Sixth Workshop on Cognitive Modeling and Computational Linguistics

(CMCL 2015)

Held at NAACL HLT 2015

Denver, Colorado, USA
4 June 2015

ISBN: 978-1-5108-0437-1
# Table of Contents

*Predictions for self-priming from incremental updating models unifying comprehension and production*
  Cassandra L. Jacobs ................................................................. 1

*Pragmatic Alignment on Social Support Type in Health Forum Conversations*
  Yafei Wang, John Yen and David Reitter .................................. 9

*Audience size and contextual effects on information density in Twitter conversations*
  Gabriel Doyle and Michael Frank .............................................. 19

*Centre Stage: How Social Network Position Shapes Linguistic Coordination*
  Bill Noble and Raquel Fernandez ............................................. 29

*Fusion of Compositional Network-based and Lexical Function Distributional Semantic Models*
  Spiros Georgiladakis, Elias Iosif and Alexandros Potamianos ........ 39

*Verb polysemy and frequency effects in thematic fit modeling*
  Clayton Greenberg, Vera Demberg and Asad Sayeed .................... 48

*An Evaluation and Comparison of Linguistic Alignment Measures*
  Yang Xu and David Reitter ..................................................... 58

*Utility-based evaluation metrics for models of language acquisition: A look at speech segmentation*
  Lawrence Phillips and Lisa Pearl .............................................. 68

*Evidence of syntactic working memory usage in MEG data*
  Marten van Schijndel, Brian Murphy and William Schuler .............. 79

*Modeling fMRI time courses with linguistic structure at various grain sizes*
  John Hale, David Lutz, Wen-Ming Luh and Jonathan Brennan ........... 89
