## STG 30: OIL AND GAS PRODUCTION – CATHODIC PROTECTION

| 5537 | Coatings in Combination with Cathodic Protection—Field Experiences after 20+ Years ................................................. | 301 |
| 5585 | Application of Linear Anodes to Protect Isolated and Unisolated Piping in a Petrochemical Plant ............................... | 316 |
| 5626 | Effect of Alternating Current on Corrosion of Pipeline Steel ................................................................. | 326 |
| 5657 | Cathodic Protection in Closed Compartments—pH Effect and Performance of Anode Materials ................................. | 341 |
| 5884 | Researches on Mitigation Methods of Interference Caused by Cathodic Protection System ......................................... | 352 |
| 6012 | ICCP Retrofit Challenges for an Offshore Jacket Complex .................................................................................. | 366 |

## STG 31: CO₂ AND H₂S METAL LOSS CORROSION – 10 YEARS REVIEW

| 5475 | Corrosion Control by Inhibition—Part I: Corrosion Control by Film Forming Inhibitors ........................................... | 405 |
| 5484 | Corrosion of Carbon Steel by H₂S in CO₂ Containing Oilfield Environments—10 Year Update ................................. | 420 |
| 5503 | Monitoring and Inspection Techniques for Corrosion in Oil and Gas Production ........................................ | 435 |
| 5635 | The Range and Variability of Crude Oil Effects on Steel Corrosion in Sweet and Sour Production ......................... | 449 |
| 5672 | Physical and Chemical Effects of Crude Oil on CO₂/H₂S Metal Loss Corrosion: An Updated Review ....................... | 462 |
| 5718 | H₂S + CO₂ Corrosion: Additional Learnings from Field Experience ........................................................................ | 477 |
| 5723 | Field Data Collection, Evaluation and Use for Corrosivity Prediction and Validation of Models - 10 Years Review – Part I: Collection of Reliable Field Data ......................................................... | 493 |
| 5733 | Corrosion Control by pH Stabilization .................................................................................................................. | 504 |
| 5809 | Comparison of Model Predictions and Field Data - The Case of Top of the Line Corrosion ....................................... | 519 |
| 5826 | Fundamental Aspects of CO₂ Metal Loss Corrosion—Part I: Mechanism .............................................................. | 534 |
| 6033 | Fundamental Aspects of CO₂ Metal Loss Corrosion—Part II: Influence of Different Parameters on CO₂ Corrosion Mechanism .............................................................................................................. | 546 |

## STG 32: ADVANCES IN MATERIALS FOR OIL AND GAS PRODUCTION

| 5477 | Application Limits for Martensitic Stainless Steel Forged Bar-Stock Alloy UNS S41500 (F6NM) ............................. | 595 |
| 5482 | Significant Advances for Alloy UNS N07022 for Sour Oilfield Service ........................................................... | 606 |
| 5497 | Evaluation of Precipitation Hardening Nickel Alloys for Use in Hydrogen Sulphide Containing Environments ............ | 613 |
| 5498 | Hydrogen Induced Cracking Safe Materials Operating Limits .............................................................................. | 626 |
| 5501 | A Laboratory Evaluation of the Suitability of Cesium Acetate Brines as Completion, Workover, Suspension, and PACKER Fluids for Extreme/Ultra HPHT Wells—Results of an Extensive Corrosion Testing Program | 641 |
| 5502 | UNS N09955: A New Ni-Base Alloy for H₂S and Hydrogen Charging Environments ...................................................... | 656 |
| 5510 | Developments on a Modified 1.4418 Stainless Steel for the Oil and Gas Industry .................................................. | 671 |
| 5512 | A Comprehensive Study of Titanium Alloys For High Pressure High Temperature (HPHT) Wells ......................... | 684 |
5568 Effects of Initial Notch Length on $K_{APP,\text{SSC}}$ and $K_{LIMIT}$ in NACE TM0177 DCB Test
Xin Long, Samar Saha ................................................................. 699
5597 Susceptibility to Hydrogen Induced Stress Cracking of UNS N07718 and UNS N07725 under Cathodic
Polarization ............................................................................... 708
Ganje Steeneveld, Roy Johnsen, Jim Stian Olsen
5660 Effect of Alloy Element on Hydrogen Entry of Low Alloy Carbon Steel in Sour Conditions
Daisuke Mizuno, Kyotoshi Yamasada, Haruo Nakamichi, Kazushiko Baba, Nobuyuki Ishikawa
5703 Corrosion Performances of Modified Grade-Duplex Stainless Steel for Line Pipe Usage in Slightly Sour
Environment ........................................................................... 733
Masayuki Segura, Akiko Tomio, Jun Nakamura, Hidekori Shitamoto, Kenta Yamada, Daisuke Motoya, Hideki Takabe, Hisashi Amaya, Kazuhiro Ogasawara, Masakatsu Ueda
5717 Fatigue Life of Flexible Armour Wires in Air, Deaerated Seawater, and Sour Environment ........... 748
Eigil Ottesen-Hansen, Jonas Gudme, Adam Rubin, Marie Haahr

VOLUME 2

5719 HIC Performance of SAWL Large-Diameter Pipes Under Non-Standard Test Conditions ............. 763
Thomas Haase, Christoph Busch, Jens Schröder, Bernadette Muerten
5741 Field Experience with Use of 3%Cr Tubing Material ................................................................ 773
Sten Axelsen, Hideki Takabe, Perry Nise, Hisashi Amaya
5742 Recent H$_2$S Corrosion Tests of Hyper Duplex Stainless Steel ....................................................... 784
Magnus Olausson, Ulf Kivissvik, Karinna Persson
5758 Super Martensitic Stainless Steel and Sour Service—Testing and Evaluations .......................... 790
Jan Skar, Stein Olsen
5794 Sour Service Test Qualification of a New High-Strength Titanium Alloy ..................................... 803
Ronald Schmitz, B. C. Jenkins
5851 Environmental Cracking of API 5CT L80 (Type 1) Production Tubulars in Non-Sour Gas Wells and the
Influence of Metallurgy and Chemical Treatment ............................................................................. 818
David Hendris, Russel Kane
5853 Identifying Key Microstructural Features Determining Susceptibility to Hydrogen Embrittlement in
Precipitation Hardened Ni-Based Alloys ......................................................................................... 836
John Hanson, Mateo Seita, Silvio Gradevac, Michael Demkowicz
5911 Hydrogen Embrittlement Resistance of High Strength Nickel Alloys for Oil and Gas Service .... 844
Stephen McCoy, James Crum, Debayesti Malita, Sarwan Mannan, Steve Tanzier
5917 The Effects of Balance Gas on Sour Corrosion and HIC Behavior of Carbon Steel ..................... 854
Kenji Kobayashi, Takuya Haru, Daisuke Mizuno, Nobuyuki Ishikawa, Eiji Tada
5994 Fit for Purpose Qualification of Casings in HPHT Service—A Multi-Disciplinary Approach ........ 867
Syttze Huizinga, Damodanan Raghun, Bruce Miglin, Manuel Gonzalez, Veera Subrumanian, Aleksandra Dominik, Brian Chambers, Jesst Hassell
6053 Effect of Microstructure and Processing on the Hydrogen Embrittlement of Ni-Based Superalloys .... 875
Samuel Kerner, Paul Maxwell, John Magee, Karl Heck
6084 Influence of Weld Preparation Procedure and Heat Tinting on Sulfide Stress Corrosion Cracking of Duplex
Stainless Steel ............................................................................ 887
Gareth Hinds, Leyla Wicksstrom, Alan Turnball

STG 35: DIRECT ASSESSMENT

5448 Protection Effectiveness of Vapor Corrosion Inhibitor for Corrosion under Insulation .................... 902
Behzad Bavarian, Lisa Reiner, Boris Mhckie, Babak Samimi, Yashar Ilder
5528 3D Structured Light Measurement and Analysis of Corrosion and Related Defects ....................... 913
Joseph Pikas, Joe Summa
5594 Requirements of Coupon AC Current Density Affecting AC Corrosion of Buried Steel Pipelines .... 929
Fumiya Kajiyama
5601 Lessons Learned During 10 Years of ECDA Application .............................................................. 943
Sorin Segall, Robert Gummow, Daniel Fingas, John Shore
5677 Multiphase Flow Internal Corrosion Direct Assessment for the Tambaredjo North West (TNW) Pipeline 953
Nima Tajaliipour, Henk Chin A Lien, Patrick Tevoren, Wafe Akeen, Anresh Mohan
5796 Combined CIPS and DCVG Surveys with Integrated GPS for Survey Data Integrity ..................... 969
John Richmond
5908 Effective Corrosion Management for Enhancing Mechanical Integrity .......................................... 982
Masood Al-Arada, Faisal Al-Rebai, Sridhri Joshi, Sandeep Patil
6001 Comparison of an Internal Corrosion Threat Assessment with an Integrity Assessment .......... 996
Dharma Abayaratna, Daniel Powell, James Harrison, Jon Harrison, Casey Lajaunie, Ron Gray
6022 Proposed ECDA Methodology Modification By Including New Probabilistic And Statistical Analysis Based
On A Case Of Study For 110Km Pipeline ....................................................................................... 1008
Homero Castaneda, Ayako Yajima, Hernan Rivera, Lorenzo Martinez, Ramon Mora, Maria Vergara
6116 Developing Selection Criteria of Field Applied Pipeline Coatings ............................................... 1019
Richard Norsworthy, David D’Ambrosio, Mike Quinn
STG 36: PERFORMANCE OF CORROSION RESISTANT MATERIALS IN INDUSTRIAL ACIDS

5430 Corrosion of Ni-based Alloys and Stainless Steels in Mixed Acids and Salts—Experimental and Modeling Results ............................................................................................................................................. 1033
Narasi Sridhar, Andrezej Andorka

5456 Corrosion Evaluation of Ni-Cr-Mo Alloys in Acidic Solutions ................................................................................................................................................................................................. 1048
Brian Deforce, John Grubb, Charles Stinner

5560 Occluded Cell Corrosion Mechanism for C-steel in HF-acid Environment ........................................................................................................................................................................ 1055
Henk Helle

5600 Corrosion Assessment of Stainless Steels in Nitric Acid .................................................................................................................................................................................................. 1065
Daniel Gullberg

5655 Adsorption and Inhibitive Properties of Camellia Sinensis for Mild Steel in 0.5M HCl and 0.8M H2SO4 ................................................................................................................................................. 1070
C. A. Loto, O. O. Joseph, R. T. Loto, Joshua Osuegun Okensiyi

5658 Recent Experiences on Suitability of Titanium and High Alloyed Materials in Acids at 200°C ............................................................................................................................................. 1085
Ralph Baessler, Christina Schmidt, Helena Alves

5749 Sulfuric acid Corrosion of Several Ni-base Alloy Weld Overlays .................................................................................................................................................................................................. 1098
Bongtao Li, George Lui, Charles Gepford, Obed Villalpando, Armen Koryan, Juan Carlos Nava, Vilupanar Ravi

5808 Effect of Chemistry and Heat Treatment on the Corrosion Resistance of Cast Nickel Alloy UNS N10276 ........................................................................................................................................ 1110
Gabriella Mirabelli, Devon Baker, Warren Denning, Alan Druschitz

5827 Performance of Non-Metallic Composite Repair System in Aggressive Environments ................................................................................................................................................................ 1124
Davie Peguero, Eri Yokshi, Venkat Minninkanti

5885 Behavior of Super-austenitic Stainless Alloy (UNS N08020) in Sulfuric Acid Alkylation Plant ............................................................................................................................................ 1132
Saad Al Dhafiri, Laxma Reddy Reddy Keri, Sameer Patil, Govindarajan Narayana, Tareq Al-Foudari

5893 Performance of Organic Corrosion Inhibitors on Carbon Steels and High Alloys in 4M Hydrochloric Acid ........................................................................................................................................ 1143
Evgeny Barmanyov, Trevor Hughes, Michaela Najf

5960 Improved Corrosion and Wear Resistance of a Niobium Alloyed Co-Cr-Mo Alloy ........................................................................................................................................................................ 1157
Matthew Yao, Rachel Collier

STG 38: CORROSION CONTROL IN PULPING, PAPERMAKING, AND BIOMASS CONVERSION INDUSTRIES

5559 Unexpected Corrosion of a Nickel-base Alloy in Acid Refiner Environments: A Mill Case Study .................................................................................................................................................. 1172
Matthew Tunnicliffe, Christian Thompson, Neville Stead, Douglas Singbeil

5617 Corrosion of Wires on Wooden Wire-Bound Packaging Crates ....................................................................................................................................................................................... 1187
Samuel Zelinka, Stan Lebow

5972 Flow Induced Corrosion of Steels Exposed to Pulping Liquors .................................................................................................................................................................................................. 1202
Bedi Aydin Baykal, Preet Singh

6059 Recovery Boiler Tube Failure by Mechanisms of Stress-Assisted Corrosion and Phosphate Hideout ........................................................................................................................................ 1215
Max Moskal

STG 39: RECENT EXPERIENCES WITH NICKEL, TITANIUM, ZIRCONIUM, AND OTHER CORROSION RESISTANT ALLOYS

5425 A Unique Explosion Case Involving a Titanium Reactor ............................................................................................................................................................................................................ 1224
Te-Lin Yau

5620 Study of Pitting Corrosion of Corrosion Resistant Alloys at Extreme High Temperature Using Electrochemical Measurements ........................................................................................................................................ 1234
Jin Huang, Paula Gurrath, Chao Yan, Ross Tomson

5631 Alloys and Stainless Steels Provide Resistance to Corrosion by Halides, Brines, and Salts ....................................................................................................................................................... 1249
Lewis Shoemaker, James R. Crum, Samuel D. Kiser

5659 Electrochemical Characterization of High Alloyed Materials in Molten Salts for Solar Energy Applications ........................................................................................................................................ 1264
Ralph Baessler, Oleksandra Tsvetushenko, Heike Hattendorf

5680 Effect of Heat Treatment on Nickel Alloy Clad Plates ........................................................................................................................................................................................................ 1274
Larry Paul, Curtis Prothe

5682 Alloy Options for Shipboard Scrubbers of Diesel Fuel Emissions .................................................................................................................................................................................................. 1288
Larry Paul, Helena Alves, Volker Wahl

5683 Recent Experiences and Applications with a New Ni-Cr-Mo-N Alloy .................................................................................................................................................................................................. 1297
Helena Alves, Larry Paul, Rainer Behrens

5756 Metallurgy and Corrosion Resistance of UNS N06686 Weld Metal .................................................................................................................................................................................................. 1304
Jeremy L. Caron, Paul Crook

5760 A New Cast Alloy with High Strength and Excellent Corrosion Resistance—An Alternative to the Conventional Ni-Base Alloys ............................................................................................................................................... 1315
Nenad Asteman, Dietlinde Jakobi

5802 Localized Corrosion Study of Ni-Cr-Mo Alloys for Oil and Gas Applications ........................................................................................................................................................................ 1328
Ajit Mishra, Raul Rebak, Danielle Richesin
6122 Corrosion Assisted Fatigue of a Nickel Based Alloy - UNS-N07725 Electric Discharge Machined (EDM) Rubber Cutter ................................................................. 1343
Ivan Morales

STG 40: CORROSION ISSUES IN MILITARY EQUIPMENT AND FACILITIES

5449 Comparison of the Corrosion Protection Effectiveness of Vapor Corrosion Inhibitors and Dry Air Systems ................................. 1349 Behzad Bavarian, Lisa Reiner, Boris Mkistk, Yashar Ikle, Babak Samimi
5956 Predicting the Impact of Metallic Coating and Paint Degradation on Airframe Corrosion ......................................................... 1373
Alan Rose, Keith Leeg
6011 Comparative Evaluation and Testing of Chromate and Non-chromate Primers in Coating Systems for Ballistic Missile Launch Tubes .......................................................................................... 1382
Cindy O'Malley, Nasruddin Laivalla, Harvey Hack

STG 44: MARINE CORROSION

5518 Pitting and Crevice Corrosion Resistance of Alloy X-750 in Seawater .................................................................................. 1393
El-Mabruk Khalifa, Robert Akid
5570 Corrosion of Thermally Sprayed Aluminum in Flowing Seawater .................................................................................. 1409
Kamal Nissanciglu, Catherine Holager, Roy Johnson
5582 The Cavitation Erosion Behavior of UNSN04400 Alloy in Seawater .................................................................................. 1419
Abdul Hameed Al-Hassam, Nasrat Tanoli, Hassam Tariq
5688 Low-Cost Autonomous Condition Monitoring System for Tank Coatings ................................................................. 1429
Conrad Andrews, Kevin Fairinholt, Fritz Friedersdorf, Gheorghe Bunget
5748 A Novel Method for the Measurement of Dry Film Thickness on Profiled Steel Surfaces ......................................................... 1443
John Fletcher, J. Walker
5751 Determining Surface Saline Contamination Using the Saturated Filter Paper Method ......................................................... 1453
5762 Corrosion Protection of Offshore Wind Farms—Protecting Internal Sides of Foundations ......................................................... 1466
Birit Buhl Jensen
5896 Corrosion Protection of Offshore Wind Foundations .......................................................................................... 1478
Anders Black, Lisbeth Hilbert, Troels Mathiesen
5942 Corrosion Performance of TDG Coatings for Marine Bridge Application ................................................................. 1489
Md Ahsan Sabir, Kingsley Lau, Dale Deford
6019 New Generation Ultra-High Solids Surface Tolerant Tank Lining .................................................................................. 1504
Santiago Arias, Joel Luna, Antonio Prieto
6074 Analysis of Corrosion Damage on Propulsion Shafts of Marine Vessels .................................................................................. 1514
Moavin Islam, James Ellor

VOLUME 3

6164 Managing Corrosion Challenges with Drilling Risers and Subsea Equipment ................................................................. 1523
Troels Mathiesen, Harald Osvoll, Borge Bjørneklett, Peyman Mohseni

TEG 024X: DC AND AC TRANSIT STRAY CURRENT INTERFACE

5588 Corrosion Behavior of Buried Pipeline in Presence of AC Stray Current in Controlled Environment ........................................ 1538
Elmira Ghanbari, Mariano Iannuzzi, Scott Lillard, Mauricio Rincon Ortiz
5721 Effects of Intermittent DC Stray Current on Carbon Steel Under Cathodic Protection ................................................................. 1548
Marco Ormellese, Andrea Brenna, Luciano Lazzari
5753 AC Corrosion of Cathodically Protected Buried Pipelines: Critical Interface Values and Protection Criteria .......................... 1559
Andrea Brenna, Marco Ormellese, Luciano Lazzari
5918 Using Remote Data-Logging Techniques to Evaluate Transit System Interference ................................................................. 1570
Jamey Hillieary, Jerry Devitt, Len Krissa
5981 Examination of Grounding Methodologies for HVAC Induction on Buried Pipelines ................................................................. 1580
David Kemp, Shane Pinneman, Daxson Arellano
6015 Investigating Railway Corrosion Caused by Cathodic Protection Systems .................................................................................. 1590
Christophe Baute, Koen De Gusseme, Gert Schevvens, Leslie Borrels
6133 Accelerated Corrosion Study of Direct-Fixation Fasteners .......................................................................................... 1602
Jonah Kurth, Paul Krauss, Jonathan McGormley, James Harper
TEG 053X: ASSESSMENT AND CONTROL IN REINFORCED CONCRETE STRUCTURES

5460 Exposure Testing of Chloride Exposed Reinforced Concrete and Potential Misrepresentation of Service Performance
William Hart

5461 Wire/Strand Slippage in Anchorages—A Potential Failure Mode for Corroding Post-Tensioning Tendons
William Hart, John F. Vincent, Vladimir I. Ivanov

5481 Application of Electrochemical Techniques in the Corrosion Process of Rebar in the Concrete
Xuexian Zhang, David Loveday, Abe Krebs

5696 Condition Assessment, ICCP Design, Installation, and Commissioning for a Carbonated and Salt Contaminated Reinforced Concrete Parking Deck
Suyaj Math, Clem Firlotte, Ali Akbar Shokampurwala

5706 Cracks Width-Corrosion Rate Correlation on the Durability of Reinforced Concrete in a Very High Aggressiveness Tropical Environment
Oladisz Trocuonis De Rincion, Valentina Millano, Yolanda Hernandez, Andres Torres-Acosta, K. Acosta, M. Bracho, D. Patemina

5775 Performance of Corrosion Inhibitors Under the Combined Effect of Chloride and Sulfate Contamination in Concrete
Sammanbar Perneh, Mario Paredes, Ivan Lasa, Kingsley Lau, Krishna Vigneshwaran

5828 Material and Corrosion Evaluation of Deficient PT Grout with Enhanced Sulfate Concentrations
Mohammed Malekshahdini, Omar S. Baghabra Al-Amoudi, Khaled A. Altwi Al-Sodani

5837 Corrosion Propagation Under Moderate Accelerated Conditions
Andréas Sanchez, Alberto Sagues

5838 Corrosion Propagation of Carbon Steel Rebar with Different Concrete Covers and Concrete/Mortar Compositions
Francisco Presuel-Moreno, Brian Weber

5852 Corrosion Condition Evaluations of Historic Concrete
Gina Crevello, Paul Noyce

5890 Preventing Corrosion of Reinforcing Steel in Seawater Cooling Tower and Basins
Zia Chaudhary, Fahad Al-Mutlaq

5907 Design, Online Installation & Commissioning of CP Systems for an Existing Seawater Concrete Structure
Jeevanandam Shanmugam, Roderick Callon

6049 Looking Under the Hood—Condition Assessment of an Aging Underground Garage with Unbonded Overlay
Paul Noyce, Nate Sauer

6063 Practical Approach to Introducing Potential-Dependent Chloride Corrosion Threshold in Reinforcement Corrosion Predictive Models
Andrea Sanchez, Alberto Sagues

6097 Enhanced Soil-Cementitious Fill Corrosion of Galvanized Steel Reinforcement in Mechanically Stabilized Earth Walls
Enrique Paz, Alberto Sagues

6102 Cathodic Prevention for Reinforcing Steel in Cracked Concrete of Chloride Contaminated Structures
Margareth Dugarte, Alberto Sagues, Kevin Williams

6170 Passive Wireless Surface Acoustic Wave Sensors for Corrosion Monitoring of Steel Concrete Structures
Masjed Belkerdij, Adrian Steele, E. Struble

TEG 059X: CO2/H2S CORROSION IN WET HYDROCARBON-CONTAINING ENVIRONMENTS

5438 Water Wetting Study on Crude Oil Using a Model Oil Blend
Abdulazziz Alrayees, Sonja Richter, Marijan Babic, Ramsey White

5447 Mystery of SAGD Produced Gas Corrosivity and Corrosion Mitigation Strategy
Qiang Liu, Jack Whitaker, Rick Marsden

5525 Effect of Intervention History on Corrosion State of Production Tubulars
Lisa Hillert, Jan Larsen, Perille Haugland

5640 Evaluation of Preferential Weld Corrosion Susceptibility and Its Mitigation in Slightly Sour Conditions
Ray Case, Mohsen Achnour, Jordan Daniels

5649 Effects of Heat Treatment on Mechanical Resistance and CO2 Corrosion Resistance of 3Cr Steel
Lining Xu, Xiaodi Fan, Minna Lu, Jiong Zeng Zhu

5671 Corrosion on Mild Steel in an Aqueous CO2 Environment - Basic Electrochemical Mechanisms Revisited
Thu Tran, Bruce Brown, Srdjan Sestic

5674 In Situ Synchrotron Radiation GIXRD Study of Sweet Corrosion Scaling on Carbon Steel
Robert Lindsay, Gaurav Joshi, Karyn Cooper, Jacek Lapinski, Dirk Engelberg, Oier Bikondoa, Mark G. Dowsett

5807 The Role of CO2 on Carbon Steel Corrosion
Mervin Bandeira, Oscar Mattos, Tatiana Almeida, Rogaciano Moreira

5820 Environmental Effects on Fitness-for-Service Parameters For 1% Nickel Steel Pipe Welds with Preferential Weld Corrosion Damage
Dale McIntyre, Ray Case

5829 Corrosion Testing of Steel Armour Wires in Flexible Pipes—A Parametric Study
Arne Dugstad, Simona Palencsar, Linda Burvik, Pål Eikrem

5898 General and Localized Corrosion in a Tail Gas Treating Quencher Column
Riky Bernardo, Jeevanandam Shanmugam, Zoltan Hazos
5921 Galvanic Corrosion Following Local Breakdown of a Scale Formed on X-65 in CO2 Saturated Solutions .................................................. 1986
Najia Leiva-Garcia, Jake Anderson, Ramon Domene, Manuel Fernandez-Domene, Robert A.ild

5619 The Corrosion of Carbon Steel in the Presence of Monoethylene Glycol (MEG) - Assessing the Influence of an Iron Carbonate Scale .................................................................................................................. 1999
Ikeachukwu Ivonye, Chun Wang, Anne Neville

6162 Development of Novel Phosphate Based Inhibitors Effective for Oxygen Corrosion. Part II: Electrochemical Characterization .............................................................................................................................. 2010
Omar Yepez, Nihal Obeyesekere, Jonathan Wylde

6163 Development of Novel Phosphate Based Inhibitors Effective for Oxygen Corrosion. Part I: Rotating Cage Autoclave Study .................................................................................................................. 2024
Omar Yepez, Nihal Obeyesekere, Jonathan Wylde

TEG 093X, TEG 145X: INHIBITORS – VAPOR TRANSPORTED (VCI) AND SURFACE COATING RUST PREVENTIVES (RP)

5450 Comparison of the Corrosion Protection Effectiveness of Vapor Corrosion Inhibitor and Nitrogen Blanketing System .............................................................................................................................................. 2038
Behzad Bavarian, Lisa Reiner, Boris Miksic, Jia Zhang

5468 Investigation of Bio-based Aromatic Acids as Corrosion Inhibitor ........................................................................................................... 2051
Ming Shen, Margarita Kharchan, Alla Fisron

5575 Improved Packaging—Barrier Coated Paper Incorporating Vapor Phase Corrosion Inhibitors ...................................................................... 2063
Robert Kean, Margarita Kharchan, Boris Miksic

5636 Performance of Rhizophora Mangle L. Leaf-Extract and Sodium Dichromate Synergies on Steel-reinforcement Corrosion in 0.5 M H2SO4-Immersed Concrete............................................................................................................. 2070
Joshua Okemiyi, Cleophas Loto, Abimbola Popoola, Olugbenga Omotoshi

5678 Evaluating Efficacy of Volatile Corrosion Inhibitors Versus Traditional Methods for Preservation of Industrial Equipment and Operational Spare Parts .............................................................................................................. 2080
Eric Utdale, Cliff Crucauer, Boris Miksic

5790 The Commercialization of Self-Healing Technology in Normal Epoxy Coatings .................................................................................. 2093
Lujie Ye, Alan Jones, Eman Mohamed Faysy, Mariam Ali S. Al-Maadeed

5840 Evaluation and Comparison of Waxes in Rust Preventives ...................................................................................................................... 2105
Jennifer Clark, Britt Minch, David Boothe, Eric Rodheaver, Ben Faber, Amelia Hadler

5860 Electrochemical Assessment of Corrosion Inhibitors on Steel and Aluminum Substrates ........................................................................... 2115
Homero Castanedo, Britt Minch, David Boothe, Dongrui Yang

5861 Corrosion Resistance and Bond Strength of Steel Bars Coated with Calcium Silicate Modified Enamel ................................................................ 2127
Fujian Tang, Genda Chen, Dongming Yan

5986 Advanced Analytical Techniques for Characterization of Rusted Steels ..................................................................................................... 2141
Seifollah Narzadani

Testing and Analyses of Davis-Besse UNS N06600 Control Rod Drive Mechanism Nozzles ............................ 4250
David Alley, Darrell Dunn

Environmental Behavior of Light Water Reactor Accident Tolerant Candidate Cladding Materials Under Design Conditions .............................................................................................................. 4271
Raul Rebak, Young J. Kim, Frank Wagenbaugh, Timothy B. Jarewicz, R. J. Blair

Brunswick Nuclear Plant IGSCC Mitigation Strategy and Monitoring ............................................................... 4286
Jeremie Varnam, David Morgan, Steven Williams

Oxidation Behavior of an Austenitic Stainless Steel Used in the UK Advanced Gas Cooled Reactors .............. 4295
Bo-Cherkia, Ian Ledingham, Fabio Scenini, Robbert Ainsworth

Corrosion Analysis in Risky Environments: Assessment of Pipelines Used on the Hanford Nuclear Site Used to Transfer Plutonium Production Process Waste .................................................................................. 4310
Jason Page, Jason Engelmann, Gary A. Cooke

Repassivation Behavior of UNS N06022 in Chloride-Containing Solutions .................................................... 4317
Hundal Jung, Tae M. Ahn

Hanford Review of Double-Shell Tank Construction ....................................................................................... 4330
Jason Gunter

241-AY-102 Leak Detection Pit Drain Line Inspection ....................................................................................... 4345
Brandon Vazquez, K. D. Boomer, T. J. Venetz, J. K. Engeman

TEG 267X: PIPELINE INTEGRITY

DC Interference of Impressed Anodes on Metallic Structure Buried in an Adjacent Gas Station ........................ 4360
Yabo Hu, Jianjun Li

Monitoring AC Interference and Corrosion on High-Pressure Pipeline ............................................................ 4368
Ian Thompson, Peter Martin

Detecting Pinhole Leaks Using Free Swimming In-Line Acoustic Leak Detection Tool ......................................... 4381
Anas Somani, Dave Kurtz

Electrochemical Behavior of X80 Steel in Sub-Zero NS4 Solutions .................................................................. 4391
Yabo Hu, Jiaying Yao, Cheng Ma, Chaojun Dong

Quantitative Assessment of Risk Due to External Corrosion in Underground Oil and Gas Pipelines .............. 4398
Swati Jain, Andrea N. Sanchez, Zhan Guan, Shanshan Wu, Francois Aeyello, Narasi Sridhar, Qingshun Feng, Bingchuan Yan

Assessment of Free Water Flow at a Gas Pipeline Dead Leg/Lateral Interface .................................................. 4413
Xihua He, Kevin Supak, Rebecca Owston, Stuart Stothoff, Kaushik Das

Unexpected Effect of Small Oxygen Concentrations in Saleh Gas on Element Currents Between Pipeline Steel and Magnetite from Black Powder .................................................................................. 4425
Guenter Schmitt, Ruediger Forster

Modern AC Mitigation Performance Testing and Comparison ........................................................................ 4439
Christopher Sheldon

Study on Formation Mechanism and Protection Characteristic of Corrosion Scale on X65 Pipeline Steel in CO2 Environment ........................................................................................................................................ 4448
Liang Wei, Xiaolu Pang, Kewei Gao

A Fuzzy Logic Model Designed for Quantitative Risk Analysis Based on ECDA Data ........................................ 4462
Amarnath Martins Junior, Elizabeth Nicholson

Corrosion Management of MIC Contributes to Pipeline Integrity .................................................................. 4471
Richard Eckert, Torben Lund Skovhus, Brit Katherine Grever

Are We Learning From the Past? Opportunities for Continuous Improvement of Internal Corrosion Management Programs ................................................................................................................................. 4483
Richard Eckert

Long-Range Microwave Detection of Wet Insulation for CUI Mitigation .......................................................... 4497
Francesco Simonetti, Peter Nagy, Geir Instanes, S. M. Bégiaarupu, Audun Pedersen

The Long-Lasting Operation of Cleaning and Inspecting a Pipeline with Black Powder Issues ........................ 4512
Helene Sirnes, Kyrre Kaugland

Importance of Coating Integrity Survey of Buried Oil and Gas Pipelines .......................................................... 4523
Aloko Dare, Abiodun Liadi, Bright Edward
6057 Ultra High Modulus Carbon Fiber Repair Systems with Stiffness Greater than Steel for Pipeline Applications .......... 4533
Davie Piovaro

6077 Monitoring DC Decoupling Devices at Isolation Flanges for Compliance and Pipeline Integrity ................................................. 4544
Jamey Hilleary, Jerry Dewitt, Len Krissa

6107 Simulating Pipeline Flow Using the Rotating Cage Method ........................................................................................................ 4554
Muhammad Arufin, Allan Ranstedtler, Patrick Boisvert, Nicholas Senior

TEG 282X: SOUR CORROSION

5485 Current Understanding of Corrosion Mechanisms Due to H₂S in Oil and Gas Production Environments ................................ 4567
Stephen Smith

5507 Construction and Verification of Pourbaix Diagrams for Hydrogen Sulfide Corrosion of Mild Steel ........................................ 4585
Carlos Menendez, Vladimir Jovanovic, Jeanne Jardine, Wai Y. Mak

5578 H₂S Control Via Downhole Injection of a New, Non-scaling H₂S Scavenger Chemistry .............................................................. 4604
Kevin Janak

5583 Early Stages of Pitting Corrosion of UNS K03014 Carbon Steel in Sour Corrosion Environments: The Influence of CO₂, H₂S and Temperature .................................................................................................................... 4615
Frederick Pesu, Richard Barker, Anne Neville

5687 Development of New Sour Gas Corrosion Inhibitors and Their Compatibility with Kinetic Hydrate Inhibitors ..................... 4632
Amer Jarrahi, Vinayak Sardesai, Sandip Kotha, Saleh Al-Salama

5700 Predictive Corrosion Technology for Gas Plants ......................................................................................................................... 4646
Michael Simonetti

5701 Ultradeepwater H₂S Scavenger for Oil and Gas Production ......................................................................................................... 4659
Aline Kina, Gesxie Andreade, António Oliveira

5720 Effect of High H₂S Partial Pressures on Localized Corrosion of Carbon Steel ........................................................................ 4670
Joel Kvaarsnes, Gata Svenningsen

5839 Sulfide Stress Cracking Susceptibility Assessment of Topside and Subsea Facilities .......................................................... 4684
Jose Vera, Heider Suarez, Robert Franco

5856 Effect of High Arm Displacement on DCB Specimen Testing ................................................................................................... 4700
Sebastian Cravero, Tomas Turkaia, Hugo Ernst, Gustavo Kissner

5858 Uncertainty Assessment in DCB Testing ........................................................................................................................................ 4710
Sebastian Cravero, Tomas Turkaia, Hugo Ernst, Ricardo Schifini, Gustavo Kissner

5894 Study of Corrosion Pattern in Gas Dehydration System Handling Sour Gas ............................................................................. 4725

5909 Hydrogen Permeation of Pipeline Steel Under Sour Condensate Film Condition ......................................................................... 4738
Lei Zhang, Duangli Li, Mingjiang Liu, Minzhu Li, Wei Chang, Xiaohu Zhang

5930 Elemental Sulfur Corrosion Behavior in the Presence of Sulfur Solvent and Monoethylene Glycol ............................................ 4747
Najmiddin Yaakob, Marc Singer, David Young

5933 Mechanistic Study of the Effect of Iron Sulfide Layers on Hydrogen Sulfide Corrosion of Carbon Steel ............................ 4761
Youngai Zheng, Jing Xing, Bruce Brown, Srijan Nescui, David Young

5988 Synergistic Evaluation of Casing Materials for Cyclic-Temperature Sour Wells ........................................................................ 4781
Morgan Allen, Jarek Nowinka

5993 DLC Coatings in High-Temperature Hydrogen Sulfide Environment ......................................................................................... 4796
Tomasz Liskiewicz, Anne Neville, Amal Al-Borno, Hongyuan Zhao

6034 Sour Water Corrosion of Quench Column and Integrity Management in a Gas Plant ............................................................. 4806
Pappula Y. Rao

6090 Development of Alternate Sour Corrosion Inhibitor for Severe Sour Condition and Its Performance .................................... 4821
Palikis Murgan, Kenneth Worsley, Clayton Smith, Trebyg Duane

6119 Corrosion of Carbon Steels in H₂S Containing Alkaline Brines .................................................................................................. 4835
Serguei Ilov, Ruoshu Feng, Justin Beck, Rosemary Ciani, Margaret Zomek-Morse

6131 Thermodynamic Modeling and Validation of Gas Charging Techniques .................................................................................. 4850
William Kovacs, Jose Vera, Kenneth Evans, Steven Waters

6137 Failure Analysis of Localized Corrosion in Sour Environments in Discharge Lines of Hydrocarbon Wells ......................... 4864
Irene Carrillo Salgado, Jorge Canto Ibanez, Paul Gomez Font, Carlos Alberto Reyes

TEG 331X: CORROSION OF BIOMEDICAL MATERIALS AND DEVICES

5523 Study of Nanocrystallines on Artificial Hip Implants Surfaces Induced by Biotribocorrosion Processes ............................ 4876
Yu Xue, Gang Han, Zhongwei Wang, Lijie Qiao

5599 The Effect of Microseparation on Corrosion Rates of Metal-on-Metal Total Hip Replacements ........................................... 4882
Andrew Beadling, Michael Bryant, Duncan Dowson, Anne Neville

6058 Evaluation of Surface Characteristics of Different Materials Used in the Design of Hip Implants .................................................... 4894
Izabelle Gindri, Maria Barbano, Robert Russell, Danyal Sridhar, Daniel Rodrigues, Danyal Siddiqui

6080 Assessment and Management of Corrosion in Implantable Medical Device Battery ............................................................. 4899
Mingzhong Wang, Puqiang Zhang, Michael Ringle, Gaurav Jain, Tom Gorka
6120 Characterization of the Corrosion Behavior of Advanced Titanium Alloys in Simulated Physiological Environments Using Electrochemical Impedance Spectroscopy ........................................................................................................... 4914
Stefano Mischler, A. Igual Munoz, B. M. Jolleys

6142 Electrochemical Characterization of CoCr Alloy in In-vivo Synovial Fluids ................................................................................................................................. 4924

TEG 407X: MECHANISMS OF LOCALIZED CORROSION

5562 Localized Corrosion of Corrosion-resistant Alloys in Environments Containing Hydrogen Sulfide ................................................................. 4932
Andrzej Anderko, George Engelhardt, Feng Gui, Liu Cao, Narasi Sridhar

5584 The Influence of pH on Localized Corrosion Behavior of X65 (UNS K03014) Carbon Steel in CO2-Saturated Brines ........................................................................................................... 4947
Paula Martinez, Pablo Martinez, Edgar Hornus, Ricardo Carvajal, Raul Rebak

5595 Use of Electrochemical Techniques to Determine the Effect of Sigma (σ)-phase Precipitationon a 25 wt% Cr Super Duplex Stainless Steel ........................................................................................................... 4962
Roy Johnson, Monika Naess, Mariano Iannuzzi

5610 Effects of Anodic Species on the Crevice Corrosion Behavior of Copper in the Groundwater .................................................................................... 4977
Qifa Xu, Kewei Guo, Xiaolu Pang

5699 Effect of Anodizing Treatment on Galvanically Accelerated Crevice Corrosion of Aluminum Alloy ........................................................................... 4991
Jia Xi Li, Jiang Ling, Yang Liu, Jun Yang, Yajun Wang, Yanhua Wang

5740 Crevice Corrosion Resistance of Super-Austenitic and Super-Duplex Stainless Steels in Chloride Solutions ................................................................. 4998
Martin Rodriguez, Pablo Martinez, Edgar Hornus, Ricardo Carvajal, Raul Rebak

5746 Role of Alloying Elements and Ageing in the Pitting Corrosion Resistance of Duplex Stainless Steels ................................................................. 5013
Sandra Le Manach, Vincent Vignal, Djilby Ba, Olivier Heintz, Frederic Herbst

5799 Effect of Copper on Crevice Corrosion Inhibition of Nickel-Chromium-Molybdenum Alloy in Aggressive Conditions ................................................................. 5028
Ajit Mishra, Dave Shoemarker

5818 Electrochemical Behavior of Nickel-Containing LAS in Deaerated TM0177 Solution A ........................................................................................................... 5043
Raul Rebak, Mariano Iannuzzi, Ricardo M. Curranz, R. J. Blair

5842 Electrochemical Tests in Completion Fluid Environment in Martensitic Stainless Steels Used in Oil and Gas Wells ........................................................................................................... 5058
Elaine Azvedo Nascimento de Almeida, Jose Antonio da Cunha Pomianco Gomes, Flavia Maciel Fernandes Guedes

5855 The Likelihood of Localized Corrosion in an H2S/CO2 Environment ............................................................................................................................... 5071
Bruce Brown

5971 Effect of Thiourea on Metastable Pitting in Chloride Containing Environment ........................................................................................................... 5086
Yushu Wang, Preet Singh

6000 The Effect of Microstructure on the Pitting Resistance of Duplex Stainless Steels ........................................................................................................... 5095
Luis Garfias-Mesias

TEG 462X: CONVENTIONAL FUELS/BIOFUELS CORROSION ISSUES

5535 Compatibility of Scaling Materials with Biofuels and Biodiesel-Heating Oil Blends ................................................................. 5097
Margot Weltsch, Manuela Haufe, Martina Heyer, Frank Heming

5536 Compatibility of Polyethylene Grades with Biofuels and Biodiesel—Heating Oil Blends ................................................................. 5120
Margot Weltsch, Anka Kohl, Manuela Haufe, Martina Heyer

5540 Effect of Total Acidity and Water Content on Ethanol Corrosiveness (E100) ........................................................................................................... 5132
Anna Moreira, Zehhour Panossian, Gutemberg De Souza Pimenta, Viviane de Oliveira

5772 Assessment of Microbiologically Influenced Corrosion of Metals in Biodiesel from Jatropha Curcas ........................................................................................................... 5144
S. Maavanzhi, R. Shymalama, Sankara Pravinsanum

5945 Use of NACE TM0111 Slow Strain Rate Test for Evaluation of Ethanol SCC ........................................................................................................... 5158
Russell Kane

6095 Corrosion of Low-Carbon Steel in Seawater/Biodiesel Mixtures - A Study Related to the Corrosion of Fuel Tanks in Ships ........................................................................................................... 5171
Shenxi Li, Lloyd Hihara, Jian Kealoha

6104 Pump Stations and Terminal Facilities—Material Compatibility with Ethanol ........................................................................................................... 5185
Dave Norfleet, Greg Quickel, John Beavers, Hans Deeb

6153 Impact and Interaction of Water, Chloride, and Acetic Acid on the Corrosion Behavior of Aluminum in Ethanol Blended Gasoline Fuels ........................................................................................................... 5200
B. Mischler, Georg Andorsohn, Matthias Oechsner

TEG465X: CORROSION AND CORROSION CONTROL OF BURIED PIPING IN NUCLEAR POWER PLANTS

5511 US Nuclear Regulatory Commission Activities Regarding Buried and Underground Piping at Nuclear Power ........................................................................................................... 5214
David Alley

5622 Design of a C. P. System Upgrade at Comanche Peak Nuclear Power Plant ........................................................................................................... 5227
Earl Kirkpatrick, Jacob Smith

5830 Application of Non-Metallic Repair Technologies in Nuclear Plant Buried Piping Systems ........................................................................................................... 5236
John Rengepis, Raymond Pace, Jenifer Marchess, Jim Gabriel
TEG 474X: NANOTECHNOLOGY IN CORROSION

5554 New Coatings for Corrosion Protection Using Nanoparticles or Nanocapsules ..............................................................5272
Wolfram Fuerbeth

5673 Durable Hydrophobic Coatings for Metal Corrosion Protection .......................................................................................5283
Bryan Koene, Adam Goff, Tammy Metroke, Alaina McGregor

5735 Nano-Layered, Metallic Coatings for Corrosion and Erosion Resistance .................................................................5291
Michael Joosten, Jeff Vander Laan, Samuel Lomasney, Christina Lomasney, Leslie Collinson, Jacob St. Clair

5797 Non-Chrome Corrosion Resistant Primers with Carbon Nanotubes for Improved Performance .............................5306
Robert Jeffers, James Garrett, Adam Goff, Charles Sprinkle

6093 Electrochemical Characterization in CO2 Saturated Environment of Zn-Rich Epoxy Nanocoatings on API X52 Pipeline Grade Steel Substrate Under Flow Conditions .................................................................5313
Violeta Valencia-Goujon, Homero Castaneda, Enrique Maya Visuet, Todd Hawkins
