2015 9th International Symposium on Medical Information and Communication Technology

(ISMICT 2015)

Kamakura, Japan
24-26 March 2015
Program

2015 9th International Symposium on Medical Information and Communication Technology (ISMICT)

[Special Session I] ETSI SmartBAN

ETSIC TC SmartBAN: Overview of the Wireless Body Area Network Standard
Matti Hämäläinen (University of Oulu, Finland), Tuomas Paso (University of Oulu, Finland), Lorenzo Mucchi (University of Florence, Italy), Marc C. Girol-Genet (INT - GET, France), John Faroserutu (CSEM, Switzerland), Hirokazu Tanaka (Hiroshima City University, Japan), Woon Hau Chin (Toshiba Research Europe Limited, United Kingdom), Lina Nachabe (Instructor & AUCE Lebanon, Lebanon) ........................................................................................................... 1

An Overview of ETSI TC SmartBAN's Ultra Low Power Physical Layer
Woon Hau Chin (Toshiba Research Europe Limited, United Kingdom), Hirokazu Tanaka (Hiroshima City University, Japan), Matti Hämäläinen (University of Oulu, Finland), Tuomas Paso (University of Oulu, Finland) ............................................................... 6

An Overview of ETSI TC SmartBAN MAC Protocol
Tuomas Paso (University of Oulu, Finland), Hirokazu Tanaka (Hiroshima City University, Japan), Matti Hämäläinen (University of Oulu, Finland), Woon Hau Chin (Toshiba Research Europe Limited, United Kingdom), Ryoko Matsuo (Toshiba Corporation, Japan), Siva Subramani (Toshiba Research Europe Limited, United Kingdom), Jussi P Haapola (Centre for Wireless Communications, University of Oulu, Finland) ........................................................................................................... 10

On Spectrum Occupancy Evaluations From the Standpoint of Body Area Networks in ISM Band
Muhammad Hasnain Virk (University of Oulu, Finland), Risto Vuohtoniemi (University of Oulu, Finland), Matti Hämäläinen (University of Oulu, Finland), Jari Iinatti (University of Oulu, Finland), Juha-Pekka Mäkelä (University of Oulu, Finland) .......................................................... 15

Threshold Setting for the Evaluation of the Aggregate Interference in ISM Band in Hospital Environments
Lorenzo Mucchi (University of Florence, Italy), Alessio Carpini (University of Florence, Italy), Theo D'Anna (University of Florence, Italy), Muhammad Hasnain Virk (University of Oulu, Finland), Risto Vuohtoniemi (University of Oulu, Finland), Matti Hämäläinen (University of Oulu, Finland), Jari Iinatti (University of Oulu, Finland) ........................................................................................................... 20

Antennas and Propagation in Body Area Networks I

Accuracy of Approximated WBAN Channel by Fundamental Modes of Spherical Wave Functions
Jun-ichi Naganawa (Tokyo Institute of Technology, Japan), Jun-ichi Takada (Tokyo Institute of Technology, Japan), Takahiro Aoyagi (Tokyo Institute of Technology & Graduate School of Decision Science and Technology, Japan), Minseok Kim (Niigata University, Japan) .................................................. 25

Development of a Tri-Polarized Dynamic Channel Sounder for Wireless Body Area Network
Gaochao Chen (Tokyo Institute of Technology, Japan), Jun-ichi Naganawa (Tokyo Institute of Technology, Japan), Minseok Kim (Niigata University, Japan), Jun-ichi Takada (Tokyo Institute of Technology, Japan) .................................................................................. 30

Analysis of Signal Propagation Loss on the Human Body in Intrabody Communication
Ibuki Yokota (Kyoto Institute of Technology, Japan), Yuichi Kado (Kyoto Institute of Technology & Graduate School of Science and Technology, Japan) .................................................................................. 35

A Thin, Flexible Receiving Coil for Wireless Power Transmission Based on Magnetic Induction to an Implantable Device
Ryutaro Iwashita (Tokyo University of Science, Japan), Masami Ishiwata (Tokyo University of Science, Japan), Yoji Takaguchi (Tokyo University of Science, Japan), Takashi Koike (Tokyo University of Science, Japan), Issei Hashimoto (Tokyo University of Science, Japan), Kenji Shiba (Tokyo University of Science, Japan) .................................................................................. 40
Measurement of Human Body Communication Transmission Characteristics At 20MHz
Thang Nguyen (The University of Tokyo, Japan), Dairoku Muramatsu (The University of Tokyo, Japan), Ken Sasaki (University of Tokyo, Japan) ........................................................................................................45

[Special Session II] EMC

Temperature Dependent on Electrical Properties of Swine Liver From 0.3 MHz to 30 MHz
S. Kon (Chiba University, Japan), Koichi Ito (Chiba University, Japan), Kazuyuki Saito (Chiba University, Japan) .........................................................................................................................49

Electric Field Evaluation Around Radiation Sources Used for EMI Test with Medical Devices From Mobile Terminals
Satoshi Ishihara (NTT DOCOMO, INC., Japan), Teruo Onishi (NTT DOCOMO, Japan) ..........................................................52

Measurement and Analysis of the Electromagnetic Fields Radiated by the Medical Devices
Seungwoo Lee (Chungbuk National University, Korea), Nam Kim (Chungbuk National University, Korea) ..........................................................................................................................56

Health-Care Systems and Applications

The Human Movement Identification Using the Radio Signal Strength in WBAN
Sukhumarn Archantasituk (Tokyo Institute of Technology, Japan), Takahiro Aoyagi (Tokyo Institute of Technology & Graduate School of Decision Science and Technology, Japan) .........................................................59

Study for Acceptance on New Navigation Assistance by Visually Impaired People
Iikka Paajala (University of Oulu, Finland), Niina Keranen (University of Oulu, Finland) .................................................................64

Using KINECT to Measure Joint Movement for Standing Up and Sitting Down
Hiroyuki Adachi (Kitasato University & Saibousosiki Saiseigaku, Japan) ..........................................................................................68

Biological Information Detection Using Ultra Wideband Signals
Aya Suzuki (Meiji University, Japan), Tetsushi Ikegami (Meiji University, Japan) ..........................................................73

Pulse Duty Factor and Transmission Power Evaluation of Direct Sequence Spread Spectrum Communication System for Body Area Network
Masayuki Sakata (Meiji University, Japan), Tetsushi Ikegami (Meiji University, Japan) ..........................................................78

MAC Technologies for Body Area Networks

Error Control Scheme Using Decomposable Codes for Various QoS in Multiple WBAN Environment
Kento Takabayashi (Yokohama National University, Japan), Hirokazu Tanaka (University of Oulu Research Institute Japan - CWC-Nippon, Japan), Chika Sugimoto (Yokohama National University, Japan), Ryuji Kohno (Yokohama National University & University of Oulu, Japan) .........................83

Vignesh raja Karuppiah ramachandran (University of Twente, The Netherlands), Berend Jan van der Zwaag (Adaptive Systems, The Netherlands), Nirvana Meratnia (University of Twente, The Netherlands), Paul Havinga (University of Twente, The Netherlands) ..................................................88

Zone-Based Fuzzy Routing for WBANs
Harri Viittala (University of Oulu, Finland), Matti Hämäläinen (University of Oulu, Finland), Jari Iinatti (University of Oulu, Finland) ........................................................................................................93
Streamlining Medical Device Design Development Process From Research Laboratory to the Market
Tapani Koivukangas (Lewel Group Finland Oy, Finland), Junnu Lukkari (Lewel Group Finland Oy, Finland), Jussi P Haapola (Centre for Wireless Communications, University of Oulu, Finland), Ryuji Kohno (Yokohama National University & University of Oulu, Japan) ............................................. 98

Medical Image Protection Using Hyperchaos-based Encryption
Chong Fu (Northeastern University, P.R. China), Ye Lin (Northeastern University, P.R. China), Hui-yan Jiang (Northeastern University, P.R. China), Hong-feng Ma (TeraRecon, USA) ...................................................... 103

Introduction of an RFID Tag System to a Large Hospital and the Practical Usage of the Data Obtained
Eisuke Hanada (Graduate school of Science and Engineering, Saga University, Japan), Makoto Hayashi (Shimane University Hospital, Japan), Akihiro Ohira (Shimane University School of Medicine, Japan) .................................................................................................................. 108

The Role of ICT, Healthcare Investment and eHealth Policy in Achieving Millennium Development Goals: A Cross-Country Comparison
Yoke Irawan (Institut Teknologi Bandung, Indonesia), Allya Paramita Koesoema (Australian School of Business, UNSW, Australia) .................................................................................................................. 112

Antennas and Propagation in Body Area Networks II

Experiments of a Polarization-controlled Active Antenna to Enhance BAN On-body Link in Human Dynamic Channels
Kun Li (University of Toyama, Japan), Kazuhiro Honda (University of Toyama, Japan), Koichi Ogawa (University of Toyama, Japan) .................................................................................................................. 117

Towards High On-Body Sensor Node Performance with the 3D Antennas for IR-UWB WBANs
Tommi Tuovinen (University of Oulu, Finland), Markus Berg (University of Oulu, Finland), Matti Hämäläinen (University of Oulu, Finland), Jari Iinatti (University of Oulu, Finland) ...................................................... 121

Dynamic On-Body UWB Radio Channel Modeling
Timo Kumpuniemi (University of Oulu, Finland), Matti Hämäläinen (University of Oulu, Finland), Kamya Yekeh Yazdandoost (University of Oulu - Centre for Wireless Communications, Finland), Jari Iinatti (University of Oulu, Finland) .................................................................................................................. 126

Microwave Application in Medical Sensing
Yoshio Nikawa (Kokushikan University, Japan) .................................................................................................................. 131

BAN Applications

Elliptical Shape Estimation by Nonlinear Least-squares Method for Breast Cancer Using UWB Radar Technology
Yuta Okuyama (Yokohama National University, Japan), Pham Thanh Hiep (Yokohama National University, Japan), Kotaro Yamasue (Yokohama City University, Japan), Chika Sugimoto (Yokohama National University, Japan), Ryuji Kohno (Yokohama National University & University of Oulu, Japan) .................................................................................................................. 134

Performance Comparison Between TOA- And RSSI-Based Localization Methods for Wireless Capsule Endoscopy Systems
Takahiro Ito (Nagoya Institute of Technology, Japan), Daisuke Anzai (Nagoya Institute of Technology, Japan), Jianqing Wang (Nagoya Institute of Technology, Japan) .................................................................................................................. 139

Human Group Sensing and Networking: Scenario Development and Feasibility Study
Hiroyuki Yomo (Kansai University & Aalborg University, Japan), Daiki Nakamura (Kansai University, Japan), Shinsuke Harai (Osaka City University, Japan) .................................................................................................................. 144

New Method Measuring Effect of Medical Consultation Recommendation
Shigeaki Sakurai (Toshiba Corporation, Japan), Rumi Hayakawa (Toshiba Corporation, Japan), Hideki Iwasaki (Toshiba Solutions Corporation, Japan) .................................................................................................................. 148
Conceptual Design and Implementation of Indicator-based Smart Glasses
Aryan Firouzian (University of Oulu, Finland), Muhammad zeeshan Asghar (University of Oulu, Finland), Jari Tervonen (University of Oulu, Finland), Petri Pulli (University of Oulu, Finland), Goshiro Yamamoto (Nara Institute of Science and Technology, Japan) ................................................................. 153

PHY Technologies for Body Area Networks I

Stochastic Spectral Occupancy Modeling: A Body Area Network Perspective in ISM Band
Muhammad Hasnain Virk (University of Oulu, Finland), Risto Vuohtoniemi (University of Oulu, Finland), Matti Hämäläinen (University of Oulu, Finland), Jari Iinatti (University of Oulu, Finland), Juha-Pekka Mäkelä (University of Oulu, Finland) ................................................................. 157

System Parameter Adjustment of FM-DCSK UWB for Different Medical Environments
Lin Wang (Xiamen University, P.R. China), Tingting Huang (Xiamen University, P.R. China), Weikai Xu (Xiamen University, P.R. China) ........................................................................................................... 162

An Energy-Efficient Switching Technique for 2-bit /Cycle SAR ADCs
Dune-Ting Fan (National Chung Cheng University, Taiwan), Ren-Hao Yeh (National Chung Cheng University, Taiwan), Yuan-Sun Chu (National Chung Cheng University, Taiwan), Tsung-Heng Tsai (National Chung Cheng University, Taiwan) ........................................................................................................... 166

Architecture and Communication Protocols for Cognitive Radio Network Enabled Hospital
Ishtiak Al Mamoon (MJIIT, UTM, Malaysia), Akm Muzahidul Islam (University Teknologi Malaysia, Malaysia), Dr. Sabariah Baharun (Universiti Teknologi Malaysia, Malaysia), Komaki Shozo (Universiti Teknologi Malaysia (UTM), Malaysia), Ashir Ahmed (Kyushu University & Grameen Communications, Japan) ........................................................................................................... 170

Performance Evaluation on Transmit Polarization Diversity for Implant UWB-IR Communications
Yuto Shimizu (Nagoya Institute of Technology, Japan), Daisuke Anzai (Nagoya Institute of Technology, Japan), Jianqing Wang (Nagoya Institute of Technology, Japan) ........................................................................................................... 175

Sensing and Signal Processing Techniques for Medical Healthcare Applications

Regularizing Multi-bands Common Spatial Patterns (RMCSP): A Data Processing Method for Brain-Computer Interface
Thang Quoc Le (King Mongkut's Institute of Technology Ladkrabang (KMITL), Thailand), Chivalai Temiyasathit (King Mongkut's Institute of Technology Ladkrabang (KMITL), Thailand) ........................................................................................................... 180

Reversible Blind Data Hiding for Verifying Integrity and Authenticating MRI and X-Ray Images
Angelos Fylakis (University of Oulu, Finland), Anja Keskinarkaus (University of Oulu, Finland), Vesa Kiviniemi (University of Oulu, Finland), Tapio Seppänen (University of Oulu, Finland) ........................................................................................................... 185

Estimating Surrounding Symptom Level of Dementia Patient by Sleep Stage
Shingo Tomura (The University of Electro-Communications, Japan), Tomohiro Harada (The University of Electro-Communications, Japan), Hiroyuki Sato (The University of Electro-Communications, Japan), Keiki Takadama (The University of Electro-Communications, Japan), Makoto Aoki (Aoki Hospital, Japan) ........................................................................................................... 190

Automatic Localization and Segmentation of Optic Disc in Fundus Image Using Morphology and Level Set
Ting Yu (Lanzhou University, P.R. China), Yide Ma (Lanzhou University, P.R. China), Wen Li (Lanzhou University, P.R. China) ........................................................................................................... 195

Breathing Motion Artifact Cancellation in PPG-Based Heart Rate Sensing
Takunori Shimazaki (Osaka City University, Japan), Shinsuke Hara (Osaka City University, Japan) ........................................................................................................... 200
