1st Summit on Advances in Programming Languages

SNAPL'15, May 3–6, 2015, Asilomar, California, US

Edited by
Thomas Ball
Rastislav Bodík
Shriram Krishnamurthi
Benjamin S. Lerner
Greg Morrisett
Contents

Preface vii

Regular Papers

Coupling Memory and Computation for Locality Management
Umut A. Acar, Guy Blelloch, Matthew Fluet, Stefan K. Muller, and Ram Raghunathan ............................................................... 1

Verified Compilers for a Multi-Language World
Anal Ahmed ............................................................ 15

Growing a Software Language for Hardware Design
Joshua Auerbach, David F. Bacon, Perry Cheng, Stephen J. Fink, Rodric Rabbah, and Sunil Shukla .............................................. 32

Programming with “Big Code”: Lessons, Techniques and Applications
Pavol Bielik, Veselin Raychev, and Martin Vechev .......................... 41

Bridging the Gap Between General-Purpose and Domain-Specific Compilers with Synthesis
Alvin Cheung, Shoaib Kamil, and Armando Solar-Lezama ................ 51

Yedalog: Exploring Knowledge at Scale
Brian Chin, Daniel von Dincklage, Vuk Ercegovac, Peter Hawkins, Mark S. Miller, Franz Och, Christopher Olston, and Fernando Pereira 63

The Design of Terra: Harnessing the Best Features of High-Level and Low-Level Languages
Zachary DeVito and Pat Hanrahan ................................................. 79

The Need for Language Support for Fault-Tolerant Distributed Systems
Cezara Drăgoi, Thomas A. Henzinger, and Damien Zufferey ............... 90

Toward a Dependability Case Language and Workflow for a Radiation Therapy System
Michael D. Ernst, Dan Grossman, Jon Jacky, Calvin Loncaric, Stuart Pernsteiner, Zachary Tatlock, Emina Torlak, and Xi Wang .................... 103

The Racket Manifesto
Matthias Felleisen, Robert Bruce Findler, Matthew Flatt, Shriram Krishnamurthi, Eli Barzilay, Jay McCarthy, and Sam Tobin-Hochstadt .............. 113

A Theory AB Toolbox
Marco Gaboardi and Justin Hsu ...................................................... 129

Tracking the Flow of Ideas through the Programming Languages Literature
Michael Greenberg, Kathleen Fisher, and David Walker .................. 140

InterPoll: Crowd-Sourced Internet Polls
Benjamin Liewhitz and Todd Mytkowicz ........................................... 156
Contents

The Silently Shifting Semicolon
   Daniel Marino, Todd Millstein, Madanlal Musuvathi, Satish Narayanasamy, and Abhayendra Singh ............................................................... 177

Everything You Want to Know About Pointer-Based Checking
   Santosh Nagarakatte, Milo M. K. Martin, and Steve Zdancewic .................. 190

New Directions for Network Verification
   Aurojit Panda, Katerina Argyraki, Mooly Sagiv, Michael Schapira, and Scott Shenker ............................................................... 209

A Few Lessons from the Mezzo Project
   François Pottier and Jonathan Protzenko ........................................ 221

Go Meta! A Case for Generative Programming and DSLs in Performance Critical Systems
   Tiark Rompf, Kevin J. Brown, HyoukJoong Lee, Arvind K. Sujeeeth, Manohar Jonnalagedda, Nada Amin, Georg Ofenbeck, Alen Stojanov, Yannis Klonatos, Mohammad Dashti, Christoph Koch, Markus Päschel, and Kunle Olukotun ...... 238

Hardware–Software Co-Design: Not Just a Cliché
   Adrian Sampson, James Bornholt, and Luis Ceze ................................ 262

Refined Criteria for Gradual Typing
   Jeremy G. Siek, Michael M. Vitousek, Matteo Cimini, and John Tang Boyland ... 274

None, One, Many – What's the Difference, Anyhow?
   Friedrich Steimann ........................................................................... 294

A Complement to Blame
   Philip Wadler ...................................................................................... 309

Draining the Swamp: Micro Virtual Machines as Solid Foundation for Language Development
   Kunshan Wang, Yi Lin, Stephen M. Blackburn, Michael Norrish, and Antony L. Hosking ................................................................. 321
