modified Self-Scheduling Multi-channel Cognitive Radio MAC Protocol Based on Cooperative Communications ........................................455

Rubeena and Indu Bala

BER Assessment of MIMO Incorporated W-OFDM Wireless Communication System ............................................463

Vishal Sharma, Harleen Kaur, and Gupreet Singh

CMOS Radio Transceiver Design for IEEE 802.11 ........................................................................467

Sugandha Jain

Efficient Packet Forwarding Approach Using Public Vehicles ................................................................475

Sandeep Tayal and M.R. Tripathy

Very Sharp Compact Microstrip Lowpass Filter .................................................................................481

Ashwani Kumar, Kunal Srivastava, Y.K. Awasthi, and A.K. Verma

Software Engineering & Cloud Computing

Exploring Cloud Based Load Balancing Model for Data Encryption in Ad-Hoc Network ............................................................485

Monika Rajendra Astonkar and Amar Buchade

Data Integrity Service in Multi-cloud and Distributed Cloud Storage Environment ........................................................................490

Eshwari Jagapur and Basappa B. Kodada

A New Hybrid Virtual Machine Scheduling Scheme for Public Cloud ..................................................495

Harmeet Kaur and Rama Krishna Challi

Cloud Computing Security: Amazon Web Service ..............................................................................501

Saakshi Narula, Arushi Jain, and Prachi
Web Applications and Security

Comparative Study of Security Protocols to Enhance Security ........................................552
Prachi, Surbhi Dewan, and Pratibha

Response Time Analysis of Secure IEEE 802.11n Wireless LAN in a Class
of Network Scenarios ..............................................................557
Poonam Jindal and Brahmjit Singh

Algorithmic Approach for Development of Misuse Case Modeling
Framework for imACOQR Metrics .........................................................564
C. Banerjee, Arpita Banerjee, and P.D. Murarka

Security of Web Applications with Short Web Service: A Review Study ..........................569
Anadi Ajay, Arunima Jaiswal, and Kritika Verma

Web Page Ranking Using Machine Learning Approach ....................................................575
Vijay Chauhan, Arunima Jaiswal, and Junaid Khan

VLSI Implementation of a Key Distribution Server Based Data Security
Scheme for RFID System ................................................................581
Joyashree Bag and Subir Kumar Sarkar

Using Twitter for Tapping Public Minds, Predict Trends and Generate Value ..................586
Sanchita Kadambari, Kalpana Jaswal, Praveen Kumar, and Seema Rawat
**Wired and Wireless Communications**

Cluster Based Routing Protocols: A Comparative Study .......................................................... 590

*Asif Munir*

Design and Implementation of an Efficient and Adaptive Asynchronous MPR MAC Protocol for WLAN ............................................................................................................. 595

*Gagan Sachdeva and G.S. Sharvani*

Hybrid Mechanism for Multiple User Indoor Localization Using Smart Antenna .......................................................................................................................... 602

*Yogesh Sharma and Veena Gulhane*

The Degrees of Freedom in Wireless Line-of-Sight OAM Multiplexing Systems Using a Circular Array of Receiving Antennas ........................................................................ 608

*Kwasi A. Opare, Yujun Kuang, Jerry J. Kponyo, Kenneth S. Nwizege, and Zhang Enzhan*

The Effect of Receiver-Side Circular Antenna Arrays on Bit Error Probability in a Wireless Line-of-Sight OAM Communication System .................................................. 614

*Kwasi A. Opare, Yujun Kuang, Jerry J. Kponyo, Kenneth S. Nwizege, and Parfait I. Tebe*

Review of State Based Approach Recovery Schemes in Mobile Distributed Environments ................................................................................................................. 621

*Vijaya Kapoor and Parveen Kumar*

Solution to Reduce Voice Interruption Time during Handover of VoLTE Call in Enhanced Single Radio Voice Call Continuity ................................................................. 627

*Sumit Gautam and Durga Prasad Sharma*

Mitigation of Atmospheric Turbulence in Free Space Optics: A Review .................................. 634

*Poonam Goyal, Ashwni Kumar, and Vandana Nath*

**Wireless Sensor Networks**

Load Balancing in Region Based Clustering for Heterogeneous Environment in WSNs Using AI Techniques .......................................................................................... 641

*Kalpana Singh and A.K. Daniel*

RSSI Based Localization Scheme in Wireless Sensor Networks: A Survey ................................ 647

*Hetal P. Mistry and Nital H. Mistry*

Replicated Cache Agent Technique for Wireless Sensor Network ........................................... 653

*Shelza Kumari, Research Scholar, and Sukhwinder Singh Sran*

Optimized Cluster Based Deployment of Sensor Nodes to Enhance the Network Lifetime in Wireless Sensor Network ................................................................. 658

*Er. Ranjit Kaur and Er. Sukhwinder Singh Sran*

Detection of Packet-Dropping Attack in Recoverable Concealed Data Aggregation Protocol for Homogeneous Wireless Sensor Networks ........................................ 666

*Amandeep Kaur and Sukhwinder Singh Sran*
Countermeasure for Reinforcement Swap Attack against Directed Diffusion in Wireless Sensor Networks

Saloni, Sukhwinder Singh Sran, and Lakhwinder Kaur

Sunil Kumar Soni and Gagandeep Kaur

Swarm and Classical Based Routing Schemes in Wireless Sensor Network

Pawan Kumar, Sudhir Kumar Sharma, Kota Soloman Raju, and Vaibhav Jain

A Taxonomy of Key Management Schemes of Wireless Sensor Networks

P. Raghu Vamsi and Krishna Kant
