8th Australasian Congress on Applied Mechanics 2014

(ACAM 8)

Melbourne, Australia
25-26 November 2014

Part A

Editors:

Raj Das
Sabu John

ISBN: 978-1-5108-0267-4
Some format issues inherent in the e-media version may also appear in this print version.
# TABLE OF CONTENTS

- Improvement in the Diagnostics of Gearbox Vibration Signals under Varying Speed Conditions ................................................................. 5
- Design and Test of a Multiple-DOF Motion Platform for Vibration Analysis of Heavy Duty Vehicle Seat Suspension .............................................. 14
- Experimental Investigation of Efficiency Losses in a Two Speed Electric Vehicle ........................................................................................................ 23
- Thoughts on the Scatter Associated with the Growth of Both Small Naturally Occurring Cracks and Long Cracks .............................................. 33
- Development of Physical Models to Understand Ballistic Impact Response of Human Craniums ........................................................................... 41
- Effect of Energy Absorbing Mechanisms on the Blunt Thoracic Trauma Caused by Ballistic Impacts ................................................................. 51
- The Effect of Non-Enzymatic Glycation on the Flexural and Fracture Properties of Bovine Cortical Bone ................................................................. 59
- A Voxel-Based Approach to Meshing Woven Fibre Composites .......................................................................................................................... 68
- Effect of Blank Holder Force on Strain Evolution of Forming of Steel/SRPP Fibre Metal Laminate ......................................................................... 77
- Buckling Behaviour of Reinforced Thermoplastic Pipes under Combined External Pressure and Bending ............................................................... 87
- One-Dimensional CUF Models for the Analysis of Laminated Structures ...... 95
- Stress Analysis of a Crack near an Elastic Layer ................................................ 103
- A Computational Investigation of Failure Modes in Fibre Metal Laminates ..... 112
- Dynamic Damage Analysis of Composites via a Component-Wise 1D Approach. 122
- Whipping Assessment of a Scale Warship Structure ........................................ 129
- The Effect of Drilling Mud Damping on Vertical Vibrations of Deep Rotary Drilling Assemblies ................................................................. 138
- Condition Monitoring of Planetary Gearboxes: Modelling Mesh Stiffness in the Presence of Planet Gear Tooth Root Cracks ................................ 147
- Using the Hilbert-Huang Transform to Identify Harmonics and Transients within Random Signals ................................................................. 157
- Methods for Assessing the Effects of Accumulated Fatigue Damage on the Fracture Resistance of Cortical Bone ............................................. 167
- A Simulation Model to Study the Potential Use of Micro-Structured Surfaces to Improve the Tribological Properties of UHMWPE ............................. 176
- Abrasive Wear Behaviour of Machinable Lithium Disilicate Glass Ceramic ..... 185
- Crashworthiness Investigation for Functionally Graded Thickness (FGT) Circular Column ..................................................................................... 191
- Effect of Carbon Nanotube Additions on the Mechanical Properties of Composites .......................................................................................... 198
- Characterising Crack Growth in Structural Adhesives .................................... 203
- Effect of Process Parameters on Non-Isothermal Stamp Forming of a Self-Reinforced Polypropylene Composite ...................................................... 211
- Modelling and Analysis of Structures Made with Viscoelastic Functionally Graded Materials .............................................................................. 219
NUMERICAL MODELLING OF SANDSTONE UNIAXIAL COMPRESSION TEST USING A MIX-MODE COHESIVE FRACTURE MODEL ................................................................. 227
STATIC SHEAR STRENGTH CALCULATION OF PLASTIC HELICAL GEARS MATING WITH STEEL WORM ........................................................................................................ 236
IS CURRENT RUGBY HEADGEAR ADEQUATE? ....................................................................................... 244
NONLINEAR MECHANICS OF OPTICAL GLASS IN ITS SUPER-COOLED LIQUID REGION .......... 252
THE INVESTIGATION OF THE WEAR BEHAVIOURS OF ARTIFICIAL JOINT AT A MACRO AND NANO SCALE .............................................................................................................. 261
TABLE OF CONTENTS

DEFORMATION OF A THREE-DIMENSIONAL RED BLOOD CELL IN A STENOSED MICRO-CAPILLARY ........................................................................................................................................ 273

APPLICATION OF SELECTIVE LASER MELTING (SLM) FOR HYBRID AEROSPACE STRUCTURES ........................................................................................................................................ 280

NON-LINEAR QUASI-ISOTROPIC MATERIAL MODELLING OF CHOPPED FLAX FIBRE REINFORCED POLYPROPYLENE COMPOSITES IN STAMP FORMING .......................................................................................................................... 289

FINITE ELEMENT ANALYSIS OF A LOWER-LIMB RUNNING-SPECIFIC PROSTHESIS ........................................................................................................................................ 297

PROPAGATION OF ELASTIC WAVES IN COMPOSITE MATERIALS WITH INCLUSIONS ........................................................................................................................................ 306

CAPABILITIES OF 1D CUF-BASED MODELS TO ANALYZE METALLIC/COMPOSITE ROTORS ........................................................................................................................................ 315

ISSUES WITH THE EXPERIMENTAL CHARACTERISATION OF AUTOMOTIVE SHOCK ABSORBERS FOR VEHICLE DYNAMIC SIMULATIONS ........................................................................................................................................ 323

CONCEPT CAE MODELING METHOD FOR NVH VEHICLE STRUCTURE ANALYSIS ................................................................................................................................. 332

SIMULATIONS OF UNDERWATER EXPLOSIONS USING FLUID-STRUCTURE-INTERACTION ANALYSIS ........................................................................................................................................ 339

EFFECT OF CURVATURE ON STRUCTURAL LOADING OF PRISMATIC BODIES SUBJECTED TO WATER SLAMMING ........................................................................................................................................ 348

DEVELOPMENT OF THE EXPERIMENTAL FACILITY FOR TESTING OF AERODYNAMIC SHAPES ........................................................................................................................................ 356

CHARACTERISATION OF LAMINAR DAMAGE IN A COMPOSITE PANEL BY DIFFRACTION TOMOGRAPHY BASED IMAGING METHOD USING LAMB WAVES ........................................................................................................................................ 364

IDENTIFICATION OF LAMBD WAVES USING AN ENERGY-BASED TWO-TRANSDUCER METHOD ........................................................................................................................................ 372

NUMERICAL STUDY OF NONLINEAR GUIDED WAVES IN LAMINATED COMPOSITE BEAMS WITH DELAMINATIONS ........................................................................................................................................ 379

USE OF THE MODE-CONVERTED SCATTERED LAMB WAVES FOR BASELINE-FREE IMAGING OF STRUCTURAL DAMAGE ........................................................................................................................................ 389

DEFORMATION OF PAVEMENT STRUCTURE DUE TO CONTACT EROSION FAILURE BELOW THE PAVEMENT LAYERS ........................................................................................................................................ 398

EARTH PRESSURE DEVELOPMENT IN INTEGRAL ABUTMENT BRIDGE SUBJECTED TO THERMAL LOADINGS ........................................................................................................................................ 408

LOSS OF SUPER-HARMONIC RESONANCES IN A TIME-DELAYED NONLINEAR OSCILLATOR ........................................................................................................................................ 416

ANALYSIS OF SOIL-PIPELINE INTERACTION USING ABAQUS/EXPLICIT ........................................................................................................................................ 429

VORTEX INDUCED VIBRATIONS OF SUBSEA PIPELINES ........................................................................................................................................ 440

ON THE INCORPORATION OF DAMPING IN MODAL PARAMETER BASED SYSTEM IDENTIFICATION ........................................................................................................................................ 449

CONDENSATION OF INDEPENDENT VARIABLES IN SOME EIGENVALUE PROBLEMS ........................................................................................................................................ 457

EXACT SOLUTIONS TO THE FREE VIBRATION OF STEPPED BEAMS UNDER AXIAL LOAD ........................................................................................................................................ 463

PREDICTING PULL-OFF STRENGTHS OF BONDED JOINTS USING COHESIVE ELEMENTS ........................................................................................................................................ 472

APPLICATION OF FEA IN LARGE STORAGE TANKS’ SHELL COURSE REPAIRS - A CASE STUDY ASSESSMENT TO DETERMINE MEMBRANE DEFORMATION AND STRUCTURAL STABILITY ........................................................................................................................................ 482

MONITORING STRUCTURAL DAMAGE IN MATERIALS USING ADAPTIVE FINITE-IMPULSE-RESPONSE ANALYSIS AND THERMAL IMAGERY ........................................................................................................................................ 489

DETERMINATION OF FM300 MATERIAL PROPERTIES USING LAMB WAVES ........................................................................................................................................ 500
STRESS ANALYSIS OF BURIED PIPES ........................................................................................................ 510
CYCLIC DIRECT SIMPLE SHEAR TEST ON SOFT CLAY AT LOW NORMAL STRESS – AS APPLICABLE TO OFFSHORE PIPELINE AXIAL WALKING PROBLEMS ...................................................... 519
CODIFIED METHODS TO ANALYSE THE FAILURES OF WATER PIPELINES: A REVIEW ............. 529
ROOT CAUSE AND FATIGUE ANALYSIS OF TRACTION WINCH FAILURES .................................. 540
EVALUATING THE USE OF STATISTICAL ESTIMATES OF VEHICLE GEOMETRIC AND INERTIAL PROPERTIES FOR USE IN NUMERICAL SIMULATIONS ....................................................... 549
CHALLENGES AND STRATEGIES IN TEACHING ENGINEERING MECHANICS .............................. 560
COMPARISON OF DYNAMIC STIFFNESS AND FINITE ELEMENT METHODS IN DYNAMICS AND AEROELASTIC RESPONSE ........................................................................................................ 565
A MAXIMUM STRESS AT A DISTANCE CRITERION FOR THE PREDICTION OF CRACK PROPAGATION IN ADHESIVELY-BONDED JOINTS ...................................................................................... 574
COMPARISON OF FAILURE CRITERION EXAMINING MATRIX DOMINANT FAILURE UNDER BIAXIAL LOADING ................................................................................................................... 579
INFLUENCE OF SPECIMEN SIZE ON FRACTURE TOUGHNESS OF SANDSTONE WHEN USING SCB SPECIMEN .............................................................................................................................. 588
SEISMIC EARTH PRESSURE DEVELOPMENT IN SHEET PILE RETAINING WALLS: A NUMERICAL STUDY ........................................................................................................................................ 596
VISCOS CRITERION AND ITS RELATION WITH THE PROJECTILE-THORAX ENERGY INTERACTIONS ................................................................................................................................................. 604
MEASUREMENT OF BIOMECHANICAL ENERGY DELIVERED THROUGH KICKING ......................... 614
MODELLING AND ANALYSIS OF VARIOUS PIEZO FIBRE GEOMETRIES ON THE PIEZOELECTRIC PROPERTIES FOR ENERGY SCAVENGING APPLICATIONS .................................................. 622
IN SITU CHARACTERIZATION OF THE FATIGUE CRACK-TIP STRESS FIELDS ................................. 630
DETECTION OF LAMINAR DAMAGE IN COMPOSITE BEAMS USING NONLINEAR ULTRASONIC MODULATION TECHNIQUES ........................................................................................................ 635
NUMERICAL STUDY ON TRAFFIC INDUCED VIBRATION EFFECTS UNDER DIFFERENT TYPES OF BEHAVIOUR OF MOVING LOADS .................................................................................................. 644
VIBRATION-BASED DAMAGE DETECTION USING MODE SHAPE-BASED RESPONSE SURFACE METHODOLOGY ......................................................................................................................... 652
DYNAMIC ANALYSIS OF MULTILAYER GFRP SANDWICH SLABS WITH INTERLAYER DELAMINATIONS ................................................................................................................................................. 660
MECHANICAL RESPONSE OF A THICK COMPOSITE HYDROFOIL ..................................................... 668
ON THE CRITICALITY OF BONLINE FLAW IN SCARF JOINTS UNDER IMPACT LOADING .... 677
FATIGUE RESISTANCE OF MECHANICALLY FASTENED, BONDED AND HYBRID JOINTS USED IN COMPOSITE STRUCTURES ........................................................................................................ 684
A REDUCED BASIS SOFTWARE PLATFORM FOR STRUCTURAL DESIGN AND INFRASTRUCTURE ASSESSMENT ............................................................................................................................ 693
MODELLING ONSET OF FAILURE IN COMPOSITE STRUCTURES USING THE ENHANCED EMBEDDED ELEMENT TECHNIQUE .................................................................................................. 701
A DEPLOYABLE STENT FOR STRUCTURAL REPAIR OF WATER PIPES ........................................... 710
NOVEL NON DESTRUCTIVE SAMPLE ANALYSIS TECHNIQUES USING NEUTRON SCATTERING .... 718
NUMERICAL ANALYSIS OF WELDING STRESSES IN WIC WELDABILITY TEST ........................... 726
A METHOD TO PREDICT STRIP CURVATURE UNDER ASYMMETRIC ROLLING CONDITIONS 734
NUMERICAL MODELLING FOR IMPROVED UNDERGROUND-MINE VENTILATION SYSTEMS 742
ANISOTROPY EFFECT IN THE NANOSCRATCHING OF SILICON ................................................ 970
THERMAL STRESS ANALYSIS OF HYDRAULIC HOSE IN MINING INDUSTRY .......................... 976
EFFECT OF WEAVE STRUCTURE ON FLAX FIBRES REINFORCED POLYPROPYLENE
COMPOSITES IN STAMP FORMING .......................................................................................... 985
STAMP FORMING ANALYSIS OF A FIBRE METAL LAMINATE SYSTEM CONSISTING OF A
GLASS FIBRE REINFORCED COMPOSITE .............................................................................. 993
EVOLUTION OF MERIDIAN STRAINS IN STAMP FORMING OF STEEL-BASED FIBRE METAL
LAMINATE .................................................................................................................................. 1000
A FINITE ELEMENT ANALYSIS OF FIBRE FRACTURE IN A POLYMER COMPOSITE DURING
VIBRATION-ASSISTED CUTTING ............................................................................................... 1008
NUMERICAL SIMULATION OF BALLISTIC IMPACT ON WOVEN CFRP LAMINATE .............. 1016
REVIEW OF ANTHROPOMORPHIC TEST DUMMIES FOR THE EVALUATION OF THORACIC
TRAUMA DUE TO BLUNT BALLISTIC IMPACTS ..................................................................... 1025
EVALUATION OF THE BLUNT THORACIC TRAUMA DUE TO BASEBALL IMPACTS – REVIEW OF
THE BLUNT CRITERION ............................................................................................................. 1035
AN ELASTIC PLASTIC FINITE ELEMENT CASE STUDY OF VOID PRESENCE UNDERNEATH THE
TANK BOTTOM PLATE ................................................................................................................ 1042
EXPERIMENTAL INVESTIGATION OF THIN METAL SHEETS UNDER TENSION-COMPRESSION
CYCLIC LOADING .......................................................................................................................... 1051
