TABLE OF CONTENTS

PLENARY SESSION – WASTEWATER AND BIOSOLIDS TREATMENT AND REUSE: WHAT DOES THE FUTURE HOLD?
Session Chairs: Domenico Santoro And Antonio Lopez

KEYNOTE 2: Role of Anaerobic Digestion in Next Generation Wastewater Treatment and Biosolids Management
Damien Batstone ............................................................................................................................... 1

KEYNOTE 3: Approaches to Rational Microbial Risk Assessment of Treated Biosolids
Charles Haas ............................................................................................................................... 17

KEYNOTE 5: Computational Modeling: Valuable Tool Or Math Exercise?
C. Poloni ........................................................................................................................................ 29

TECHNICAL SESSION A - WASTEWATER AND BIOSOLIDS TREATMENT AND REUSE: THE MATERIAL AND ENERGY "FACTORY"
Session Chairs: Wun Jern Ng And Giuseppe Mininni

KEYNOTE 6: Sludge Production and Utilization in Italy
G. Mininni, Giulia Sagnotti ............................................................................................................. 54

KEYNOTE 7: Sludge Pretreatment Methods for Enhanced Volatiles Solids Destruction and Methane Production
Ng Jern Wun ............................................................................................................................... 60

KEYNOTE 9: Valorization of Sewage Sludge Via Nitrite Nutrients Removal from Anaerobic Effluents
F. Fatone, S. Longo, E. Karsou, S. Malamis, D. Renzi, L. Lijo .......................................................... 75

Aerobic Conditions Prevail Over Scarce Aeration and Starvation Conditions for Activated Sludge Degradation
Jonathan Haber, Eberhard Morgenroth, Nicolas Derlon .................................................................. 100

Impact of Enhanced Stabilization Treatments on Sludge Quality and Methane Recovery
Camilla Braguglia, A. Gallipoli, A. Gianico, G. Mascolo, G. Mininni .................................................. 111

Comparative Study of the Mechanisms of Ultrasonic, Alkaline, and Sono-Alkaline Pretreatment of Industrial Biosludge
Santosh Pathak ............................................................................................................................... 126

Sludge Minimization: Ozonolysis and Pure Oxygen Autothermal Thermophilic Digestion
Pier Luigi Radavelli, Eleonora Pasinetti, Riccardo Calvi .................................................................. 134

Influence of One Step Temperature Increase Acclimation Method on Microbial Community Dynamics During Thermophilic Biochemical Methane Potential Test of an Industrial Wastewater
Santosh Pathak ............................................................................................................................... 147

Purple Phototrophic Bacteria for Nutrient Recovery from Domestic Wastewater Treatment
Tim Hulsen, Jurg Keller, Damien Batstone ....................................................................................... 155

Integrating the Selection of PHA Storing Biomass and Nitrogen Removal Via Nitrite for the Treatment of the Sludge Reject Water
F. Fatone, N. Frison, E. Katsou, S. Malamis ....................................................................................... 172

The Integrated Biohydrogen Reactor Clarifier System (IBRCS): Setup, Performance, and Application
Hesham El-Naggar ........................................................................................................................ 191

Sewage Sludge Valorization by Pyrolysis Using a Mechanically Fluidized Reactor
Franco Berruti, Mireco Della Volpe, Charles Greenhalf, Cedric Briens ........................................... 206

Treatment of Carbide Slurry Using Electrocoagulation
Shereen Wajeeh Hasan, Muftah El-Naas ......................................................................................... 219
TECHNICAL SESSION B - WASTEWATER AND BIOSOLIDS TREATMENT AND REUSE: THE WATER "FACTORY"
Session Chairs: Ronald Gehr And Franco Berruti

KEYNOTE 10: How Drugs in Wastewater Enforce Advanced Drinking Water Treatment ......................................................... 237
   Bram Martijn

KEYNOTE 11: New Insights Into the Ultraviolet Disinfection of Wastewater ............................................................ 260
   Ramin Farnood

KEYNOTE 12: Wastewater Disinfection with UV Or PAA: Are Those Surviving Microbes Really Benign? ............................................................... ................................................ 277
   Ronald Gehr

CFD Optimized Woven Filter Media for Wastewater Application ................................................................................. 301
   Markus Knefel

Peracetic Acid: A Good Choice For Wastewater Reuse ................................................................................................. 321
   Paola Toniolo

Agricultural Reuse of Treated Wastewater: the Case of Milano-Nosedo Municipal Wastewater Treatment Plant ............................................................... ............................................................... 332
   Francesco Pizza

Large Wastewater Agricultural Reuse with Adaptive Nutrient Removal Case Study ................................................................. 343
   Luca Pedrazzi

Sludge Ozonation and Intermittent Aeration Through the Oscar® Controller: A Combined Strategy for Opex Minimization in Wastewater Treatment ............................................................... 357
   G. Guglielmi, G. Riva, C. Bancher, F. Gelmini, M. Vian, A. Bettinardi

Phenolic Wastes Valorization Through Bioenergy and Bioactive Compounds Production ....................................................... 366
   Francesco La Cara, Isabel Marques, Alessandra Morana

Evaluating the Performance of Spouted Bed Bio-Reactor (SBBR) during Aerobic Biodegradation of 2, 4 Dichlorophenol (DCP) ............................................................... ............................................................... 380
   Taghreed Al Khalid, Muftah El-Naas

Ecotoxicological Bioassays for Treated Wastewater Monitoring and Assessment ................................................................. 394
   M.G. Lionetto, R. Caricato, A. Calisi, E. Erroi, M.E. Giordano, T. Schettino

Liquid Waste Treatment: Can Combined Biological Processes Be Really Effective? ................................................................. 415
   Luca Rondi

TECHNICAL SESSION C - WASTEWATER AND BIOSOLIDS TREATMENT AND REUSE: THE ROLE OF MODELING
Session Chairs: Charles N. Haas And M. Concetta Tomei

KEYNOTE 14: Modeling Reactions Between Activated Sludge Fractions and Ozone to Optimize Biosolids Reduction Processes ................................................................................. 428
   Dominic Frigon

KEYNOTE 15: Modeling of Anaerobic Digestion of Sludge ................................................................................................. 442
   M. Concetta Tomei

KEYNOTE 16: Simulation Based Feed Stream Estimation of Wastewater Treatment Plants Using a Surrogate Model ................................................................................. 461
   Daniele Montecchio, Camilla Braguglia, A. Gianico, A. Gallipoli, G. Mininni

Getting to Know the Investigated Phenomena and Manage Them According to Its Own Wishes*
   (*Modeling and Optimization Workshop) ................................................................................. 486
   Vito Primavera

Towards an Integrated Model of Sludge & Water Line in A Full Scale WWTP ................................................................................. 616
   T. Wambecq, L. Maes, M. Weemaes, A. Fenu

Optimal Control for Activated Sludge Alternating Flow/aeration Systems with More Than Two Basins ................................................................................. 625
   A. Fenu, T. Wambecq, K. de Gussem, M. Weemaes
Linear Time Invariant Model of Anaerobic Digestion of Waste Activated Sludge ................................................................. 634
Antonios Sendjaja

Life Cycle Assessment of a Full Scale Case Study on Agricultural Reuse of Treated Agro-industrial Wastewater ................................................................. 642
Pompilio Vergine, Carlo Russo, Giuseppe Martino Nicoletti, Alfieri Pollice

Equilibrium, Kinetic and Thermodynamic Study of Adsorption of Rhodamine B from Aqueous Solution by Activated Carbon from Peltophorum Pterocarpum Leaf ................................................................. 653
B. Jeyaraj, Y. Subbareddy, C. Jayakumar, K.S. Nagaraja, S. Valliammai

TECHNICAL SESSION D - WASTEWATER AND BIOSOLIDS TREATMENT AND REUSE: FIELD STUDIES AND FULL-SCALE APPLICATIONS
Session Chairs: Gianfranco Boari And Antonio Lopez

KEYNOTE 18: On the Sustainable Management of Sewage Sludge Disposal in Apulia ................................................................. 665
A.M. Lotito, U. Fratino, M. Blonda

KEYNOTE 20: Developments in Sludge Dewaterability Characterization ................................................................. 693
Ludovico Spinosa

Wastewater Reuse in Apulia: Between Dream and Reality ................................................................. 707
Antonio Lopez

Wastewater Reuse in Apulia: Constraints and Perspectives ................................................................. 729
Vito Colucci

Back to Future: The Success Story of Fasano's Agricultural Wastewater Reuse Plant ................................................................. 741
Oronzo Santoro

Surface Filtration Technologies for Municipal Wastewater Reuse for Irrigation - Preliminary Results of Demo-Scale Activities ................................................................. 756
Pompilio Vergine

Wastewater Treatment and Reuse in the Oil & Petrochem Industry - A Case Study ................................................................. 766
Alberto Girardi

Design of Semiconductors-based Composites for the Efficient Photodegradation of Organic Micropollutants in Water ................................................................. 783
Giuseppe Mele

Experimental Measurement and Modeling of Radiation Fields in TiO₂ Nanoparticle Photocatalysis ................................................................. 821
Andrea Turolla, Domenico Santoro, John de Bruyn, Manuela Antonelli

Deep UV-LEDs Based on Group III-Nitride for Water Disinfection Applications ................................................................. 832
Iolanda Pio, Vittorianna Tasco, Adriana Passaseo
