2015 22nd International Conference on Telecommunications

(ICT 2015)

Sydney, Australia
27-29 April 2015
22nd International Conference on Telecommunications

Cognitive Radio

Enhancing Throughput of Cognitive Radio System with Multiple Power Levels for Primary Users
Shabnam Khomejani (Kings College London, United Kingdom), Arumugam Nallanathan (King’s College London, United Kingdom), Huan X Nguyen (Middlesex University, United Kingdom), Hamid Aghvami (King’s College London, United Kingdom) ......................................................... 1

Secure Cognitive Radio System with Cooperative Secondary Networks
Wenli Liu (Beijing University of Posts and Telecommunications, P.R. China), Li Guo (Beijing University of Posts and Telecommunications, P.R. China), Tianyu Kang (Beijing University of Posts and Telecommunications, P.R. China), Jianwei Zhang (Beijing University of Posts and Telecommunications, P.R. China), Jiaru Lin (Beijing University of Posts and Telecommunications, P.R. China) .................................................................................................................. 6

Beamforming Design for Weighted Rate Balance in Cognitive Network
Jun Zhang (Beijing University of Posts and Telecommunications & Key Lab of Universal Wireless Communications, P.R. China), Li Guo (Beijing University of Posts and Telecommunications, P.R. China), Tianyu Kang (Beijing University of Posts and Telecommunications, P.R. China), Jianwei Zhang (Beijing University of Posts and Telecommunications, P.R. China) .................................................................................................................. 11

Channel-Grouping Based Rendezvous Algorithm for Cognitive Radio Adhoc Networks
Rui Wu (Beijing University of Posts & Telecommunications, P.R. China), Guo Wenbin (Beijing University of Posts and Telecommunications, P.R. China), Feifei Wang (Beijing Institute of Information Technology, P.R. China) .................................................................................................................. 16

Secrecy Transmission Capacity of Primary Network with Help of Cognitive Interference
Hongyu Ma (Beijing University of Posts and Telecommunications, P.R. China), Kai Niu (Beijing University of Posts and Telecommunications, P.R. China), Weiling Wu (Beijing University of Posts and Telecommunications, P.R. China), Shengyu Li (Beijing University of Posts and Telecommunications, P.R. China), Guangqian Chu (Beijing University of Posts and Telecommunications, P.R. China) .................................................................................................................. 21

Network Coding and Relaying

Lattice Network Coding in Multiple-Antenna Two-Way Relay Channels
Mengyu Huang (University of New South Wales, Australia), Jinhong Yuan (University of New South Wales, Australia) .................................................................................................................. 26

An Opportunistic Protocol for Two-Way Relaying Systems with Direct Link
Ou Bai (Beijing University of Posts and Telecommunications, P.R. China), Gaoli Bi (Beijing University of Posts and Telecommunications, P.R. China) .................................................................................................................. 31

Fairest Constant Sum-rate Transmission for Cooperative Data Exchange: An M-convex Minimization Approach
Ni Ding (The Australian National University, Australia), Rodney Andrew Kennedy (The Australian National University, Australia), Parastoo Sadeghi (The Australian National University, Australia) ............... 36

Multi-group Multi-way Relaying with Multi-stage Non-Regenerative Relay Stations
Shama N. Islam (The Australian National University, Australia), Salman Durrani (The Australian National University, Australia) .................................................................................................................. 43

A new TDMA-based Cooperative MAC Scheme
Xinyu Liu (Hefei University of Technology, P.R. China), Cheng Chen (Hefei University of Technology, P.R. China), An Huang (Hefei University of Technology, P.R. China), Qingfeng Zhou (Hefei University of Technology, P.R. China) .................................................................................................................. 48

Networking and Protocols

Energy Efficient Contention Window Adaptation Algorithm for IEEE 802.11 WLAN
Wan Norsyafizan W. Muhamad (University of Newcastle, Australia), Jamil Y Khan (The University of Newcastle, Australia), Jason Brown (University of Newcastle, Australia) .................................................................................................................. 54
Scheduling and Resource Allocation

A Novel Multi-path Traffic Control Mechanism in Named Data Networking
Chengcheng Li (Beijing University of Posts and Telecommunications, P.R. China), Tao Huang (Beijing University of Posts and Telecommunications, P.R. China), Renchao Xie (Beijing University of Posts and Telecommunications, P.R. China), Hengyang Zhang (Beijing University of Posts and Telecommunications, P.R. China), Jiang Liu (Beijing University of Posts and Telecommunications, P.R. China), Yunjie Liu (Beijing University of Posts and Telecommunications, P.R. China) ........................................................................... 60

A Capacity Enhancing Modification to RTS/CTS
Robert Hunjet (DSTO, Australia) ........................................................................................................... 67

Adaptive Contention Window Tuning for IEEE 802.11
Xin Zhou (Institute of Software Chinese Academy of Sciences & University of Chinese Academy of Sciences, P.R. China) ........................................................................................................... 74

Performance Evaluation of PUMA Routing Protocol for Manhattan Mobility Model on Vehicular Ad-hoc Network
Doan Perdana (University of Indonesia, Indonesia), Muhammad Nanda (University of Indonesia, Indonesia), Revient Ode (University of Indonesia, Indonesia), Riri Fitri Sari (University of Indonesia, Indonesia) ........................................................................... 80

Routing

REAR: A Radio Environment Adaptive Routing Protocol for CR Mobile Ad hoc Networks
Yan Sun (Queen Mary University of London, United Kingdom), Yuhui Yao (Queen Mary University of London, United Kingdom), Da Han (Queen Mary University of London, P.R. China), Chris Phillips (Queen Mary University of London, United Kingdom) ........................................................................... 112

A Bypassing Void Routing Combining of Geographic and Virtual Coordinate Information for WSN
Dejing Zhang (Shandong University, P.R. China), Enqing Dong (Shandong University, Weihai, P.R. China) ........................................................................................................................................... 118

Adaptive Router Bypass using Feedback Adjusted OTN
Fahad Ghonaim (University of Victoria, Canada), Thomas E Darcie (University of Victoria, Canada), Sudhakar Ganti (University of Victoria, Canada) ........................................................................... 123

A Stable Opportunistic Routing Scheme for Multi-hop Ad Hoc Networks
Cao Shiwei (Beijing University of Posts and Telecommunications, P.R. China), Wu Muqing (Beijing University of Posts and Telecommunications, P.R. China), Chu Jinjin (Beijing University of Posts and Telecommunications, P.R. China) ........................................................................... 128
A Multi-hop Broadcast Routing Algorithm Based on Real-time Traffic Estimation for VANETs
Fan Zhang (Beijing University of Posts and Telecommunications, P.R. China), Tao Luo (Beijing University of Posts and Telecommunications, P.R. China), Jianfeng Li (Beijing University of Posts and Telecommunications, P.R. China) ........................................... 134

Information Theory and Coding

Performance Analysis of A NOWT Scheme for High Spectral Efficiency Communications
Ying Wang (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China), Yongming Wang (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China), Weihua Zhou (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China), Daoben Li (Beijing University of posts and telecommunications, P.R. China) .......................................................... 140
On the Capacity of the Gaussian Mixture Channel Under Average and Peak Power Constraints
Linyun Huang (Monash University, Australia), Yi Hong (Monash University, Australia), Emanuele Viterbo (Monash University, Australia), ...................................................... 146
Quantization Of Binary Input DMC At Optimal Mutual Information Using Constrained Shortest Path Problem
Harish Vangala (Monash University, Australia), Emanuele Viterbo (Monash University, Australia), Yi Hong (Monash University, Australia) ........................................................................................................... 151
Syndrome Based Check Node Processing of High Order NB-LDPC Decoders
Philipp Schläfer (University of Kaiserslautern & Creonic GmbH, Germany), Norbert Wehn (University of Kaiserslautern, Germany), Matthias Alles (Creonic GmbH, Germany), Timo Lehnigk-Emden (Creonic GmbH, Germany), Emmanuel Boutillon (Université de Bretagne Sud, France) ........................................................................................................... 156
Adaptive Analog Coding for Video Broadcast in Wireless Cooperative System
Mengyao Sun (Beijing University of Posts and Telecommunications, P.R. China), Yumei Wang (Beijing University of Posts and Telecommunications, P.R. China), Xiaocheng Lin (Beijing University of Posts and Telecommunications, P.R. China), Yu Liu (Beijing University of Posts and Telecommunications, P.R. China) ............................................................. 163

Radio Resource Management in Heterogeneous Networks

Evolutionary Radio Resource Management in Distributed Femtocell Networks
Shangjing Lin (Beijing University of Posts and Telecommunications, P.R. China), Wei Ni (CSIRO, Australia), Hui Tian (Beijing university of posts and telecommunications, P.R. China), Ren Ping Liu (CSIRO, Australia) .................................................................................................................. 168
DC Programming for Power Minimization in a Multicell Network with RF-Powered Relays
Ali A Nasir (Australian National University, Australia), Duy T Ngo (University of Newcastle, Australia), Salman Durrani (The Australian National University, Australia) ......................................................................................... 174
Joint Power Control and Resource Scheduling in Wireless Heterogeneous Networks
Shahriar Etemadi Tajbakhsh (University of New South Wales (UNSW), Australia), Tapabrata Ray (University of New South Wales at ADFA, Australia), Mark C Reed (University of New South Wales, Australia), Yuan Liu (South China University of Technology, P.R. China) .................................................................................................................. 180
Joint User Association and BS On-Off Scheduling in Heterogeneous Networks
Stephen Hanly (Macquarie University, Australia), Chunshan Liu (Macquarie University, Australia), Philip Whiting (Macquarie University, Australia) .................................................................................................................. 185
Call Completion Probability in Heterogeneous Networks with Energy Harvesting Base Stations
Craig Wang (The Australian National University, Australia), Salman Durrani (The Australian National University, Australia), Jing Guo (The Australian National University, Australia), Xiangyun Zhou (The Australian National University, Australia) .................................................................................................................. 191

Security
Spatial Coupling of Root-LDPC: Parity Bits Doping
Volkan Dedeoglu (Texas A&M University at Qatar, Qatar), Fanny Jardel (Télécom ParisTech, France), Joseph Jean Boutros (Texas A&M University at Qatar, Qatar) 272

Diversity of Low-Density Lattices
Mayur Punekar (Texas A&M University at Qatar, Qatar), Joseph Jean Boutros (Texas A&M University at Qatar, Qatar) 277

MIMO and Massive MIMO

Zeroforcing Precoding based MAC design to address Hidden Terminals in MU-MIMO WLANs
Sanjeeb Shrestha (Macquarie University, Australia), Gengfa Fang (Macquarie University, Australia), Eryk Dutkiewicz (Macquarie University, Australia), Xiaojing Huang (University of Technology, Sydney, Australia) 283

Simplified Robust Design for Nonregenerative Multicasting MIMO Relay Systems
Lenin Gopal (Curtin University Malaysia, Malaysia), Yue Rong (Curtin University, Australia), Zhuquan Zang (Curtin University. Malaysia, Malaysia) 289

Two-Stage Hybrid Precoding for Massive MIMO Systems
Yuwei Ren (Beijing University of Posts and Telecommunications, P.R. China), Yingmin Wang (Datang Mobile, P.R. China), Guixian Xu (Beijing University of Posts and Telecommunications, P.R. China) 294

Performance Analysis of Large-scale MU-MIMO with AF Relaying in the Presence of Interference
Mengmeng Liu (Beijing University of Posts and Telecommunications, P.R. China), Jiahua Zhang (Beijing University of Posts and Telecommunications, P.R. China), Ping Zhang (Beijing University of Posts and Telecommunications, P.R. China) 298

A Wavelet Compression Based Channel Feedback Protocol for Spatially Correlated Massive MIMO Systems
Pengbiao Wang (Beijing University of Posts and Telecommunications, P.R. China), Junfeng Wang (The State Radio Monitoring Center Testing Center, P.R. China), Chenglin Zhao (Beijing University of Posts and Telecommunications, P.R. China), Xiaokai Liu (Beijing University of Posts and Telecommunications, P.R. China) 303

Cellular Networks and HetNet

Performance Evaluation of Flexible Duplex Implement based on Radio Frame Selection in LTE Heterogeneous Network
Huan Liu (Beijing University of Posts and Telecommunications, P.R. China), Yan Jiao (Beijing University of Posts and Telecommunications, P.R. China), Yuehong Gao (Beijing University of Posts and Telecommunications, P.R. China), Lin Sang (Beijing University of Posts and Telecommunications, P.R. China), Dacheng Yang (Beijing University of Posts and Telecommunications, P.R. China) 308

Energy-Optimal Resource Scheduling and Computation Offloading in Small Cell Networks
Wael Labidi (CEA LIST, France), Mireille Sarkiss (CEA LIST, France), Mohamed Kamoun (CEA LIST, France) 313

An Area Packet Scheduler to Mitigate Coexistence Issues in a WPAN/WLAN Based Heterogeneous Network
Dong Chen (The University of Newcastle, Australia), Jamil Y Khan (The University of Newcastle, Australia), Jason Brown (University of Newcastle, Australia) 319

Energy-Aware Joint Transmission Coordinated MultiPoint Utilizing Dynamic Sectorization
Robert Webster (University of Sydney, Australia), Kumudu S Munasinghe (University of Canberra, Australia), Abbas Jamalipour (University of Sydney, Australia) 326

Distributed Learning Game based Spectrum Sharing and Resource Selection for Femtocells
Ghassan R. Alnwaimi (King Abdulaziz University & Faculty of Engineering, Saudi Arabia), Seiamak Vahid (University of Surrey, United Kingdom), Klaus Moessner (University of Surrey, United Kingdom) 331

Compressed Sensing and Data Compression
Joint Reconstruction Algorithms for One-Bit Distributed Compressed Sensing
Yun Tian (Beijing University of Posts and Telecommunications, P.R. China), Wenbo Xu (Beijing University of Posts and Telecommunications, P.R. China), Cong Zhang (Beijing University of Posts and Telecommunications, P.R. China), Yue Wang (Research Department of Hisilicon, Huawei Technologies Co., Ltd., P.R. China), Hongwen Yang (Beijing University of Posts and Telecommunications, P.R. China) .................................................................................................................................................................................. 338

A Tree-based Regularized Orthogonal Matching Pursuit Algorithm
Zhilin Li (Beijing University of Posts and Telecommunications, P.R. China), Wenbo Xu (Beijing University of Posts and Telecommunications, P.R. China), Yue Wang (Hisilicon, P.R. China), Jiaru Lin (Beijing University of Posts and Telecommunications, P.R. China) .................................................................................................................................................................................. 343

Wideband Spectrum Sensing Based on Coprime Sampling
Shiyu Ren (Beijing University of Posts and Telecommunications, P.R. China), Zhimin Zeng (Beijing University of Posts and Telecommunications, P.R. China), Cali Guo (Beijing University of Posts and Telecommunications, P.R. China), Xuekang Sun (Beijing University of Posts and Telecommunications, P.R. China) .................................................................................................................................................................................. 348

Analog Channel Coding for Wireless Image/Video SoftCast By Data Division
Xiaocheng Lin (Beijing University of Posts and Telecommunications, P.R. China), Yu Liu (Beijing University of Posts and Telecommunications, P.R. China), Mengyao Sun (Beijing University of Posts and Telecommunications, P.R. China) .................................................................................................................................................................................. 353

OFDM and Channel Estimation

Training-Based Estimation of Spatially Correlated Channels in AF MIMO Multi-Relay Systems Using LMMSE Criterion
Jae-Mo Kang (Korea Advanced Institute of Science and Technology (KAIST), Korea), Jae-Hwan Lee (Korea Advanced Institute of Science and Technology, Korea), Hyung Myung Kim (Korea Advanced Institute of Science and Technology, Korea) .................................................................................................................................................................................. N/A

Time Domain Channel Estimation Method for Uplink OFDMA System
Tanairat Mata (Mie University, Japan), Mio Hourai (Mie University, Japan), Kazuo Mori (Mie University, Japan), Hideo Kobayashi (Mie University, Japan), Pisit Boonsrimuang (King Mongkut's Institute of Technology Ladkrabang, Thailand) .................................................................................................................................................................................. 363

Round-Trip Carrier Synchronization Exploiting the Broadcast Nature for Distributed Beamforming
Jiawei Hao (Beijing University of Posts and Telecommunications, P.R. China), Li Guo (Beijing University of Posts and Telecommunications, P.R. China), Ranjie Hu (Beijing University of Posts and Telecommunications, P.R. China), Jiaru Lin (Beijing University of Posts and Telecommunications, P.R. China) .................................................................................................................................................................................. 368

Time Domain Cyclic-Selective Mapping for PAPR Reduction Using Delayed Correlation with Matched Filter in OFDM System
Panca Pamungkasari (Keio University, Japan), Yukitoshi Sanada (Keio University, Japan) .................................................................................................................................................................................. 373

A Buffer-limited Maximum Throughput Routing Algorithm for Satellite Network
Bing Lin (Xidian University, P.R. China), Hongyan Li (Xidian University, P.R. China), Yan Long (Xidian University, P.R. China) .................................................................................................................................................................................. 378

Localization and Wireless Communications

Accurate Node Localization with Directional Pulsed Infrared Light for Indoor Ad Hoc Network Applications
Ahmet Sekercioglu (Monash University, Australia), Joseph Violi (Monash University, Australia), Leo Priestnall (Monash University, Australia), Jean Armstrong (Monash University, Australia) .................................................................................................................................................................................. 384

On Complete Targets Coverage and Connectivity in Energy Harvesting Wireless Sensor Networks
Changlin Yang (University of Wollongong, Australia), Kwan-Wu Chin (University of Wollongong, Australia) .................................................................................................................................................................................. 391

RSS-based Indoor Positioning with Biased Estimator and Local Geographical Factor
Di Zhai (University of Sydney, Australia), Zihuai Lin (University of Sydney, Australia) .................................................................................................................................................................................. 398
Results and Analysis based on a Novel LTE-R Channel Measurement at 2.6 GHz
Zhang Siyu (Beijing University of Posts and Telecommunications, P.R. China), Wu Muqing (Beijing University of Posts and Telecommunications, P.R. China), Xiangli Lin (Beijing University of Posts and Telecommunications, P.R. China) .......................................................... 403

Optimization of Quality of Experience for Video Traffic
Qahhar Qadir (University of Southern Queensland, Australia), Alexander A. Kist (University of Southern Queensland, Australia), Zhongwei Zhang (University of Southern Queensland, Australia) .......................................................... 408
