41st Annual Convention of the Society for the Study of Artificial Intelligence and the Simulation of Behaviour

(AISB 2015)

Canterbury, UK
20-22 April 2015
# TABLE OF CONTENTS

## AI AND GAMES

- **Modelling Cultural, Religious and Political Affiliation in Artificial Intelligence Decision-Making** ................................. 1  
  Mark R. Johnson

- **Discerning Human and Procedurally Crafted Content for Video Games** ................................................................. 4  
  Tommy Thompson, Rob Watling

- **Hybrid Procedural Content Generation: A Proposal** ......................................................................................................... 8  
  Michael Cook, Simon Colton

- **Revealing Social Identity Phenomena in Videogames with Archetypal Analysis** ............................................................... 12  
  Chong-U Lim, D. Fox Harrell

- **PALAIS: A 3D Simulation Environment for Artificial Intelligence in Games** ................................................................. 18  
  Patrick Schwab, Helmut Hlavacs

- **Simulating Autonomous Non-Player Characters in a Capture the Flag Scenario Using PALAIS** ................................. 22  
  Patrick Schwab, Helmut Hlavacs

- **EmohawkVille: Virtual City for Everyone** ........................................................................................................................ 23  
  David Holan, Jakub Gemrot, Martin Cerny, Cyril Brom

- **An Interactive, Generative Punch and Judy Show Using Institutions, ASP and Emotional Agents** ............................ 25  
  Matt Thompson, Julian Padget, Steve Battle

- **Search and Recall for RTS Tactical Scenarios** .................................................................................................................... 31  
  Jason Traish, James Tulip, Wayne Moore

- **Follow-up on Automatic Story Clustering for Interactive Narrative Authoring** ............................................................. 37  
  Michal Bida, Martin Cerny, Cyril Brom

- **aMUSE: Translating Text to Point and Click Games** ........................................................................................................ 42  
  Martin Cerny, Marie-Francine Moens

- **Data Collection with Screen Capture** ............................................................................................................................... 44  
  Jason Traish, James Tulip, Wayne Moore

- **Cognitive Navigation in PRESTO** ........................................................................................................................................ 48  
  Paolo Calanca, Paolo Busetta

## UPDATING THE ANTI-REPRESENTATION DEBATE: BEHAVIOR-ORIENTED PERSPECTIVES

- **Introduction** ............................................................................................................................................................................ 54  
  N/A

- **Information and Dynamics in Brain-Body-Environment Systems** .................................................................................. 55  
  Randall D. Beer

- **Perception in Action: Radicality in Cognition and How to Resist it** .................................................................................. 56  
  Gabriele Ferretti

- **Growing Minds from a Different Seed: How Focusing on the Basis of Behavior Induces a Radically Different Theory of Cognition** ..................................................................................................................... 58  
  Martin Flament Fultot

- **The Behavior-based Origin of Life and the Problem of Genetic Representation** ............................................................... 59  
  Tom Froese

- **A Dynamical Multi-scaled Approach to Sensorimotor Behavior** ....................................................................................... 60  
  Raoul Huys

- **Agents and Organisms: Why the Difference is Important for the Representation Discussion (and Cognitive Science in General)** .................................................................................................................. 61  
  Fred Keijzer

- **Adaptive Behavior Through Synchronization and Compliance** ...................................................................................... 63  
  Brian Mirelez

- **Finding Home Without Knowing Where You Are: Visually Guided Navigation Without Mapping Or Object Recognition** ............................................................................................................................ 64  
  Andrew Philippides

- **Moving Beyond On- and Offline Cognition** ........................................................................................................................ 65  
  Ludger van Dijk, Rob Withagen
# SOCIAL ASPECTS OF COMPUTING AND COGNITION

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Introduction</td>
<td>66</td>
</tr>
<tr>
<td>The Enactive Theory of Social Cognition: From Theory to Experiment</td>
<td>69</td>
</tr>
<tr>
<td>The Dual Sociality of Big Data Practices: Epistemological, Ethical</td>
<td>70</td>
</tr>
<tr>
<td>Reasoning In Mathematics and Machines: The Place of Mathematical</td>
<td>71</td>
</tr>
<tr>
<td>Propagation of the Effects of Certain Types of Military Psychological</td>
<td>81</td>

</table>
COMPUTATIONAL CREATIVITY

The Creativity of Computers at Play ................................................................. 208
David C. Moffat

An Informational Model for Cellular Automata Aesthetic Measure ............... 213
Mohammad Ali Javaherjavid, Mohammad Majid al-Rijafie, Robert Zimmer

Tightening the Constraints on Form and Content for an Existing Computer Poet ................................................................. 220
Pablo Gervas

Four PPPPerspectives on Computational Creativity ........................................ 228
Anna Jordanous

Towards a Computational Theory of Epistemic Creativity ................................ 235
Jir Wiedermann, Jan van Leeuwen

How Many Robots Does It Take? Creativity, Robots and Multi-Agent Systems ...................................................................................... 243
Stephen McGregor, Mariano Mora McGinity, Sascha Griffiths

FOURTH INTERNATIONAL SYMPOSIUM ON “NEW FRONTIERS IN HUMAN-ROBOT INTERACTION”

Introduction ....................................................................................................... 250
Maha Salem, Astrid Weiss, Paul Baxter, Kerstin Dautenhahn

General Republics’ Opinions on Robot Ethics: Comparison between Japan, the USA, Germany, and France ..................................................... 252
Tatsuya Nomura

Differences on Social Acceptance of Humanoid Robots between Japan and the UK .................................................................................. 258
Tatsuya Nomura, Dag Sverre Syrdal, Kerstin Dautenhahn

Presence of Life-Like Robot Expressions Influences Children’s Enjoyment of Human-Robot Interactions in the Field ................................................................. 264
David Cameron, Samuel Fernando, Emily Collins, Abigail Millings, Roger Moore, Amanda Sharkey, Vanessa Evers, Tony Prescott

The Paro Robot Seal As a Social Mediator for Healthy Users ............................. 270
Natalie Wood, Amanda Sharkey, Gail Mountain, Abigail Millings

Can Less be More? The Impact of Robot Social Behaviour on Human Learning ................................................................................... 276
James Kennedy, Paul Baxter, Tony Belpaeme

Robots Guiding Small Groups: The Effect of Appearance Change on the User Experience ........................................................................... 279
Michiel Joosse, Robin Knuppe, Geert Pingen, Rutger Verkevisser, Josip Vukoja, Manja Lohse, Vanessa Evers

How Can a Tour Guide Robot’s Orientation Influence Visitors’ Orientation and Formations? ................................................................. 282
Daphne E. Karremans, Geke D.S. Ludden, Elisabeth M.A.G. van Dijik, Vanessa Evers

Performing Facial Expression Synthesis on Robot Faces: A Real-time Software System ...................................................................................... 290
Maryam Moosaei, Cory J. Hayes, Laurel D. Rieck

Gender, More So Than Age, Modulates Positive Perceptions of Language-based Human-robot Interactions ................................................................. 297
Megan Straat, Priscilla Briggs, Matthias Schuez

Perception of Artificial Agents and Utterance Friendliness in Dialogue ................ 305
Sascha Griffiths, Friederike Eyssel, Anja Philipsven, Christian Pietsch, Sven Wachsmuth

Turn-yielding Cues in Robot-human Conversation .......................................... 313
Jef A. van Schendel, Raymond H. Cuijpers

Robot Learning from Verbal Interaction: A Brief Survey .................................. 320
Herberto Cuayahuitl

Embodiment, Emotion, and Chess: A System Description ................................ 324
Christian Becker-Asano, Nicolas Rieinterer, Julien Hue, Bernhard Nebel

Towards a Child-Robot Symbiotic Co-Development: A Theoretical Approach ................................................................................ 331
Vicky Charisi, Daniel Davison, Frances Wijnen, Jan van der Meij, Dennis Reidsma, Tony Prescott, Wouter van Joolingen, Vanessa Evers

Does Anyone Want to Talk to Me? – Reflections on the Use of Assistance and Companion Robots in Care Homes ......................................................... 337
Kerstin Dautenhahn, Anne Campbell, Dag Sverre Syrdal

Robots Have Needs Too: People Adapt Their Proxemic Preferences to Improve Autonomous Robot Recognition of Human Social Signals ......................................................... 341
Ross Mead, Maja J. Matarić

A New Biomimetic Approach Towards Educational Robotics: The Distributed Adaptive Control of a Synthetic Tutor Assistant ........................................................................ 349
Vasiliki Vouloutsou, Maria Blancas Muoz, Klaudia Grechuta, Stephane Lallee, Armin Duff, Jordi-Ysard Puigbo, Llobet, Paul F. M.J. Verschure
FROM MENTAL "ILLNESS" TO DISORDER AND DIVERSITY: NEW DIRECTIONS IN THE
PHILOSOPHICAL AND SCIENTIFIC UNDERSTANDING OF MENTAL DISORDER

Psychiatry and the Poverty of Subjectivity: How Phenomenology Can Contribute to the Validation of
Categories of Disorder ................................................................. 357
Anthony Vincent Fernandez

The Juice is in the Detail: An Affordance-based View of Talking Therapies .................................................. 364
Mark McKergow

Are Mental Disorders Illnesses? the Boundary Between Psychiatry and General Medicine .................................. 371
Valentina Petrolini

An Encounter Between Attachment Theory and 4e Cognition ........................................................................... 378
Dean Petters, Everett Waters

EMBODIED COGNITION, ACTING AND PERFORMANCE

Image Theatre and Digital Story-telling: Towards a Research Method Called ‘Collaborative
Embodied Participant Analysis’ (CEPA) ................................................................. 384
Michael Carklin

Stanislavsky’s Mindful Actor: The System as a Guide to Experiencing Embodiment ........................................ 385
Ysabel Clare

Better Than Life; Testing Techniques for an Online Audience to Influence and Participate in a Live
Performance .................................................................................................................. 386
Nicky Donald, Marco Gillies

The Cognitive Dynamics of Performance Generating Systems: Deborah Hay through Christopher
House ............................................................................................................................... 387
Pil Hansen

Acted Emotion: A Performance Experiment in Psychology and Actor Training ................................................ 388
David Jackson

Enacting Desire: Constructing Social Flexibility through Somatic-informed Processes .................................. 389
Thomas Kampe

Watergait: Designing Sense Perceptions for Individual Truth ............................................................................ 391
Esthir Lemi, Marientina Gotsis, Vangelis Lympouridis

Participatory Enaction of Music: Key Points Towards Radicalizing the Notion of Embodiment in
Music ..................................................................................................................................... 392
Juan Losaita

The Embodied Brain: An Argument from Neuroscience for Radical Embodied Cognition ................................. 393
Julian Kiverstein, Mark Miller

Stanislavski’s System and a Dual-Process Approach to Performer Training .................................................... 394
Grant Olson

Attempts on Margarita (Multiple Drafts): A Cognitive Dramaturgy Generated by Voice and Space ................. 395
Christina Penna

Extended Body in the Telematics Performance: The Perceptual System of Remote Dancers .............................. N/A
Ivani Santana

The Pleasure of Not Finding Things Out: Dramaturging with Boundary Objects ............................................. 396
Freya Vass-Rhee

The Embodiment of Sound in an Intermedial Performance Space .................................................................... 397
Caroline Wilkins
