2015 IEEE 29th International Conference on Advanced Information Networking and Applications Workshops

(WAINA 2015)

Gwangiu, South Korea
24-27 March 2015
AINA 2015 Steering Committee Co-Chairs.............................................................................................................xviii
Message from AINA 2015 General Co-Chairs........................................................................................................xx
AINA 2015 Program Committee Co-Chairs........................................................................................................xxi
AINA 2015 Workshops Co-Chairs ...........................................................................................................................xxiii
Message from the BICom 2015 Workshop Co-Chairs............................................................................................xxiv
BICom 2015 Organizing Committee and Reviewers.............................................................................................xxv
Message from the COLLABES 2015 Workshop
Organizers................................................................................................................................................................xxvii
COLLABES 2015 Organizing Committee
and Reviewers.........................................................................................................................................................xxviii
Message from the DC2 2015 Workshop Co-Chairs...............................................................................................xxix
DC2 2015 Organizing Committee and Reviewers................................................................................................xxx
Message from the EEEWSN 2015 Symposium Chairs...........................................................................................xxxi
EEEWSN 2015 Organizing Committee and Reviewers...........................................................................................xxxii
Message from the FINA 2015 Symposium Co-Chairs............................................................................................xxxiv
FINA 2015 Organizing Committee and Reviewers..............................................................................................xxxv
Message from the HWISE 2015 Workshop Co-Chairs............................................................................................xxxvii
HWISE 2015 Organizing Committee and Reviewers.............................................................................................xxxviii
Message from the ICAES 2015 Workshop Co-Chairs.............................................................................................xl
ICAES 2015 Organizing Committee and Reviewers..............................................................................................xli
Message from the INTRICATE-SEC 2015 Workshop
Chairs.....................................................................................................................................................................xlii
INTRICATE-SEC 2015 Organizing Committee
and Reviewers.......................................................................................................................................................xliii
Message from the ITIS 2015 Workshop Co-Chairs............................................................................................xlv
ITIS 2015 Organizing Committee and Reviewers.................................................................................................xliv
The Eighth International Workshop on Bio and Intelligent Computing (BICom-2015)

Session 1: Wearable and Mobile Computing

Template Matching Compression Algorithm for Wearable ECG Measurement System
Based on Multi Wireless Transmission Platform .................................................................1

Tae-Young Kim, Yun-Hong Noh, and Do-Un Jeong

Implementation of the Variable ECG Data Packet Transmission System with Activity
State ...........................................................................................................................................6

Byeong-Gu Ahn, Yun-Hong Noh, and Do-Un Jeong

A Wearable ECG Monitoring System Using Adaptive EMD Filter Based on Activity
Status ........................................................................................................................................11

Byeong-Hoon Kim, Yun-Hong Noh, and Do-Un Jeong

Design and Analysis of an Enhanced Secure Mechanism of LLRP in RFID Systems ..................17

Baojiang Cui, Ziyue Wang, Jun Yang, and Xiaofeng Chen

Privacy-Preserving Traffic Monitoring in Vehicular Ad Hoc Networks ........................................22

Chen Yang, Bo Qin, Xiuwen Zhou, Yang Sun, Shuangyu He, and Qianhong Wu
**Session 2: Healthcare and Smart Environments**

Hybrid Cloud Service Based Healthcare Solutions ..............................................................................................................25
*Young Sil Lee, Ndibanje Bruce, Thiranant Non, Esko Alasaarela, and Hoonjae Lee*

Integrated and Personalized Diabetes Coach for Children ...........................................................................................................31
*Andy Harris, Arjan Durresi, Mihran Tuceryan, and Tamara S. Hannon*

A Survey of 'User Comfort' in Home Energy Management Systems in Smart Grid .........................................................................36
*A. Mahmood, A. Ahmad, H.T. Javed, Z. Mehmood, Z.A. Khan, U. Qasim, and N. Javaid*

Development of Virtual Palpation System for Dental Education ..................................................................................................
*Tatsushi Tokuyasu, Takaaki Nakayama, Kazuhiko Toshimitsu, Kazutoshi Okamura, and Kazunori Yoshiura*

Implementation and Evaluation of a Small Size Omnidirectional Wheelchair ..................................................................................49
*Keita Matsuo, Yi Liu, Donald Elmazi, Leonard Barolli, and Kazunori Uchida*

**Session 3: Intelligent Computing**

Integrating Wireless Cellular and Ad-Hoc Networks Using Fuzzy Logic Considering Node Mobility and Security .........................................................................................................................................54
*Takaaki Inaba, Donald Elmazi, Yi Liu, Shinji Sakamoto, Leonard Barolli, and Kazunori Uchida*

Enabling Large-Scale Biomolecular Conformation Search with Replica Exchange Statistical Temperature Molecular Dynamics (RESTMD) over HPC and Cloud Computing Resources ........................................................................................................................................61
*Nayong Kim, Richard Platania, Wei Huang, Chris Knight, Tom Keyes, Seung-Jong Park, and Joohyun Kim*

Application of Neural Networks for Intrusion Detection in Tor Networks ..........................................................................................67
*Taro Ishitaki, Donald Elmazi, Yi Liu, Tetsuya Oda, Leonard Barolli, and Kazunori Uchida*

An Improved Algorithm for Secure Outsourcing of Modular Exponentiations ..................................................................................73
*Jun Ye, Xiaofeng Chen, and Jianfeng Ma*

**Session 1: Business Intelligence and Secure Systems**

Improving Business by Migrating Applications to the Cloud Using Cloudstep ..................................................................................77
*Paulo R.M. Andrade, Renanh G. Araújo, Jose Cronemberger Filho, Tiago R. Pereira, Adriano B. Albuquerque, and Nabor C. Mendonca*

Implementation of a Collaborative Document Processing in the Cloud ............................................................................................83
*Jiafei Wen, Xiaolong Wu, and Shui Lam*

General Multi-key Searchable Encryption ........................................................................................................................................89
*Jun Yang, Chuan Fu, Nan Shen, Zheli Liu, Chunfu Jia, and Jin Li*
Session 2: Intelligent Data Processing

Implementation of a Software-Defined Storage Service with Heterogeneous Storage Technologies
Chao-Tung Yang, Wei-Hsiang Lien, Yu-Chuan Shen, and Fang-Yi Leu

Optimize Auction Bandwidth in Content Centric Network with Provider Portal for Application
Wisarut Suesuwan and Woraphon Lilakiatsakun

Experimental Study of Borehole Logs for Oil and Gas Exploration
S. Imran and N. Khan

The Second International Workshop on Device Centric Cloud (DC2-2015)

Session 1: Device Centric Cloud I

Contextual User Interest Modeling Approaches for Personalized Services on Multiple Devices
Zheng Hao, Deng Xiaotao, Yu Lei, Zhang Jie, Inchul Hwang, and Sunhee Youm

DNS Name Autoconfiguration for IoT Home Devices
Sejun Lee, Jaehoon (Paul) Jeong, and Jungsoo Park

Will ToR Achieve Its Goals in the “Future Internet”? An Empirical Study of Using ToR with Cloud Computing
Antonio Carnielli and Mahdi Aiash

SBUS: Smart e-Bus Battery Substitution Scheme in Vehicular Networks
Jihyeok Seo, Jaehoon (Paul) Jeong, Hyoungshick Kim, and Jung-Soo Park

Session 2: Device Centric Cloud II

Privacy Preserving Nearest Neighbor Search Based on Topologies in Cellular Networks
Mahdi Daghezchi Firoozjaei, Jaegwan Yu, and Hyoungshick Kim

A Framework for Security Services Based on Software-Defined Networking
Jaehoon (Paul) Jeong, Jihyeok Seo, Geumhwan Cho, Hyoungshick Kim, and Jung-Soo Park

Introducing a Hybrid Infrastructure and Information-Centric Approach for Secure Cloud Computing
Mahdi Aiash, Robert Colson, and Mohammad Muneer Kallash

A Survey on Interfaces to Network Security Functions in Network Virtualization
Hyunsu Jang, Jaehoon (Paul) Jeong, Hyoungshick Kim, and Jung-Soo Park

Session 1: Applications of WSNs and Network Protocols

Packet Arrival Analysis in Wireless Sensor Networks ................................................................. 164

Krishna Doddapaneni, Purav Shah, Enver Ever, Ali Tasiran, Fredrick A. Omondi,
Leonardo Mostarda, and Orhan Gemikonakli

RUHEED-Rotated Unequal Clustering Algorithm for Wireless Sensor Networks .......................... 170

Nueraili Aierken, Roberto Gagliardi, Leonardo Mostarda, and Zaib Ullah

A Framework for Energy Based Performability Models for Wireless Sensor Networks .................... 175

Fredrick A. Omondi, Purav Shah, Orhan Gemikonakli, and Enver Ever

Time Reversal-Based Transmissions with Distributed Power Allocation for Two-Tier Networks .............. 181

Vu Tran-Ha, Quang-Doanh Vu, and Een-Kee Hong

A Constrained ECA Language Supporting Formal Verification of WSNs ........................................ 187

Flavio Corradini, Rosario Culmone, Leonardo Mostarda, Luca Tesei,
and Franco Raimondi

An ANT+ Protocol Based Health Care System ............................................................................ 193

Nadeem Qaisar Mehmood and Rosario Culmone

The Eleventh International Symposium on Frontiers of Information Systems and Network Applications (FINA-2015)

Session 1: Distributed Applications and Software Engineering

An Active Learning System Using Smartphone for Improving Students Learning Concentration .......................................................... 199

Noriyasu Yamamoto

Technology Research of Tibetan Hot Topics Extraction ............................................................... 204

Guixian Xu and Lirong Qiu

Word Sense Disambiguation Based on Feature Ranking Graph .................................................... 209

Yeqing Li and Xiaoyu Qiu

Named Entity Relation Extraction Based on Multiple Features ...................................................... 213

Yeqing Li
Session 2: Energy-Aware Information Systems

Power Consumption and Computation Models of a Server with a Multi-core CPU and Experiments ................................................................. Hiroki Kataoka, Dilawaer Duolikun, Tomoya Enokido, and Makoto Takizawa
Implementation of Cloud Infrastructure Monitor Platform with Power Saving Method ........................................... Chao-Tung Yang, Chih-Liang Chuang, Jung-Chung Liu, Chien-Chih Chen, and William C. Chu
Demand Response: From Classification to Optimization Techniques in Smart Grid ................................................ Ashfaq Ahmad, Nadeem Javaid, Umar Qasim, and Zahoor Ali Khan
Implementation of Application Softwares for Reducing Power Consumption in Web Services ................................................................. Ken Nishimura and Kaoru Sugita
Secure Two-Party Computation in Social Cloud Based on Reputation ................................................................. Yilei Wang, Chao Guo, Tao Li, and Qiuliang Xu

Session 3: Scalable Computing Systems and Protocols

e-MinZu: A Software Service Architecture Based on Saas for Massive Data Source ................................................................. Weng Yu
The Research of Security of P2P Network File Sharing System ........................................................................ Shaojing Li, Wanli Su, and Haoling Li
New Methods for Big Data Analysis in Images ........................................................................................................ Petra Perner
Why Internet Protocols Need Incentives ..................................................................................................................... David Murray
A New Scheduling Algorithm for Real-Time Communication in LTE Networks ........................................................... Dardouri Samia and Bouallegue Ridha
Broadcast Protocols in Wireless Networks ........................................................................................................ Kazuaki Kouno, Dilawaer Duolikun, Tomoya Enokido, and Makoto Takizawa

Session 4: Security and Privacy

Performance Comparison Between RSA and Elliptic Curve Cryptography-Based QR Code Authentication ......................................................................................................................... Non Thiranant, Young Sil Lee, and Hoonjae Lee
Analysis of Researcher Co-authorship Network ........................................................................................................ Jiiana Meng and Jun Guo
Anonymous Identity-Based Encryption with Bounded Leakage Resilience .......................................................................................................................... Pengtao Liu, Chengyu Hu, Shanqing Guo, and Yilei Wang
### The Eleventh International Workshop on Heterogeneous Wireless Networks (HWISE-2015)

#### Session 1: Wireless Sensor Networks

Extended Lifetime Based Elliptical Sink-Mobility in Depth Based Routing Protocol for UWSNs .................................................................

- Tao Li, Hao Yang, Yilei Wang, and Qiuliang Xu

**Selection of Actor Nodes in Wireless Sensor and Actor Networks: A Fuzzy Based Method Considering Actor Mobility** ........................................

- Donald Elmazi, Elis Kulla, Tetsuya Oda, Evjola Spaho, Leonard Barolli, and Kazunori Uchida

Circular Joint Sink Mobility Scheme for Wireless Sensor Networks ........................................

**DYN-NbC-JSM: Dynamic Joint Sink Mobility with Need-Based Clustering in WSNs** ........................................

- Ayesha Hussain Khan, Nadeem Javaid, Muhammad Imran, Zahoor Ali Khan, Umar Qasim, and Noman Haider

Using Cellular Sensor Networks for Environment Protection ........................................

- Mimoza Durresi, Arjan Durresi, Leonard Barolli, and Kazunori Uchida

#### Session 2: Wireless Network Algorithms and Performance Analysis

An Analysis of Machine-Type-Communication on Human-Type-Communication over Wireless Communication Networks ........................................

- Parampreet Sidhu, Isaac Woungang, Glaucio H.S. Carvalho, Alagan Anpalagan, and Sanjay K. Dhurandher

**Video Quality Transmission Evaluation over Next Generation Wireless Networks** ........................................

- Hekma Chaari, Kais Mnif, and Lotfi Kamoun

Smartphone-Based Secure Access Control in Wireless Network Analysis ........................................

- Hyunho Kim, Young-Jin Kang, Ndibanje Bruce, Suhyun Park, and Hoonjae Lee

**Performance Evaluation of a VANET Simulation System Using NS-3 and SUMO** ........................................

- Vladi Kolici, Tetsuya Oda, Evjola Spaho, Leonard Barolli, Makoto Ikeda, and Kazunori Uchida

Using Combined Cellular Ad Hoc Communications for Smart Environments ........................................

- Mimoza Durresi, Arjan Durresi, Leonard Barolli, and Kazunori Uchida
Session 3: Wireless and Mobile Communication Systems

A Discrete Ray Tracing Method Based on Dijkstra Algorithm for 3D Propagation Environments
Kazunori Uchida

Numerical Analysis of 1X4 Branch Waveguide in Two Dimensional Photonic Crystal Structure
Hiroshi Maeda, Naoki Sakuma, Noriyuki Toyomasu, Ryoma Nishi, and Daichi Ogata

Investigation of Message Suppression Method Considering TCP in Vehicular-DTN
Seiichiro Ishikawa, Taiki Honda, Makoto Ikeda, and Leonard Barolli

Analytical Downlink Effective SINR Evaluation in LTE Networks
Marwane Ben Hcine and Ridha Bouallegue

Investigating Performance of Concurrent Virtual Wi-Fi Interfaces
Kien Nguyen, Kentaro Ishizu, Homare Murakami, and Fumihide Kojima

Session 1: Intelligent Context-Aware Systems and Applications

On Context and the Open World Assumption
Philip Moore and Hai Van Pham

Handling Big Data Using NoSQL
Jagdev Bhogal and Imran Choksi

An Ontological Analysis of the Role of Culture within Green IT
Jagdev Bhogal and William Campbell

Models for an Intelligent Context-Aware Blended m-Learning System
David Newell, Philip Davies, Ron Austin, Philip Moore, and Mak Sharma

Session 1: Theories and Intricacies of Information Security Problems

Secure and Efficient Mobile Personal Health Data Sharing in Resource Constrained Environments
Richard Ssembatya and Anne V.D.M. Kayem

Structural Controllability Analysis Via Embedding Power Dominating Set Approximation in ErdHős-Rényi Graphs
Bader Alwasel and Stephen D. Wolthusen
A Usable and Secure Crime Reporting System for Technology Resource Constrained Context ........................................................................................................................................................................424
   Aderonke Busayo Sakpere, Anne V.D.M. Kayem, and Thabo Ndlovu

Physical Layer Secrecy Performance of Multi-hop Decode-and-Forward Relay Networks with Multiple Eavesdroppers .................................................................430
   Duc-Dung Tran, Nguyen-Son Vo, Tan-Loc Vo, and Dac-Binh Ha

A New Efficient Request-Based Comparable Encryption Scheme .........................................................................................................................................436
   Peng Chen, Jun Ye, and Xiaofeng Chen

Server Aided Ciphertext-Policy Attribute-Based Encryption ................................................................................................................................................440
   Hao Wang, Bo Yang, and Yilei Wang

The Eighth International Workshop on Information Technology for Innovative Services (ITIS-2015)

Session 1: Innovative Services and Systems

Shape and Motion Features Approach for Activity Tracking and Recognition from Kinect Video Camera ........................................................................................................................................445
   Ahmad Jalal, Shaharyar Kamal, and Daijin Kim

A Hybrid Type DTN Routing Method Using Delivery Predictability and Maximum Number of Replication .................................................................................................451
   Tomoaki Miyakawa and Akio Koyama

The Design of a Framework for Smart Appliances ........................................................................................................................................................................................457
   Minoru Uehara

Extension of Web-Based Software Development Environment ........................................................................................................................................463
   Hideaki Yanagisawa

Parallel Architectures with Small World Network Model ........................................................................................................................................467
   Hideki Mori, Minoru Uehara, and Katsuyoshi Matsumoto

The Seventh International Workshop on Disaster and Emergency Information Network Systems (IWDENS-2015)

Session 1: Disaster Information System

Feasibility Validation of WiFi Based Multihop Access Network for Disaster Recovery ......................................................................................................................473
   Quang Tran Minh and Shigeki Yamada

GICS: Group-Based Internet Connection Spreading Architecture for Disaster Recovery ........................................................................................................................................478
   Xuan Thien Phan, Quang Tran Minh, Kien Nguyen, Nam Thoai, and Shigeki Yamada

Proposal of the Fire Fighting Support System for the Volunteer Fire Company ........................................................................................................................................484
   Kazuhiro Takahagi, Tomoyuki Ishida, Satoshi Noda, Akira Sakuraba, Noriki Uchida, and Yoshitaka Shibata
Application of DTN to the Vehicle Sensor Platform CoMoSE ................................................................. 490
Go Hirakawa, Noriki Uchida, Yoshikazu Arai, and Yoshitaka Shibata

Implementation of High Presence Video Communication System for Multiple Users
Using Tiled Display Environment .................................................................................................................. 494
Satoshi Noda, Yasuo Ebara, Tomoyuki Ishida, Koji Hashimoto, and Yoshitaka Shibata

Session 2: Disaster Information Network
M2M Emergency Help Alert Mobile Cloud Architecture ................................................................. 500
Mohammad Aazam, Pham Phuoc Hung, and Eui-Nam Huh

Evaluation of Vehicle-to-Vehicle Communication with Delay Tolerant Networks
for Safety Surveillance System ......................................................................................................................... 506
Noriki Uchida, Go Hirakawa, Yoshikazu Arai, Kazuo Takahata, and Yoshitaka Shibata

Mobile Cloud Computing for Distributed Disaster Information System in Challenged
Communication Environment ....................................................................................................................... 512
Yosuke Kikuchi and Yoshitaka Shibata

A Road Condition Monitoring System Using Various Sensor Data in Challenged
Communication Network Environment ...................................................................................................... 518
Kenta Ito, Go Hirakawa, Yoshikazu Arai, and Yoshitaka Shibata

Development of Autonomous Anti-Disaster Base Station by Combination of Satellite
and Wireless Networks ................................................................................................................................. 524
Hiroaki Yuze, Shinichi Nabeta, and Yuji Ito

The Eighth International Symposium on Mining and Web (MAW-2015)

Session 1: Information Retrieval and Tweet Sentiment Analysis
Increasing Trust in Elections via a Simple Receipt Algorithm ............................................................... 529
Suzanne Mello-Stark and Edmund A. Lamagna

Overviewing the Knowledge of a Query Keyword by Clustering Viewpoints of Web
Search Information Needs ............................................................................................................................ 535
Ichiro Moriya, Yusuke Inoue, Takakazu Imada, Takehito Utsuro, Yasuhide Kawada,
and Noriko Kando

Approximating Document Frequency for Self-Index Based Top-K Document Retrieval ................................................. 541
Tokinori Suzuki and Atsushi Fujii

The Use of POS Sequence for Analyzing Sentence Pattern in Twitter Sentiment
Analysis .......................................................................................................................................................... 547
Fajri Koto and Mirna Adriani

Discover Overlapping Topical Regions by Geo-Semantic Clustering of Tweets ........................................ 552
Yuta Taniguchi, Daiki Monzen, Lutfiana Sari Ariestien, and Daisuke Ikeda
Session 2: Data Mining and Data Structures

Exploring Technical Phrase Frames from Research Paper Titles ................................................................. 558
  Yuzana Win and Tomonari Masada

Mining User Interests through Internet Review Forum for Building Recommendation System ................................................................. 564
  Omar Abdillah and Mirna Adriani

SkillsRec: A Novel Semantic Analysis Driven Learner Skills Mining and Filtering Approach for Personal Learning Environments Based on Teacher Guidance ................................................................. 570
  Zaffar Ahmed Shaikh, Denis Gillet, and Shakeel Ahmed Khoja

Academic Performance Predictors ...................................................................................................................... 577
  Cheng Lei and Kin Fun Li

Applicability of Probabilistic Data Structures for Filtering Tasks in Data Loss Prevention Systems ................................................................. 582
  Lu Shi, Sergey Butakov, Dale Lindskog, Ron Ruhl, and Evgeny Storozhenko

The Third International Workshop on Network Management and Monitoring (NetMM-2015)

Session 1: Network Monitoring and Management

An Approach for Testing Data Intensive Systems: Application to a Banking CRM System ................................................................. 587
  Xiaoping Che, Pengyu Liu, Zhipeng Zhang, and Fangzhi Wen

DOCKEMU—A Network Emulation Tool .............................................................................................................. 593
  Marco Antonio To, Marcos Cano, and Preng Biba

A Reliable and Scalable Classification-Based Hybrid IPS ...................................................................................... 599
  Oscar Rodas, Gerardo Morales, and Jose Alvarez

Process Mining for Trust Monitoring ................................................................................................................. 605
  Jorge López, Stephane Maag, Cecilia Saint-Pierre, Javier Bustos, and Ana Cavalli

The Fifth International Workshop on Protocols and Applications with Multi-Homing Support (PAMS-2015)

Session 1: Multipath Transport Protocols

Maintaining and Monitoring the Infrastructure of the NORNET CORE Testbed for Multi-homed Systems ................................................................. 611
  Thomas Dreibholz, Jarle Bjorgeengen, and Jonas Werme

Multi-path TCP in Real-World Setups—An Evaluation in the NORNET CORE Testbed ................................................................. 617
  Thomas Dreibholz, Xing Zhou, and Fu Fa
The Third International Workshop on Pervasive Internet of Things and Smart Cities (PITSaC-2015)

**Session 1: Internet of Things**

Smart Eco-Urban Cities Ubiquitous Public Park ..............................................................................................................638
   *Nizar Boussarsar, Youssef Kamoun, Mouna Ketatni, Anis Benhajji, and Seifallah Jemal*

A Publish-Subscribe Approach to IoT Integration: The Smart Office Use Case .................................................................644
   *Alex C. Olivieri, Gianluca Rizzo, and Francois Morard*

Group-Based Uplink Scheduling for Machine-Type Communications in LTE-Advanced Networks ..........................................................................................................................................................652
   *Tsung-Hui Chuang, Meng-Hsun Tsai, and Chun-Yi Chuang*

Proof-of-Concept: Infrared Transmission Using Smart Phone Cameras ..................................................................................658
   *Rêne Romann*

Automatic Generation of Social Relationships between Internet of Things in Smart Home Using SDN-Based Home Cloud ........................................................................................................................................662
   *Younggi Kim and Younghee Lee*

Internet of Things for Cultural Heritage of Smart Cities and Smart Regions ........................................................................668
   *Antonio J. Jara, Yunchuan Sun, Houbing Song, Rongfang Bie, Dominique Genooud, and Yann Bocchi*

**Session 2: Security in the Internet of Things**

Managing Context Information for Adaptive Security in IoT Environments ........................................................................676
   *Josè L. Hernández Ramos, Jorge Bernal Bernabe, and Antonio F. Skarmeta*

   *Abhijan Bhattacharyya, Tulika Bose, Soma Bandyopadhyay, Arijit Ukil, and Arpan Pal*

SDN Based Architecture for IoT and Improvement of the Security .......................................................................................688
   *Olivier Flauzac, Carlos González, Abdelhak Hachani, and Florent Nolot*

EAP for IoT: More Efficient Transport of Authentication Data—TEPANOM Case Study ........................................................................................................................................................................................................694
   *Marcin Piotr Pawłowski, Antonio J. Jara, and Maciej J. Ogorzalek*
The Ninth International Workshop on Telecommunication Networking, Applications and Systems (TeNAS-2015)

Session 1: Distributed and Parallel Applications
A Case Study and Design of Transformation Architecture in BSS .......................................................... 700
   Teh-Sheng Huang, Chun-Yen Wang, Tsung-Ching Lin, and Jeu-Yih Jeng
An Anomaly Detection by Whitening HOSF ............................................................................................ 706
   Chun-Hui Wang, Yue Pan, and Shwu-Huey Yen
Video Streaming: H.264 and the Internet of Things .............................................................................. 711
   R. Pereira and E. Pereira

Session 2: Networking and Communications Technologies and Performance
Multipath Transmission Model and Its Route Selection Policy Considering Packet Re-sequencing Buffers Availability ........................................................................................................... 715
   Yuta Yoshinaga, Masayoshi Shimamura, and Katsuyoshi Iida
Road-Oriented Geographic Routing Protocol for Urban Vehicular Ad Hoc Networks ............................. 721
   Ryosuke Akamatsu, Keiji Obara, and Hiroshi Shigeno
Equalization for the FDM System Using Mach-Zehnder Filters ................................................................ 727
   Yuki Fukushima, Isamu Wakabayashi, and Takayuki Kawahara
A Visible Light Communication Link Protection Mechanism for Smart Factory ..................................... 733
   Shih-Hao Chang

Author Index ............................................................................................................................................. 738
